2nd Teaching Seminars on Higher Education Science and Engineering Courses 2012

Taian, China
24-25 November 2012

Volume 1 of 2

Editors:

Zheng-Liang Huan
Deyun Yang

ISBN: 978-1-62993-323-8
# Table of Contents

Exploration and Practice of the Task Driving Teaching Method in JSP  
Ping Zhou, Yu Zhang, Ying Xu

The Research of Software Engineering Education and Systems Analysis  
Zhuyun Wang

Investigation on Application Present Situation of Traditional Physical Health-Preserving Curriculum in Guangxi Universities and Colleges  
Huijun Gao

Thinking on Local Undergraduate Normal University Music Teachers’ Professional Quality in West China  
Jiangning Li

The Study of the Scientific Outlook on Development with Higher Mathematics Teaching  
Xiaoyan Wen, Wei Li, Shu Yang

Current Situation Analysis and Countermeasures Research of Bilingual Education in Chinese Universities and Colleges  
Huanxin Zou, Shilin Zhou, Kefeng Ji, Hao Sun

Studying on the Talent Cultivation Model of City Orbit Transportation Engineering and Technology Specialty  
Yingchun Fu, Xianlong Luo, Qifang Zhan

The Reform in the Experimental Teaching of Single Chip Microcomputer  
Xiaocui Han

On Teaching Grammar and Language of Compiling Principles  
Lin Xue

The Few Principles Analysis to Build and Perfect of the Financial Aid System for Poor College Student in Guangxi  
Limin Huang

A Study of English and American Literature Curricular System in Application-Orientated English Major  
Lijing Deng

Construction and Practice of the Information Visualization Expression Course Group  
Yingzi Song, Yin Fan, Ping Xu, Weifeng Zhang, Qin Li

Constructing and Exploring Jewelry Vocational Education in Higher Vocational Colleges  
Xiaohui Zhang

Investigation and Reflection of P.E Teaching Mode of “Triple Independent” in University  
Songxian Zhou
“Post-Olympic Era”, China Values the Masses of Sports Research
   Dan Li, Songxian Zhou

Design and Application of Supply Chain Management Experimental Teaching Platform Based on RFID
   Yujie Zang, Lihua Wu, Linan Li

Research on International Evaluation of Ph.D. Dissertations
   Weihua Xu

A Teaching Model Combining Study, Research and Application for Comprehensive Information Specialty Course
   Jing Feng, A-ixia Zhou, Wei-jun Ma, Xue-yan Zhang

Quality Improvement of the Undergraduates’ Graduation Thesis of Materials Speciality
   Duxia Cao, Juan Chen, Ruifang Guan, Guozhong Li

Applications of Computer Simulation in Polymer Physics Teaching
   Weigui Fu, Guangfen Li, Benqiao He

The Application of Multisim in the Traffic Lights Experiment of Digital Circuit Course
   Huifang Gao, Yajun Zhang, Xiaoanyi Niu, Long Chen

Attempts on Application-Oriented Teaching Method for Postgraduate Course
   Jianhua Wang, Jianxin Chu, Weimin Xu, Xixia Huang, Wangqiang Niu

The Exploration of Teaching Reform in Higher Education Specialized Courses
   Juan Chen, Duxia Cao, Guozhong Li, Heyi Ge, Ruifang Guan

Research on the Enforcement Scheme for “A Plan for Educating and Training Outstanding Engineers” of Civil Engineering
   Dejian Yang, Ruibin Zhao

The Study for Internet of Things Application Professional Construction in Higher Vocational Colleges
   Wenliang Cao, Xuanzi Hu

Research on Architecture Innovation Education
   Ying Pan, Zhanchang Yang, Yong Han

Based on the Innovative Personnel Training “Civil Engineering Material” Teaching Reform and Practice
   Jia-ying Sun

Research of the Teaching and Practice of Computer Organization Principle
   Xiaolin Yi, Yishuang Ning, Xiao Zhao, Wenjun Zhu

Constructing the Practice Teaching System of Software Engineering Based on JAZZ
   Kewen Li

Implementation of the Curriculum Reform in the Hardware Project Combined with Contest
   Xiaoyan Wang, Yujiang Zeng, Lin Chen, Wenqing Cheng, Guoping Yan

English Course Construction of Electrical Engineering and Automation for Engineering Education
   Wenjuan Li, Yang Liu, Huaiying Cheng, Meilan Zhou

Probing into Teaching and Innovation for Basic Course of Computer Science in Universities
   Qiusun Ye

Innovating the Mode of Talent Training of Comprehensive Reform of Microcontroller Unit Courses
   Jian Zhao, Xiaobiao Zheng, Fang Meng, Haitao Peng
On How to Improve Students’ Enthusiasm on Learning
Shuchun Chang, Jing Shang, Shaofeng Zhang..............................................................................(119)

The Construction of the Innovation Teaching Mode on the Civil Engineering Geology
Furong Yan, Yunbo Mo.........................................................................................................................(122)

An Overview on Self-Evaluation and Self-Evaluation Effects
Xiangju Shi.............................................................................................................................................(125)

Exploration for Teaching Team Building of Basic Specialized Curriculum of Graduate
on Computer Science
Wenyu Chen, Chunxiang Xu, Mengshu Hou, Lijun Xie, Yang Du.....................................................................(129)

A Comparison Analysis of Teaching Method between the Sino-US Universities
Yating Zhang..............................................................................................................................................(133)

The Research and Practice on Optimizing Course System of the Specialty of Process Equipment
and Control Engineering
Shaofeng Yan, Guojin Liao.........................................................................................................................(137)

The Exploring and Practice of Master Degree of Engineering Mechanics
Bing Yuan, Feng Liu.................................................................................................................................(140)

Using SERVPREF Model to Assess the Quality Gap among Colleges
Hailin Wang..................................................................................................................................................(144)

Research of Project Textbook Building Based on Working Process
Yonghui Pan..................................................................................................................................................(147)

Application of Multiplex Teaching Methods in Construction Technology of Architecture Course
Xine Yan, Hongjie Guan..............................................................................................................................(151)

The Construction of Mechanical Engineering and Automation Experiment System
Mingfu Yin....................................................................................................................................................(154)

Practice and Exploration of Multi-Level Teaching in Higher Vocational College
Yani Zhou, Huirong Li.................................................................................................................................(157)

Discussing Teacher’S Team Construction at Higher Medical Colleges and Universities
Haihong Zhang, Zhenbin Wei......................................................................................................................(160)

Practice Base Construction of Process Equipment and Control Engineering
Caixia Liu.....................................................................................................................................................(163)

Application of EDA Technology in the Electronic Practice Teaching Based on Constructivism Theory
Jun Liu, Lianrong Lv, Jinli Liu, Xiaoping Yang, Zhen Wei............................................................................(167)

Method Improvement for Experimental Teaching of EDA
Xuemei Li, Li Li, Wei Lin.............................................................................................................................(172)

Establishment and Perfection of Student’s Teaching Evaluation Mechanism and Constant
Improvement of Teaching Quality
Dong Mei, Qiyi Zhang.................................................................................................................................(176)

Impact of Autonomous Learning Theories on Chinese Higher Education
Shufang Wu..................................................................................................................................................(179)

Undergraduate Teaching Project as a Platform to Develop Advanced Applications Personnel
as the Starting Point of the Discipline Contest
Zhongxun Wang, Ruiping Chen, Jie Zheng.................................................................................................(184)
A Research into the Teaching Reform for the Professional Education Course of “Mechanical Design Basis”  
Sujuan Luo, Shufeng Chai, Lijie Zhang, Lina Bai

College-Enterprise Cooperation Pattern during Education of Excellent Engineer  
Can Kang, Bo Gao, Zhong Li

The Application of Mind Map Used in “Teaching-Learning Integration” Curriculum Teaching Design  
Yajun Zhang, Xianghua Wang

Teaching Exploration Based on Project Development of Electrical Driving Control System  
Jiaquan Lin, Jian Zhang

Establish a New Model of the Professional Teachers Take Part in Personnel Training in “Full Guide” and “Throughout Guide” Way  
Ruxin Che, Wei Hui, Jianhai Wang

Teaching Reform and Practice of Hydraulics Based on National Excellence Engineer Training Program  
Jiangchuan Liu, Beisheng Long

Construction and Experience of Innovative Engineering Talents Training Mode in Electrical and Intelligent Building Faculty  
Haifei Si, Zhong Yang, Quanyong Ju

Research on Teaching Methods of Architecture Mechanics Based on Constructivism Theory  
Honghai Zhang, Chunyan Wang, Liyan Long

Teaching Reform Study on Game Introduction Course  
Hui Du, Lianqing Shu

The Application of CFD Software in the Teaching of Pumps and Fans  
Ling Zhang, Wenpeng Hong, Zhida Zhang, Tie Li

Optimizing Imagining on the Course Teaching of “Garden Plants Design”  
Yang Liu, Dan Shen, Guosheng Fan

Practice and Exploration on Bilingual Teaching of Biochemistry  
Jiaoying Xin, Huanan Guan, Shuai Zhang, Lin-lin Chen, Yan Wang

Practice and Consideration of Auxiliary Teaching by Romance of the Three Kingdoms in the Course of Management  
Hongxing Sun

Research on International Trade Professional Curriculum of Computer Education  
Jiamian Wei, Kaixia Wei

Research of the Teaching Quality Monitoring and Evaluation System of Electronic Information Specialty  
Jinli Liu, Jun Liu, Xiaoping Yang, Zhen Wei

Teaching Reform and Discussion of Engineering Mechanics Course under Application-Oriented Talents Training  
Yanyu Meng, Xinliang Zheng, Hui Yang

Inquire into the Choice of Multimedia Tools in General Physics Teaching  
Xiaoying Mi, Yafang Li

Application of Probing Teaching in Functional Materials Curse  
Heng Liu, Yimin Guo, Zhaoyang Zeng
Practice and Exploration in the Characteristic Course of Cooperation between College and Enterprise
Xiaoqun Jin, Jian Yao.................................................................(251)

Research on Art Design Talent Education Mode Integrated with Teaching and Practice
Zhijian Tang, Huiping Liang............................................................(255)

Teaching Reform for Foundation Mechanics Course Based on Cultivation of Brilliant Engineers
Xinchun Zhang, Wenqiang Jiang, Zhangqi Wang.......................................(258)

Research on the Coordinative Development between Higher Education and Regional Economy
Xiangxia Meng, Likun Wu, Gang Feng..................................................(262)

Research on the Teaching Model of Professional Postgraduates Majored in Control Engineering
Denghua Li, Meisa Pang, Keke Duan, Aihua Liu........................................(266)

The Role of Perfect Test Database and Experiment on Pharmacology Bilingual Teaching
Ying Song, Yiqi Wang, Yan Yang, Biwei Song.............................................(269)

Teaching Method Exploration and Practice of ‘Design of Overhead Transmission Lines’ based on the Engineering Ability Training
Wenqiang Jiang, Zhangqi Wang.............................................................(272)

The Application of Numerical Simulation in the Teaching of Soil Mechanics and Foundations
Xiaosong Tang, Jia He, Yongfu Wang.....................................................(275)

Preliminary Study on Teaching and Scientific Research Team Building of Safety Engineering Major
Fumei Song, Xuexi Chen........................................................................(278)

Teaching Method Analysed on Prosthesis Technology Course
Ling Shen.........................................................................................(282)

The Application of Converter Steelmaking Simulation System in the Teaching of Metallurgy Professional Course
Yan Wang, Yan Liu.............................................................................(285)

Typical Electronic Product As Course Carrier
Rui-Li Mao......................................................................................(289)

The Research of the Situation of the Community Sports Development and Countermeasures during the Period of Social Transformation in Our Country
Jinfeng Li ..........................................................................................(292)

The Application Research of the Happy –Teaching Method of the Specialized Course Teaching in the University Physical Education
Lina Mei...........................................................................................(295)

Deepen Educational Reform——Thinking about Educational Reform for the Course of the Standard and Test of Rehabilitation Instrument
Ming Zhu, Linlin ZHANG, Ling Shen, Feng Zheng......................................(298)

Reflection on Cultivating the Excellent Engineers of Materials Specialty
Dequan Shi, Guili Gao, Chengguo Ma, Fuwei Kang, Xuliang Ma, Dayong Li..................................................(301)

Problem Analysis and Process Management of Graduation Project
Dequan Shi, Guili Gao, Chengguo Ma, Zeming Yu, Fuwei Kang...............................(305)

Research and Analysis of the Positions Vacant in Computer-Related Industry
Hongyan Pan, Fangyi Xia.................................................................(309)
Study on Training Program of Safety Science and Technology Talent
Fumei Song.................................................................(313)

Exploration of Practice Teaching Reform in Seed Test Science for Seed Science and Engineering Major
Chunyang Xiang, Shoujun Sun, Jin Du, Feng Luo.................................................................(317)

Design of the Digital Safety Campus System
Dezhong Ma, Wenfei Ding, Jiao Liu, Qiuyuan Li, Shangjiu Meng.................................................................(320)

Exploration and Practice of New Career-oriented Curriculum System for Material Formation and Control Technology in Higher Vocational Institute
Zhiming Liu, Yan Liu, Pingyuan Wang, Yimin Liu, Bo Li.................................................................(324)

Research of Formative Mechanism for Teacher-students Teaching Resonance Based on the Comprehensive Information Emotional Theory
Jiang Pu.................................................................(328)

Compaction Test Research of Dalian Port Railway Company Office Building Foundation
Xunguo Zhu, Ping Guan, Yan Zhang.................................................................(332)

Study on Improving Quality of Graduation Design for Civil Engineering
Ying Cui, Guangwei Zhang.................................................................(336)

Research on Improving Quality of Education Status in Independent College
Rui Yang.................................................................(340)

Discussion on Teaching of Mechanical Drawing Based on Constructivism
Yanhui Chen, Yihua Hu, Yueping Chen.................................................................(345)

Construction and Thinking of Network Education for Course of “Concrete Structure Design Principle”
Ping Guan, Feng Miao, Xun Li.................................................................(349)

Build Integrated Engineering Practice Teaching System Based on CDIO
Min Zhang, Baofeng Wang, Lianshan Shen.................................................................(352)

The Novel Application Based on MATLAB for Teaching Practice in the Course of Circuit Analysis
Qun Yu, Hua Shu, Xinbing Chen.................................................................(356)

An Experimental Study on the Effect of Bilingual Education in Sino-Australia Cooperatively-Run Project
Ying Wang, Guiqiao Xiao, Li Zhu, Lan Cheng.................................................................(360)

The Reform and Practice of Course Education Based on the Idea of CDIO
Zhenhua Liu.................................................................(363)

The Practice Teaching Innovation of Metal Materials Specialty and Practice of Practice Teaching New System
Yongtao Zhao, Liping Zhao, Junwei Zhou.................................................................(366)

Method of Cultivating Students' Quality and Ability in Applied Optics Experiment
Chunying Ding, Renxian Li, Pingzhou Li.................................................................(370)

Innovation Practice of Cultivation for Professional Degree Postgraduates
Jiong Chen, Xiang Gao, Kunzan Qiu, Xuecheng Wu, Kefa Cen.................................................................(372)

Exploration of Productive Practice Based on Innovative Engineering Talents
Yuliang Ma, Qingshan She, Yunyuan Gao, Ming Meng.................................................................(376)

Reformation and Exploration of Experiment Teaching of Seed Science
Jin Du, Chuyang Xiang, Shoujun Sun

Study and Development on the Seismic Testing Methods for RC Structures
Longhe Xu, Peifen Li

Scheme about Bilingual Teaching for Environmental Soil Science under Teaching Mode of Multimedia Combined with WPBL
Weiqin Zhu

The Effects of Excited Learning Interest in the University Professional Education
Donghai Cheng

Talents on the Basis of Application Type Steel Structure Teaching Ideas
Xiaojie Zhang, Shujiang Liu, Deyan Liu

Cultivating students’ Innovative Ability in the College Physics Experiment
SuJuan Gao, XiuZhen Hu

Study on Marketing Planning Teaching Practice Based on Experiential Teaching
Cuiying Zhang

Research on Management Countermeasures to Improve the Quality of the Dissertations for Postgraduate Academic Degree
Yucheng Wan, Xingfang Fu, Li Qiao

Exploration and Practice of the CNC Comprehensive Experimental Course Construction
Shumin Feng, Yan Wu

To Strengthen College Students of Science and Engineering Mathematical Application Ability Training and Practice
Juan Su

A Preliminary Study of Bilingual Teaching of Biochemistry in Chemical Engineering and Technology
Fuxin Chen, Pin Gong, Anning Zhou

Improve Teaching Quality and Optimize Teaching Effect
Da-peng Zhang, Hui-min Zhao, Feng-zhong Wang

The Application of Teaching Experimental Projects Used in the Course of the Logistics System Planning
Zhilan Song, Pei Zhang, Junshuai WU

The Application of Integrated Methods in Laboratory Construction Quality Evaluatio
Xinhui Wu, Hanqing Tao, Qiong Guan

The Practice of Introduction of the Project Teaching Methods in Computer Network Course
Hong Xu, Hua Jiang, Lei Ju, Xiaohong Fan

Design of the Grade Evaluating System about Performance Test for Experiment
Guiqing Zhao, Huijuan Niu, Shengyu Hao, Zhe Shen

University-Enterprise Cooperative Innovation on Cultivating Talents in Semiconductor Lighting
Guanying Cao, Yingming Gao, Jinghui Zhang, Yi Yang, Desheng Li, Yuncui Zhang, Fan Cao, Nianyu Zou

Exploration and Research of Improving Production Practive Quality
Dawei Yin, Gangtao Liang, Yuting Liu, Bin Liu

Combine Curriculum Instruction of the Analytical Methods for Materials to Develop Ability of Undergraduate for Scientific Research
Zhuocheng Liu, Tao Li, Liping Zhao, Ming Zhao
Research and Exploration on Electrical Engineering and Automation Cultivating Program  
Yaai Chen, Jinghua Zhou, Jining Xu, Yinghong Li ......................................................... (646)

Research on the Cultivation Strategy of the Environmental Engineering Innovative Talents under the Requirement of Society  
Chunhui Du, Chunjin Wu, Chunying Dong, Liguang Wu ................................................. (650)

The Construction of Teaching Research Ability Based on Innovative Teaching Team  
Fenghe Tao, Guibo Yu, Mingshan Zhang, Lijun Cao, Jianzhuang Zhi ................................. (654)

Academic Research Capacity Building in the Innovative Significance of Teaching Team  
Guang Tian, Fenghe Tao, Xinjie Shao, Guangsheng Liu, Guibo Yu, Xiangdong Wu ........... (657)

Building Excellent Course Website based on Open Source Softwares  
Yihai Chen, Hongwei Zeng ............................................................................................... (659)

Exploration and Research on the Vocational Training of Teachers in Colleges and Universities  
Haihong Qin, Shishan Wang, Jie Chen, Zhenyang Hao ................................................... (663)

Teaching Design and Practice of Polymer Chemistry Course in Independent Colleges  
Guixiang Hou, Yi Shen, Xiaoming Sang .............................................................................. (667)

Curriculum Research and Construction of Non-information Professional Information Visualization  
Yin Fan, Yingzi Song, Ping Xu, Weifeng Zhang, Qin Li, Jian Zhu ...................................... (671)

Practice on the Construction of Teaching Team of Mechanical Basis  
Lihong Liu, Dongsu Zhang, Xin Zhang, Youdong Ye ...................................................... (674)

Study of Art Design Education Based on Traditional Creation Art in Jiangxi  
Wen Zhang ....................................................................................................................... (677)

The Study on The Extracurricular Science and Technology to Create Teaching and Learning Activities of Information Technology Class College Students  
Xiaochuan Zhang, Fei Tu, Yue Eang, Huihui Xiao, Ximing Jiang ..................................... (680)

Higher Education in Urgently Need the Unity of Scientific Literacy and the Human Spirit  
Shixin Pei, Fenping Cui, Tingting Sun ............................................................................. (684)

Combine Probability Statistics with MATLAB  
Chuanwu Xia .................................................................................................................... (689)

A Study on the Innovation of the Textbook Construction in Universities Based on Idea of Research-oriented Teaching  
Hong Li, Hai Lin ............................................................................................................. (694)

The Multi-disciplinary knowledge Construction on Personnel Training of the Architecture Virtual Scene Design  
Peihuan Wang ................................................................................................................ (698)

Study on Training Mode based on Demand for Merchandising Talents from Clothing Enterprises  
Guolian Liu, Yuchai Sun, Xiaoqun Dai, Xiaofeng Jiang ................................................... (701)

Construction and Reform of Chemical Experimental Teaching Demonstration Center in Local University  
Ruiyun Xu, Dan Zhen, Yihong Tang, Xiuwen Xiao ............................................................ (704)

Practice and Research of Top-quality Course Construction on Communication Principle  
Yinghui Kong, Qiang Gao, XingRong Li, Tao Liu ............................................................ (707)
Practice and Exploration of the Teaching Mode Reform of Specialized Course in the Engineering Courses
Bo Chang...........................................................................................................................................(711)

Study on Construction of Science and Engineering Teaching Materials in High Education
Lihua Huang........................................................................................................................................(714)

Constructing a New Cultivation System on Chemical Engineering and Technology Specialty for Building the Central Plains Economic Zone
Chunshan Zhu, Liqin You, Keren Gu, Tiangui Wang, Dongguang Li......................................................(717)

Implement Scheme Research of Improving Innovative Ability of Students Through Electronic Competition
Wu Dong, Yingjie Tang, Likun Lu, Yeli Li...................................................................................................(721)

Improve the Innovation Abilities of Students Major in Lighting with Opportunity of Subject Competition
Huanlin Lv, Ping Li, Yuncui Zhang, Nianyu Zou......................................................................................(724)

Application of M-learning in Adult Education of Civil Engineering
Chaojun Yan, Zhichao Zhang..................................................................................................................(727)

Practice and Thinking on Training Information Technology Undergraduates with Campus Information Technology Projects
Huizhou Zhao, Chao Li, Xia Chen..........................................................................................................(730)

Use of PBL Method in the Classroom Teaching of Professional Courses
Hongmei Niu, Kanshe Li, Lanying Yan....................................................................................................(734)

Reform and Practice of Engineering Practice of Teaching in Chemical Engineering Specialty
Ruiyun Xu, Zhongca Ma.........................................................................................................................(737)

Engineering Master in the Field of Architecture and Civil
Qun Guan................................................................................................................................................(742)

Information Technology and Subject Teaching Curriculum Integration in University Mechanism Research
Tian-bo Ren, Ming-xuan Lei...................................................................................................................(746)

Exploration and Practice on Graduation Project Cooperation with Taiwan Leading Enterprise
Hongmei Kang, Bo Li, Meng Zhang........................................................................................................(750)

Questionnaire survey and Thinking on a Physics Experiment Textbook
Yuan Niu, Hongmin Zhao, Bin Zhang....................................................................................................(753)

Research on Training Mode of Advanced Talents Based on Production, Study and Research Combination
Shiai Xu, Shumin Chen, Yan Song, Xiaoling Han..................................................................................(757)

Discussing Simply about Cultivating Students Interesting in College Engineering Chemistry Teaching
Jianli Yang, Jin Li, Renshan Li...............................................................................................................(761)

The Teaching Methods of DSP Theory and Application
Guibin Zhu, Sen Bai, Qiuhua Li.............................................................................................................(763)

An Improvement of Separating Cavity with Capillary to Alcohol Blowtorch
Wei Zhao, Jianlin Qu, Anning Zhou........................................................................................................(767)

Cultivating Modes for Undergraduate Students of Aerospace Specialties Based-on “a Plan for Educating and Training of Outstanding Engineers”
Liangyu Zhao, Shengjing Tang, Kun Zhao.............................................................................................(770)
Research on the Development of Military Science Masters Creativity Capability
Chang-peng Pan, Guo-wei Wang, Hai-feng Zhang, Jie Chen ..................................................(775)

Training Model of Biological Creative Talents
Bo Yang, Dongling Niu, Bo Sun ...........................................................................(778)

The Exploration and Practice of the Classroom Teaching Approach Based on Clicker
Hongmin Zhao, Tianfang Cai, Kai Zheng ..................................................(781)

Teaching Model to Explore a Combination of Medical Physics Practice Teaching and Quality Education
Ying Zhang, Yantang Zhang, Bin Nie, Dongsheng Zhang ..................................................(785)

Research on Teaching and Studying about Experiment of Cartography Based on Task-driving Teaching Method and 3S Technique
Fengyun Mu, Xiaosong Lin, Hong Chen, Jun Deng ..................................................(787)

Petroleum Engineering Undergraduate Curriculum Reform Proposals
Junqi Wang, Junbin Chen, Yanbo Sun ..................................................(791)

Discussion on the Cultivating of Compound Talents in University
Tao Li ..........................................................................................................................(795)

An Exploration on Advanced Math and Polytechnic Combination Mode
Meng Li, Quimei Sun, Rui Xu ...........................................................................(798)

A Teaching Approach Based on Inquiry and Step-by-Step Learning
Tianfang Cai, Jing Wang, Hongmin Zhao, Kai Zheng ..................................................(800)

Conducting College Physics Teaching Based on the New Approaches of Physics Education in the United States
Kai Zheng, Guangtian Zhu, Jing Wang, Tianfang Cai, Hongmin Zhao ..................................................(804)

Teaching Reform and Practice of the Mechanical Structure Design Course
