2013 IEEE Conference on Technologies for Sustainability
(Sustech 2013)

Portland, Oregon, USA
1-2 August 2013
Program

2013 1st IEEE Conference on Technologies for Sustainability (SusTech)

Alternate Energy I

Optimal Generation Expansion Planning with Integration of Variable Renewables and Bulk Energy Storage Systems
Zhouxing Hu (Western Electricity Coordinating Council, USA), Ward Jewell (Wichita State University, USA) .......................................................... 1

On the Usage of Storage Systems in the Presence of Ramping Costs and High Penetration of Renewables
Alberto J. Lamadrid (Lehigh University, USA) ........................................................................... 9

Variable Energy Resource Induced Power System Imbalances: Mitigation by Increased System Flexibility, Spinning Reserves and Regulation
Aramazd Muzhikyan (Masdar Institute, UAE), Amro Farid (Masdar Institute, UAE), Kamal Youcef-Toumi (MIT, USA) ........................................................................ 15

Constrained Support Vector Machines for Photovoltaic In-Feed Prediction
Marcus Hildmann (ETH Zurich, Switzerland), Abhishek Rohatgi (National University of Singapore, Singapore), Göran Andersson (ETH Zürich, Switzerland) ........................................ 23

Energy Efficiency I

A Long-Term Case Study of Improved Residential Sustainability
Amy Fuchs Heidner, PE (The Rextor Group PLLC, USA), Dennis Heidner (The Rextor Group PLLC, USA) ........................................................................... 29

Hybrid Calibration Methodology for Building Energy Models Coupling Sensor Data and Stochastic Modeling
Chad Miller (Portland State University, USA), Huafen Hu (Portland State University, USA), Lucas Klesch (AirAdvice Inc., USA) .......................................................... 37

Reliability-Driven Optimum Standby Electric Storage Allocation for Power Distribution Systems
Salman Kahrobaee (University of Nebraska-Lincoln, USA), Sohrab Asgarpoor (University of Nebraska-Lincoln, USA) ........................................................................ 44

Information and Communications Technology based Solutions in Achieving Building Energy Efficiency
Huafen Hu (Portland State University, USA), Geoffrey Jenks (Portland State University, USA), Catherine Huang (Intel Labs, USA), Milan Milenkovic (Intel Corporation, USA), Ulf Hanebutte (Intel Labs, USA) .......................................................... 49

Advancing Industrial Sustainability Through Energy Efficiency Improvements in Motors and Motor-driven Systems
Baskar Vairamohan (EPRI, USA), Satish Rajagopalan (EPRI, USA), Marek Samotyj (EPRI, USA), Sudeshna Pabi (EPRI, USA) .......................................................... 55

Smart Grid I

Residential Water Heaters as a Grid-Scale Energy Storage Solution Using Model Predictive Control
Kelcey Lajoie (Oregon State University, USA), Douglas Halamay (Oregon State University, USA), Ted Brekken (OSU, USA) .......................................................... 62

Active Power Control of Photovoltaic Power Systems
Anderson Hoke (University of Colorado Boulder, USA), Dragan Maksimovic (University of Colorado Boulder, USA) .......................................................... 70
**Alternate Energy II**

*Load Modeling Methodologies for Cascading Outage Simulation Considering Power System Stability*
Jiajia Song (Oregon State University, USA), Eduardo Cotilla-Sanchez (Oregon State University, USA), Ted Brekken (OSU, USA) .................................................................................................................. 78

*Smart Grid Distribution Prediction and Control Using Computational Intelligence*
Shawn Chandler (Portland State University, USA), Joshua Hughes (Portland State University, USA) .................................................................................................................. 86

*Multi-agent residential demand response based on load forecasting*
Ivana Dusparic (Trinity College Dublin, Ireland), Colin Harris (Trinity College Dublin, Ireland), Andrei Marinescu (Trinity College Dublin, Ireland), Vinny Cahill (Trinity College Dublin, Ireland), Siobhán Clarke (Trinity College Dublin, Ireland) .................................................................................................................. 90

**Quality of Life I**

*DC Arc Flash Calculations for Solar Farms*
Eduardo H. Enrique (Stantec Consulting Ltd., Canada), Peter N Haub (Stantec Consulting Ltd., USA), Timothy Bailey (Stantec Consulting Services Inc, USA) .................................................................................................................. 97

*Wave Energy Converter Modeling in the Time Domain: A Design Guide*
Bret Bosma (Oregon State University, USA), Ted Brekken (OSU, USA), Tuba Özkan-Haller (Oregon State University, USA), Solomon Yim (Oregon State University, USA) .................................................................................................................. 103

*Mobile Elemental Power Plant (MEPP)*
Julanne McCulley (Weber State University, USA) .................................................................................................................. 109

*Novel Wireless Performance Monitoring for Small Wind Turbines*
Joshua D Freeman (Amrita University, India), Melvin Sabu (Amrita Vishwa Vidyapeetham University, India), Balakrishnan Shankar (Amrita Vishwa Vidyapeetham, India), Krishnashree Achuthan (Amrita School of Engineering, India) .................................................................................................................. 114

*Development of low-profile piezoelectric energy harvester for high load application*
Thorin Purviance (Washington State University Tri-Cities, USA), Spencer Wickler (Washington State University Tri-Cities, USA), Keith Clayson (Washington State University Tri-Cities, USA), Travis Barnes (Washington State University Tri-Cities, USA), Changki Mo (Washington State University Tri-Cites, USA) .................................................................................................................. 120

*Server Sky - Computation and Power in Orbit*
Keith Lofstrom (Server Sky, USA) .................................................................................................................. 126

*Piezoelectric Sensors for Taxiway Airport Traffic Control System*
Chung Leung (Texas A&M University-Kingsville, USA), Wei-Da Hao (Texas A&M University-Kingsville, USA), Claudio Montiel (Texas A&M University at Kingsville, USA) .................................................................................................................. 134

*Effects of Salinity and Feed Temperature on Permeate Flux of an Air Gap Membrane Distillation Unit for Sea Water Desalination*
Ifegwu Eziyi (Florida State University, USA), Anjaneyulu Krothapalli (Florida State University, USA), Julián Ramírez (Florida State University, USA), Juan Ordonez (Florida State University, USA), Jose Vargas (Federal University of Parana, Brazil) .................................................................................................................. 142

*Our Environmental Handprint -- The Good We Do*
Jon Biemer (Creating Sustainability, USA), Willow Dixon (Creating Sustainability, USA), Natalia A Blackburn (Blackburn Engineering, USA) .................................................................................................................. 146
Smart Grid II

Look-ahead Economic Dispatch of Microgrids with Energy Storage, Using Linear Programming
Anderson Hoke (University of Colorado Boulder, USA), Alexander Brissette (University of Colorado, USA), Shawn Chandler (Portland General Electric, USA), Annabelle Pratt (Intel Labs, USA), Dragan Maksimovic (University of Colorado Boulder, USA) .......................................................... 154

A Motor-Generator and Supercapacitor Based System for Micro-Grid Frequency Stabilization
Rick Crispo (Oregon State University, USA), Ted Brekken (OSU, USA) .......................................................... 162

Optimal Demand Response Bidding and Pricing Mechanism: Application for a Virtual Power Plant
Ashot Mnatsakanyan (Masdar Institute of Science and Technology, UAE), Scott Kennedy (Masdar Institute of Science and Technology, UAE) .......................................................... 167

Characterizing Energy Usage of Chevrolet Volt Versus Speed
Dale S.L. Dolan (California Polytechnic State University, USA), Taufik Taufik (California Polytechnic State University, San Luis Obispo, USA), Matthew Ducasse (California Polytechnic State University, USA) .......................................................... 175

The Effect of Demand Side Management on Reliability of Automated Distribution Systems
Salman Kahrobaee (University of Nebraska-Lincoln, USA), Sohrab Asgarpoor (University of Nebraska-Lincoln, USA) .......................................................... 179

Alternate Energy III

Modeling and simulation of the microalgae derived hydrogen process in compact photobioreactors
Jose Vargas (Federal University of Parana, Brazil), David Mitchell (Federal University of Parana, Brazil), Juan Ordonez (Florida State University, USA), Andre Mariano (Federal University of Parana, Brazil), Diego Corrêa (Federal University of Parana, Brazil) .......................................................... 184

Energy harvesting technologies for structural health monitoring application
Changki Mo (Washington State University Tri-Cites, USA), Joseph Davidson (Washington State University Tri-Cities, USA) .......................................................... 192

Poster Session

Wind Power Ramping in BPA Area
James Mullen (Washington State University - Tri-Cities, USA), Mohamed Osman (Washington State University-Tri-Cities, USA) .......................................................... 196

WSN Based Tracking for a Concentrating Solar Thermal Energy System
Joshua D Freeman (Amrita University, India), Jibin Varghese (Amrita Vishwavidyapeetham, India), Divya Pullarkatt (Amrita Vishwa Vidyapeetham, India) .......................................................... 203

Battery Recharging and Testing Swap Stations
Russell Ellis (Portland State University, USA), Caitlin Fackrell (Portland State University, USA), Thatcher Gordon (Portland State University, USA), Phil Lamb (Portland State University, USA), James Morris (Portland State University, USA), Charlie Kawasaki (BETTERY, Inc., USA) .......................................................... 208

Communication(s) and Technology in Spectrum Implementation with Body Earth
John Vinson (Bonneville Power Administration Retired, USA) .......................................................... 212

Investigating the Effects of 802.11n Interference on Home Area Networks
Daniel Ihlenfeldt (Southern California Edison, USA), Clint Powell (SCE, USA), Afshin Amini (SCE, USA) .......................................................... 218

Integrating heterogeneous distributed energy resources to manage intermittent power at low cost
Shahin Abdollahy (University of New MExico, USA), Olga Lavrova (University of New Mexico, USA), Nicholas Heine (University of New Mexico, USA), Svetlana V. Poroseva (University of New Mexico, USA), Andrea Mammoli (the University of New Mexico, USA) .......................................................... 223
Supercapacitor Energy Storage Systems for Voltage and Power Flow Stabilization
Arne Bostrom (OSU, USA), Annette von Jouanne (Oregon State University, USA), Ted Brekken (OSU, USA), Alex Yokochi (OSU, USA) .................................................................................................................. 230

Low-cost solar micro-forecasts for PV smoothing
Andrea Mammoli (University of New Mexico, USA), Anthony Menicucci (University of New Mexico, USA), Thomas Caudell (University of New Mexico, USA), Abraham Ellis (Sandia National Laboratories, USA), Steve Willard (Public Service Company of New Mexico, USA), John Simmins (Electric Power Research Institute, USA) .................................................................................................................. 238

Low-Cost Cloud-Based Design of Smart Rural Energy Device in Microgrid: Perspective India (An Energy-On-Demand Service for Rural India)
Mukundhan Srinivasan (Alpha College of Engineering, India), Vineeth Vijayaraghavan (Solarillion Foundation, India), Sabarigirish Vijayakumar (TCS Pvt Ltd, India), Ramesh Rajesh (Solarillion Foundation, India) .................................................................................................................. 244

Variable Energy Resource Induced Power System Imbalances: A Generalized Assessment Approach
Aramazd Muzhikyan (Masdar Institute, UAE), Amro Farid (Masdar Institute, UAE), Kamal Youcef-Toumi (MIT, USA) .................................................................................................................. 250

X-View: The Reichmuth Framework II
Terry Egnor (Energy Resource Management, USA), Howard Reichmuth (Energy Resource Management, USA) .................................................................................................................. 258

Study on the Effect of Solar Irradiance Intermittency Mitigation on Electric Vehicle Battery Lifetime
Alexander Brissette (University of Colorado, USA), Anderson Hoke (University of Colorado Boulder, USA), Joshua Traube (University of Colorado, USA), Fenglong Lu (University of Colorado, USA), Dragan Maksimovic (University of Colorado Boulder, USA) .................................................................................................................. 262

Current Total Harmonic Distortion Calculation of Interior Permanent Magnet Synchronous Traction Motors for HEV/BEV Applications
Leon Jin (Oregon State University, USA) .................................................................................................................. 268

Novel nanomaterials for water desalination technology
David Cohen-Tanugi (MIT, USA), Shreya Dave (MIT, USA), Ronan McGovern (MIT, USA), John H Lienhard, V (MIT, USA), Jeffrey Grossman (MIT, USA) .................................................................................................................. 272
