**TABLE OF CONTENTS**

Combined Wind Tunnel Tests and Flow Simulations for Light Aircraft Performance Prediction ........................................ 1
Sylvain Mouton, Eric Rantet, Guillaume Gouverneur, Christophe Verbeke

Experimental Aerodynamic Analysis of a Slow Running Vertical Axis Wind Turbine ................................................. 10
Leonardo Manfriani, Marcello Righi, Michael Ammann, Marco Blunschi

EnGAM – Integrating CFD into the Concept Design Process .................................................................................. 17
Nick Leppard, Nigel Taylor

Interactive Aircraft Design for Undergraduate Teaching ......................................................................................... 28
Omran Al-Shamma, Rashid Ali

Initial Evaluation of a CAD Embedded CFD Method for Predicting 2D and 3D External Aerodynamics ................. 37
M. E. Milne

FloEFD Simulation of Micro-Turbine Engine ............................................................................................................. 51
T.V. Trebunskikh, A.V. Ivanov, G.E. Dumnov

The Stability and Control Dataset for Eurofighter Typhoon ................................................................................ 64
Simon Peter Eccleston

Modelling and Analysis of a High Lift System for a Blended Wing Body Aircraft .............................................. 89
Daniel Paulus, Nicolas Frank, Mirko Hornung

Aerodynamic Performance Analysis of a Non Planar C-Wing Using Experimental and Numerical Tools ...... 110
Mano Prakash, Lakshmi Narayanan, Manoj Kumar

Scale Effects on a Single-Element Inverted Wing in Ground Effect ..................................................................... 113
J. Correia, M.V. Finnis, K. Knowles

The Application of Flow Control To A Highly Convoluted Air Intake Duct for a Combat UAV ......................... 125
Ian Whitmore, Keith Weatherill, Kenneth Stevens, Jason Green, Jean-Jacques Vallee, Michel Bourasseau, Eric Garnier

Passive Control of Transonic Cavity Aero-Acoustics ............................................................................................. 149
David A. Roberts, David G. MacManus, Philip Rubini, Qin Qin

Experimental and Numerical Investigation of Flowfield of a Generic Scramjet Intake ........................................ 173
E. Erdem, A.C. Idris, K. Kontis

Investigation of the Flow Asymmetry around Axi-symmetric Spiked Blunt Bodies in Hypersonic Speeds ............. 177
Mahmoud Y.M. Ahmed, Ning Qin

Lee Cameron, Juliana Early, Richard McRoberts, Mark Price

Investigation of CST Geometric Parameterisation Method for an Entire Transport Aircraft .......................... 208
Feng Zhu, Ning Qin

Experimental Aerodynamic Analysis of a Slow Running Vertical Axis Wind Turbine ....................................... 245
Leonardo Manfriani, Marcello Righi, Michael Ammann, Marco Blunschi

Flexible Wing Twist Optimisation using Rapid Computational Methods .............................................................. 252
Christian Agostinelli, Christian B. Allen, Abdul Rampurawala

Propeller Effects on MAV Aerodynamics ............................................................................................................. 268
Z.J. Chen, N. Qin

Hardware Simulation of Power and Propulsion System of a Solar Powered Aircraft ......................................... 286
Tarek Nada, Prashant Shaholia, Muhammad Ishfaq, Ali Sajjad, Sumit Jashnani

Qualification of the ARA TWT for laminar flow testing ...................................................................................... 393
Naomi Allen, Simon Lawson, Moira Maina, James Alderman

The Effects of Scaling on Flow Inside a Cavity at High Subsonic Mach Numbers .............................................. 407
V. Thangamani, K. Knowles, A.J. Saddington

Aerocoustic Modelling of a 3-D Transonic Cavity Flow Using a High-Order Solver ........................................ 423
A.J. Saddington, K. Knowles, B. Khanal

The Aero-Acoustic Environment Within the Weapons Bay of a Generic UCAV ................................................ 437
Ross A. Chaplin, Trevor Birch

Of Drag Crises and Burst Altitudes – The Aerodynamics of Stratospheric Ballooning in Theory and Practice ................................................................. 479
Andras Sobester
