2013 IEEE International Symposium on Intelligent Control (ISIC 2013)

Hyderabad, India
28-30 August 2013
# TABLE OF CONTENTS

Stable Neural PID Anti-Swing Control for an Overhead Crane ................................................................. 1
   Panuncio Cruz, Wen Yu, Xiaoou Li

A Swarm Model for Planar Formations of Multiple Autonomous Unmanned Aerial Vehicles .................. 7
   Jito Vanualailai, Ashna Sharan, Bibhya Sharma

Certifying Non-Existence of Undesired Locally Stable Equilibria in Formation Shape Control Problems ............................................................................................................................... 13
   Tyler Summers, Changbin Yu, Soura Dasgupta, Brian Anderson

Convergence Conditions of Iterative Learning Control Revisited: A Unified Viewpoint to Continuous-Time and Discrete-Time Cases ........................................................................................................ 19
   Tomoya Hashikawa, Yasumasa Fujisaki

Policy Iteration Based Near-Optimal Control Scheme for Robotic Manipulator with Model Uncertainties .............................................................................................................................................. 23
   Samrat Dutta, Laxmidhar Behera

Kernel Machines for Uncalibrated Visual Servoing of Robots ................................................................... 29
   Alexander Kale, Meetha Lal Meena, M. Gopal

Dynamically Re-Optimized SNAC Controller for Robust Wing Rock Suppression ........................................ 35
   Shivendra Tiwari, Radhakant Padhi

Zonotope-Based Set-Membership Estimation for Multi-Output Uncertain Systems ........................................ 41
   Vu Tuan Hieu Le, Cristina Nicoleta Stoica, Teodoro Alamo, Eduardo Camacho, Didier Dumur

Probabilistic Analysis of Sampling Based Path Planning Algorithms ................................................................. 47
   Titus Bera, M. Seetharama Bhat, Debasis Ghose

Demonstration of Self-Sensing Shape Memory Alloy Actuated Gripper ......................................................... 53
   S. Krishna Chaitanya, K. Dhanalakshmi

A Novel Visual Odometry Correction Using Sensor Fusion Technique on Multiple Cameras ...................... 58
   Kinjal Patel, Leena Vachhani

Finite-Horizon Optimal Adaptive Neural Network Control of Uncertain Nonlinear Discrete-Time Systems ............................................................................................................................. 64
   Qiming Zhao, Hao Xu, Sarangapani Jagannathan

Neural Network-Based Adaptive Event-Triggered Control of Nonlinear Continuous-Time Systems ............. 70
   Avimanyu Sahoo, Hao Xu, Sarangapani Jagannathan
