2013 12th International Conference on Information Technology Based Higher Education and Training

(ITHET 2013)

Antalya, Turkey
10-12 October 2013
# TABLE OF CONTENTS

An Exploratory Study of Employing Blogs as a Platform for English Learning Beyond the Classroom* ................................................................. 1
Chen Yan, Jiang Yuhong

Building Information Modeling-enhanced Team-based Learning in Construction Education ................................................................. 6
Dong Zhao, Kenneth Sands, Zhalin Wang, Yincheng Ye

Multicultural Pragmatic Learning Through Total Students' Engagement ........................................................................................................ 11
Panagiotis Kalagiakos, Gabor Kiss

Creating Win-Win-Win Experiences: When Do Virtual Internships Really Work? ............................................................................................ 17
Ruth Massingill

A Narrative Inquiry into Professional Identity Construction of University EFL Teachers in China A Case Study of Three Teachers Based in Community of Practice ................................................................. 23
Yuhong Jiang, Huizhi Min, Yan Chen, Zhiwei Gong

On Assessment of Students' Academic Achievement Considering Categorized Individual Differences at Engineering Education (Neural Networks Approach) ........................................................................................................ 31
Hassan M. M. Hasha, Maryam Al-Hamadi, Mohamed M. Hassan, Saeed A. Al-Ghamdi, Adel A. Khedr

MOOCs and/or eLectures – a Means of Virtualizing University Education? ................................................................................................. 41
Thomas Ottmann

The Comparison of the Computer Science Learning Habits of the Students on the Obuda University in the Last Five Years ................................................................. 47
Gabor Kiss

MiWIT-Plus: Integrated Text Tools for Creating EFL/ESL Reading Materials Integrated Text Analysis Tools, SNS and Cloud Storage within the MS Word Platform ........................................................................................................ 50
Ryoji Matsuno, Kanako Matsuo, Richard Gilbert, Yutaka Tsutsuki

Easy-to-answer web-based Questions with Considerable Explanatory Power to Predict EFL-learners’ Basic Skills ........................................................................................................ 55
Atsuko Kuramoto, Toru Ochi

University EFL Teacher Learning in Community of Practice ........................................................................................................ 59
Yuhong Jiang, Ding Zheng

A Virtual Stock Exchange Simulator for Education and Training ........................................................................................................ 67
Zenon Chaczko, Robin Braun, Arman Jizan

Applying Mobile Trends in Education: A Mobile Learning Guideline ........................................................................................................ 72
Ilker Yengin

Cloud-Savvy Contextual Spaces as Agile Personal Learning Environments or Informal Knowledge Management Solutions ........................................................................................................ 77
Denis Gillet, Evgeny Bogdanov

A Web-based Solution to Collect, Manage and Analyse Auditory Brainstem Response Data ........................................................................................................ 83
Zenon Chaczko, Samuel Kirkpatrick, Robin Braun

Linking Theory with Practice .......................................................................................................................................................... 87
Petra Poulova, Blanka Frydrychova Klimova

IT and Management from Graduates’ View 20-year Evaluation of the Study Programme ................................................................................................. 91
Petra Poulova, Ivana Simonova

Didactic Reflection of Learning Preferences in IT and Managerial Fields of Study ................................................................................................. 96
Petra Poulova, Ivana Simonova

Applying Knowledge, Skills and Abilities in Undergraduate Research Seminar Course ........................................................................................................ 101
Hend S. Al-Khalifa

Constructing an English Vocabulary Test Website: A Database Application ........................................................................................................ 104
Dan-Pui Feng, Hua-Jen Yu

Automatic Generation of Assessment Objects and Remedial Works for MOOCs........................................................................................................ 108
Sergio Miranda, Giuseppina Rita Mangione, Francesco Orlicaudi, Matteo Gaeta, Vincenzo Loia

Using 3D Virtual Learning Environments in New Perspective of Education ........................................................................................................ 116
Rosana Wagner, Sandra Dutra Piovesan, Liliana Maria Passerino, Jose Valdeni De Lima

Gaze Behavior Analysis in Multiple-Answer Tests: An Eye Tracking Investigation ........................................................................................................ 122
Nabumi Nagrahaningsih, Marco Porta, Stefania Ricotti

Virtual Reality System to the Inclusion of People with Disabilities in the Work Market ................................................................................................. 128
Sandra Dutra Piovesan, Rosana Wagner, Roseccla Duarte Medina, Liliana Maria Passerino

A Preliminary Analysis of Light Blue Backgrounds on the Scores of Web-based Tests using NIRS ........................................................................................................ 135
Atsuko K. Yamazaki, Kaoru Eto, Hitomi Shimada
Moving Away from Simulations: Innovative Assessment of Mechatronic Subjects Using Remote Laboratories............................................................................................................................... 308
Sarath Kodagoda, Alen Alempijevic, Shoudong Huang, Michel De La Villefromoy, Michael Diponio, Luke Cogar

A Case Study of e-tutors' Training Program .................................................................................. 313
Doukakis Spyros, Koutroumpa Cleo, Despi Olga, Raffa Elissa, Chira Theodora, Michalopoulou Georgia

Framework Integrating Multiple Dimensions of Competency and Related Pedagogies - A Case for IT Industry ............................................................................................................................... 318
Ravi Shankar Pillutla, M. G. P. L. Narayana

Why Do Students Prefer Search Engines Over Academic Databases .......................................................... 326
Arif Selcuk Ogrenci

Combining technologies with the ECFS file system ........................................................................ 329
Konstantinos Chinos, Dimitris Kallergis, Michael Basios, Christos Douligeris

Peer-assessment and Grading of Open Answers in a Web-based e-learning Setting ........................................... 333
Andrea Sterbini, Marco Temperini

Individual learning path constructing in multilevel regional educational system .................................................. 340
Alexander Shukhman, Maria Motyleva, Isabella Belonovskaya

Dynamic Synchronization of Learning Contents of Distributed Learning Management Systems over Band Limited Network - Contents Sharing Between Distributed Moodle 2.0 Series .......................................................................................................................... 344
Tsuyoshi Usagawa, Masahiro Yamaguchi, Yoshifumi Chisaki, Royyana Muslim Ijtihadie, Achmad Affandi

Design of a Domain-Independent Training System Based on a Smart Pedagogical Agent .................................. 350
Carla Limongelli, Giovanni Mosiello, Stefano Panzieri, Filippo Sciarrone, Antonio Zoccoli

Influence of Learning Styles on Improving Efficiency of Adaptive Educational Hypermedia Systems ............................................. 356
Suad Kulaglic, Izudinka Kapetanovic Serdarevic, Samra Mujacic, Suad Kasapovic

Control Engineering Education Critical Success Factors Modeling via Fuzzy Cognitive Maps ................................ 363
Engin Yesil, Cihan Ozturk, M. Furkan Dodurka, Atakan Sahin

Development of a Skill Learning Environment for Posture and Motion with Life-size Bone Model using Augmented Reality .......................................................................................................................... 371
Masaru Okada, Masato Soga, Takazumi Kawagoe, Hirokazu Tuki

Playful Participation for Learning in Higher Education - the Introduction of Participatory Role Play Simulation in a Course at Hedmark University College .......................................................................................................................... 379
Tone Vold, Sule Yildirim

Get Your Students to SMILE! Exploring Emerging Interaction Technologies ......................................................... 383
Torben E. Svane

Teaching and Learning Perspective on System Development in Large Teams .................................................. 389
Zenon Chaczko, Robin Braun
