# Table of Contents

## Volume 1

### Fundamental Aspects of Binding Strength Development in Multilayer Coated Paper
- Giona Kilcher

### Taking a Fresh Look at Optical Crowding of TIO2: The Role of Nanocarbonate as Synergistic Optical Extender
- Cathy J. Ridgway, Patrick A. C. Gane

### Barrier Coatings: Design and Performance Considerations for Success
- Martin Cohen

### Superooleophobic Surfaces on Plasma Modified Paper
- Lester Li, Victor Breedveld, Dennis Hess

### Introduction to High Throughput Research Applied to Coatings
- John Roper, Brian Einsla, Vivek Kallihari, Saraj Deshmukh

### Recent Progress in High-Throughput Materials Development
- Carson Meredith

### Data-Driven Modeling of High-Throughput Coatings Data
- Jonathan Moore, A. Bruce Chaput, Rebecca Ortiz, Guido Smits

### Novel Silicate Hollow Macrospheres (SHM) and Super Precipitated Calcium Carbonates (Super PCC) in Paperboard Coatings
- Vijay Mathur, Ron Eklund

### TiO2 Use in Paper Coatings
- Tony Lyons

### Extension of TiO2 in Coated Paperboard Using a Performance Optimization Model
- Stephanie Rose, Gerard Lefevre

### New Zeolite Pigments for TiO2 Extension
- Dan Ma, Tony Lyons, Prakash Mallu, Doug Carter

### Dynamic Water Retention Properties of Biobased Latex Containing Coating Colors
- Jae Y. Shin, Nathan Jones, Paul D. Fleming, Margaret K. Joyce, Do Ik Lee, Ralph Dejong, Steven Bloembergen

### Statistical Mixture Design Study of the Effects of Pigment Particle Shape on the Performance of Coating in Woodfree Offset Applications
- Siva Devisetti, Prakash B. Mallu

### Short Time Water Absorption Into Multilayer Curtain Coated Linerboard
- Stig Renvall, Vinay Kumar, Martti Toivakka, Pekka Salminen

### Thin Coatings for Paper by Foam Coating
- Karita Kinnunen, Tuomo Hjelt, Eija Kettun, Ulla Forsstrom

### Development and Production Experience of the Multilayer Curtain-Coated Linerboard of Ji’An PM3
- Junming Shu, Arthas Yang, Pekka Salminen, Henri Vaittinen

### Toward Deinking of LEP Inks Printed on Different Substrates
- Zheng Wei, Veronica Husovska, Paul D. Fleming, John Cameron

### Tessellated Group: Industrial Technology Platforms
- N/A

### REACH: Recruit * Engage * Align College Hires - International Paper’s Approach to Motivating Millennials
- N/A

### Leading from the Middle - You Must Make the Difference!!
- N/A

### Packaging 2020 – Innventia Global Outlook
- Fredrik Rosen
DOW INNOVATIONS OFFER COATING SOLUTIONS TO PAPER INDUSTRY PRIMED FOR CHANGE .............................................................................................................................. 314
Brian Einsla
MOVEROLL - SIMPLY THE SMARTEST ..................................................................................................................... 319
Mikko Rantanen
FENNOBIND P3S - NOVEL NANOTECHNOLOGY FOR PAPER AND PAPERBOARD ................................................ 322
Johnson Steve
LINESPRINT: COATER BACKING ROLL CLEANING SYSTEM FOR BETTER RUNNABILITY AND FEWER QUALITY DEFECTS .............................................................................................................................. 328
Randy Southin
NEW USES FOR SOY IN PAPERMAKING APPLICATIONS - AND FUNDING SERVICES THEREOF ................................................................. 334
Linda Kim-Habermehl
USE ENERGY COST SAVINGS TO FUND IMPLEMENTATION OF NEW MACT RULES - ID AND FD FANS MEDIUM VOLTAGE VFD INSTALLATION ................................................................................... 338
Andrew Denasiewicz
AIRMASTER AERATOR “TURBO X-TREME MAGNUM” WATER CANNON AERATOR .............................................................. 344
N/A
TOSCOTEC: TT SHORT FORMER .............................................................................................................................. 352
I. Stephens
NALCO EARLY WARNING CHATTER DETECTION (EWCD) TECHNOLOGY - CREPE BLADE VIBRATION MONITORING FOR IMPROVED EFFICIENCY AND ASSET PROTECTION .............................................................................................................................. 360
Larry Bonday
THE COLT GROUP - INTELLIGENT LEAK REPAIR SOLUTIONS ................................................................................................. 367
Tim Woodring
ECO-FLO WATER SAVINGS UPGRADE FOR NASH 2BE3, 2BE4 AND CL MODEL VACUUM PUMPS .................................................................................................................................................................................. 376
Dan Dunn, E. W. Klein
ENERGY MAESTRO: EMPOWERING YOU .............................................................................................................................. 380
N/A
NEUTRA SOLVE™ STICKIES CLEANER (PAT. PENDING) .............................................................................................................................. 386
John Schwamberger
PAPER MACHINE ALIGNMENT BY AMERICAN INDUSTRIAL METROLOGY INC ................................................................................................. 392
Bill Wick
MAINTENANCE STRATEGY: DEVELOPING A FOUNDATION FOR SUCCESS .............................................................................................................................. 413
Dave Cutnaw
DEVELOPING A RELIABILITY STRATEGY .............................................................................................................................. 434
David Netkirk
SUCCESSFUL ASSET MANAGEMENT IN THE PAPER INDUSTRY – FROM AN OEM POINT-OF-VIEW .................................................................................................................................................................................. 441
Michael Von Grumbkow
NATURAL WORK TEAM (NWT) CERTIFICATION PROCESS ................................................................................................. 459
Bobby Allen
EVOLUTION OF PAPER MACHINE PERFORMANCE EVALUATIONS .............................................................................................................................. 479
Dick Reese
CLEANER WATER, GREATER BENEFITS .................................................................................................................................................................................. 519
Ross Elliot
PRACTICAL MICROBIOLOGICAL AUDIT GUIDELINES FOR PAPER MILL SYSTEMS .................................................................................................................................................................................. 534
Mark Nelson, Ken Keegan
KEYS TO SUCCESSFUL PERFORMANCE EVALUATIONS .............................................................................................................................. 542
Jeff Levensailor
KEY TO SUCCESSFUL PERFORMANCE EVALUATIONS - PANEL .................................................................................................................................................................................. 552
Gary Nyman
SUCCESSFUL DRYER PERFORMANCE EVALUATIONS .................................................................................................................................................................................. 556
Ken Hill
SURVEYING, EVALUATING AND OPTIMIZING STEAM SHOWERS – TAPPI PAPERCON 2013 .................................................................................................................................................................................. 561
Philip Wells
APPROACHES TO OPTIMIZING PRESS FELT CLEANING .............................................................................................................................. 577
Harold Laser
EASY TO APPLY DRYER PERFORMANCE INDICATORS .................................................................................................................................................................................. 587
Jeff Chalouix
