2013 19th International Conference on Automation and Computing

(ICAC 2013)

London, United Kingdom
13 – 14 September 2013
## Table of Contents

### Keynote

Morphogenetic self-organisation of swarm robots for adaptive pattern formation ............1  
*Professor Yaochu Jin of Surrey University*

### Session A – 1 Control Applications 1  
*Chair: Jihong Wang & Taicheng Yang*

Bayesian recursive filtering with partially observed inputs and missing measurements ........2  
*Jinya Su, Baibing Li and Wen-hua Chen, Loughborough University*

Dynamic matrix model predictive control of coal feeder speed ......................... 8 of a supercritical power plant  
*Mihai Draganescu, Shen Guo, Jacek Wojcik, Jihong Wang, University of Warwick,  
Yali Xue and Qirui Gao, Tsinghua University,  
Xiangjie Liu and Guolian Hou, North China Electric Power University*

A constrained optimization approach to dynamic state estimation ....................... 14 for power systems including PMU measurements  
*Liang Hu, Zidong Wang, Izaz Rahman and Xiaohui Liu, Brunel University*

H-Infinity state estimation for discrete-time systems with fading ..................... 20 measurements and randomly varying nonlinearities  
*Derui Ding, Zidong Wang, Hongli Dong and Bo Shen, Brunel University*

Adaptive backstepping control of linear motor based ................................. 26 on maxwell slip model of friction  
*Marcin Jastrzębski and Jacek Kabziński, Institute of Automatic Control*

### Session A – 2 System Diagnosis  
*Chair: Fengshou Gu & Kary Thanapalan*

The real-time implementation of envelope analysis for bearing ....................... 31 fault diagnosis based on wireless sensor network  
*Guojin Feng, Mustafa Aliwan, University of Huddersfield  
James Xi Gu, Manchester Metropolitan University  
Dong Zhen, Fengshou Gu, Andrew Ball, University of Huddersfield*

Dispersion behavior of torsional guided waves in a small ......................... 37 diameter steel gas pipe  
*Bahareh Zaghiari, Victor Humphrey,  
Mohamed Moshrefi-Torbati, University of Southampton Southampton*
Techniques for estimating the VRLA batteries ageing, degradation and failure modes
  Alessandro Mariani, Kary Thanapalan, University of South Wales
  Peter Stevenson, Yuasa
  Jonathan Williams, University of South Wales

Development of an OCV prediction mechanism for lithium-ion battery system
  Thomas Stockley, Kary Thanapalan, Mark Bowkett,
  Jonathan Williams, University of South Wales

The influence of vehicle tyres pressure on the suspension system response
  by applying the time-frequency approach
  Moamar Hamed, Belachew Tesfa, Fengshou Gu, Andrew Ball,
  Mustafa Aliwan, University of Huddersfield

Session A – 3 Network Applications
Chair: Hongnian Yu & Qingde Li

Challenges in mobile localisation in wireless sensor networks for disaster scenarios
  Shuang Gu, Yong Yue, Carsten Maple, Chengdong Wu,
  Beisheng Liu, University of Bedfordshire

Fuzzy logic based packet scheduling algorithm for mobile ad-hoc network with a realistic propagation model
  Oche Egaji, Alison Griffiths, Mohammad Hasan, Staffordshire university
  Hong Yu, University of Bournemouth

A novel symmetric key cryptographic authentication for cooperative communication in cognitive radio networks
  Munam Shah, Sijing Zhang, Carsten Maple,
  Omair Shah, University of Bedfordshire

Cognitive radio networks for internet of things: applications and future
  Munam Shah, Sijing Zhang, Carsten Maple, University of Bedfordshire

Large scaled multi-users mimo systems so called massive mimo systems for future wireless communication networks
  Yasir Mehmood, NUST Islamabad
  Umair Younas, Comsats University Abbottabad
  Ikram Mehmood, Brunel University
  Waseem Afzal, Muhammad Ali Jinnah University Islamabad
  Farhan Ahmad, Bremen University, Imran Rashid, NUST Islamabad
Session A – 4 Manufacture Systems 1  
Chair: Jinsheng Kang & Yanmeng Xu

A Study of Flexible Supercapacitors for Future Energy Storage……………………….……87  
Ruirong Zhang, Yanmeng Xu, David Harrison, John Fyson,  
Fulian Qiu, Brunel University  
Darren Southee, Loughborough University

Full Beam Atomic Force Microscopy……………………………………………………..…91  
Umar Khan, Mark French, Harold Chong, University of Southampton

Research on Engineering Change Knowledge Representation and………………………97  
Retrieval Technology Based on Ontology  
Zhen Wang, Yi Wan, Shandong University

Application of JACK on Evaluate of the split Seat chair…………………………………...102  
Jinsheng Kang, Qing TAO (Brunel University)

User-defined Driving-System Design Concepts for Elderly Drivers……………………….108  
Sebin Jung, General Motors Korea, Shengfeng Qin, Brunel University

Session P1 – 1 Control Applications 2  
Chair: Wen-hua Chen & Christoforos Economakos

Moving object tracking in support of unmanned vehicle operation…………………………114  
Runxiao Ding, Wen-hua Chen, Loughborough University

Fast data fusion algorithm for building navigation base in formation flying……………….120  
Runle Du, Jiaqi Liu, Zhenhong Niu, Zhifeng Li, Zhiye Jiang, National Key Lab of Sci & Tech,

Modeling and Interactional Control of the Multifingered Hand……………………………126  
Rakibul Hasan, Queen Mary, University of London  
Akbar Rahideh, Shiraz University of Technology  
Hasan Shaheed, Queen Mary, University of London

Fast control algorithm for digital camouflage spraying robot……………………………....132  
Miao Chu, Shaohui Tian, Xiaochun Pan, Northwestern Polytechnical University,

Rapid prototyping of digital controllers using fpgas and ESL/HLS………………………..137  
design methodologies  
Christoforos Economakos, Technological Educational Institution of Sterea Ellada  
Harry Sidiropoulos, George Economakos, Nat.Tech. University of Athens

Session P1 – 2 Condition Monitoring  
Chair: Zidong Wang & Philip Cross

Model-based condition monitoring for wind turbines………………………………………….143  
Philip Cross, Xandong Ma, Lancaster University
Fault detection and isolation for open-loop chylla-haase ........................................150
Abdelkarim Ertiame, Dingli Yu, Barry Gomm, Liverpool John Moores University

Fault detection and isolation based on feedforward-feedback ..................................156
control for oxygen excess of fuel cell stack
Mahanijah Md Kamal, Dingli Yu, Liverpool John Moores University

Finite-horizon estimation of randomly occurring faults for discrete .............................161
Time-Varying Systems
Hongli Dong, Northeast Petroleum University,
Zidong Wang, Brunel University
Bo Shen, Donghua University

A structural equation model for predicting virtual enterprise and agile .......................167
supply chain relation
Ariunbayar Samdantsoodol, Staffordshire University
Shuang Cang, Hongnian Yu, Bournemouth University
Angarag Tumur-Ochir, Mongolian University of Science and Technology

Session P1 – 3 Computer Vision
Chair: Jing Wang & Qingde Li

High order edge-aware texture filter design using PSP-splines .................................173
Qingde Li, University of Hull
Zongxiang He, Anhui Normal University

Texture-based segmentation for extracting image shape features ...............................179
Jing Wang, Zhijie Xu, University of Huddersfield
Ying Liu, Xi’an University of Post and Telecommunications

Spatio-temporal volume-based shape modelling for video event detection ..................185
Jing Wang, Zhijie Xu, University of Huddersfield
Ying Liu, Xi’an University of Post and Telecommunications

A framework for feature based dynamic intra-video indexing .................................191
Muhammad Nabeel Asghar, Fiaz Hussain, Rob Manton,
Muhammad Nabeel Asghar, University of Bedfordshire

Inter-turn short circuit detection based on modulation signal ....................................197
bisetpectrum analysis of motor current signals
Ahmed Alwodai, Fengshou Gu, University of Huddersfield

Session P1– 4 Manufacture Systems 2
Chair: Abhinivesh Beechook & Tahsin Opoz

Multivariable optimisation on a homogeneous charge Microwave Ignition System .......203
Lutz-Christoph Schöning, Yun Li, University of Glasgow
Establishing large-scale wind turbine blade cad model based on reverse engineering
Wenlei Sun, Xinjiang University
Qing TAO, Jinsheng Kang, Brunel University
Xiaoqiu zhuang, Animal Science Academy Xinjiang Uygur autonomous region

Design and Implementation of an Optimal Battery Management System for Hybrid Electric Vehicles
Mark Bowkett, Thomas Stockley, Kary Thanapalan, Jonathan Williams,
Mark hathway, University of South Wales

Aerodynamic analysis of variable cant angle winglets for improved aircraft performance
Abhinivesh Beechook, Coventry University
Jian Wang, Kingston University

Acoustic emission features of material removal during single grit scratching
Tahsin Opoz, Xun Chen, Liverpool John Moores University

Integration approach of mechatronics system in PLM systems
Houssem Abid, Jean-Pierre Campagne, Didier Noterman, Chokri Benamar,
Philippe Pernelle, INSA LYON

Session P2 – 1  Control Applications 3
Chair: Baibing Li

Compilation method for control program based on event graph method
Zhong Chong-quan, Chen Chen, Dalian University of Technology
Wu Wen-yan, Staffordshire University

RBF model based predictive control for exothermic semi-batch polymerizations
Magdi Nabi, Dingli Yu, Liverpool John Moores University

Dynamic modelling and simulation study of Texaco gasifier in an IGCC process
Yue WANG, Jihong Wang, University of Warwick
Junfu Lv, Qirui Gao, Tsinghua University

Development of a simulation model of a windshield wiper system for hardware in the loop simulation
Mark Dooner, Jihong Wang, University of Warwick
Alexandros Mouzakitis, Jaguar Land Rover

An external consensus protocol design for heterogenous multiply processes with predictive control scheme
Nurul Mohd Subha, Guo- ping Liu, University of South Wales
Session P2 – 2 Information Systems
Chair: Jia Jiang & Lichen Zhang

The definition, research scope and challenges of creative computing.........................264
Lu Zhang, Bath Spa University, Hongji Yang, DMU

Modeling railway cyber physical systems based on AADL.................................270
Lichen Zhang, Guangdong University of Technology

Multi-view approach to model aerospace cyber-physical systems..........................276
Lichen Zhang, Guangdong University of Technology

Towards designing an intelligent movie therapy system........................................282
for mental disease treatment
Jia Jiang, Yingmei Wang, Nanjing University of Information Science and Technology
Hongji Yang, DMU

An investigation on energy recovery analysis of active suspension system..............287
Ruichen Wang, Van Tung Tran, Fengshou Gu, Andrew Ball, University of Huddersfield

Author Index ..............................................................................................................293
