2013 International Conference on Selected Topics in Mobile & Wireless Networking

(MOWNET 2013)

Montreal, Quebec, Canada
19-21 August 2013
Table of Contents

2013 International Conference on Selected Topics in Mobile and Wireless Networking (MoWNeT)

Long term evolution engineering 1

- Real-Time Traffic Classification for Unified Communication Networks
  Abdelwaha Elnaka (University of Guelph, Canada), Qusay Mahmoud (University of Guelph, Canada) .......................................................... 1

- PGM Structures in Self-Organized Healing for Small Cell Networks
  Julio Aráuz (Ohio University, USA) ...................................................................................... 7

Traffic Model for Long Term Evolution Networks

- Traffic Model for Long Term Evolution Networks
  Dima Dababneh (Carleton University, Canada), Marc St-Hilaire (Carleton University, Canada), Christian Makaya (Telcordia Technologies, USA) .......................................................... 13

Network Security

- Approach for Enhancing Data Transfer Security and Performance over Internet
  H Kiwan (University of Regina, Canada), Yasser Morgan (University of Regina, Canada) ............... 19

- Performance Analysis of an RFID Key Management Scheme for Vehicular Networks
  Qingwei Zhang (University of Ottawa, Canada), Mohammed Almulla (Kuwait University, Kuwait), Azzedine Boukerche (University of Ottawa, Canada) ......................................................... 25

Botnets in 4G Cellular Networks: Platforms to Launch DDoS Attacks Against the Air Interface

- Botnets in 4G Cellular Networks: Platforms to Launch DDoS Attacks Against the Air Interface
  Masood Khosroshahy (Concordia University, Canada), Dongyu Qiu (Concordia University, Canada), Mustafa Mehmet-Ali (Concordia University, Canada) .......................................................... 30

Green communications/mobile networking 1

- Client-Centric Data Streaming on Smartphones: An Energy Perspective
  Abdulhakim Aboghara (University of Waterloo, Canada), Sagar Naik (University of Waterloo, Canada) .......................................................... 36

- Joint BS Selection and Resource Allocation Model for OFDMA Macro-Femtocell networks incorporating mobility
  Rebeca Estrada (ETS, Canada), Hadi Otrok (Khalifa University of Science, Technology & Research (KUSTAR), UAE), Zbigniew Dziong (École de technologie supérieure, University of Quebec, Canada), Hassan Barada (Khalifa University of Science, Technology and Research, UAE) ................................................................................. 42

Communication networks and architectures for smart grids

- On Advantages and Limitations of 3D wireless Grids as Parallel Platforms
  Amir Kamali Sarvestani (University of York, United Kingdom), Christopher Crispin-Bailey (University of York, United Kingdom), Jim Austin (University of York, United Kingdom) .............. 48

- Using an Overlay Network to Manage the Renewable Energy in Residential Areas
  Ying Qiao (University of Ottawa, Canada), Hussein Mouftah (University of Ottawa, Canada) ........ 56
Green communications/mobile networking 2

Current Trends and Perspectives in Wireless Virtualization
Heming Wen (McGill University, Canada), Prabhat Kumar Tiwary (McGill University, Canada), Tho Le-Ngoc (McGill University, Canada) ................................................................. 62

Wireless Infrastructure for Remote Environmental Monitoring: Deployment and Evaluation
Fan Yang (Clemson University, USA), Vamsi Gondi (Clemson University, USA), Jason Hallstrom (Clemson University, USA), Kuang-Ching Wang (Clemson University, USA), Gene Eidson (Clemson University, USA), Christopher Post (Clemson University, USA) ........................................ 68

Self-* networking and mobility

Self-optimization in legacy networks through offload management
Rachad Maallawi (France, France), Agoulmine Nazim (University of Evry Val d'Essonne, France), Benoit Radier (Orange France Telecom R&D, France), Tayeb Ben Meriem (Orange, France) ........................................................................................................................................ 74

Towards Flexible Data Sharing in Multi-Device Mobility Scenarios
Josef Spillner (Technische Universität Dresden, Germany), Sven Bendel (Technische Universität Dresden, Germany), Alexander Schill (Technische Universität Dresden, Germany) ............ 80

Wireless-enabled P2P networking

Download Time Reduction Using Recent Performance-Biased Peer Replacement in Stochastic P2P Content Delivery Networks
Richard Wilkins (Thomas College, USA), Greg Simco (Nova Southeastern University, USA) ............... 86

Coping with Flash Crowd in Multi-Channel Live Video Streaming for Peer-to-Peer Networks
Navid Bayat (University of Western Ontario, Canada), Hanan Lutfiyya (University of Western Ontario, Canada) ........................................................................................................................................ 92

Host Mobility Management Using Combined MIPv6 and DNS for MANETs
Younchan Jung (The Catholic University of Korea, Korea), Marnel Peradilla (Catholic University of Korea, Korea) ........................................................................................................ 100

Content-distributed networks

A Cloud-hosted Hybrid Framework for Consuming Web Services on Mobile Devices
Rahnuma Kazi (176 Thorvaldson Bldg., University of Saskatchewan, Canada) ...................................... 106

Intellectus: Multi-Hop Fault Detection Methodology
Tiziana Campana (University College of Dublin, Ireland), Gregory O'Hare (University College Dublin, Ireland) .................................................................................................................. 112

A Q-Learning Solution for Adaptive Video Streaming
Dana Marinca (PRiSM Laboratory, France), Dominique Barth (University of Versailles-St Quentin, France), Danny De Vleeschauwer (Alcatel-Lucent, Belgium) ........................................ 120

Long term evolution engineering 2

A QoE Preserving M2M-Aware Hybrid Scheduler for LTE Uplink
Isam Abdalla (University of Texas at Dallas, USA), Subbarayan Venkatesan (University of Texas at Dallas, USA) .................................................................................................................. 127
Localization in wireless/mobile networks

**SDMA: A Semi-Distributed Mobility Anchoring in LTE Networks**  
Gurusanthosh Pabbisetty (IIT Madras, India), Ahmad Rostami (Technical University of Berlin, Germany), Manivasakan (IIT, Chennai, India) .......................................................... 133

**Indoor Positioning using Magnetic Compass and Accelerometer of Smartphones**  
Rashid Rashidzadeh (University of Windsor, Canada), Paramvir Singh Nagpal (University of Windsor, Canada) .......................................................... 140

**Comparative Analysis of RSSI-based Indoor Localization when using Multiple Antennas in Wireless Sensor Networks**  
Safa Hamdoun (University Paris-Est, France), Abderrezak Rachedi (University Paris-Est Marne-la-Vallée, France), Abderrahim Benslimane (University of Avignon, France) ........................................... 146
