2013 International Symposium on Theoretical Aspects of Software Engineering

(TASE 2013)

Birmingham, United Kingdom
1 – 3 July 2013
Welcome Message from the Program Committee Chairs .............................................. viii
Committee Lists .............................................................................................................. ix
Reviewers ......................................................................................................................... xii

Invited Talk
Engineering Multi-view Models for Model-Driven Engineering ........................................ 3
Axel van Lamsweerde

Session 1: Model Checking
Planning in Real-Time Domains with Timed CTL Goals via Symbolic Model Checking ...................... 7
Daniel Stöhr and Sabine Glesner
Process Rewrite Systems for Software Model Checking ................................................................ 15
Tayssir Touili
Optimizing the SAT Decision Ordering of Bounded Model Checking by Structural
Information ..................................................................................................................... 23
Liangze Yin, Fei He, and Ming Gu

Session 2: Verification
A Timing Verification Framework for AUTOSAR OS Component Development Based
on Real-Time Maude ........................................................................................................ 29
Longfei Zhu, Peng Liu, Jianqi Shi, Zheng Wang, and Huibiao Zhu
Modeling and Verification of AUTOSAR OS and EMS Application ................................................. 37
Yunhui Peng, Yanhong Huang, Ting Su, and Jian Guo
Formal Analysis of AODV Using Rely-Guarantee .............................................................................. 45
Xiaofeng Wu, Qiwen Xu, and Huibiao Zhu
Session 3: Logic and Semantics

Algebraic Framework for Synchronous Language Semantics ................................................................. 51
  Daniel Gaffé and Annie Ressouche

Towards Conformance Testing of Choreography Based on Scenario ............................................................ 59
  Hongli Yang, Kai Ma, Cheng Deng, Husheng Liao, Jun Yan, and Jian Zhang

Aspect-Oriented Semantic Framework for Executable Models ........................................................................ 63
  D. Mouheb, R. Ziarati, and M. Debbabi

Designs with Angelic Nondeterminism ........................................................................................................... 71
  Pedro Ribeiro and Ana Cavalcanti

When Even the Interface Evolves... .................................................................................................................. 79
  Alexandre Madeira, Renato Neves, Manuel A. Martins, and Luis S. Barbosa

Invited Talk

Model Repair for Markov Decision Processes ............................................................................................... 85
  Taolue Chen, Ernst Moritz Hahn, Tingting Han, Marta Kwiatkowska, Hongyang Qu,
  and Lijun Zhang

Session 4: Program Analysis and Testing

Aspect Orientation Based Test Case Selection Strategy for Service Composition ........................................... 95
  Guisheng Fan, Huiqun Yu, Liqiong Chen, and Dongmei Liu

A Programming Language Approach to Fault Tolerance for Fork-Join Parallelism ........................................ 105
  Mustafa Zengin and Viktor Vafeiadis

On Denotational Semantics of Spatial-Temporal Consistency Language—STeC ........................................ 113
  Hengyang Wu, Yixiang Chen, and Min Zhang

An Operational Approach to Happens-Before Memory Model ..................................................................... 121
  Yang Zhang and Xinyu Feng

Session 5: Modeling and Application

Using Intelligent Proxies to Develop Self-Adaptive Service-Based Systems ................................................ 131
  Radu Calinescu and Yasmin Rafiq

Verifying Bigraphical Models of Architectural Reconfigurations .................................................................. 135
  Alejandro Sánchez, Luis Soares Barbosa, and Daniel Riesco

Surfing with Fun .............................................................................................................................................. 139
  Laurent Thiry and Michel Hassenforder

Session 6: Concurrency and Real Time

Unified Modeling of Active and Reactive Components for Real-Time Systems ........................................... 145
  Zhucheng Shao, Jing Liu, Xiaohong Chen, Zuohua Ding, and Zhengheng Yuan
