Contents

Reform and Exploration on Training Modes for Skill Enhanced Vocational Teachers’ Education
Nongfen PAN, Xuewen DU, Feiyan LOU .................................................................(1)

Investigation of Case Teaching Methodology in Software Engineering Course for Education Technology
Yunxiang ZHENG, Tianxiang ZHENG .................................................................(5)

Entrepreneurship Education System Research in China’s High School Based on Competency Model
Jie ZHANG, Qingchun WU, Ci REN, Yiping LIU .........................................................(9)

The Preliminarily Exploration for Cultivation of University Students in “Smile Curve” Model
Yun SHI, Jie ZHANG, Yiping LIU .................................................................(15)

Teaching Reform of Advanced Programming Language Course and Its Effect Analysis
Yunxiang ZHENG, Tianxiang ZHENG .................................................................(20)

Concept Map Construction for Cooperative Learning Improvement
Zi YE, Tiequan CAI .................................................................(24)

A New Problem Solving Oriented Knowledge Organization Method for Programming Language Textbook
Jiyan LI, Guojin ZHU .................................................................(29)

Exploring of Teaching Reform in the Course of Database Principles and Applications Based on CDIO Mode
Yaping HUANG, Xiaohong CHEN, Yongliang ZHANG .........................................................(32)

Research on Sources Pattern Learning Strategy Based on Internet
Baoxian JIA .................................................................(37)

PBL Teaching Mode and Application in Course of Principles and Applications of Database
Yaping HUANG, Xiaohong CHEN, Yongliang ZHANG, yonggu WANG, Haojun LI .................................................................(40)

Application of Virtual Reality Technology in the Primary English Auxiliary Software
Jianyong LOU, Xingxing LI .................................................................(45)

Building a Student-Centered Innovation-Oriented Distance Learning Environment
Ping JIANG, Qian YU .................................................................(48)

Application of Computer Software in the Practical Teaching of Crowd Evacuation
Yumin TIAN .................................................................(55)

The Digit Publishes the Personnel Training Pattern Research
Liangfu JIANG, Jingliang CHEN, Yongqin SHI .................................................................(59)

Exploration of Teaching Methods of Machinery Manufacturing Technology Based on CDIO Model
Feiyan LOU, Nongfen PAN, Xuewen DU .................................................................(63)

The Reformation and Exploration of Practice Teaching in Automation Specialty
Zhi WENG, Ze ZHANG, Yongxin LIU, Runjing ZHOU, Zixian ZHAO, Li ZHU .................................................................(66)

Research on Assessment and Improvement of the Thinking Course
Yi CHENG, Lei FAN .................................................................(69)

The Misunderstanding in College Innovation Education
Jianjun YUN, Guanlong LOU, Jie TANG .................................................................(73)

Innovation Exploration of Higher Education Teaching Reform
Zhiling WU, Xukong BAN .................................................................(76)

Industry-University-Government-Research on Cultivating Method of Entrepreneurial Talents of Management Major
Jiangbo PAN, Daowei FANG, Yang GANG .................................................................(79)

Interaction and Alignment in Language CAS
Xiaoyan ZHANG .................................................................(83)
Schema Theory and the Teaching of Second Language Listening Comprehension

Dichen ZHANG........................................................................................................(87)

Implementing an In-depth Expanded Science Model in Science Education
