2013 2nd International Workshop on Realizing Artificial Intelligence Synergies in Software Engineering

(RAISE 2013)

San Francisco, California, USA
25 – 26 May 2013
Contents

Preface
Foreword

Keynotes
SE and AI: A Two-Way Street
John A. Clark — University of York, UK .................................................. 1

The Synergy of Human and Artificial Intelligence in Software Engineering
Tao Xie — North Carolina State University, USA ......................................... 4

Algorithms
Bayesian Artificial Intelligence for Tackling Uncertainty in Self-Adaptive Systems: The Case of Dynamic Decision Networks
Nelly Bencomo, Amel Belaggoun, and Valerie Issarny — INRIA, France ............................ 7

Using Spectral Clustering to Automate Identification and Optimization of Component Structures
Constanze Deiters, Andreas Rausch, and Mirco Schindler — TU Clausthal, Germany ................ 14

Pareto-Optimal Search-Based Software Engineering (POSBSE): A Literature Survey
Abdel Salam Sayyad and Hany Ammar — West Virginia University, USA ......................... 21

Requirements and Design
Addressing the QoS Drift in Specification Models of Self-Adaptive Service-Based Systems
Romina Torres, Nelly Bencomo, and Hernan Astudillo — Federico Santa Maria Technical University, Chile; INRIA, France ..................... 28

High Assurance Human-Centric Decision Systems
Constance Heitmeyer, Marc Pickett, Len Breslow, David Aha, J. Greg Trafton, and Elizabeth Leonard — Naval Research Laboratory, USA ........................................ 35

Data Repositories
Predicting More from Less: Synergies of Learning
Ekrem Kocaguneli, Bojan Cukic, and Huihua Lu — West Virginia University, USA ............ 42

Handling Missing Attributes using Matrix Factorization
Övünç Bozcan and Ayşe Başar Bener — Bogazici University, Turkey; Ryerson University, Canada ................ 49
