Part 2  Power Transmission and Distribution

Analysis of Inrush Current and Over-voltage with HVDC AC Filters Switching on
\textit{XIA Chengjun, Cong Baofeng}.................................................................(157)

Method for suppressing random pulse interference of partial discharge based on fuzzy clustering
\textit{Guan Hong, Shaoying, Qian Yong, Sheng Gehao, Jiang Xiuchen}..............................(161)

External Insulation Strength Assessment of Contaminated Insulator Based on Acoustic Emission
\textit{Li Zipin, Li Hongling, Wang Youyin}.............................................................(165)

Aerodynamic Analysis of Bundle with Six Cables for UHVDC by Numerical Simulation Based on LES
\textit{Si Jiajun, Zhu Kuanjun}..................................................................................(169)

Applications of Embedded HVDC in Power System Transmission
\textit{Jicheng Yu, George G. Karady, Lei Gu}...........................................................(174)

Modulation Strategy Study of Hybrid Multilevel Inverter
\textit{Yang Xingwu, Xue Hua}.................................................................................(181)
Simulation Research of Current-modulated Tripole DC Transmission System

Analysis on Commutation Failure Caused by AC Faults in Multi-infeed HVDC Systems

Fault Location Based on Natural Frequency for the VSC-HVDC Lines

Installation SVC to Improve Output Active Power of Large-scale Wind Farm Based on the Transient Stability

Pattern Identification Method Of Partial Discharge Based on the Features of UHF Envelope Signals

Multi-source Separation Method for Partial Discharge Detection in Substations

Conjunct Influence of Temperature and Humidity on Discharge Voltage of Air Gap

Electromagnetic radiation spectrum from partial discharge in air-insulated medium voltage switchgear

A Prediction Techniques in Resistive current Measurement of Metal Oxide Arrester

Simulation and Analysis of Multi-level Gap Lightning Protection for the 10kV Distribution Transformer

Analysis of Distribution Network Protection Gap Protect Distance

Design and Analysis of Clamper for Short Circuit Ground Wire

The Simulation of the Multi-stage Magnetic Compression Circuit by Pspice

The Calculation Model of the Shielding Failure Tripout Rate of Double-circuit Transmission Line on the Same Tower

The Calculation Model of the Shielding Failure Tripout Rate of Double-circuit Transmission Line on the Same Tower

Lightning Protection Research of Quadruple-circuits on One Tower based on Shielding Failure Trip-out Rate

Fault Detection and Location Based on Matrix Algorithm in Distribution Network

The Analysis of Harmonics Damage on the Reactive power Compensation Capacitors of Dongguan Network
Part 3  Smart Grid Technologies

Three-Dimensional Digital Design in Substation Based on Microstation

Wenjie Li, Huachen Fu, Huan Shi...........................................................................................................(315)

A Practical Digital VRB Simulator for Power System and Smart Grid Applications

Junwen Xie, Jiming Lu, Chengxiong Mao, Dan Wang, Yang Yi, Changsong Yi, Yong Luo, Jie Zeng, Xun Chen...........................................................................................................(319)

A New Method for Demand Response by Real-Time Pricing Signals for Lighting Loads

R. Roofigari Nejad, S. M. Moghaddas Tafreshi......................................................................................(325)

Research on characteristics of low voltage power line communication channel

Zhang Jie, Yan Xiao, Qing Kaiyu.............................................................................................................(330)

Impacts of Charging Plug-In Hybrid Electric Vehicles on the Electric Grid and its Charging Strategies

Zhiwei Zhang, Danzhen Gu....................................................................................................................(335)

Coordination Control of PSS and SVC for Damping of Low Frequency Oscillations

Hongjun Fu, Tao Lin, Jianhua Sun, Jun Li, Zhiheng Li, Wei Hu, Lizhe Pan...........................................(339)

Research on Operation Control of Micro Sources within a Microgrid

Wang Jing, Wang Xiaohui, Wang Jia, Du Hong....................................................................................(343)

Wireless ZigBee Transceiver for Smart Meter Reading System

CAI Yuehong, Xiao Yong, Yan Xiao, Qin Kaiyu......................................................................................(347)

Designing a Filter Bank and an Adaptive Filtering Technique to Eliminate Noises in Power Line Communication

Saurabh Chaudhury, Anirban Sengupta................................................................................................(353)

A Novel Composite Chaotic Sequence for Low Voltage Power Line Spread Spectrum Communication

Liu Li, Yan Xiao, Luo Haoding, Wang Kun.............................................................................................(357)

Characteristic Parameters Prediction of Power Transformer Based On Discrete Gray Model

Kai Wang................................................................................................................................................(363)

Identification Method for Low-Voltage Arc Fault Based on the Loose Combination of Wavelet Transformation and Neural Network

Haoying Gu, Feng Zhang, Zijun Wang, Qing Ning, Shiwen Zhang......................................................(367)

Interactive Building Load Management for Smart Grid

Xue Xue, Wang Shengwei......................................................................................................................(371)

Impact Analysis of Interaction Between Power Grid and Electric Passenger Vehicles Considering the V2G Mode

Dong Huifeng, Wang Jiangbo, Yan Meng, Zhang Zhen'an, Jiang Xiaolong, Liu Wei..............................(376)

Impact of Parameters of Pantograph on the Dynamics of Pantograph-catenary and Optimization of Parameters

Jing Zhang, Jian Yang, Ruigang Song.....................................................................................................(380)

Structural Design of a Universal and Efficient Demand-Side Management System for Smart Grid

N/A
Part 4  Power System Management

The research on Synchronous generator real-time simulation using an embedded parallel system based on Ethernet

Comparative Analysis of Two Phase Compensation and WACS techniques of PSS based on Different Faults and Variable Loading Conditions

Research of Fuzzy Synthetic Evaluation Method of Power Quality Based on Improved Membership Function

Considering Wind & Demand Uncertainties in SCUC

Load Frequency Control for Wide Area Monitoring and Control System (WAMC) in Power System with Open Communication Links

An improved adaptive harmonic detection method applied in shunt APF

An improved adaptive harmonic detection method applied in shunt APF

Research on Asynchronous Motor Control Characteristics Based on dual SVPWM Back to BackThree level Converter
Effect of Shaft Parameter Uncertainty on Subsynchronous Resonance Simulation

Evaluating the Effect of Subsynchronous Oscillation on Turbine Generator Shaft

Improved Interface Models for Hybrid Simulation on Large AC/HVDC Power System

Research on the Model of EV Battery and Charger

Alarm transmission for distributed energy resources over power line communication

On-line Monitoring System for Icing State of Overhead Transmission Line

Frequency-domain Transmission Characteristics of Electromagnetic Wave Signals Excited by Partial Discharge in GIS

Fault Location in Radial Distribution Systems Using Frequency Slice Wavelet Transform

Fault Recorder Data Refinement for Accurate Fault Location in a Transmission System

Applied Research of a New ODE Method in the Power Flow Computation of Power System

GPU Based Parallel Simulation of Transient Stability Using Symplectic Gauss Algorithm and Preconditioned GMRES method

Voltage Sag Assessment of Distribution Network with Distributed Generations

The LMS channel estimation algorithm of low-voltage power line communication

The Analysis of Interharmonics Generated by VSI-Fed Adjustable Speed Drives Considering Mechanical Load Fluctuations

Condition Assessment of the Health Index for Power Transformer

The Complexity Analysis Applied to Search Power Supply Path

Active Power Flow Adjustment Based on Sensitivity Analysis of DC Load Flow Model

Application of PID Control Based on BP-NN for Marine Generator Excitation System

Study of Different solution for voltage Sag and Designing of Fast Active DVR for Series Compensation

Interval Two-stage Stochastic Robust Programming Model for Carbon Dioxide Mitigation Planning Under Uncertainty

Statistical Methods of Performance Evaluation for Determining the Elements Contents of Carbon, Hydrogen and Nitrogen in Biomass Fuels

Overview of Micro-grid Energy Management System Research Status
Part 5 Automation Technologies

Flocking control with communication noise based on second-order distributed consensus algorithm

WANG Wenkai, PENG Huanxin

(701)

Flocking control under virtual leader-follower with communication time-delay

WANG Wenkai, PENG Huanxin

(705)

Controller Design for the Internet of Things for Building Electrical Equipments

Zhang Guiping, Duan Xingchao, Wang Ming, Li Chengdong

(709)

A Deadbeat Control of a Semiconductor Converter without Transformation of Variables

Albert Iskhakov, Alexander Istomin, Vladimir Pospelov, Sergey Skovpen

(714)

The dividing model of islands considering interrupted customers

Qu Fang, Pang Suohong, Sun Zhiqiang, Xu Li

(719)

Pseudo two-hop distributed consensus algorithm with communication noise

WANG Wenkai, PENG Huanxin

(724)

Discussion of an Integrated Estimator’s Property

WU Tingfang, WANG Pan, WANG Jiasen

(736)

Accelerate convergence rate of distributed consensus under undirected small world networks

PENG Huanxin, WANG Wenkai, QI Guoqing, SHENG Andong

(740)

Fast second-order distributed consensus with adaptive quantization

PENG Huanxin, WANG Wenkai

(744)

A Discussion about Information Security Technology of Electronic Government Based on LSB watermarking algorithm

CHEN Ru-qi

(750)

Research of Ex-post Pricing Mechanism based on Principal-Agent Theory

LI Yanli, LIN Hua, HAN Benshuai

(754)

Current Situation of Catenary Wire Wear Measurement

Jixian QU, Jiali SHUAI

(758)

Biped Walking Robot

Hui Liu, Yuan Liu, xianbin xie, Jianfei ouyang

(762)

Optimizing Research on Design Logic Diagram of Nuclear Power Plant

Liu Yu-Sui

(770)

Feasibility Study of Event-Based PI Controller

Mohammad Sohani, Yuvin Chinniah

(774)

Determination of the competitive ion exchange isotherms of taurine and glycine on D290 resin by inverse method

Shujuan Zhuang, Feng Song

(780)

Existence of the attractor and numerical analysis for the fractional-order Lü et al power system

Xu guangli, Sun fengyun

(784)
United simulation of hydraulic system and control system of dumping casting machine by low flow hydraulic driving

JIN Kai, YAN Hong-zi, TAN Wu-zhong, CHEN Xin-yu

Statistical Leakage Power Modelling of Manufacturing Process Variations at System Level

Chenxi Ni, Z. Al Tarawneh, Gordon Russell, Alex Bystrov

The Defect-Detection System for Firearms Bore

Wen Zhang, Chensheng Wang, Guang Yang, Zhiqiang Chen, Lei Li

Evaluation of Electric Vehicles' Impacts and Rationalization of Their Energy Sources' Distribution: Based on Analytic Hierarchy Process and multi-objective programming model

Zeming Jiang, Chi Wang

Study on Controlling and Simulation of Drive System for Permanent Magnet Synchronous Motor in Electrical Vehicle

Li Ping, Cao Lan

Testability Evaluation Method Based on Multi-source Information Fusion Technique

Jin Luo, QiBin Deng, PengCheng Fu

The Electromagnetic Nondestructive Testing Device of the Wirerope-core Transmission belt

Guozhou XIAO, Zezhou YANG

Application of Smith Prediction Compensation Control Strategy in Monitor AGC of the Cold-rolling Mill

Li Shaoming, Yang Bo, Zhang Jiayan, Zhang Guoli

A Novel Method for Shaft Torsional Oscillation Suppression in Servo Systems

Lei Gu, Shan-ming Wan, Jicheng Yu

Mechanical Behavior Research for Pressuring and Crawling Institutions of Cone Lamp Pole

Liu Zhong-bin, Wu Hui, Gu Nan-jiang

Application of S7-200 PLC to the monitoring system of strip steel temperature

Xiaoyong Zhang, Danghong Zhang, Yixin Su, Pei Lv

Quick screen of thermal resistance for batching high brightness LEDs

Jingwan Li, Shiwei Feng, Guangchen Zhang, Zhou Zhou, Chunsheng Guo

Design of the Wireless Monitoring System of Solar Lamps Based on ZigBee and GPRS

Mingxia SU, Yixin SU, PeiLV

The research, design and implement of PSISimulator

Deng Su Bi, Zhang Yan, Man Zhen Mei

Parallel Force Control for a Robot Gripper Based on Grey Prediction Models

Xuelin Wang, Xinjian Fan, Yongguo Zhao, Shiguo Ma

A Combined System of APF and SVC for Power Quality Improvement in Microgrid

Tuo Dong, Linchuan Li, Zhengbo Ma

The Design and Simulation of Adaptive Fuzzy-PID Control in the Ceramic Detecting System

Jin-Gang Lai, Xiao-Qing Lu
