11th International Conference on Fast Sea Transportation

(FAST 2011)

Honolulu, Hawaii, USA
26-29 September 2011

Editors:

Todd J. Peltzer

# CONTENTS

**T-Craft, Surface Effect Ships (SES), and Air Cushion Vehicles (ACV)**

<table>
<thead>
<tr>
<th>Section</th>
<th>Title &amp; Authors</th>

</table>
## Computational Methods, Modeling, and Simulation

<table>
<thead>
<tr>
<th>Paper</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>A9-1</td>
<td>Study on Linear 3D Rankine Panel Method for Prediction of Semi-Displacement Vessels’ Hydrodynamic Characteristics at High Speed</td>
<td>Babak Ommani and Odd M. Faltinsen</td>
</tr>
<tr>
<td>A9-2</td>
<td>URANS Simulation of Catamaran Interference</td>
<td>Wei He, Teresa Castiglione, Mani Kandasamy, and Frederick Stern</td>
</tr>
<tr>
<td>A9-3</td>
<td>Solving Nonlinear Wave-Body Interaction Problems with the Pre-corrected Fast Fourier Transform (pFFT) Method</td>
<td>Sheguang Zhang, Kenneth Weems, and Woei-Min Lin</td>
</tr>
<tr>
<td>A10-1</td>
<td>Investigation of Skirt Dynamics of Air Cushion Vehicles under Non-linear Wave Impact Using a SPH-FEM Model</td>
<td>Qing Yang, Van Jones, and Leigh McCue</td>
</tr>
<tr>
<td>A10-2</td>
<td>Anisotropic Grid Adaptation for RANS Simulation of Ship Flow</td>
<td>Michel Visonneau, Ganbo Deng, Patrick Queutey, and Jeroen Wackers</td>
</tr>
<tr>
<td>A13-1</td>
<td>Simulation of Maneuvering in Waves for a High-Speed Surface Effect Ship</td>
<td>David C. Kring, Mealan K. Parish, William M. Milewski, and Benjamin S.H. Connell</td>
</tr>
<tr>
<td>B2-3</td>
<td>Comparison of Turbulence Models for Simulating Flow in Waterjets</td>
<td>Xian Luo, Brenden Epps, Chrysostomos Chryssostomidis, and George Em Karniadakis</td>
</tr>
<tr>
<td>B9-1</td>
<td>Hydroelasticity of Marine Vessels Advancing in a Seaway</td>
<td>Suvabrata Das and Kwok Fai Cheung</td>
</tr>
<tr>
<td>B9-2</td>
<td>Application of SPH in Fluid-Structure Interaction Problems Involving Free-Surface Hydrodynamics</td>
<td>Ruben Paredes and Len Imas</td>
</tr>
<tr>
<td>B9-3</td>
<td>Validation of a Time Domain Panel Code for High Speed Craft Operating in Stern Quartering Seas</td>
<td>Frans van Walree and Pepijn de Jong</td>
</tr>
<tr>
<td>B11-3</td>
<td>Numerical and Experimental Evaluation of Waterjet Propelled Delft Catamarans</td>
<td>Manivannan Kandasamy, Svetlozar Georgiev, Evgeni Milanov, and Frederick Stern</td>
</tr>
<tr>
<td>B13-1</td>
<td>Hydrodynamic Forces on High-Speed Ships in Forced Vertical Motions</td>
<td>Hui Sun and Odd M. Faltinsen</td>
</tr>
</tbody>
</table>

## Optimization

<table>
<thead>
<tr>
<th>Paper</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>A6-3</td>
<td>Applying Soft Constraints to Multi-Disciplinary Design Optimization using Fuzzy Logic</td>
<td>Brian J. Cuneo, Kevin J. Maki, and David J. Singer</td>
</tr>
<tr>
<td>B5-3</td>
<td>Optimization of Hull Structures for a 60 Meters MegaYacht</td>
<td>Dario Motta, Jean-David Caprace, Philippe Rigo, and Dario Boote</td>
</tr>
<tr>
<td>B8-1</td>
<td>Optimization of Waterjet Propelled High Speed Ships-JHSS and Delft Catamaran</td>
<td>Manivannan Kandasamy, Wei He, Tomohiro Takai, Yusuke Tahara, Daniele Peri, Emilio Campana, Wesley Wilson, and Frederick Stern</td>
</tr>
<tr>
<td>B8-3</td>
<td>Hydrodynamic Optimization of Multihull Ships</td>
<td>Hyunyul Kim and Chi Yang</td>
</tr>
<tr>
<td>C4-2</td>
<td>CFD-Based Multiobjective Optimization of Waterjet Propelled High Speed Ships</td>
<td>Yusuke Tahara, Takanori Hino, Manivannan Kandasamy, Wei He, and Frederick Stern</td>
</tr>
</tbody>
</table>
C4-3  Multi-Objective Particle Swarm Optimization of a Planing Craft with Uncertainty ........................................ 273
Joshua T. Knight, Frank T. Zahradka, David J. Singer, and Matthew D. Collette

C8-1  Multi Objective Optimization under Uncertainty for Catamaran Preliminary Design ........................................ 280
J.M. Vasconcellos and H.B. Moraes

C9-3  Dual-operating-point blade optimization for high-speed propellers ................................................................. 286
Brenden Epps, Oscar Víquez, and Chryssostomos Chryssostomidis

C11-1  Automatic Parametric Hull Form Optimization of Fast Naval Vessels ......................................................... 294
Iacopo Biliotti, Stefano Brizzolara, Michele Viviani, Giuliano Vernengo, Danilo Ruscelli, Mauro Galliussi, Domenico Guadalupi and Andrea Manfredini

**Hydrodynamics**

A10-3  Nonlinear Nearshore Wave Environment for Ship Motion ..................................................................................... 302
Wenting Xiao, Yuming Liu, and Dick K.P. Yue

A11-1  Re-evaluation of Resistance Prediction for High-Speed Round Bilge Monohull Forms ....................................... 311
Prasanta K Sahoo, Heather Peng, Jae Won, and Dileepan Sangarasigamamy

B6-2  Experimental Investigation of the Lift and Interference of Asymmetric Planing Catamaran Demi-Hulls .................... 320
Michael G. Morabito

B8-2  The Influence of Catamaran Hull Form on Added Resistance in Head Seas ............................................................ 329
Gregor J. Macfarlane and Nikki Daire

B10-1  Calm water and Seakeeping Investigation for a Fast Catamaran ....................................................................... 336
R. Broglia, B. Bouscasse, B. Jacob, A. Olivieri, S. Zaghi and F. Stern

B10-3  Stern End Bulb for Energy Enhancement and Speed Improvement .............................................................................. 345
Gabor Karafiath

B11-2  An Investigation into the Effect of Section Shape on the Interference Resistance of Catamarans ......................... 355
Cullen Sarles, Bradley Gelles, and Amanda Malarkey

B12-1  Pressure Sensor Arrays to Optimize the High Speed Performance of Ocean Vehicles ....................................... 363
Vicente I. Fernandez, Jeff Dusek, James Schulmeister, Audrey Maertens, Stephen Hou, Karthik S. Sekar, Jason Dahl, Jeffrey H. Lang, and Michael S. Triantafyllou

B13-2  Effects of Shallow Water on Catamaran Interference ............................................................................................. 371
Teresa Castiglione, Wei He, Frederick Stern, and Sergio Bova

B13-3  Twin-Hull Formation Cruising for Efficiency ........................................................................................................ 377
Livia Cohen

C1-2  Hydrodynamic Trends in Ferry Design ...................................................................................................................... 382
John S. Richards, Oliver Reinholz

C3-3  A Hybrid Method for Predicting Lift and Drag on Semi-planing/Semi-displacement Hull Forms ........................... 387
Brandon M. Taravella, William S. Vorus, and Lothar Birk

C10-1  Investigation of Cylinder Planing on a Flat Free Surface ........................................................................................ 396
Timothy Yen, Michael Morabito, Len Imas, John Dzielski and Raju Datla

C10-3  Measurements and Computational Predictions of A Deep-V Monohull Planing Hull .................................................. 404
T. C. Fu, R. Akers, T. O’Shea, K. Brucker, D.G. Dommermuth, and E. Lee

C11-2  A Method for Resistance Prediction in the Design Environment ............................................................................. 413
William J. Rosemurgy, Deborah O. Edmund, Kevin J. Maki, and Robert F. Beck
C11-3 Hydrodynamic and Supportive Structure for Gated Ship Sterns - Amphibious Ship Stern Flap

Dominic S. Cusanelli

Propulsion, Maneuvering, and Control

A11-3 Numerical Investigation of the Impact of SES-Waterjet Interactions and Flow Non-uniformity on Pump Performance

Yin Lu Young, Brant R. Savander, and Matthew R. Kramer

A12-2 Experimental and Simulation Studies on Fast Delft372 Catamaran Maneuvering and Course Stability in Deep and Shallow Water

Evgeni Milanov, Valya Chotukova, and Frederick Stern

B6-3 Nonlinear Adaptive Model Predictive Control for Ship Path-Following Using Parametric Neighbouring Extremal Approach

Lingfeng Gao, Reza Ghaemi, and Jing Sun

B7-3 Development of an Emergency Trip System in Response to a Ride Control System FMEA

Robert Ranzenbach and Jeff Bowles

C5-1 Study of a Novel Air Augmented Waterjet Boost Concept

Alon Gany and Aviad Gofer

C5-3 Hydrodynamics of Surface-Piercing Outboard and Sterndrive Propulsion Systems

John O. Scherer and S.K.R. Patil

C7-1 An Improved Z-Drive with Contra-Rotating Propellers for High-Speed Applications

R. Schulze and A. Weber

C7-2 Application of the new FORTJES® Z-drive from REINTJES on planing vessels

A. Weber and R. Schulze

Structures and Materials

A5-3 Structural Evaluation of Metallic and Composite Material Systems Used for T-Craft Hull Structure

Himat J. Garala

B1-1 Modeling the Constitutive Behavior of Polymer Foams

Victor L. Berdichevsky and John N. Herman

B1-2 Numerical Simulation of a Composite Ship under Hydrodynamic and Blast Loads using Fluid Structure Interactions

Siyuan Ma and Hassan Mahfuz

B2-1 Structural Health Monitoring of Composite T-Joints Based on Distributed Effects of Localized Damages

Valery Pilipchuk, Ihab Grace, Raouf Ibrahim and Emmanuel Ayorinde

B2-2 An Holistic Approach to Design and Construction of Composite Ships

Nere G Skomedal and Arve Pedersen

B3-1 Modes of Vibration of High Speed Ship Hull Sections

Michael R. Davis, Gary Davidson, Timothy Roberts, and Christopher Cato

B3-2 Lifecycle Fatigue Management for High-Speed Vessels Using Local Approaches

Jiandao Zhu and Matthew Collette

B3-3 Computational Assessment of Build Strategies for A Titanium Mid-Ship Section

Pingsha Dong and Larry DeCan
B4-1 Comparison of Long-term Fatigue Damage in Bulk Carrier, VLCC and Container Carrier
Subjected to Wave-induced Vibrations.................................................................547
Kazuhiro Iijima, Naoki Itamura, and Masahiko Fujikubo

B4-2 Life-Cycle Ship Reliability Assessment, Damage Detection, and Optimization ........................................555
Dan M. Frangopol, Paolo Bocchini, Alberto Decò, Sunyong Kim, Kihyon Kwon, Nader M. Okasha, Duygu Saydam, and Liming W. Salvino

B4-3 Global load estimations for a 75 Meter FRP Composite SES vessel using a scaled model
instrumented with a network of fiber optic sensors........................................61
Alf E. Jensen, Jon Taby, Karianne Pran, Arve Pedersen, and Egil Jullumstrø

B5-1 Investigation of Wave Impact and Whipping Response on the Fatigue Life and Ultimate
Strength of a Semi-Displacement Patrol Boat..................................................569
Rubin Sheinberg, Christopher Cleary, Karl Stambaugh, and Gaute Storhaug

B5-2 A Comparison of Numerical Methods to Predict the Progressive Collapse of Lightweight
Aluminium Vessels ................................................................................................577
Simon Benson, Jonathan Downes, and Robert S. Dow

B12-3 Structural Responses of High Performance Sailing Yachts to Slamming Loads ........................................585
Tom Allen, Mark Battley, Pascal Casari, Benoit Kerling, Ivan Stenius, and Joacim Westlund

C12-1 Bending Tests of Inflatable Dropstitch Panels ..............................................593
Jaye Falls and Jennifer K. Waters

Seakeeping, Seaworthiness, and Slamming

A7-2 SES Seakeeping Motion in Transforming Near-Shore Head Seas..........................601
Manhar Dhanak

A7-3 Non-linear roll motions of a frigate-type trimaran............................................607
Adrian S. Onas and Raju Datla

A8-1 Seakeeping Analysis of a Medium Speed Twin-Hull Containership ....................615
George Zaraphonitis, Gregory J. Grigoropoulos, Dimitra P. Damala, and Dimitris Mourkoyannis

A12-1 Dynamic Performance of the NTUA Double-Chine Series Hullforms in Random Waves ...............623
Gregory J. Grigoropoulos and Dimitra P. Damala

A12-3 On the Lateral Accelerations of Multihulls compared against the Cruise Performance
requirements of the HSC Code Annex 9 – a Safety Issue ..................................630
Tony Armstrong

B7-1 Seakeeping Evaluation and Loads Determination of a High-Speed Hull Form with and without a
Bow Lifting Body.....................................................................................................638
Allen Engle, Van Lien and Christopher Hart

B7-2 Hydroelastic Effects in Slamming Loaded Panels .............................................644
I. Stenius, A. Rosén, M. Battley, T. Allen, and P. Pehrson

B10-2 Hydroelastic Wedge Entry and Exit ..................................................................653
Dominic J. Piro and Kevin J. Maki

B11-1 Influence of Centrebow on Motions and Loads of High-Speed Catamarans .................661
Shinsuke Matsubara, Giles Thomas, Michael R. Davis, Damien S. Holloway, and Tim Roberts

B13-4 Simulation of Free Fall Lifeboats – Impact Forces, Slamming and Accelerations ..............669
Vidar Tregde, Trygve Espeland Halvorsen, and Kjell Ove Underhaug
