37th International Precious Metals Institute Annual Conference

(IPMI 2013)

Out of the Ashes the Golden Phoenix Rises: Staying Compliant by Rising Above the Regulations

Phoenix, Arizona, USA
22-25 June 2013

## TABLE OF CONTENTS

### SESSION A: SILVER:
Moderator: Jon Potts

- **World Silver Survey** ................................................................. 1  
  Cameron Alexander
- **An Update on the Future of Silver Industrial Demand** .................. 25  
  Mike DiRienzo
- **An Introduction to Rochester Silver Works, LLC,** ........................ 38  
  Robert Surash
- **Silver Market Outlook: Can the Fundamentals Re-assert Themselves** 62  
  Philip Newman

### SESSION B: PRECIOUS METALS SAMPLING AND ANALYTICS
Moderator: Sue Strachan

- **Mobile Labs: A New Alternative for Third Party Lab Operations in Remote Locations** .......................................................... 71  
  Russ Calow
- **Scraps Evaluation-A Comparison between Analytical Techniques** ................................................................. 77  
  Jonathan Jodry
- **Sampling in the 21st Century in Umicore Precious Metals** .......... 86  
  Jeroen Dejonckheere

### SESSION C: PRECIOUS METAL PROCESSING AND PROCEDURES
Moderator: Erica Rannestad

- **The Kinetics, Optimization, Design and Implementation of Industrial Silver Chloride Processing** ............................... N/A  
  Corby Anderson
- **Selenium Deportment in Precious Metals Refining Operations** ................................................................. 98  
  Mike Mooiman
- **Inductotherm Induction Melting Furnaces for Precious Metals** ................................................................. 110  
  Charlie Fink
- **The Values and Benefits of Umicore’s Process Excellence Model** ..................................................... 137  
  Sven Janzten
- **Assessing the Environmental Performance of the Plasma PGM Recovery Process** ............................................. 144  
  Tim Johnson, David Deegan, Raj Mishra

### SESSION D: LATEST DEVELOPMENTS IN ENVIRONMENTAL REGULATIONS
A Panel Discussion

- **Dodd-Frank and Precious Metals: Where Are We Now?** ................ 156  
  John Bullock
- **AML Developments: Proposed Changes to the Regulations** ........... 165  
  Mike Riess
- **Act II: What Can We Expect from Obama’s Second Term in Environmental Law and Policy?** ..................... 171  
  Lynn Bergeson
- **PGM Health Science Research Group: Current Research Projects: Why, What and Progress to-Date** .................. 178  
  Barbara Curtis

### SESSION E: PRECIOUS METALS NEW TECHNOLOGY
Moderator: Diana Koppenaal

- **Nickel - Free Age Hardenable 14 Karat White Golds** .................. 191  
  G. Raykhtsaum
- **Innovative Technology to Recycle Precious Metals in Continuous Stream of Copper** ................................. 198  
  Fumito Tanaka, Shigeiko Iwahori, Osamu Iida
- **Single Reagent PGM Refining** ................................................... 208  
  Joe Thomas
- **The Use of the Flameless Tunnel® Casting System for the Production of Good Delivery Bars** ................. 212  
  Salvatore Todaro
SESSION F: ALL ABOUT MINING  
Session Moderator: Corby Anderson  
- Permitting Mill and Mine in the USA in Today’s Environment ................................................................. 240  
  Pierre Quilliam  
- Sustainability Issues in Operating the Stillwater Mine .............................................................................. 252  
  Greg Roset  
- Capitol Allocation in Mining .................................................................................................................. 266  
  Rob Doyle  

SESSION G: AUTO CATALYSTS  
Moderator: Jay Robie  
- Extracting the “Mine on Wheels” – An Important Contribution to Sustainability ........................................ 269  
  Marc Caffarey  
- Tricks of the Trade - Understanding Scams that Could Impact the Value of Your Catalytic Converter Metal Returns .................................................................................................................. 292  
  Oliver Krestin  
- Foiled Again! Processing Metallic Converters and Industry Trends ............................................................ 300  
  John Keating  
- Anti-Money Laundering for Precious Metal Dealers .................................................................................... 308  
  Glenn Fugate  

SESSION H: PRECIOUS METALS BUSINESS, MARKETING AND REGULATIONS  
Moderator: Chris Jones  
- 10 Years of Successful Cooperation with Johnson Matthey and Catalysts Future of Krastsvetment ........... 324  
  Vladimir Osipenko  
- Hedging Financial Assets with Gold and Gold Volatility ............................................................................. N/A  
  Bob Biolis  
- E-Scrap Processing for Precious Metals Extraction: Market Issues .............................................................. 334  
  Patrick Jeffery  
- FATCA ..................................................................................................................................................... 359  
  Darren Mills  
- Money Laundering & Criminal Activity Trends: How it Affects Dealers in Precious Metals ...................... 368  
  Steve Crogan  

SESSION I: PRECIOUS METALS AND STUDENT RESEARCH  
Moderator: Robert Ianniello, IPMI  2013 Student Award Winners Research Presentations  
- Synthetic Tuning of Precious Metal Based Nanoparticles for Catalysis ......................................................... 383  
  Huiyuan Zhu  
- Metal Complexes of Osmium and Ruthenium for Obtaining Novel Molecular Computation Devices ........ 385  
  Graham De Ruiter  
- Mechanisms and Synergistic Effects During NOx Reduction over Platinum Group Metal Based Catalysts ........................................................................................................................................ 387  
  Cedric Barroo  
- Cathode Dissolution using Silver Vanadium Phosphorous Oxid .................................................................. 394  
  David Bock  
- From Synthesis Toward Applications of Nanoparticle Superlattices Engineered with DNA ...................... N/A  
  Evelyn Auyeung  
- Sulfur Deactivation of Diesel Oxidation Catalysts ......................................................................................... 396  
  Tayebeh Hamzehlouyan  
- Platinum Complexes as Catalysts for Olefin Hydroarylation to Produce Alkyl or Vinyl Arenes .................. 399  
  Anna Brosnahan  
- Organometallic Scaffolds for the Selective Binding of Alkanes to Metals ...................................................... 400  
  Jessica DeMott  
- A New Generation of Green Polymers from Biomass by ROMP with Ruthenium Based Catalysts ............. 402  
  Vaguleyan Balasanthiran  
- Medicinal and Material Dimensions of Gold .................................................................................................. 405  
  James Heckler
Synthesis and Characterization, Purification and Synthesis of Walter Soluble Nano Clusters of Gold and Silver ................................................................. 410
   Santosh Kumar

Ruthenium and Molybdenum Supported on Mesoporous Silica Catalyst for Green and Cost-Effective Production of Biofuels for a Sustainable Energy Future .................................................. 419
   Sridhar Budhi

Catalysis-Induced Dispersive Behavior of Individual Metal Nanoparticles Probed at Single Molecule Level with Single Turnover Resolution ................................................................. 423
   Venkataramanan Ravi

Synthesis and Simulation of the Optical Properties of Core/Alloy Nanoparticles ................................................................. 426
   Wenjie Wu

Analysis of the Flotation Response of Auriferous Pyrite Multiphase Particles by High Resolution Xray Micro CT ............................................................................................................. 429
   Yan Wang

SESSION J: PRECIOUS METALS BUSINESS AND ECONOMICS
   Moderator: Bodo Albrecht

The Gold Truck: The Story of Assay on Wheels ............................................................................................................. 432
   Chris Noyes, Bodo Albrecht

Stairway to Heaven: The “Gold Zero” Approach to No Inventory ................................................................................................. 452
   Peter Schmitt

The Rebirth of a Grand Old Name in the Precious Metals Industry ................................................................................................. 465
   Wolfgang Wrzesniok-Rossbach

Gold Coins, Gold Standard, Good Night ................................................................................................................................. 482
   John Maguire

Outlook for Precious Metals Turning Tides ................................................................................................................................. N/A
   Suki Cooper

Eliminating Conflict Gold from the Commercial Gold Supply Chain-Refiner/Smelter Processing and Inventory Control ............................................................................................................. 488
   Bill Tierney

SESSION K: PRECIOUS METALS AND MINING
   Moderator: Erica Rannestad

Security Challenges for Equipment, Product and People at Mining Operations in Mexico ................................................................................................................................. N/A
   Godfrey Walton

Financing in the Current Market ......................................................................................................................................................... 493
   Jim Verraster, Justin Sullivan

Black Swan Risk Management ......................................................................................................................................................... 499
   Belinda Berwick, Marsh

The Importance of Independent, Qualified, Technical Due Diligence in Mining for Investors, Owners and Managers ............................................................................................................. 505
   Tim Alch

SESSION L: PRECIOUS METALS TECHNOLOGY AND PROCESSES
   Moderator: Steve Izatt

Analysis of Precious Metals by Solid Phase Extraction Using Highly Selective Molecular Recognition Resins ......................................................................................................................................................... 540
   Steve Izatt, Neil Izatt, Ronald Bruening, Yoshiaki Furusho, Takeshi Miyabayashi, Masato Ono, Takeshi Kitade, Kenichi Kamimura, Tamotsu Yamamoto

PhosphonicS: New Technologies for PGM Recovery from Refining Streams ................................................................................................................................. 550
   Thomas Leonard

New Opportunities in the Application of Silver Electrolysis using EMEW Technology ................................................................................................................................. 561
   Mike Mooiman, Ian Ewart, Trevor Bergfeldt
