2013 IEEE 59th Holm Conference on Electrical Contacts

(HOLM 2013)

Newport, Rhode Island, USA
22 – 25 September 2013
# TABLE OF CONTENTS

Foreword ...................................................................................................................................................................... xiii
Morton Antler Lecture.................................................................................................................................................. xiv
Erle Shobert Prize Paper Award ................................................................................................................................... xv
The Armington Recognition Award ............................................................................................................................. xviii
Young Investigator Award .......................................................................................................................................... xix
The 2013 Ragnar HOLM Scientific Achievement Award ........................................................................................ xx

## 2013 HOLM Award

### Developments in Functional Surfaces for Electrical Contacts ............................................................... 1
Sophie Noel, Laboratoire de Génie Electrique de Paris

### Young Investigator Award
Chair: S. Noel
Co-Chair: C. Leung

1.1 Study of the Electrical Contact in a Fully Inkjet Printed Membrane Switch ............................................ 27
Daniele Sette, Christophe Poulain, Abdelwahhab Yakoub, Mohamed Saadaoui, Béatrice Dubois and Anne Blayo

1.2 Spreading Resistance of a Contact Spot on a Thin Film .............................................................................. 33
Peng Zhang, Y.Y. Lau and Roland S. Timsit

1.3 Influence of Large Periodic Sliding Sequences on the Electronical Endurance of Contacts Subjected to Fretting Wear ........................................................................................................................... 40
J. Laporte, S. Fouvry, O. Perrinet, G. Blondy and O. Alquier

1.4 The Effect on Switching Lifetime of Chromium Adhesion Layers in Gold-Coated Electrical Contacts under Cold and Hot Switching Conditions ........................................................................... 49

1.5 Micro-Contact Performance Characterization of Carbon Nanotube (CNT)-Au Composite Micro-Contacts ............................................................................................................................. 56
Christopher Stilson, Benjamin Toler and Ronald Coutu Jr.

### Fundamentals
Chair: M. Myers
Co-Chair: G. Haupt

2.1 Effect of A-Spot Temperature on the Temperature of External Surfaces in an Electrical Connection .......................................................................................................................... 65
C. Wilson, G. McIntosh and Roland S. Timsit

2.2 Influence of Films on the Surface of Electrical Contacts at Cryogenic Temperatures ............................. 71
Sebastian Dreier, Benjamin Kaufmann and Steffen Großmann
2.3 The Impact of Electro-Migration on Various Contact Materials .............................................................. 78  
Robert D. Malucci

Sliding Contact  
Chair: E. Smith  
Co-Chair: D. Gagnon

3.1 Erosion by Arc Discharge at Carbon Contacts in Various Automotive Fuels ........................................... 86  
Koichiro Sawa, Cheng Chan Wei and Takahiro Ueno

3.2 Research on Current-Carrying Wear Characteristics of Friction Pair in Pantograph Catenary System ................................................................................................... 92  
Zhiyong Wang, Fengyi Guo, Zhonghua Chen, Aixia Tang and Zhiling Ren

3.3 Long-Time Correlation in the Study of Sliding Electrical Contacts................................................................. 97  
C. Holzapfel

Arc Fault Safety  
Chair: J. Shea  
Co-Chair: Z.K. Chen

4.1 Characterization of EMI/RFI in Commercial and Industrial Electrical Systems ............................................ 103  
Xin Zhou, John J. Shea and Birger Pahl

4.2 Frequency Analysis to Arcing Detection and Prototyping FPGA Approach ................................................. 111  
Jinmi Lezama, Patrick Schweitzer, Serge Weber, Etienne Tisserand, Patrice Joyeux and Michaël Rabla

4.3 Arc Fault Analysis and Localisation by Cross-Correlation in 270 V DC ..................................................... 117  
Michaël Rabla, Etienne Tisserand, Patrick Schweitzer and Jinmi Lezama

4.4 The Current Level to Weld Closed Contacts .................................................................................. 123  
Paul G. Slade

Arcing I  
Chair: P. Slade  
Co-Chair: H. Czajkowski

5.1 A Comparison of Contact Attachment Methodology on the Electrical Performance of AgSnO2 Contacts ......................................................... 129  
Alexander D. Pearce and William Balme

5.2 Design Guideline of Contactors: Optimal Use of Assembled Contacts .................................................. 135  
Jean-Luc Wintz and Sébastien Hardy

5.3 The Effect of Material Composition on Dynamic Welding of Electrical Contacts ............................. 145  
Timo Mützel, Michael Bender and Ralf Niederreuther
# Diagnostics

**Chair:** G. Flowers  
**Co-Chair:** D. Moore

## 6.1 Contact Resistance Anomalies in Reed Contacts - Influence of Temperature and External Magnetic Field

R. Kwiatkowski, M. Vladimirescu and A. Zybura

## 6.2 Fault Detection of Electrical Connectors in RF Circuits Using a Wavelet Transform Approach

Jinchun Gao, Hao Zhang, Rui Ji, Chen Chen, Gang Xie and Cuiping Yu

## 6.3 Implementation of a Diagnostic Tool for Semi Permanent Electrical Contacts for a Direct Contact Force Measurement

H. Essone Obame, E. Carvou, N. Ben Jemaa, B. Cousin and R. Elabdi

## 6.4 Switch Hybridization: Micro-Arcing Model and Color Analysis

Jonathan Andrea, Philippe Bindner, Patrick Besdel and Marc Bournat

---

# Materials

**Chair:** G. Witter  
**Co-Chair:** Z.K. Chen

## 7.1 Role of Incorporated Hydrogen and Sputtered Grain Size on Tin Whiskering

E. K. Snipes, G. T. Flowers, P. Lall and M. J. Bozack

## 7.2 Usability of Silver Plating and Silver Bismuth Alloy Plating on Electrical Contacts

Yilin Zhou, Chengming Yuan and Shichao Ge

## 7.3 Switching Properties of Contacts Made of Silver-Tungsten and Silver-Tungsten-Rhenium Composite Materials

P. Borkowski, E. Walczuk, K. Frydman and D. Wojcik-Grzybek

---

# Fretting

**Chair:** D. Gagnon  
**Co-Chair:** B. Rickett

## 8.1 Understanding Field Experience of Contact Performance from Lab Fretting Tests of Model Contacts

Gunnar Andersson, Åke Öberg, Martina Grandin and Åsa Kassman Rudolphi

## 8.2 Threshold of Axial Vibration Induced Fretting in Electrical Connectors

Haoyue Yang and George Flowers

## 8.3 Degradation Phenomenon of Electrical Contacts by Using a New Micro-Sliding Mechanism - The Comparison of a New Mechanism with the Former Concerning Minima

Shin-ichi Wada and Koichiro Sawa

## 8.4 Application of the Friction Energy Density Approach to Predict Electrical Contact Endurance in a Silver-Plated Coating Subjected to Fretting Wear

O. Perrinet, S. Fouvry and O. Alquier
Modeling I
Chair: R. Malucci
Co-Chair: G. Drew

9.1 A Comparison of the Predictions of a Finite Element Model and Multiscale Model for a Rough MEMS Electrical Contact ................................................................. 243
Robert L. Jackson, Hong Liu and Dimitri Leray

9.2 Experimental and Simulated Springback after Stamping of Copper-Based Spring Materials .......... 252
Yasuhiro Hattori, Kingo Furukawa, Hiroshi Hamasaki and Fusahito Yoshida

9.3 An Asperity-Based Finite Element Model for Electrical Contact of Microswitches ................. 258
Hong Liu, Dimitri Leray, Patrick Pons and Stéphane Colin

Arcing II
Chair: H. Czajkowski
Co-Chair: X. Zhou

10.1 Particle Size Determination in Electrical Arcs Using X-Ray Scattering ............................................ 268
E. Carvou, J. L. Le Garrec, E. Yee Kin Choi and J. B. A. Mitchell

10.2 Two Different Experimental Approaches to Investigate the Influence of Gassing Polymer Walls on Switching Arcs in Miniature Circuit Breakers ..................................................... 272
Diego González, Frank Berger, Heinz Pursch and Hartwig Stammberger

10.3 A Three Dimensional CFD Analysis to Investigate the Effect of Ablative Materials and Venting Arrangement on Arc Characteristics in Low Voltage Circuit Breakers ........................................ 279
Mahesh S. Ranade, Amol Kale and Abhimanyu kumar Singh

10.4 Comparison of Transfer and Erosion Shapes on Ag and AgSnO2 Contacts Caused by Break Arc Discharges in a DC Inductive Load Circuit ......................................................... 288
Makoto Hasegawa, Keisuke Takahashi, Daichi Kawamura and Yuya Hirano

Relays
Chair: E. Smith
Co-Chair: M. Myers

11.1 A New Automated Test Equipment for Measuring Electrical Contact Resistance of Real Size Rivets ........................................................................................................ 295
Wanbin Ren, Yu Chen, Sheng Cao, Li Cui and Huimin Liang

11.2 Equivalent Circuit Modeling of Stripline RF Relay ............................................................................. 302
Le Xu, Juan Yan, Jiangzhu Song and Guofu Zhai

11.3 Single Pole Hybrid Switch .................................................................................................................. 307
Rajesh Kumar Panda and Jitendar Veeramalla
Modeling II
Chair: K. Sawa
Co-Chair: G. Horn

12.1 The Influence of Metallic and Plastic Vapors on Dielectric Breakdown for Low-Voltage Circuit Breaker after Current-Zero ..........................................................313
Venkat R. T. Narayanan, Joachim V. R. Heberlein and Christian Ruempler

12.2 Equivalent Circuit Analysis for Transient Phenomena from Elastic Contact to Breaking Contact through Metal Melting ..........................................................319
Takayuki Kudou, Noboru Wakatsuki, Nobuo Takatsu and Daisuke Hara

12.3 Study on Magneto Hydro-Dynamic and Volume of Fraction Modeling on Molten Bridge at Different Lengths and Currents ..........................................................325
Guofu Zhai, Xinyun Zhang, Xue Zhou, Huimin Liang and Yaqi Liu

12.4 Modeling of the near Electrode Physics for Simulation of Arc .........................................................330
Kedar R. Purandare and Md. Naim Ahmed

MEMS
Chair: R. Jackson
Co-Chair: R. Martens

13.1 A High Aspect Ratio Microfabricated Reed Switch Capable of Hot Switching ..............................336
Stephen Day and Todd Christenson

13.2 Evaluating the Influence of Current on the Wear Processes of Au/Cr-Au/MWCNT Switching Surfaces ..........................................................344
C. Chianrabutra, L. Jiang, A. P. Lewis and J. W. McBride

13.3 Reliability in Hot Switched Ruthenium on Ruthenium MEMS Contacts ........................................350
Anirban Basu, Ryan Hennessy, George Adams and Nicol McGruer

13.4 Contact Resistance Evolution of Au-Au Micro-Contacts with Encapsulated Ag Colloids ..............358
Benjamin Toler, Christopher Stilson and Ronald Coutu Jr.

Author Index ............................................................................................................................................... follows page 365
