2013 IEEE 32nd International Symposium on Reliable Distributed Systems

(SRDS 2013)

Braga, Portugal
30 September - 3 October 2013
# 2013 IEEE 32nd International Symposium on Reliable Distributed Systems

SRDS 2013

## Table of Contents

Message from the General Chair .............................................................................................................viii
Message from the Technical Program Co-chairs ...............................................................................................ix
Organizing Committee ...........................................................................................................................................x
Referees and Reviewers .......................................................................................................................................xii

### Network Reliability and Integrity

A Fault-Tolerant Routing Algorithm Design for On-Chip Optical Networks ..............................................1  
* Dong Xiang, Yan Zhang, Shuchang Shan, and Yi Xu  

PIP: Privacy and Integrity Preserving Data Aggregation in Wireless Sensor Networks ........................................10  
* Vimal Kumar and Sanjay Madria  

Virtual Synchrony Guarantees for Cyber-physical Systems ...........................................................................20  
* Federico Ferrari, Marco Zimmerling, Luca Mottola, and Lothar Thiele  

### Handling Uncertainty

Fighting Uncertainty in Highly Dynamic Wireless Sensor Networks with Probabilistic Models  
* Luís Marques and António Casimiro  

A Distributed Polling with Probabilistic Privacy ......................................................................................41  
* Yahya Benkaouz, Rachid Guerraoui, Mohammed Erradi, and Florian Huc  

Consensus with Unknown Participants in Shared Memory .............................................................................51  
* Cátia Khouri, Fabiola Greve, and Sébastien Tixeuil

Replication and Reliability

Bounded Delay in Byzantine-Tolerant State Machine Replication ..................................................61
  Zarko Milosevic, Martin Biely, and André Schiper

Stochastic Analysis on RAID Reliability for Solid-State Drives .....................................................71
  Yongkun Li, Patrick P.C. Lee, and John C.S. Lui

Automated Multi-graceful Degradation: A Case Study .................................................................81
  Yiyan Lin and Sandeep Kulkarni

Stabilizing Optimal l-Exclusion Algorithm ......................................................................................91
  Rachid Hadid, Mehmet Hakan Karaata, and Omer Yusuf Adam Mohamed

Detection and Diagnosis

A Distributed Abstraction Algorithm for Online Predicate Detection ...............................................101
  Himanshu Chauhan, Vijay K. Garg, Aravind Natarajan, and Neeraj Mittal

Linking Resource Usage Anomalies with System Failures from Cluster Log Data ................................111
  Edward Chuah, Arshad Jhumka, Sai Narasimhamurthy, John Hammond,
  James C. Browne, and Bill Barth

Automatic Problem Localization via Multi-dimensional Metric Profiling .........................................121
  Ignacio Laguna, Subrata Mitra, Fahad A. Arshad,
  Nawanol Theera-Ampornpunt, Zongyang Zhu, Saurabh Bagchi,
  Samuel P. Midkiff, Mike Kistler, and Ahmed Gheith

Formal Models

Efficient Verification of Distributed Protocols Using Stateful Model Checking ................................133
  Habib Saissi, Péter Bokor, Can Arda Muftuoglu, Neeraj Suri, and Marco Serafini

Validity-Based Failure Algebra for Distributed Sensor Systems .....................................................143
  Tino Brade, Sebastian Zug, and Jörg Kaiser

Rigorous Performance Evaluation of Self-Stabilization Using Probabilistic Model Checking ...........153
  Narges Fallahi, Borzoo Bonakdarpour, and Sébastien Tixeuil

Transactions and Consistency

Non-monotonic Snapshot Isolation: Scalable and Strong Consistency for Geo-replicated Transactional Systems ..........................................................163
  Masoud Saeida Ardekani, Pierre Sutra, and Marc Shapiro

Clock-SI: Snapshot Isolation for Partitioned Data Stores Using Loosely Synchronized Clocks ........173
  Jiaqing Du, Sameh Elnikety, and Willy Zwaenepoel
Bumper: Sheltering Transactions from Conflicts ................................................................. 185

*Nuno Lourenço Diegues and Paolo Romano*

**Security**

Analysis of Malware Propagation in Twitter ........................................................................... 195

*Ameya Sanzgiri, Andrew Hughes, and Shambhu Upadhyaya*

Adaptive Anomaly Identification by Exploring Metric Subspace in Cloud Computing Infrastructures .................................................................................................................. 205

*Qiang Guan and Song Fu*

A Unified Framework for Measuring a Network’s Mean Time-to-Compromise ......................................................... 215

*William Nzoukou, Lingyu Wang, Sushil Jajodia, and Anoop Singhal*

**Author Index** .......................................................................................................................... 225
