KEITH MILLIS SYMPOSIUM ON DUCTILE CAST IRON
October 15-17, 2013 • Loews Vanderbilt Hotel • Nashville, TN

Table of Contents

1. Inter-Laboratory Study of the Determination of Nodularity and Nodule Count of Ductile Iron by Image Analysis .......................................................... 1
   Grenier, Bhattacharjee, Gundlach, Kroka, LaBrecque, Riabov

2. The Continuing Evolution of MgFeSi Treatments for Ductile and Compacted Graphite Irons .......................................................... 14
   Hartung, White, Copi, Liptak, Logan

3. Filtering a Heavy Section Ductile Iron Casting—New Opportunities .................................. 22
   Reuther

   Dawson, Popelar

5. Optimized Lifetime Prediction of Ductile Iron and CGI Castings ..................................... 40
   Heisser, Hepp, Sturm, Thomser

   Shaner, Dickinson, Adams

7. Iron Turbulence Analysis via Foundry Water Model I: Introduction .................................. 54
   Pinto, Alquist

8. Experiences in Identifying and Reducing Ductile Iron Casting Defects ......................... 62
   Alagarsamy, Kumar

9. The Effect of Copper on the Ferrite—Pearlite Ratio in Ductile Iron .................................. 86
   Samuel, Viswanathan

    Material Structural Design ......................................................................................... 98
    Zanardi
11. Advanced Fracture Mechanics Testing of DCI—
A Key to Valuable Toughness Data ................................................................. 121
   Baer

12. As-Cast Ausferritic Ductile Iron ................................................................. 131
    de la Torre, Stefanescu, Hartmann, Suarez

    Keough, Hayrynen

14. The Importance of Rare Earth Contribution from Nodulizing Alloys and
Their Subsequent Effect on the Inoculation of Ductile Iron ...................................... 154
    Riposan, Chisamera, Uta, Stan, Naro, Williams

15. Optimization of Chemical Compositions of Ductile Iron ........................................ 174
    Pokusová, Murgaš

Properties, Production and Application ........................................................................ 181
    Stets, Löblich, Gassner, Schumacher

17. Proposed Theory on the Mechanism for Spheroidal Graphite Formation in Iron
(with reviews) ...................................................................................................................... 191
    Campbell

18. A New Model for the Solidification of Ductile Iron ............................................ 214
    Viswanathan, Samuel

19. Novel Approaches to Analyze the Structure of Ductile Iron ..................................... 224
    Lekakh, Harris

    Lacaze, Magnusson Åberg, Sertucha

Note: The table of contents does not necessarily follow the order of presentations as listed on
the agenda. Only paper presentations have been published.
