2013 IEEE International Conference on Teaching, Assessment, and Learning for Engineering

(TALE 2013)

Bali, Indonesia
26-29 August 2013
# TABLE OF CONTENTS

Steps to Increase Student Engagement and Retention in First Year Engineering ........................................... 1  
C. Watterson, W. Browne, D. Carnegie,

From Traditional Learning into e-Learning: Comparing Students Response To Promote e-learning in College Education ................................................................. 7  
H. Sarjono, S. Candra, N. Setiadi

Influence Factors on the Content Quality of Learning Management System: A Case Study in a Secondary School .......................................................................................... 12  
C. Yang, L. Chien, H. Kuo, C. Chang

Extraction of Relationships Between Page Transition and Understanding for Contents .................................. 18  
E. Watanabe, T. Ozeki, T. Kohama

Increasing Participation From Underrepresented Minorities in STEM Through Robotics Clubs .................. 24  
T. Yuen, L. Ek, A. Scheutze

Learning the Basics of Microcontroller Starter Kit Boards AVR (eSnack) .................................................. 29  
B. Parahong

Empowering Communities On Line ...................................................................................................................... 37  
S. Martin, M. Castro, D. Gago, D. Torres

PMBOK Simulator for Acquiring Decision Making Competencies in Project Management Education ........... 41  
Y. Tachikawa, T. Nakamura

Implementing a Sustainable Methodology for Assessment of Course Outcomes and Program Outcomes in an Indian Engineering Institute .......................................................... 51  
R. Mahadevan, N. Shivaparakash, N. Khobrogade, K. Raju, F. Luo

Developing Assessment Criteria for Portfolio Assessed Introductory Programming .................................. 55  
C. Cain

Improving Retention Rates at First Year for Modern Engineering Students ................................................... 61  
D. Carnegie, C. Watterson

Examining Student Progress In Portfolio Assessed Introductory Programming ........................................... 67  
A. Cain, C. Woodward, S. Pace

A Rubric to Evaluate Learning Management Systems ....................................................................................... 73  
V. Ramesh, C. Ramanathan

Do Ethics Courses Make Engineering Students More Ethical? ................................................................. 78  
I. Skinner, G. Bushell

The Rolling Discussion Technique for Engineering Design Activities .......................................................... 83  
S. Jin, Y. Lee, C. Nam

Roles and Effects of Activities of a Student Project Team in Engineering Education for University Students in Lower Grades ................................................................. 87  
M. Hasegawa

Analysis and Design of Learner Quanta Graph Properties for Efficient Query Processing in an Adaptive Dynamic Courseware ................................................................................. 91  
K. Halder, N. Chaki, R. Dasgupta

Development of a Training Mode with Enterprise Cooperation Project for Professional Master ................... 95  
X. Zhao, M. Ling, Y. Xu, L. Zheng

Use Data Warehouse and Data Mining to Predict Student Academic Performance in Schools: A Case Study (Perspective Application and Benefits) ........................................... 98  
Y. Kurniawan, E. Halim

Helping Students Track Learning Progress Using Burn Down Charts ......................................................... 104  
C. Woodward, A. Cain, S. Pace, A. Jones, J. Rapper

Teaching Mathematics to Electrical Engineering Students By Electrical Engineering staff in College of Technology in Japan ......................................................................................... 110  
M. Tokuda, A. Fujimoto, T. Mori, T. Sakama

Tutoring Actions Based on Learning Portfolio for Writing Assignments in Engineering ............................. 115  
F. Tobajas, A. Morales, V. De Armas

Students’ Perception on the Use of Visual Tilings to Support Their Learning of Programming Concepts .................................................................................................................. 121  
H. Liang, C. Fleming, J. Morey, K. Sedig, K. Man

Anomalies Detection in Evaluation of Essay Type Answers by Multiple Evaluators ..................................... 127  
A. Shukla, B. Chaudhary
Using Social Network Technology as a Peer-Mediated Learning Tool in a Computer Course ............................................................................................................... 289
  F. Lin, D. Lin

Effectivity Analysis of Approaches to Creativity Education for Engineering Students ......................................................................................................................... 295
  J. Han, S. Kim

Obtaining University Practical Competences in Engineering by Means of Virtualization and Cloud Computing Technologies ............................................................ 301

Introducing Hands-On Experience to a Massive Open Online Course on OpenHPI ........................................................................................................................................ 307
  C. Willems, J. Jasper, C. Meinel

Enhancing a Virtual Security Lab With a Private Cloud Framework ............................................................................................................................................... 314
  D. Moritz, C. Willems, M. Guderbauer, P. Moeller, C. Meinel

Meuruno: An SMS-based Learning System That Nudge Students to Review Previously Taught Materials ........................................................................................................ 321
  R. Davood, S. Muchalilil, K. Munadi

Improving the Teaching of Computer Networks Through the Incorporation of Industry Based Training Courses ........................................................................................................ 325
  R. Matsuda, L. Butkus, T. Kralivcius, K. Man, H. Liang

Investigation on Function Extension ofExtensible Learning Support System Architecture to Group Learning Environment .................................................................................................................. 335
  K. Nakabayashi, Y. Morimoto

The Influence of Learning Model Towards Student Academic Achievements in the Management Department, School of Business Management and Information System, at Bina Nusantara University ........................................................................................................ 344
  Titan, Harisno

Cultivating Design-Thinking in Freshmen: The Evolution of the KU Freshman Design Course ............................................................................................................ 350
  S. Balawi, G. Hitt, K. Khalaf, B. Hirsch, L. Powell

  G. Choi, S. Park

GLSA Based Online Essay Grading System ................................................................................................................................................................................................. 358
  A. Ratna, H. Artajaya, B. Adhi

Implementation of Constructive Alignment Approach in Department of Electronic Engineering, Faculty of Engineering, Universiti Malaysia Sarawak ............................................................................ 362
  D. Salleh, A. Lit, K. Lias

Exploring Students’ Perceptions of Learning Management System: An Empirical Study Based on TAM .................................................................................................................. 367
  W. Goh, J. Hong, W. Gunawan

Developing Methodologies for the Presentation of Graphical Educational Material in a Non-Visual Form for Use by People with Vision Impairment ................................................................................................. 373
  N. Mohammadi, I. Murray

Method of Measuring Doppler Shift of Moving Targets Using FMCW Maritime Radar ............................................................................................................................................... 378
  W. Sedione

Promoting Holistic Education Through Design of Meaningful and Effective Assignments in Sustainable Engineering .................................................................................................................. 382
  P. Balan, G. Manickam

A Mobile Virtual Environment Game Approach for Improving Student Learning Performance in Integrated Science Classes in Hong Kong International Schools ........................................................................................................ 386
  T. Wang, D. Towey

BeA: Management of Handwritten Exams on the Cloud ................................................................................................................................................................................................. 389
  M. Llamas-Nistal, J. González-Tato, M. Caeiro-Rodríguez, M. Manso-Vázquez

Short MATLAB Introductory Laboratory for Electronic Engineering Undergraduate Students: A Three Weeks Hands-on Syllabus: A Case Study .................................................................................................................. 400
  H. Ibrahim

Developing Educational Smart Grid Laboratory: Part I: Upgrading Stage .................................................................................................................................................. 404
  A. Gaouda, A. Abol-Rabou, A. Dahir

Web-Based Smith Chart Learning Helper: A Guessing Game for Quarter-Wavelength Transformer .................................................................................................................. 410
  C. Huang, Y. Peng, K. Tsai

Bringing Signal Processing to High School Students – A Novel Gravity Measurement Experiment .................................................................................................................. 419
  E. Aboutanios

Visiting a Milk Factory Without Gumboots: Students’ Attitudes Towards a Virtual Field Trip .................................................................................................................. 423
  E. Rahim, A. Dönser, K. Unsworth, A. McKinnon, M. Billinghurst, P. Gostomski, A. Herritsch

An Adaptive Learning System Using Plug and Play Ontologies .................................................................................................................................................. 429
  S. Heiyanthudawage, R. Schwitter, M. Orgun
Framework to Reduce Cycle Time for Enhancing Productivity in Associates .......................................................... 435
J. Reddyypoga, P. Shankar, S. Kumar

An Interactive Web-based IDE Towards Teaching and Learning in Programming Courses .................................. 439
H. Tran, H. Dang, K. Do, T. Tran, V. Nguyen

Improving Digital Electronics Education with FPGA Technology, PBL and Micro Learning Methods: A Case Study From FPGA Based Digital Electronics Education Project (FPGA_b_DEEP) ......................................................... 445
V. Kiray, S. Demir, M. Zhaparov

Project Based Learning of Entrepreneurship in Electrical Engineering Curriculum ............................................. 449
Linavati

Facilitating Teachers in Developing Online PBL Courses .................................................................................. 454
Y. Miao, M. Samaka, J. Impagliazzo

Impact of Tertiary Studies on Development of Students’ Generic Competencies: A Case Study of Associate Degree Graduates in Hong Kong ......................................................... 466
J. So, S. Lam, Y. So

A Case Study of Generic Competencies Among Science and Technology Tertiary Graduates in Hong Kong .............................................................. 472
J. So, S. Lam, Y. So

Using Mobile Technology to Enhance Teaching Reconfigurable Systems .......................................................... 478
I. Sklarova, V. Sklyarov, A. Sadunton, M. Kraus

Assessment of Ph.D (Technology) Quality in Indian Universities: AHP Based Decision Model. ......................... 484
B. Dey, J. Mechedi, R. Dey

Journaling and Sketching in Support of Formative Learning in Engineering ......................................................... 490
L. Bernold

Do “Slow Learners, Pre-School Children” Learn Number More Effectively With SOBATAKA? ......................... 495
N. Rosmin, F. Rosmin, A. Musta'amal

Innovative Workflow for Accreditation Process to Ensure Quality Engineering Education in India .................. 507
U. Kulkarni, K. Shindhe

Design and Development of a Low-Cost Student Experiments for Teaching ARM Based Embedded System Laboratory .............................................................................................................. 515
A. Kommu, R. Kanchi, R. Varadarajula

Modeling an E-Learning Tool to Cultivate Critical Thinking in Students Based on Information Needs and Seeking Behavior .......................................................... 521
M. Haghiparast, N. Hanum, N. Abdullah

Mnemonic Phrase Generation Using Genetic Algorithms and Natural Language Processing ............................ 527
J. Mountstephens

Rubric Based Assessment Plan Implementation for Computer Science Program: A Practical Approach ................ 551
M. Dawood, K. Buragga, A. Khan, N. Zaman

Advancements in Using a Machine Design Project for Teaching Introductory Electrical Engineering ................. 556
C. Lei, H. Liang, K. Man

Rule-Based Systems Made Easy With Battleship Games: A Well-Received Classroom Experience: Combination of Activity-Based and Cooperative Learning in a Competitive Environment .................................. 560
A. Srisuphab, P. Silapachote

Evaluating Multiple Choice Items In Determining Quality of Test: Mathematics Engineering Subject ............. 565
A. Aziz, T. Salleh

Enhancing VHDL Learning Through a Light-Weight Integrated Environment for Development and Automated Checking ............................................................. 570
A. Kumar, R. Panicker, A. Kassim

Professional Practice Competencies in a Work-Integrated Learning Course: Assessing Critical Reflection .................................................................................................................. 576
G. Jenkins

A Penalty Scheme for Academic Dishonesty ........................................................................................................ 580
M. Awad, B. Zogheib, H. Alazemi

Monitoring of Laboratory Work Problem Based Project Implementation ......................................................... 585
R. Hamid, S. Baharom

MATLAB GUI for Digital Communication System with Tone Jamming .......................................................... 589
T. Mathumisaranon, P. Chayratsami

Experience Integration in Different Student Competitions: In Engineering Education ..................................... 593
K. Woo, C. Leung

Automated Marking for Interactive Exercises on Heuristic Search Algorithms ............................................... 598
F. Grivokostopoulou, I. Hatzilygeroudis
