TABLE OF CONTENTS

Spontaneous Construction of Higher Order Voronoi Diagram ........................................................................ 1
Hongmei Yang, Huaying Yin

On-Line Modeling of AUV’s Maneuvering Motion Based on Sliding Window SVM ............................................. 5
Pang Yongjie, Hu Zhonghui, Zhang Guocheng, Sun Yushan

Stochastic Simulation of River Water Quality Risk Assessment Under Coupling Effect of Reclaimed Water Recharge and Inner Source Release .............................................................. 11
Han Yan, Zhihong Zou

The Research of Image Feature Matching Method Based on CH-SURF ................................................................ 14
Zhaodi Wang, Jicai Deng

Tolerance-control Solutions to Interval Linear Equations .................................................................................. 18
Li Tian, Wei Li, Qin Wang

Based on RFID and NFC Technology Retail Chain Supermarket Mobile Checkout Mode Research .................. 23
Fugui Ruan, Daijiang Chen

A Data Fusion Algorithm Based on Improved LEACH Clustering Routing for Wireless Sensor Network .............. 28
Shiyue Zhang, Jiande Wu, Xiaodong Wang

Research on KAAS-based Social Knowledge Collaboration Service Mechanism and Application .................. 32
Yuan Rao, Shaочuan Chen

The Design and Implementation of Satellite Communication Signal Spectrum Automatic Monitoring System ............................................................ 37
Liu Mingbo, Wang Zhong

Water Demand Forecasting Based on Adaptive Extreme Learning Machine .................................................... 42
Jinming Jia, Shengyue Hao

Study on the Method of CGF Intelligent Decision-making ................................................................. 46
Xiaoming Du, Shuchao Tian, Xuefeng Xu, Gu Ping

Stereo Image Watermarking Method for Authentication with Self-Recovery Capability ....................................... 49
Jing Wang, Gangyi Jiang, Fen Chen, Xingbin Zeng, Xiaodong Wang, Mei Yu, Yo-Sung Ho

ERWD: A Measure for Nearest-Neighbor Search in Undirected Graph .................................................... 54
Junyin Wei, Binghui Qi, Mingxi Zhang

ICA and BP Neural Network Based Fingerprint Recognition ........................................................................ 59
Lu Zhao, Wenyong Wang

Interacting Multiple Gaussian Particle Filter ....................................................................................... 62
Yanwen Qu

Research and Development on Supply Chain Collaboration Management System ........................................... 67
Yong Cen

Convergence and Parameters Analysis of Shuffled Frog Leaping Algorithm .................................................... 71
Liangguo Wang, Yang Gong

Expert System of Fault Diagnosis of Dry-mixed Mortar Fieldbus Control System ........................................ 77
Huan Zhang, Shuai Shang, Dongwei Wang, Jiasheng Wang, Ranheng Yang

Competitive Decision Algorithm for the Rooted Delay-constrained Minimum Spanning Tree ..................... 82
Xiaohua Xiong, Xuemin Chen, Aiheng Ning

AMDS: Sentence Extraction Based Proficient Framework For Multi-Document Summarization .................. 87
C. Balasubramaniam, K.G. Srinivasagan, K. Duraiswamy

The Number of Economic Relations Analysis of Regional per Capita GDP and Quality Level in China .......... 95
Wuyi Zhang, Yunfei Yang

Study on the Model of Quality Safety Information Diffusion ......................................................................... 101
Wuyi Zhang, Yunfei Yang, Linjing Tao

Discussion on SME Financial Management Problems and Countermeasures .............................................. 107
Yang Xuhui, Zhang Ruoxi

Fuzzy Control of Obstacle Avoidance for Mobile Robot Based on Single Chip Microcomputer .................. 112
Ling Wang

Cognitive Component Analysis of Basic Mathematics Achievement Assessment ........................................ 117
Yen-Wen Yang
Study on Dielectric Property of BST of Gradient Thick Films ................................................................. 120
Maoyan Fan, Lifang Zhang
Systematic Analysis on Pipeline Leak Detection and Location ........................................................................... 124
Yang Qibin, Sun Wei
A Numerical Method for Nonlinear Inverse Heat Conduction Problem ......................................................... 131
Ai-lin Qian, Guangfu Wang
Effective and Efficient Ways of Hybridizing GA with Various Methods While Reviewing a Wide
Variety of Hybrid Genetic Approaches ........................................................................................................... 136
Naifisa Maqbool, Chaoyong Zhang, Mudabbir Baddir
Ceramic Products Recommendation Based Improved Collaborative Filtering .................................................. 142
Huaying Li, Yilai Zhang, Gongxun Cheng
Fusion Recognition: Fingerprints and Handwritten Signature Recognition Fusion Based on the
Bayesian Algorithm ........................................................................................................................................ 146
Xiaojie Yang, Yunyun Zhou, Mandan Liu
Checking Strong Optimality of Interval Linear Programming ........................................................................... 151
Jia-Jia Luo, Wei Li
The Effect of Tourism Competitiveness Relating to Tourist Arrivals and Revenue in East Asia ......................... 155
Ming-Lang Yeh, Lai-Chu Lin, Hsieh Ya-Ju, Chin-Hsin Chiu
Minimizing the Number of Tardy Jobs with Gammadistributed Processing Times ........................................ 160
Haohao Li
Functionally Equivalent Clone Detection Using IOT-Behavior Algorithm ...................................................... 165
Xia Li, Tianjian Wang, Xiaohong Su, Peijun Ma
The Improved AdaBoost Algorithm Application in Image Retrieval ................................................................ 170
Si Qing Zhang, Run Zheng
Secure Mechanism for Remote Bitstream Updates of Reconfigurable Computing Platform ........................ 174
Run-feng Huang, Qing-lei Zhou
Application of Count Data Models in Inbound Tourism Source Markets Based on Data Mining
Technology ....................................................................................................................................................... 179
Changfeng Yin
A Robust Region based Active Contours Model for Image Segmentation .............................................................. 184
Jiandong Bao, Fan Jiang
The Research on the Performance Evaluation of Civil Servant Based on Competency Model ....................... 189
Lei Zhao
An Adaptive Bayesian Network Inference Algorithm for Network Situation Awareness .................................. 193
Jue Li, Lingwei Chu, Cheng Dong, Xiaoyuan Lu
Neural Network and Improved Method for Wind Power Prediction ........................................................................ 198
Rui Li
Design and Implementation of the Inference Machine of an Intelligent Ultrasonic Emulsification
Instrument ......................................................................................................................................................... 203
Aili Li, Zhiwen Yang, Xiaoyu Tu, Xuefeng Zhen
Rehabilitation Evaluation Model of a Rehabilitation Robot Based on Fuzzy Comprehensive
Evaluation ..................................................................................................................................................... 207
Lei Chen, Chang-niu Yang, Wen-quan Huang, Ze-gang Sun, Liu Yu-cong
Malicious Code Detection Based on Software Fingerprint .............................................................................. 211
Zhimin Yin, Xianzhan Yu, Linhua Niu
Application Analysis of Wall and Deck Numerical of Modelling Composite Ship EN AC-AlSi10Mg
(b)+SiC P by Using ANSYS ver. 12.0 ............................................................................................................ 216
P.H. Tjahjani, Septia Hardy Sujianti
Information security based on Resource Conflict with SSH Architecture .......................................................... 220
Su Yu, Ghassan Azar, Yin Wang, Zhou Wei
Optimizing Gaze Typing with Pupil Size for People with Severe Motor Disabilities ...................................... 225
Xiangsheng Wang
Research on the Conceptual Modeling Method Base on System Six-view and Ontology ................................ 229
Wanghu Su, Yanqi Bai, Xueming Zhang, Chuang Gu
Enterprise Network Business Process Incompatible Vulnerability Detection Method Based on FPN
Model .............................................................................................................................................................. 233
Yan Huaizhi, Ye Wenwen
Demonstration of an Optical Switch Based on SOA-MZI Operation at 10 Gbit/s ......................................................... 237
Yalin Guan, Ruidong Wang

The Influence of Noisy Data On Skype Traffic Classification ......................................................................................... 240
Linhua Niu, Xiangchun Yu, Zhimin Yin

A New DFT-HQ Channel Estimation Algorithm in OFDM Systems for Sparse Multipath Channels ....................... 244
Chen Li, Liu Yuan-an, Gao Jin-chun, Xie Gang

The Research and Development of Cross-fault Site Based Information Systems .......................................................... 248
Yue Wenchao, Wang Ruiqi, Wang Ning

A Solution of Indoor Positioning System ......................................................................................................................... 256
Fu Chunchang
