CFSE 2013: The Fifth IEEE International Workshop on Computer Forensics in Software Engineering

CFSE 2013 Session 1
Customizing k-Gram Based Birthmark through Partial Matching in Detecting Software Thefts .......................................................................................................................................................................1

Hyun-il Lim

Fingerprint Clustering for Forensic Data Indexing ...........................................................................................................5

Wei-Ho Tsai and Cin-Hao Ma

Cloud Server Aided Computation for ElGamal Elliptic Curve Cryptosystem ..........................................................11

Narn-Yih Lee, Zih-Ling Chen, and Fu-Kun Chen

CFSE 2013 Session 2
Towards a Better Similarity Measure for Keyword Profiling via Clustering ...............................................................16

Y. Liang, K.P. Chow, L.C.K. Hui, J. Fang, S.M. Yiu, and Shuhui Hou

Development and Evaluation of Guideline Total Support System for Evidence Preservation by Using an Android Phone ......................................................................................................................21

Wataru Takahashi, Ryoichi Sasaki, and Tetsutarou Uehara

IWSC 2013: The 10th IEEE International Workshop on Software Cybernetics

IWSC 2013 Session 1
Understanding Requirements for Online Services Based on Users’ Behavioural Data Analysis ................................................................................................................................................................27

Qing Zhou and Lin Liu

An Adaptive Control Strategy for Managing Concurrent Service Requests in Service-Based Systems ........................................................................................................................................................................35

Wen-Long Zhu, Bei-Bei Yin, Kai-Yuan Cai, Dazhi Huang, and Stephen S. Yau

IWSC 2013 Session 2
A Feedback-Based Approach to Validate SWRL Rules for Developing Situation-Aware Software ................................................................................................................................................................41

Joonseok Park and Keunhyuk Yeom

A Case Study of Adaptive Combinatorial Testing ........................................................................................................47

Changhai Nie, Siyang Chen, Hareton Leung, and Kai-Yuan Cai

Service-Oriented Maintainability Modeling and Analysis for a Cloud Computing ........................................................53

Yoshinobu Tamura and Shigeru Yamada
STA 2013: The Fifth IEEE International Workshop on Software Test Automation

STA 2013 Session 1
Reducing the Number of Initial Database States for Integration Testing .................................................................59
Haruto Tanno and Takashi Hoshino
Opportunities for Clone Detection in Test Case Recommendation ..............................................................................65
Mostafa Erfani, Iman Keivanloo, and Juergen Rilling

STA 2013 Session 2
Using Dependency Relations to Improve Test Case Generation from UML Statecharts .............................................71
Valentin Chimisliu and Franz Wotawa
Incrementally Applicable t-Wise Combinatorial Test Suites for High-Strength Interaction Testing .................................................................77
Andrea Calvagna and Emiliano Tramontana

STPSA 2013: The Eighth IEEE International Workshop on Security, Trust, and Privacy for Software Applications

STPSA 2013 Session 1
A Multi-order Markov Chain Based Scheme for Anomaly Detection ........................................................................83
Wenyao Sha, Yongxin Zhu, Tian Huang, Meikang Qiu, Yan Zhu, and Qiannan Zhang
Hybrid Authorization Conflict Detection by Inferring Partial Data in RDF Access Control ..............................................89
Jaehoon Kim
Heuristic Path Pruning Algorithm Based on Error Handling Pattern Recognition in Detecting Vulnerability ..............95
Dong Chen, Yang Zhang, Liang Cheng, Yi Deng, and Xiaoshan Sun

STPSA 2013 Session 2
Using Security and Domain Ontologies for Security Requirements Analysis .................................................................101
Amina Souag, Camille Salinesi, Isabelle Wattiau, and Haris Mouratidis
A Petri Net Based Model for Trustworthy Software Process Composition .................................................................108
Xuan Zhang, Tong Li, Zhong-Wen Xie, Fei Dai, and Jin-Zhuo Liu
Transparent Security-Sensitive Process Protection via VMM-Based Process Shadowing ............................................115
Xiaoguang Wang, Yong Qi, Yuehua Dai, and Jianbao Ren
STPSA 2013 Session 3
Privacy-Preserving Two-Party k-Means Clustering in Malicious Model .......................................................... 121
Rahena Akhter, Rownak Jahan Chowdhury, Keita Emura, Tamzida Islam,
Mohammad Shahriar Rahman, and Nusrat Rubaiyat
Privacy-Aware Community Sensing Using Randomized Response ............................................................... 127
Shunsuke Aoki, Masayuki Iwai, and Kaoru Sezaki

MVDA 2013: The Second IEEE Workshop on Modeling and Verifying Distributed Applications

MVDA 2013 Session 1
An Abstraction Method of Behaviors for Process Algebra ...................................................................................... 133
Jinho On, Yeongbok Choe, and Moonkun Lee
Cost Optimization Strategy for Iterative Integration of Multi-critical Functions in IMA
and TTEthernet Architecture ................................................................................................................................. 139
Michaël Lauer, John Mullins, and Moez Yeddes
Conceptual Modeling of the Organisational Aspects for Distributed Applications: The Semantic Lifting Approach ........................................................................................................................................ 145
Vedran Hrgovcic, Dimitris Karagiannis, and Robert Woitsch
A Practical Software Model for Content Aggregation in Browsers Using Recent Advances in HTML5 ..................................................................................................................................................... 151
Marat Zhanikeev

MVDA 2013 Session 2
Building Adaptive Accessible Context-Aware for User Interface Tailored to Disable Users .......................................................... 157
Lamia Zouhaier, Yousra Bendaly Hlaoui, and Leila Jemni Ben Ayed
An Integrated Formal Model for Context-Aware Systems ...................................................................................... 163
Eun-Sun Cho, Tae-Seob Yoon, Joong-Hyun Choi, Joon-Young Paik, and Sumi Helal
ArgoAWS-UML: Modeling Tool for Adaptive Web Services ................................................................................ 169
Chiraz El Hog, Raoudha Ben Dijemaa, and Ikram Amous

MVDA 2013 Session 3
Modeling and Verification of Call Setup Dynamics of LTE Communication Systems .............................................. 175
Ishthiaq Ahmed Chowdhry, Nazir Ahmad Zafar, and Mohammed Al-Zahrani
Model Checking for SpaceWire Link Interface Design Using Uppaal .................................................................. 181
Ping Luo, Rui Wang, Xiaojuan Li, Yong Guan, Hongxing Wei, and Jie Zhang
Refinement Based Modeling of Workflow Applications Using UML Activity Diagrams .................................... 187
Ahlem Ben Younes, Yousra Bendaly Hlaoui, Leila Jemni Ben Ayed, and Rahma Jiassi
SAPSE 2013: The Fifth IEEE International Workshop on Security Aspects in Processes and Service Engineering

SAPSE 2013 Session 1

Predictive Notification Service of Privacy Invasion on Posting Pictures to SNS ...............................................................193
  Shigeru Shimada and Isao Echizen

Towards Privacy-Friendly Transparency Services in Inter-organizational Business Processes .........................................................................................................................................................200
  Meiko Jensen

An LOF-Based Adaptive Anomaly Detection Scheme for Cloud Computing .................................................................206
  Tian Huang, Yan Zhu, Qiannan Zhang, Yongxin Zhu, Dongyang Wang, Meikang Qiu, and Lei Liu

A File-Distribution Approach to Achieve High Availability and Confidentiality for Data Storage on Multi-cloud .....................212
  Yuuki Kajiura, Atsushi Kanai, Shigeaki Tanimoto, and Hiroyuki Sato

METHOD 2013: The Second IEEE International Workshop on Methods for Establishing Trust with Open Data

METHOD 2013 Session 1

Easy Access to Provenance: An Essential Step Towards Trust on the Web ........................................................................218
  Tom De Nies, Sam Coppens, Ruben Verborgh, Miel Vander Sande, Erik Mannens, Rik Van de Walle, Danius Michaelides, and Luc Moreau

Formal Modeling of Trust-Based Access Control in Dynamic Coalitions ........................................................................224
  Nadim Sarrouh

Investigating the Relevance of Linked Open Data Sets with SPARQL Queries .................................................................230
  Thomas Holst and Edzard Höfig

Implementation of Metadata Quality Metrics and Application on Public Government Data .....................................................................................................................................................................................236
  Konrad Johannes Reiche and Edzard Höfig

NETSAP 2013 Session 1

A Device for Transparent Probabilistic Packet Marking ............................................................................................................242
  Masayuki Okada, Nasato Goto, Akira Kanaoka, and Eiji Okamoto

Towards Unified Vulnerability Assessment with Open Data ........................................................................................................248
  Akihito Nakamura

Using a Trust Model to Reduce False Positives of SIP Flooding Attack Detection in IMS ..........................................................254
  Noppawat Chaisamran, Takeshi Okuda, and Suguru Yamaguchi
Security Software Based on Windows NDIS Filter Drivers .................................................................260

Shin-Shung Chen, Tzong-Yih Kuo, and Yu-Wen Chen

EUCASS 2013: The Fourth IEEE International Workshop on Enablers for Ubiquitous Computing

EUCASS 2013 Session 1
A Patrol Guidance Mechanism in a Context-Aware Environment ..........................................................265

Chin-Chih Chang, Judy C.R. Tseng, and Hao-Yun Chang

System Evolution for Unknown Context through Multi-action Evaluation .............................................271

Asanga Nimalasena and Vladimir Getov

A Knowledge-Based Development Approach with Fact and Service for End-User in Cloud Computing .................................................................277

Rui Zhou, Jing Li, Jinghan Wang, and Guowei Wang

EUCASS 2013 Session 2
UBI-Tree: Indexing Method for Schema-Less Search ..............................................................................283

Yutaka Arakawa, Takayuki Nakamura, Motonori Nakamura, and Hajime Matsumura

A P2P Delivery Method for Sensor Data Stream Based on Load Estimation from Collection Cycles ........................................................................289

Tomoya Kawakami, Yoshimasa Ishi, Tomoki Yoshihisa, and Yuuichi Teranishi

ITeS 2013: The Fifth IEEE International Workshop on IT-Enabled Services

ITeS 2013 Session 1
The Service Design of Intelligent Robot (iRobot) for Entertainment ......................................................295

Tung-Hsiang Chou

Game theoretic analysis of the value exchange system ..............................................................................300

Miyata Sumiko, Kinoshita Hirotugu, Morizumi Tetsuya, and Chao Li

ITeS 2013 Session 2

Yu-Lung Wu, Chi-Jui Chang, and Yu-Hui Tao

The Study of Brand Perception through Social Network Sites and Corporate Social Responsibility Programs ........................................................................310

Rungsiman Nararatwong, Nagul Cooharojananone, Nattarat Pongsupankij, Rajalida Lipikorn, and Kanokwan Atchariyachanvanich
ESAS 2013: The Eighth IEEE International Workshop on Engineering Semantic Agents — Intelligence and Robotics

ESAS 2013 Session 1
A Problem Solver for Scheduling Workflows in Multi-agents Systems Based on Petri Nets .............................................................................................................................................................................316
Fu-Shiung Hsieh and Jim-Bon Lin
Social Network Data Retrieving Using Semantic Technology ........................................................................................................322
Reen-Cheng Wang, Ting-Han Su, Cheng-Peng Ma, Shih-Hung Chen, and Hsi-Ho Huang
Design and Implementation of a Novel Weighted Shortest Path Algorithm for Maze Solving Robots ............................................................................................................................................................328
Behnam Rahnama, Makbule Canan Özdemir, Yunus Kisan, and Atilla Elçi

ESAS 2013 Session 2
Towards an Information Extraction System Based on Ontology to Match Resumes and Jobs ......................................................................................................................................................................333
Duygu Çelik, Askýn Karakas, Gülsen Bal, Cem Gültunca, Atilla Elçi, Basak Buluz, and Murat Can Alevli

CIF 2013: The Third International Workshop on Complex Information Flows

CIF 2013 Session 1
Efficiency of Parallelisation of Genetic Algorithms in the Data Analysis Context ........................................................................................................339
Dimitri Perrin and Christophe Duhamel

CIF 2013 Session 2
Toward an mHealth Intervention for Smoking Cessation ........................................................................................................................345
Performance Evaluation of Cloud-Based Parallel Computing ................................................................................................................351
Yuto Nakai, Dimitri Perrin, Hiroyuki Ohsaki, and Ray Walshe
Automatic Indexing and Creating Semantic Networks for Agricultural Science Papers in the Polish Language ........................................................................................................356
Piotr Wrzeciono and Waldemar Karwowski
MidArch 2013: The Seventh International Workshop on Middleware Architecture in the Internet

MidArch 2013 Session 1
Heterogeneous Closed Information Sources and Open Services ................................................................. 361  
Teruhisa Hochin

Privacy Preserved Attribute Aggregation to Avoid Correlation of User Activities across Shibboleth SPs .................................................................................................................. 367  
Motonori Nakamura, Takeshi Nishimura, Kazutsuna Yamaji, Hiroyuki Sato, and Yasuo Okabe

MidArch 2013 Session 2
Implementation and Evaluation of the Well-Distribution Algorithm for an Overlay Network .............................................................................................................................................. 373  
Takuma Oide, Atsushi Takeda, Takuo Suganuma, and Akiko Takahashi

Privacy Enhancing Proxies in Attribute Releases: Two Approaches ........................................................................ 379  
Hiroyuki Sato, Yasuo Okabe, Takeshi Nishimura, Kazutsuna Yamaji, and Motonori Nakamura

Flexible Access and Priority Control System Based on 802.1X Authentication in Time of Disaster ........................................................................................................................................ 385  
Toshiki Watanabe, Shunichi Kinoshita, Yasuhiro Yamasaki, Hideaki Goto, and Hideaki Sone

SSS 2013: The Sixth IEEE International Workshop on Service Science and Systems

SSS 2013 Session 1
Interactive Augmented Reality Game for Enhancing Library Instruction in Elementary Schools ........................................................................................................................................... 391  
Yi-Shiang Wang, Chih-Ming Chen, Chin-Ming Hong, and Yen-Nung Tsai

A Customized Visiting Route Service under RFID Environment ........................................................................ 397  
Chieh-Yuan Tsai and Bo-Han Lai

Enhancing Diversity-Accuracy Technique on User-Based Top-N Recommendation Algorithms ........................................................................................................................................ 403  
Wichian Premchaiswadi, Pitaya Poompuang, Nipat Jongswat, and Nucharee Premchaiswadi

SSS 2013 Systems Session 2
Affective Robot Enabled Capacity and Quality Improvement of Nursing Home Aged Care Services in Australia ........................................................................................................................................ 409  
Rajiv Khosla, Mei-Tai Chu, and Khanh Nguyen

Analyzing Distribution of Implicit Semantic Information in Web Services ............................................................ 415  
Xiaocao Hu, Zhilyong Feng, and Shizhan Chen
An Activity Ontology for Context-Aware Health Promotion Application .................................................................421
  Anindhita Dewabharata, Don Ming-Hui Wen, and Shuo-Yan Chou

SSS 2013 Systems Session 3
Forecasting Reading Anxiety to Promote Reading Performance Based on Annotation Behavior .................................................................427
  Ting-Yun Lu, Mi Lin, Chih-Ming Chen, and Jhih-Hao Wu
Definition and Detection of Control-Flow Anti-patterns in Process Models .................................................................433
  Zhaogang Han, Peng Gong, Li Zhang, Jimin Ling, and Wenqing Huang
A Structural Analysis of SLAs and Dependencies Using Conceptual Modelling Approach .................................................................439
  William W. Song, Aijaz Soomro, Yang Li, and Qin Liu

QUORS 2013: The Seventh IEEE Workshop on Quality Oriented Reuse of Software

QUORS 2013 Session 1
Auction-Based Resource Provisioning with SLA Consideration on Multi-cloud Systems .................................................................445
  Chi-Chung Chang, Kuan-Chou Lai, and Chao-Tung Yang
Implementation of Video and Medical Image Services in Cloud .........................................................................................451
  Chao-Tung Yang, Kuan-Lung Huang, William C. Chu, Kuan-Chou Lai, Chih-Hung Chang, and Chih-Wei Lu
Cloud Migration for SMEs in a Service Oriented Approach .........................................................................................457
  Nicolas Nussbaumer and Xiaodong Liu
An Improvement to Data Service in Cloud Computing with Content Sensitive Transaction Analysis and Adaptation .................................................................463
  Chih-Wei Lu, Chih-Ming Hsieh, Chih-Hung Chang, and Chao-Tung Yang

QUORS 2013 Session 2
A Software-Reuse Method from Model1 to SSH2 ..............................................................................................................469
  Xiaoyu Wang, Hongwei Ruan, Yan Wang, Hua Li, and Hongji Yang
A Three-Dimensional Approach to Evolving Software ........................................................................................................475
  Shang Zheng and Hongji Yang
Analyzing and Predicting Software Quality Trends Using Financial Patterns .................................................................481
  Aseel Hmood and Juergen Rilling
A Hybrid Cloud Storage Architecture for Service Operational High Availability .................................................................487
  Yen-Hung Kuo, Yu-Lin Jeng, and Juei-Nan Chen
QUORS 2013 Session 3

Delivering Dependable Reusable Components by Expressing and Enforcing Design Decisions .......................................................................................................................................................................................... 493
Andrea Calvagna and Emiliano Tramontana

Automatically Characterising Components with Concerns and Reducing Tangling .............................................................. 499
Emiliano Tramontana

Utilization of Method Graphs to Measure Cohesion in Object Oriented Software .......................................................... 505
Atakan Aral and Tolga Ovatman

An UML Behavior Diagram Based Automatic Testing Approach .................................................................................................................. 511
Chih-Hung Chang, Chih-Wei Lu, William C. Chu, Xin-Hao Huang, Dianxiang Xu,
Tse-Chuan Hsu, and Yu-Bin Lai

CDS 2013: The First IEEE International Workshop on Consumer Devices and Systems

CDS 2013 Session 1

Power Allocation Algorithms of PoE for On-Demand Power Supply .................................................................................................................. 517
Masaya Yokohata, Tomotaka Maeda, and Yasuo Okabe

CDS 2013 Session 2

An Implementation of a Still Picture Internet Broadcasting System with Audience-Oriented QoS Control for Smartphones and PCs Audience .............................................................................................................. 523
Yuki Nakano, Natsuki Hirota, Yoshia Saito, and Yuko Murayama

Towards a Multi-screen Application Model for the Web .................................................................................................................. 528
Louay Bassbouss, Max Tritschler, Stephan Steglich, Kiyoshi Tanaka,
and Yasuhioko Miyazaki

Elevator Acceleration Sensing: Design and Estimation Recognition Algorithm Using Crowdsourcing .................................................................................. 534
Tianhui Yang, Katsuhiko Kaji, and Nobuo Kawaguchi

CDS 2013 Session 3

Multiagent System for Priority-Based Load Shedding in Microgrid .................................................................................................................. 540
Takumi Kato, Hideyuki Takahashi, Kazuto Sasai, Yujin Lim, Hak-Man Kim, Gen Kitagata,
and Tetsuo Kinoshita

Projection-Based User Interface for Smart Home Environments .................................................................................................................. 546
Chin-Yang Lin and Yi-Bin Lin

A Home Gateway Box with Meter, Probe and L2 QoS Policy Edge .............................................................................................................. 550
Marat Zhanikeev
ADMNET 2013: The First IEEE International Workshop on Architecture, Design, Deployment, and Management of Networks and Applications

ADMNET 2013 Session 1.1

An ADS-B Based Secure Geographical Routing Protocol for Aeronautical Ad Hoc Networks ...........................................................................................................556
Mohamed Slim Ben Mahmoud and Nicolas Larrieu

On the Use of Congestion Information for Rerouting in the Disaster Evacuation Guidance Using Opportunistic Communication ..........................................................563
Akihiro Fujihara and Hiroyoshi Miwa

Consideration of Network Selection Criteria on IP Mobility Communications Quality by Real-Time Status and/or Statistical Information ...........................................569
Yasuhiro Ohishi, Kaori Maeda, Takemi Sahara, Naoki Hayashi, and Reiji Aibara

An Optimal Route Selection Mechanism for Outbound Connection on IPv6 Site Multihoming Environment .......................................................................................575
Takuya Yamaguchi, Yong Jin, Nariyoshi Yamai, Kiyohiko Okayama, Koki Okamoto, and Motonori Nakamura

ADMNET 2013 Session 1.2

E-Mail Priority Delivery System with Dynamic Whitelist in the Layer 3 Switch .......................................................................................................................581
Gada, Nariyoshi Yamai, Kiyohiko Okayama, Keita Kawano, and Motonori Nakamura

Domain Registration Date Retrieval System of URLs in E-Mail Messages for Improving Spam Discrimination ........................................................................587
Masayuki Matsuoka, Nariyoshi Yamai, Kiyohiko Okayama, Keita Kawano, Motonori Nakamura, and Masato Minda

Identifying User Authentication Methods on Connections for SSH Dictionary Attack Detection ............................................................................................................593
Akihiro Satoh, Yutaka Nakamura, and Takeshi Ikenaga

A Scalable Server Load Balancing Method Using IP Address Stealing .........................................................................................................................599
Kunihiro Toumura and Naokazu Nemoto

ADMNET 2013 Session 2.1

Analysis of Temporal Latency Variation on Network Coordinate System for Host Selection in Large-Scale Distributed Network ...................................................604
Hiroshi Yamamoto and Katsuyuki Yamazaki

Parallel Evolutionary P2P Networking Technique Evaluating Network Topologies Sequentially ......................................................................................................610
Kei Ohnishi and Mario Köppen

Knaster Procedure for Proportional Fair Wireless Channel Allocation ........................................................................................................616
Mario Köppen, Kei Ohnishi, and Masato Tsuru
A Distributed Protective Approach for Multiechelon Supply Systems .................................................................621
Xiaoyi Zhang, Zheng Zheng, Yueni Zhu, and Kaiyuan Cai

ADMNET 2013 Session 2.2
Target Application Grouping Function Considering Software Updates on Application Execution Control System .................................................................................................................................627
Daisuke Okamoto, Masanori Fujiwara, Keita Kawano, and Nariyoshi Yamai

Effects of Moral Judgement, Emotional Control and Problem Solving on Information Ethics of Gifted Students in Computer Science ........................................................................................................633
HanSung Kim, Sooleen Nam, WonGyu Lee, KiChun Nam, and DaiYoung Kwon

Development and Application of the Information Ethical Sensitivity Measurement Tool for College Students in Korea ...........................................................................................................639
SoAh Gwak, HanSung Kim, and WonGyu Lee

ADMNET 2013 Session 3
Method for Keeping Small Distance from Users to Servers during Failures by Link Protection ........................................................................................................................................................................................................644
Nao Maeda and Hiroyoshi Miwa

Managing Networks Independently of the Physical Topology by Service Defined Network ........................................................................................................................................................................................................650
Yasuhiro Teramoto, Rei Atarashi, Yoshifumi Atarashi, and Yasuo Okabe

IEESD & TIP 2013 Session 1
Supporting the Software Development Process Using Social Media: Experiences with Student Projects ........................................................................................................................................................................656
Reyes Juarez-Ramirez, Rafael Pimienta-Romo, and Violeta Oceguera-Miramontes

Gaining Industrial Confidence for the Introduction of Domain-Specific Languages ..............................................................................................................................................................................662
Arjan J. Mooij, Joef Hooman, and Rob Albers

Industrial Requirements on Evolution of an Embedded System Architecture ..........................................................................................................................................................................................668
Daniel Hallmans, Thomas Nolte, and Stig Larsson

IEESD & TIP 2013 Session 2
Partitioning Decision Process for Embedded Hardware and Software Deployment ........................................................................................................................................................................................................674
Gaetana Sapienza, Tiberiu Seceleanu, and Ivica Crnknovic

Refactoring and automated testing of distributed ERP systems .........................................................................................................................................................................................................................681
Khalid Ebanhesaten, Franz-Felix Füßl, and Detlef Streitferdt
IEESD & TIP 2013 Session 3

Certifiable Development Process for Information Processing in the Measurement Domain on the Base of 3W-Models .................................................................685
   Irina Gushchina, Wolfgang Fengler, Jirka Ciemala, and Detlef Streitferdt

Analyzing Distributed Java Applications by Automatic Centralization ........................................691
   Lei Ma, Cyrille Artho, and Hiroyuki Sato

Efficient Construction of Presentation Integration for Web-Based and Desktop Development Tools ........................................................................................................697
   Matthias Biehl, Josune De Sosa, Martin Törngren, and Oscar Diaz

HSNCE 2013: The Fourth IEEE International Workshop on High-Speed Network and Computing Environments

HSNCE 2013 Session 1

PetaFlow—An Example of Communication and Computational Technologies with Social Impact .................................................................703

Parallel Caching for Scientific Visualization ......................................................................................709
   Alexandre Ancel, Bruno Raffin, Ingo Assenmacher, Annemie Van Hirtum, Yo Fujiso, and Kazunori Nozaki

HSNCE 2013 Session 2

A Scalable Approach to Avoid Incast Problem from Application Layer ..............................................713
   Yukai Yang, Hirotake Abe, Ken-ich Baba, and Shinji Shimojo

Multi-constrained Routing Algorithm: A Networking Evaluation .....................................................719
   Van Dan Nguyen, Thomas Begin, and Isabelle Guérin-Lassous

An Architectural Design of a Job Management System Leveraging Software Defined Network ........................................................................................................724
   Yasuhiro Watsaba, Susumu Date, Hirotake Abe, Kohei Ichikawa, Hiroaki Yamanaka, Eiji Kawai, and Haruo Takemura

A Note on the Accuracy of Several Existing Approximations for M/Ph/m Queues .................................................730
   Thomas Begin and Alexandre Brandwajn
IWFIT 2013: The First IEEE International Workshop on Future Internet Technologies

IWFIT 2013 Session 1

A Practical Study on Distributed Resolution Service for ICN ......................................................... 736
  Yunzheng Zhu and Akihiro Nakao

Service-Oriented Router-Based CDN System: An SoR-Based CDN Infrastructure Implementation on a Real Network Environment ................................................................. 742
  Janaka Wijekoon, Shinichi Ishida, Erwin Harahap, and Hiroaki Nishi

Packet Classification Using Multi-iteration RFC ................................................................. 748
  Chun-Hui Tsai, Hung-Mao Chu, and Pi-Chung Wang

DRANs: Resilient Disaster Recovery Access Networks ................................................................. 754
  Quang Tran Minh, Kien Nguyen, and Shigeki Yamada

IWFIT 2013 Session 2

Flow Control for Higher Resiliency in Wide Area Distributed Cloud Computing ................................. 760
  Hitoshi Yabusaki, Masakuni Agetsuma, Hiroshi Nakagoe, Koichi Murayama,
  Hiroyuki Osaki, Masami Hiramatsu, and Takatoshi Kato

Hybrid Control Model for Flow-Based Networks ........................................................................ 765
  M.M. Othman Othman and Koji Okamura

Author Index ................................................................................................................................. 771
