49th AES International Conference 2013

Audio for Games

London, United Kingdom
6 - 8 February 2013

Editors:

Damian Murphy

Paper Session 1

1-1  Talking Soundscapes: Automatizing Voice Transformations for Crowd Simulation—Jordi Janer,1 Roland Gerærts,2 Woulter G. van Toll,2 Jordi Bonada1
   1Universitat Pompeu Fabra, Barcelona, Spain
   2Utrecht University, Utrecht, The Netherlands  p. 1

   Music, Athens, OH, USA  p. 8

Paper Session 2

2-1  Can Interactive Procedural Audio Affect the Motorical Behavior of Players in Computer Games with Motion Controllers?—Niels Bøttcher, Aalborg University Copenhagen, Denmark  p. 12

2-2  Preliminary Investigation of Self-Reported Emotional Responses to Approaching and Receding Footstep Sounds in a Virtual Reality Context—Erik Sikström, Niels Christian Nilsson, Rolf Nordahl, Stefania Serafin, Aalborg University Copenhagen, Copenhagen, Denmark  p. 18

2-3  Auditory Feedback to Improve Navigation in a Maze Game—Kevin Dahlstrøm, Nicolai Gajhede, Søren K. Jacobsen, Nicklas S. Jakobsen, Søren Lang, Magnus L. Rasmussen, Erik Sikstrom, Stefania Serafin, Aalborg University Copenhagen, Copenhagen, Denmark  p. 24

2-4  Rhythm-Action Games: The Sonic Interaction Perspective—Cumhur Erkut1 Huseyin Hacihabiboglu2
   1Aalto University, Espoo, Finland
   2Middle East Technical University, Ankara, Turkey  p. 28

Poster Session

P-1  Granular Analysis/Synthesis for Simple and Robust Transformations of Complex Sounds—Jung-Suk Lee1,2,3 François Thibault,4 Philippe Depalle,1,2 Gary P. Scavone1,2
   1McGill University, Montreal, Quebec, Canada
   2Centre for Interdisciplinary Research in Music Media and Technology (CIRMMT), Montreal, Quebec, Canada
   3Broadcom Corporation, Matawan, NJ, USA
   4Audiokinetic Inc., Montreal, Quebec, Canada; now with Nuance Communications Inc., Montreal, Quebec, Canada  p. 37

P-2  Modeling and Real-Time Generation of Pen Stroke Sounds for Tactile Devices—Hanwook Chung, Hoon Heo, Dooyong Sung, Yoonchang Han, Kyogu Lee, Seoul National University, Seoul, Korea  p. 47

P-3  Individualized HRTFs Simulation Using Multiple Source Ray Tracing Method—Dooyong Sung, Nara Hahn, Kyogu Lee, Seoul National University, Seoul, Korea  p. 53

P-4  Plausible Mono-to-Surround Sound Synthesis in Virtual-World Parametric Spatial Audio—Tapani Pihlajamäki, Mikko-Ville Laitinen, Aalto University School of Electrical Engineering, Espoo, Finland  p. 63
Geometric and Wave-Based Acoustic Modeling Using Blender—Jelle van Mourik, Damian Murphy, University of York, York, UK  p. 72

Use of 3-D Head Shape for Personalized Binaural Audio—Philip J. B. Jackson, Naveen K. Desiraju, University of Surrey, Surrey, UK  p. 81

Paper Session 3

Modular Architecture for Virtual-World Parametric Spatial Audio Synthesis—Tapani Pihlajamäki, Mikko-Ville Laitinen, Ville Pulkki, Aalto University School of Electrical Engineering, Espoo, Finland  p. 87

Integrating Custom 3-D Audio Rendering into Game Sound Engines—Fritz Menzer, MN Signal Processing, Schwerzenbach, Switzerland  p. 95

Virtual Sound Source Positioning by Differential Head Related Transfer Function—Dominik Storek, Czech Technical University in Prague, Prague, Czech Republic  p. 99

Workshops 2

Behind the Mix—An In-Depth Look at the Audioengine in Hitman: Absolution—Mikkel Christiansen, IO Interactive, Copenhagen, Denmark  p. 112
