TABLE OF CONTENTS

Volume 1

CO\textsubscript{2} Emissions of the Container World Fleet.......................................................................................................................... 1
Pierre C. Samers, Martin Köpke

Facing up the Congestion and Environmental Challenges of Europe ................................................................................................................................. 12
Franco Castagnetti

Modeling the Road Degradation Process: Non-linear Mixed Effects Models for Correlation and Heteroscedasticity of Pavement Longitudinal Data ........................................................................................................................................... 21
Tristan Lorino, Philippe Lebert, Jean-Marie Marion, Hussein Kharibani

Modeling the Evolution of Pavement Surface Characteristics .............................................................................................................................. 30
Tristan Lorino, Philippe Lebert, Denis Lièvre, Sidoine De La Roque, Gabriel Laccombe, Christophe Hugh

Introducing Gaming Simulation in the Dutch Railways ................................................................................................................................. 41
Sebastiaan Meijer

Assessment of Injury Rates Associated with Road Barrier Collision ....................................................................................................................... 52
Hawzheen Karim, Rolf Magnusson, Mats Wiklund

Results of the Implementation Process Evaluation of CIVITAS II Funded Measures for Sustainable Urban Transport .................................................................................................................................................................................. 64
Reinhold Hinterberger, Reinhard Ritterger, Oliver Roeder

A Standardised Ranking Model for Evaluation of Transport Projects as Basis for a Future Funding Scheme .............................................................................................................. 75
Roman Klementschitz, Gerd Sammer

European Common Standardized Certification Methodology for Road Safety Experts ................................................................................................................. 85
Carlo Polidori, Adewole Adeiyi, Xavier Cocu, Peter Saleh, Kerstin Lemke

Concurrent Treatment of Safety Aspects in Ship Design and Construction Process ........................................................................................................ 95
Alessandro Maccauri

Comparison of the Performance of Heavy Vehicles Results of the OECD Study: ‘Moving Freight with Better Trucks’ ......................................................................................................................................................................................... 106
Micha Lesemann, Sven Fäßbender, Michael Funcke, Leif Ichert, Lutz Eckstein, Else-Marie Malneck, Jac Wismans

Heavy Traffic Data Collection and Detection of Overloaded HGV .................................................................................................................. 133
Daniel Sianczyk, Eric Klein

For Improving Safety on Roads Outside Built-up Areas with Cooperative/Self-sufficient Advanced Driver Assistance Systems ................................................................................................................................................................................. 144
Jörg Ortlepp, Jean Emmanuel Bakaba

Performance Based Evaluation on the Use of Different Waste Materials in Asphalt ........................................................................................................... 154
Viktor Haritonovs, Martins Zaumans, Gints Bencis, Juris Smirnovs

Development of Calculation Tool for Assessing the Energy Demand of Warm Mix Asphalt ........................................................................................................... 163
Martins Zaumans, Jan Jansen, Viktor Haritonovs, Juris Smirnovs

A Comparative Study – Rearend Collision Avoidance ................................................................................................................................. 173
Jacques Héard, Micha Lesemann, Andreas Apurcio, Henrik Eriksson, Jan Jacobs

Reducing Freight Transport CO\textsubscript{2} Emissions by Increasing the Load Factor ........................................................................................................ 184
Christophe Rizet, Cecilia Cruz, Mariame Mbaké

Application of a Bivariate Deterioration Model for a Pavement Management Optimization ................................................................................................. 196
Marie Zoch, Thomas Yeung, Bruno Castanier, Tristan Lorino

Improving the Links Between Research and Road Safety Policy: the Case of France and England’s Speed Management ......................................................................................................................................................................................... 205
Jérôme Hanouël, Marine Moguen-Toursel

Comparison of Trade Facilitation at Four International Ports in Thailand .................................................................................................................. 215
Jittichai Budjanakonkanob, Wiracha Sukrivoravoot

Attitudes of Drivers towards Speed Enforcement Measures on Bangkok Expressways ........................................................................................................ 222
Jittichai Budjanakonkanob, Papanan Praram, Sakda Panwai

An ID-Card Based Security System for Railway Applications ............................................................................................................................. 234
Valter Lovati, Guido Palmieri, Stefano Gervasini, Antonio Mario Colombo

Eco Innovative Refitting Technologies and Processes for Shipbuilding Industry: Project Overview ....................................................................................... 246
Francisco Del Castillo De Comas

Assessing the Productivity and the Environmental Impacts of Earthwork Machines: A Case Study for GPS-Instrumented Excavator ................................................................................................................................. 256
Adrien Capony, Tristan Lorino, Bogdan Muresan, Yvan Baudru, Michel Dauvergne, Michel Dunand, Didier Colin, Agnès Jullien

Stakeholder Expectation and Satisfaction in Road Maintenance ............................................................................................................................. 266
M. Hietbrink, A. Hartmann, G. P. M. Dewulf

Use of Treated Soils for Sustainable Rail Infrastructures ................................................................................................................................. 276
Pietro Massi, Olivier, Lenoir Thomas

Energy- and Environmentally Efficient Road Management: The Case of the Spanish Motorway Network ......................................................................................... 287
Andres Monzon, Natalia Sobrino, Sara Hernandez
Best Practice in European Traffic Incident Management ................................................................. 297
John Steenbruggen, Michel Kusters, Gerrit Broekhuizen

CO₂ Emission Reduction by Exploitation of Rolling Resistance Modelling of Pavements .................. 311
Bjarne Schmidt, Jeppe C. Dyre

Modelling of Rutting Development in Pavement Structures ............................................................... 321
Sigurður Erlingsson

Life-Cycle Cost Analysis System for Pavement Management .............................................................. 331
João Santos, Adelina Ferreira

PubTrans4All-Public Transportation Accessibility for All ................................................................. 341
Barbara Berkenmeyer, Bernhard Rüger, Goran Simic, Dennis Behnken

New Lightweight Structures for Advanced Automotive Vehicles–Safe and Modular .......................... 350
Gundolf Kopp, Elmar Bech, Roland Schill, Alexander Kobilke, Philipp Straßburger, Michael Kriecher

An Application for the Information of Children According Their School Transportation .................. 363
Kostas Kalogiorgiou, Elefthia Chalika, Evangelos Bekiaris, Frederik Diedrichs

Nordic Citizens’ Views on Traffic Safety .............................................................................................. 373
Susanne Gustafsson, Nils Peter Gregersen

Detection and Tracking of Moving Objects for Automotive Driver Assistance System ..................... 384
Élodie Vanpopperinghe, Martine Wahl, Jean-Charles Noyer

Quality of Sediment in Detention Basins–Mapping of the Danish National Road Network .................. 393
Marianne Grauer, Michael Larsen, Mikkel Mollerup

Territory as Unavoidable Constraints for Automated Speed Camera Programs ............................. 403
Laurent Carnix

European- and Global Urban Guided Transit: Green–and Socio–Economic Fit ............................ 415
Dave Van Der Meulen, Fenix Müller

Analysis of the Discomfort Feeling of Standing Bus Passengers on the TEOR T1 Rouen Bus Lane .... 425
Georges Beurier

Value Capture for Transportation Finance ......................................................................................... 435
Zhirong Zhao, Michael Iacono, Adeel Lari, David Levinson

GOALDS—Goal Based Ship Stability & Safety Standards .................................................................. 449
Apostolos Papamikolaou, Byung Suk Lee, Christian Mains, Odd Olafsen, Dacroas Vassalos, George Zaroumpitis

A Web Tool for Planning Environmental Friendly Freight Combined Transport Operations .............. 464
Vasilios Zarpalas, Kostis Mamasis, Ioannis Minis

Road Tunnel Safety: HGV Driver Training in France ........................................................................ 473
Marc Tesson, Bertrand Perrin, Véronique Aurand

The Effect of Restricted Budgets for Road Maintenance .................................................................. 484
Johann Litza, Alfred Weninger-Fycudil

Reshaping City Traffic Towards Sustainability: Why Transport Policy Should Favor the Bicycle Instead of Car Traffic ......................................................................................................................... 495
Michael Menchik

Recognizing Safety-Critical Events from Naturalistic Driving Data .................................................. 505
Marco Dozza, Nieves Puñedá Gonzalez

Actors’ Positions and Inclinations Towards the Electromobility System in France ............................ 516
Shadi Saleghian, Mariane Thiebert, Fabien Laurent, Patricia Sagous

Capacity and LOS for Urban Arterial Road in Indian Mixed Traffic Condition ................................. 527
Chetan R Patel, G. J. Joshi

Performance-Based Transportation Management: The Case of U.S. State DOTs ............................ 535
Douglas Hales, Deborah Rosen, Henry Schwarzbach, Anthony Wheeler, Christos Xenophontos

Noise Emission of Structured Road Markings ..................................................................................... 544
Annette Gail, Wolfram Bartolomaeus

Development of a Fully Electric Light Duty Vehicle – The DELIVER Project ..................................... 553
Micha Lesemann, Thomas Welfers, Lutz Eckstein

Noise Classification for Tendering Quiet Asphalt Wearing Courses ............................................... 570
Jørgen Krøgh, Hans Bendtsen, Gregers Hildebrand

Abating Annoyance Caused by Infrastructure Works ........................................................................ 580
Hinko Van Geelen

SAFECYCLE: E-safety Applications for Safe Cycling in Europe ...................................................... 589
Ronald Jorna, Henk Jan Zoor

Modeling Freight Mode Choice in Greece .......................................................................................... 597
T. P. Moschou, G. A. Giannopoulos

The Role of Intelligent Logistics Centres in a Multimodal and Cost-effective Transport System ........ 612
Jenni Eckhardt, Jarkko Rantala

Use of ITS Technologies for Multimodal Transport Operations – River Information Services (RIS) Transport Logistics Services ...................................................................................................................... 622
Gerhard Schilk, Lukas Seemann

Evaluation of Rider’s Support Systems in Power Two Wheelers (PTWs) ............................................ 632
John Steenbruggen, Dimitris Margaritis, Pavlos Epanastatou, Stella Nikolaou, Evangelos Bekiaris

Dynamic Statistical Model Selection: Application to Traffic Accident Analysis in Spain ................. 642
Bahar Dadashova, Blanca Arenas Ramirez, José M. Mira McWilliams, Francisco Aparicio Izquierdo

A Methodology to Define the Level of Safety of Public Transport Bus Stops, Based on the Concept of Risk ........................................................................................................................................................................ 653
Marco Amadori, Tommaso Bonino
