9th International Conference on Acid Rock Drainage

(ICARD 2012)

Ottawa, Canada
20-26 May 2012

Volume 1 of 2

Editors:

W. A. Price
C. Hogan
G. Tremblay

# TABLE OF CONTENTS

## CLIMATE CHANGE

## DRAINAGE COLLECTION AND TREATMENT – GENERAL

<table>
<thead>
<tr>
<th>Title</th>
<th>Author(s)</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>In-Pulp Treatment of Dissolved Arsenic from a Gold Mine</td>
<td>Bernard Aubé, Lucienne Ancil</td>
<td>37</td>
</tr>
<tr>
<td>Tracer Testing of Settling Ponds at Xstrata Copper Canada, Kidd Mine Site</td>
<td>Bernard Aubé, Stephanie Thibault, Janice Zinck</td>
<td>49</td>
</tr>
<tr>
<td>Sulphide Precipitation and Ion Exchange Technologies to Treat Acid Mine Drainage</td>
<td>Max Nodwell, David Kratochvil</td>
<td>60</td>
</tr>
<tr>
<td>Development of Low Cost ARD Neutralisation Strategies for the Savage River Rehabilitation Project</td>
<td>Daniel J. Ray, Gary Hickman, Sophie Le Roux, Alison Hughes, Jim Stefanoff</td>
<td>67</td>
</tr>
<tr>
<td>Alkaline Treatment of ARD – Carbonate and Hydroxide Alkalinites in Sequence</td>
<td>Lotta Sartz, Erik Larsson, Mattias Bäckström</td>
<td>78</td>
</tr>
<tr>
<td>The Effects of Aluminum, Iron, Manganese and Hydrogen Peroxide on Thallium Removal</td>
<td>Katherine Vatterrodt, Morgan Davies, Linda Figueroa, Thomas Wildeman, Charles Bucknam</td>
<td>96</td>
</tr>
<tr>
<td>Parys in Springtime: Hazard Management and Steps Towards Remediation of the UK’s Most Polluted Acidic Mine Discharge</td>
<td>Paul L. Younger, Hugh A. B. Potter</td>
<td>104</td>
</tr>
</tbody>
</table>

## DRAINAGE COLLECTION AND TREATMENT – BIOREACTORS

<table>
<thead>
<tr>
<th>Title</th>
<th>Author(s)</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acid Drainage: Microbes Present and Potential for Source Treatments</td>
<td>D. Jack Adams</td>
<td>116</td>
</tr>
<tr>
<td>The Genetic Diversity of Microbes in a Biochemical Reactor Treating Metal-Rich Landfill Leachate: What This Tells Us About Treatment Mechanisms</td>
<td>Susan A. Baldwin, Maryam Resadbehbashi, Marcus Taupp, Al Mattes, Steven J. Hallam</td>
<td>128</td>
</tr>
<tr>
<td>Passive Treatment of Coal-mine Drainage by a Sulfate-reducing Bioreactor: A Case Study from the Illinois Coal Basin, USA</td>
<td>Paul T. Behum, Liliana Lefficariu, Kelly S. Bender, Larry Lewis, Yosief T. Segid, Andrew S. Burns, Charles W. Pugh</td>
<td>140</td>
</tr>
<tr>
<td>Merging Prevention and Treatment of Acid Mine Drainage through the Use of an Organic Cover: The East-Sullivan Mine Site, Québec, Canada</td>
<td>Diane Germain, Normand Tassé, Johanne Cyr, Jean Dionne</td>
<td>166</td>
</tr>
<tr>
<td>An Innovative, Long Term Dry Cover Treatment System to Manage Tailings Management Area Percolate</td>
<td>James Higgins, Al Mattes, Sheldon Smith</td>
<td>187</td>
</tr>
</tbody>
</table>
Enhancing the Understanding for the Influence of Vegetation on Cover System Performance in a Canadian Mining Context ................................................................. 406  
Sebastian Lamoureux, Justin Straker, Lee Barbour, Mike O’Kane

Investigation of Alkaline Cover Performance for Abatement of ARD from Waste Rock Dumps at Savage River Mine ........................................................................................................... 418  
J. Li, N. Kawashima, K. Kaplan, R. Schumann, R. St. C. Smart, A. Hughes, B. Hutchison, S. Kent

Normetal Mine Tailings Storage Facility HDPE Cover: Design Considerations and Performance Monitoring ................................................................. 430  
R. Maurice

Field Performance Monitoring of a Cover System with Geosynthetic Layers, Case Study – Franklin Waste Rock Pile, Sydney NS ........................................................................ 441  
G. P. Meiers, M. O’Kane, D. Mayich

Development of a Technical Guidance Document for Cover System Design in Cold Regions ................................................................................................. 455  
Mike Nahir, Mike O’Kane, Mike Ayres

Dry Covers on Historical Sulphidic Mine Waste – Long Term Statistical Performance Assessment of Surface Water Quality ............................................................................... 466  
A. Pourjabbar, S. Karlsson, B. Allard

Soil-Plant-Atmosphere Numerical Modelling of a Cover System in North-western Australia Utilizing the Moisture Store-and-Release Concept – Simulation of Seven Years of Field Performance Monitoring .................................................................................................................. 479  
R. Sharmiak, M. O’Kane

Evaluation of the Function of the Dry Cover System at WRD5 at the Boliden Aitik Copper Mine, Northern Sweden ......................................................................................... 494  
Åsa Sjöblom, Dave Christensen, Seth Mueller, Tami Taylor

Assessment of Plants with Allelopathy Potential as a Bio-barrier Against Undesirable Bio-intrusion on Covers with Capillary Barrier Effects ........................................................................ 507  
Evgeniya Smirnova, Yves Bergeron, Francine Tremblay, Nelson Thiffault, Bruno Bussière, Gilles Joanisse

MITIGATION

Eliminating Acid Rock Drainage (ARD) at Mine Doyon – Sustained Operations Allow for New Possibilities .................................................................................................................. 519  
Annie Blier, Isabelle Demers, Mario Gagnon, Gaylaine Bota

Long Term Risk of Releasing Potentially Acid Producing Waste Due to Tailings Dam Failure ............................................................................................................. 528  
David M. Chambers

Acid Mine Drainage Source Control Program Design Investigation Upper Tennmile Creek Mining Area Superfund Site, Rimini, Montana ................................................................................................................. 540  
Angela Frandsen, Curt Coover

Early and Prolonged Limitation of AMD Production via Waste Landform Construction ................................................................................................................. 550  
Andrew Garvie, Stuart Miller, Pieter Fransen, Trevor Matuschka, Jeff Ruddock, Roy Haymont

Engineered Pumpable pHoam®: A New Innovative Method for Mitigating ARD .......................................................................................................................... 562  
James Gusk, Brian Masloff, John Fodor

Samatosum – A Tale of Two Early Acid Drainage Prevention Approaches ................................................................................................................................. 572  
Andrew Holmes, Brent Hamblin, James Hogarth, Craig Ford, Tracy Anderson

Phosphate Mining Waste Reduces Microbial Oxidation of Sulphidic Minerals: A Proposed Mechanism ....................................................................................................... 585  
M. Kalin, W. N. Wheeler, Carlos Paulo, M. Sudbury, Roger Smart

Long-term Biogeochemistry of Mine Tailings Amended with Organic Carbon for Water-Quality Management ............................................................................................................. 594  
Matthew B. J. Lindsay, David W. Blowes, Peter D. Condon, Carol J. Ptacek

Innovative Closure Concepts for Xstrata’s Operations at Onaping, Ontario, Canada ..................................................................................................................... 607  
Jeff Martin, Joe Fyfe

Integrated Acid Rock Drainage Management at the Phu Khamb Copper Gold Operation in Lao PDR ..................................................................................... 615  
Stuart Miller, Tim Rowles, Jeff Millgate, John Millencr, Luke Morris, Jon Gaunt

Geochemical and Hydrogeological Considerations from Backfilling of Discard and Ash .............................................................................................................. 628  
Koovila Naicker, Terry Harck, Nico Bezuidenhout

Sustainability Assessment of the Results of the Wismut Environmental Remediation Programme (1990-2011) ............................................................................................. 633  
Michael Paul, Stefan Mann, Thomas Metschies

Sullivan Mine Fatalities Technical Investigation and Subsequent Risk Management Monitoring ............................................................................................................. 646  
Mark Phillip, Daryl Hockley, Bruce Donald, Walter Kuit, Mike O’Kane
The Meadowbank Gold Mine – Reclamation Planning in an Arctic Environment .......................................................... 661
Stéphane Robert, Valérie Bertrand

Ongoing Evaluation of Tailing Geochemistry: An Integral Component of Mine Closure Planning ................................. 673
Alan M. Robertson, N. Kawashima, Roger St. C. Smart, Russell Schumann

Applicability and Suitability of Different Alkaline By-Products in Historic Mine Sites Remediation ............................ 682
Lotta Saire, Mattias Bäckström, Stefan Sädbom, Stefan Karlsson, Bert Allard

Impact of an Organic Carbon Source on the Leaching of Vanadium from LD-Slag ............................................................ 694

Pre-and Post-Remediation Characterization of Acid-Generating Fluvial Tailings Material ........................................... 701
Kathleen S. Smith, Katherine Walton-Day, Karin Olson Hoat, Rhonda L. Driscoll, Kevin Pietersen

Post-Mining Agriculture for Biofuels on Mine Tailings: An Overview of Results from the Green Mines Green Energy (GMGE) Initiative ................................................................. 711

Rehabilitation Commitments for Pits and Waste Rock Stockpiles at Frances Creek Iron Ore Mine ...................................... 723
David J. Williams, Peter A. Scott, Jamie Gerrard

MONITORING

Regulatory Water Quality Sampling and Aquatic Effects Monitoring at the Diavik Diamond Mine, Northwest Territories, Canada .............................................................. 735
Lianna Smith, Stephen Bourn, Gord Macdonald

A Reproductive and Trophic Transfer Study Associated With Selenium Concentrations in the Mud River Watershed ................................................................. 747
Mandee Wilson, Mindy Yeager Armstead, Paul Ziemkiewicz

NATIONAL PROGRAMS

South African Mining-Related Water Research and Management – A National Priority ..................................................... 758
Joanna E. Burgess, Lani Van Vuuren

Developments and Challenges in the Management of Mining Wastes and Waters in Europe ........................................ 769
A. P. Jarvis, L. Alakangas, B. Azzie, L. Lindahl, J. Loredo, F. Madai, I. F. Walder, Ch. Wolkersdorfer

The U.S. Interior Department’s Abandoned Mine Lands Program: A 15 Year Update ............................................................. 781
R. David Williams, Peter Bierbach

PIT LAKES

Predictive Pit Lake Modelling for Aitik Mine, Northern Sweden ..................................................................................... 789
C. J. D. Fraser, A. J. Martin, D. Dunbar, J. Bourne, Å. M. Sjöblom, G. D. Joslin, P. Linström

The INAP Pit Lakes Database: A Novel Tool for the Evaluation of Predicted Pit Lake Water Quality ................................ 800
Emmon P. Johnson, Devin N. Castendyk

Distribution of Rare Earth Elements and Other Metals in a Stratified Acidic Pit Lake in Black Shales 45 Years after Mine Closure ......................................................................................... 812
S. Karlsson, V. Sjöberg, A. Pourjabbar, A. Grandin, B. Allard

Characterization of an Existing Pit Lake as an in situ Model for Closure Planning for the Detour Gold Mine .................................................................................................................. 822
Patrick Mueller, Alan Martin, Jim Robertson, David Flather, Colin Fraser, Mark Bednarz

Physical Processes and Meromixis in Pit Lakes ...................................................................................................................... 834
Roger Pieters, Greg Lawrence

Hydrogeologic and Geochemical Prediction of Rosemont Pit Lake Using Three Different Modeling Programs .................. 846
Gaius (Guy) Roemer, Michael Gabora, Amy L. Hudson, Mark Williamson, David Levy, Grady O’Brien, David Krizek

An Automated Method for Assessment of Pit Lake Water Quality Risk Using the Pit Quality Risk Assessment Protocol (PQRAP) .................................................................................. 858
Pierre D. S. Rousseau, Rosalind Green, Brent Usher, Christopher Strachotta

Evaluation of Water Quality Changes for Mine Waste Disposal in Pit Lake, Former EL Mine Site Manitoba, Canada .................................................................................................................. 871
Nikolay Sidenko, Karen Mathers, Caius Priscu, Steve Sibbick
PREDICTION OF DRAINAGE CHEMISTRY – ANALYSES AND TESTS

Waste Rock Kinetic Testing Program: Assessment of the Scale Up Factor for Sulphate and Metal Release Rates
Judy Andrina, G. Ward Wilson, Stuart D. Miller ............................................................. 882

Application of an Advanced Mineralogical Technique: Sulphide Mineral Availability and Humidity
Cell Interpretations based on MLA Analysis
Lisa Barazzuoli, Kelly Sexsmith, Charles Bucknam, Daniel Lopez ........................................ 894

Evaluation of Neutral pH Chemical Leaching Properties of Waste Rock at the Meliadine Gold Project
Y. Bertrand, J. Cole, J. Noël .................................................................................. 905

Modification and Automation of the Humidity Cell Test Protocol to Favor Tailings Reactivity
Hassan Bouzahzah, Mostafa Benzaazoua, Bruno Bussière ................................................. 917

Oxic and Anoxic Tailings Slurry Aging Studies for Environmental Assessment of a Proposed Mining
and Processing Development with Emphasis on Cyanide Species
Charles Bucknam, Daniel Snyder, Thomas Wildeman, Kelly Sexsmith, Lisa Barazzuoli .......... 930

Volume 2

Automated Mineralogy of Mine Tailings using Mineral Liberation Analysis ............................. 942
M. Buckwalter-Davis, H. Haggard, H. Janieson

A Testing Approach to Assess the Weathering Behaviour of Lithotypes Characterised by a Trace-
Sulphide/Carbonate-Deficient Mineralogy: Application to Altered Andesites/Diorites at the
Boddington Gold Mine, Western Australia ..................................................................... 950
G. Campbell, R. Haymont, N. Amoah

Predicting Metal Leaching from Selected Uranium Mine Mineralized Waste Rock Piles Samples
Mackenzie J. Denyes, Richard R. Goulet ........................................................................ 961

Assessment of the Performance of Environmental Desulphurization on Arsenic Release from Tailings
Virginie Derycke, Mostafa Benzaazoua, Bruno Bussière, Mkendji Kongolo, Raphael Mermillod-Blondin

Evaluating the Oxygen Reaction Rate Coefficient of Sulphidic Tailings using Laboratory and Field
Tests .................................................................................................................. 982
Mathieu Gosselin, Mamert Mbonimpa, Thomas Pabst, Michel Aubertin

Waste Rock Sulfate Release Rates at a Former Taconite Mine, Laboratory and Field-Scale Studies
Braden Hanna, Kim Lapakko .................................................................................. 995

Validation of a European Standard or the Determination of Acid Potential and Neutralization
Potential of Sulphidic Waste .................................................................................. 1008
Tommi Kaartinen, Margareta Wahlström

Leaching of Sulfidic Alum Shale Waste at Different Temperatures ..................................... 1015
Lovisa Karlsson, Mattias Bäckström, Bert Allard

A Review of Scale Factors for Estimating Waste Rock Weathering from Laboratory Tests
Houston Kompton ............................................................................................... 1026

Sericite and Chlorite Dissolution Rates from Humidity Cell Testing of Greenstone Rock
Kim Lapakko, David Antonson, Jennifer Engstrom ........................................................... 1038

Acid Generation from Alunite and Jarosite Bearing Materials ............................................ 1051
Claire M. Linklater, John Chapman, Paul L. Brown, Rosalind Green, Lisa Terrusi

Leaching Tests to Characterize Ferrous and Non-ferrous Slag Drainage Chemistry ............. 1063
Nadine M. Piatak, Robert R. Seal II

Use of Exploration, Laboratory and Site-Specific Data for the Purpose of Mine Rock Classification,
NICO Gold-Cobalt-Bismuth-Copper Project, Northwest Territories, Canada ...................... 1075
Kristin Salzsauler, Ken DeVos, Rick Schryer

An Empirical Comparison of Humidity Cell and Field Barrel Data to Inform Scale-Up Factors for
Water Quality Predictions .................................................................................. 1087
Shannon Shaw, Andrea Samuels

GEOTEST®: Development of Field Geochemical Cells for On-site Acid Mine Drainage Monitoring
M. Carolina Soto, Natalia Farfán, Patricio Galaz, Lissette Flores ........................................ 1095

Standard and Adapted Laboratory Test for Acid Drainage Prediction in Arid Zones ............... 1102
M. Carolina Soto, May-Lin Almendras, Juan Ramón Candia

Use of Calcite-bearing Volcanic Rocks to Neutralize Sulfide Mine-waste Drainage: Results from Static
Reaction Vessel Experiments .................................................................................. 1110
Mark R. Stanton, Douglas B. Yager

Investigation of the Humidity Cell Testing Procedure for Prediction of Acid Rock Drainage .... 1118
Surya P. Sunkavalli, Edward M. Trujillo
Predicting ML/ARD from Low Sulphide and Low Neutralization Potential Waste Rock; Baffinland Iron Mines Mary River Project, Nunavut, Canada .......................................................... 1130
S. Walker, J. Millard, J. Andrina, S. Sibbick

Geochemical Characterization with High Ionic Strength Methods for Arid-Climate Mines Utilizing Seawater ................................................................. 1140
Jacob Waples, Christian Wisskirchen, Felipe Vásquez

PREDICTION OF DRAINAGE CHEMISTRY – ANTAMINA

The Influence of Spatial Heterogeneity and Material Characteristics on Fluid Flow Patterns Through Two Unsaturated, Mixed Waste-Rock Piles .......................................................... 1152
Sharon Blackmore, Brad Speidel, Andrew Critchley, Roger D. Beckie, K. Ulrich Mayer, Leslie Smith

Quantitative Mineralogy to Assess Waste Rock Weathering at the Antamina Mine .......................................................... 1164
Randy Blaskovich, Bern Klein, Stephane Brienne, Roger D. Beckie, K. Ulrich Mayer, Celedonio A. Aranda,
Charlene Haupt

Waste Rock Management at the Antamina Mine: Overall Strategy and Data Application in the Face of Continued Expansion .......................................................... 1176
Bevin Harrison, Celedonio Aranda, Michael Sanchez, Janeth Vizconde

Mineralogical Characterization of Sulfidic Waste Rock at the Antamina Mine .......................................................... 1187
Charlene D. Haupt, Louis Kabwe, Bern Klein

Stacked Field Cells as a Means for Studying Metal Attenuation by Waste Rock Mixing at the Antamina Mine in Peru .......................................................... 1199
D. Trevor Hirsche, Roger D. Beckie, Michael Conlan, Sharon R. Blackmore, Leslie Smith, Bernhard Klein, K.
Ulrich Mayer, Celedonio Aranda, Luis A. Rojas Bardón, Raúl Jamanca Castañeda

Evaluating Preferential Flow in an Experimental Waste Rock Pile using Unsaturated Flow and Solute Transport Modeling .......................................................... 1210

Rapid Seasonal Transition from Neutral to Acidic Drainage in a Waste Rock Test Pile at the Antamina Mine, Peru .......................................................... 1220
Holly Peterson, Roger Beckie, Bevin Harrison, K. Ulrich Mayer, Leslie Smith

Spatial and Temporal Variations of O₂ and CO₂ Pore Gas Concentrations in an Experimental Waste Rock Pile at the Antamina Mine, Peru .......................................................... 1232
Beckie, L. Smith

PREDICTION OF DRAINAGE CHEMISTRY – DIAVIK

Diavik Waste Rock Project: Wind-Induced Gas Transport .......................................................... 1242
Richard T. Amos, Xiaotong Chi, Marek Stastna, David W. Blowes, David C. Sego, Leslie Smith

Diavik Waste Rock Project: Geochemistry of Low Sulfide Content Large-scale Waste-rock Test Piles .......................................................... 1253
Brenda L. Bailey, David W. Blowes, Leslie Smith, David C. Sego

Diavik Waste Rock Project: Microbiological Succession in Waste-rock Testpiles .......................................................... 1263

Diavik Waste Rock Project: Preliminary Estimates of Multi-Year Net Infiltration .......................................................... 1274
Nathan Fretz; Leslie Smith, David Blowes, Dave Sego

Diavik Waste Rock Project: Mineralogical Investigation of Sulfide Mineral Weathering Products in Low-sulfide Waste Rock from an Operational Stockpile in the Arctic .......................................................... 1288
Stacey Hannam, Matthew B. J. Lindsay, Blair Gibson, Dogan Paktunc, David W. Blowes, Leslie Smith, David C.
Sego

Processed Kimberlite Porewater Geochemistry from Diavik Diamond Mines, Inc. .......................................................... 1296
Michael C. Moncur, Lianna J. D. Smith

Heat Transport and the Effects of Climate Change in a Large-scale Waste Rock Pile Located in a Continuous Permafrost Region at Diavik Diamond Mine .......................................................... 1308
Nam Pham, David C. Sego, David W. Blowes, Leslie Smith, Richard T. Amos

Diavik Waste Rock Project: Objectives, Construction, Current Conclusions and Implications .......................................................... 1321
Lianna J. Smith, Gord Macdonald, David W. Blowes, Leslie Smith, David C. Sego, Richard T. Amos

Diavik Waste Rock Project: Laboratory Studies .......................................................... 1330
Ashley L. Stanton, David W. Blowes, Mandy Moore, Carol J. Ptacek, David C. Sego, Leslie Smith, Richard T.
Amos
PREDICTION OF DRAINAGE CHEMISTRY – FIELD STUDIES

Suggestion for a Protocol for Detailed Investigation of Historical Mine Sites ................................................................. 1340
Mattias Bäckström, Stefan Sädhöm

Predicting Copper Concentrations in ACID Mine Drainage: A Comparative Analysis of Five Machine Learning Techniques .................................................................................................................. 1351
Getnet D. Betrie, Solomon Tesfamariama, Kevin A. Morin, Rehan Sadiq

Acid Rock Drainage Evaluation of Construction Aggregate Materials: Assessment of Petrographic Contribution ................................................................................................................................. 1363
Anett G. Briggs, Fred H. Shrimer

Arsenic Speciation in Mine Tailings and Co-existing Pore Water, Lower Seal Harbour Gold District, Nova Scotia, Canada ................................................................................................................ 1375
Catherine Daniels, Michael Parsons, Heather Jamieson, Wendy Hall

Early Indicators of Acid Seepage Generation – A Comparative Study of Long-term Seepage Quality from Two Waste Rock Dumps in the Central Rocky Mountains ........................................................................ 1387
John W. Dockrey, Justin S. Stockwell

Current Water Quality Conditions at the Historic Rum Jungle Mine Site, Northern Australia ........................................... 1397
Paul R. Ferguson, Christoph Wels, Mike Fawcett

Integration of Hydrogeological, Geophysical and Geochemical Methods for the Delineation of Natural Sources of Uranium in Groundwater ..................................................................................................... 1398
M. R. Gunsinger, G. R. Boonstra, D. F. Laporte, K. J. DeVos

Metal Leaching in a Neutral pH Environment: EKATI Diamond Mine, NT, Canada ............................................................ 1408
Kirsty Y. Ketchum, Stephen J. Day, Claudine A. Lee, Keith J. McLean

Evolution of Water Quality in the Goathill North Rock Pile at the Questa Mine and the Impacts on Under Drain Performance ................................................................................................................... 1420
Paul J. Kos, Mark J. Logsdon

Field Monitoring and Numerical Modeling of Gas Flow and Radon Emission Control in Waste Rock Dump 38neu, Germany ................................................................................................................................ 1432
Rene Lefebvre, Belkacem Lahmira, Wallfried Löhner

Investigations of Calcite Deposits in Streams Downstream of Coal Waste Rock Dumps, British Columbia and Alberta, Canada ........................................................................................................ 1443
Dylan Macgregor, Stephen Day, Gibran Lopez

Geologic Processes Affecting the Chemistry, Mineralogy, and Acid Potential on Particle Size Fractions: Examples from Waste Rock Piles in New Mexico, USA ........................................................................ 1459
Virginia T. McLemore

Case Studies of Thousands of Water Analyses through Decades of Monitoring: Selected Observations from Three Minesites in British Columbia, Canada ........................................................................ 1471
Kevin A. Morin, Nora M. Hutt, Mike Aziz

Two and Three Decades Post-Closure: Revisiting the ARD Predictions and Closure Plans for Two Copper Mines in British Columbia, Canada ................................................................................ 1483
Ronald V. Nicholson, Michael Venhuis, Erin Clyde, Jacques Moulins, John Stroiazzo, Charles See

Arsenic Mobility from Mine Tailings ................................................................................................................................ 1495
Dogam Pakhune

Estimating Water Quality Trends in Abandoned Coal Mine-Pools ..................................................................................... 1507
Eric F. Perry, Henry Rauch

Fingerprinting Acid Mine Drainage in Wet-dry Tropical Climates using Stable Isotope Approach: An Example from Queensland, Australia .................................................................................... 1520
Phong H. Pham, Mansour Edraki, Barry Noller, Sue Golding

Extraction of ARD/ML Information from a Brownfield Site for Development of an ARD/ML Plan at the Detour Gold Mine, Ontario, Canada ........................................................................ 1532
Jim Robertson, Lisa Barazzuol, Stephen Day

Physical and Geochemical Characteristics of Contaminants in an Abandoned Metal-Impacted River Catchment under Varying Hydrological Conditions ......................................................................................... 1547
Sian E. Ruddall, Adam P. Jarvis

Estimation of Groundwater Residence Time in Tailings from the Elizabeth Copper Mine Superfund Site, Vermont, USA ...................................................................................................................... 1559
Robert R. Seal II, Andrew G. Hunt, L. Niel Plummer, Gerolamo C. Casile, Nadine M. Piatak, Edward Hathaway

Thiosulphate-oxidizing Bacteria as Indicators of Sulphide Mineral Oxidation ........................................................................ 1570
A. Sobolewski

Aluminum Buffering of Mildly Acidic Waste Rock from a Hard Rock, Open Pit Mine in the Central Rocky Mountains ....................................................................................................................... 1580
Justin S. Stockwell, John W. Dockrey
