2013 3rd International Workshop on Replication in Empirical Software Engineering Research

(RESER 2013)

Baltimore, Maryland, USA
9 October 2013
Session 1: Joint Replication - Conway's Law

A Decade of Conway’s Law: A Literature Review from 2003-2012 .................................................................1
   Sabrina E. Bailey, Sneha S. Godbole, Charles D. Knutson, and Jonathan L. Krein

An Evolutionary Perspective on Socio-Technical Congruence: The Rubber
Band Effect ..........................................................................................................................................................15
   Stefanie Betz, Darja Šmite, Samuel Fricker, Andrew Moss, Wasif Afzal, Mikael Svahnberg, Claes Wohlin, Jürgen Börstler, and Tony Gorschek

Impact of Communication Structure on System Design: Towards a Controlled
Test of Conway’s Law ........................................................................................................................................25
   Kyle L. Blatter, T.J. Gledhill, Jonathan L. Krein, and Charles D. Knutson

Relationships Between Communication Structure and Software Architecture:
An Empirical Investigation of the Conway’s Law at the Federal University
of Pernambuco ................................................................................................................................................34
   Anderson M. de Santana, Fabio Q.B. da Silva, Regina C.G. de Miranda,
   Angélica A. Mascaro, Tatiana B. Gouveia, Cleviton V.F. Monteiro, and André L.M. Santos

Session 2: Methods and Methodology

A Replicable Infrastructure for Empirical Studies of Email Archives .................................................................43
   Megan Squire
Towards a Taxonomy of Replications in Empirical Software Engineering
Research: A Research Proposal .................................................................50
  Cleyton V.C. de Magalhães and Fabio Q.B. da Silva

A Partial Replication with a Sample Size of One: A Smoke Test for Empirical
Software Engineering .................................................................................56
  Andrew Brooks, Jason Chambers, Chee Nou Lee, and Forest Mead

Two Replication Studies for Evaluating Artefact Models in RE: Results
and Lessons Learnt ..................................................................................66
  Birgit Penzenstadler, Jonas Eckhardt, and Daniel Méndez Fernández

Session 3: Replication Studies
A Replicated Comparative Study of Source Code Authorship Attribution ..................76
  Matthew F. Tennyson

On Parameter Tuning in Search Based Software Engineering: A Replicated
Empirical Study .......................................................................................84
  Abdel Salam Sayyad, Katerina Goseva-Popstoianova, Tim Menzies,
  and Hany Ammar

The Use of Visual Text Mining to Support the Study Selection Activity
in Systematic Literature Reviews: A Replication Study ..................................91
  Katia Romero Felizardo, Simone R.S. Souza, and José Carlos Maldonado

Author Index ............................................................................................101
