2013 2nd International Workshop on Software Engineering Challenges for the Smart Grid

(SE4SG 2013)

San Francisco, California, USA
18 May 2013
## Contents

A Run-Time Verification Framework for Smart Grid Applications Implemented on Simulation Frameworks  
Selim Ciraci, Hasan Sözer, and Bedir Tekinerdogan — Pacific Northwest National Laboratory, USA; Özyeğin University, Turkey; Bilkent University, Turkey

Towards a Bottom-Up Development of Reference Architectures for Smart Energy Systems  
Maximilian Irlbeck, Denis Bytschkow, Georg Hackenberg, and Vasileios Koutsoumpas — TU Munich, Germany; fortiss, Germany

Towards a Constraint Based Approach for Self-Healing Smart Grids  
Vasileios Koutsoumpas and Pragya K. Gupta — TU Munich, Germany; fortiss, Germany

Residential Electrical Demand Forecasting in Very Small Scale: An Evaluation of Forecasting Methods  
Andrei Marinescu, Colin Harris, Ivana Dusparic, Siobhán Clarke, and Vinny Cahill — Trinity College Dublin, Ireland

MODAM: A MODular Agent-Based Modelling Framework  
Fanny Boulaire, Mark Utting, and Robin Drogemuller — QUT, Australia
