# TABLE OF CONTENTS

## VOLUME 1

### PLENARY SESSIONS

#### PLENARY SESSION - 1

**Fully Vertically Integrated Coal Based Clean Energy Company --- The Future of Coal Industry**

Yuzhuo Zhang  

**CONSOL Energy and the States of the U.S. Coal Mining and Coal-Fired Electric Generation Industries**

Richard A. Winschel

#### PLENARY SESSION - 2

**CFB Combustion and Coal Slurry Gasification**

Guangxi Yue

**Coal and Coal Based Energy in Turkey**

Güven Onal

#### PLENARY SESSION - 3

**Lessons Learned from U.S. Government Support of Clean Coal Technologies**

Thomas A. Sarkus

### ORAL SESSIONS

#### SESSION 1: COAL SCIENCE: GENERAL - 1

**Effect of Grinding Medium on the Surface Chemical Property and Flotation Behavior of Coal Middlings**

Weining Xie

**Mercury and Fluorine in the Late Permian Coals from Eastern Yunnan Province, China**

Xibo Wang, Lei Zhao, Shifeng Dai

**Basin - Mountain Evolution and Coalbed Deformation in North China**

Yiwen Ju

**Mercury Removal Technology, Today and Tomorrow**

Robert Nebergall

**Thermal Analysis of Chinese Lignite Pyrolysis Using Thermogravimetry and Differential Scanning Calorimetry**

Zhihang Guo, Qinhui Wang, Zhongyang Luo, Kefa Cen

#### SESSION 2: COAL MINING: GROUND CONTROL IN MINING – SESSION 1

**Development and Applications of Rock Bolting Materials for Coal Mine Roadways**

Hongpu Kang, Jian Lin, Yongzheng Wu

**Experiments on Effects to Rock Bolt Pretension by Thread Rolling Accuracy**

Lixin Yan

**Simulation Analysis of the Bolt Support in Inclined Shaft Through the Soft Rock Strata**

Pengfei Jiang

**Technology Research on Weakly-cemented Sandstone Roadway Supporting in Lignite Coal Mine and its Application**

Mingjian Fan

**Research on Testing and Comprehensive Assessment Methods of Coalmine Goaf Treatment Effect**

Zhang Gang-Yan

#### SESSION 3: GASIFICATION: GENERAL - 1

**State of the Gasification Industry - The Updated Worldwide Gasification Database**

Chris Higman

**Modeling of Volatiles Condensation and Re-evaporation in Coal Gasification in a Low-Temperature, High-Pressure Entrained-Bed Reactor**

Ming-Hong Chen, Yau-Pin Chyou, Ting Wang

**Dry Solids Pump Program Status**

Alan Darby

**ITM Oxygen Technology for Clean Energy Applications**

Andrew Mak, Edward P. Foster, Phillip A. Armstrong, John M. Repasky, Vaneric E. Stein
Enhanced Hydrogen Production from Steam Gasification of Coal with In-Situ CO₂ Capture in a Pressurized Fluidized Bed

Nai Rong, Qinhui Wang, Hongtao Fan, Yongjie Meng, Zhongyang Luo, Kefa Cen

SESSION 4: CLEAN COAL AND GAS TO FUELS: GENERAL - 1

Application of Selective Fischer-tropsch Synthesis in CTL and CBTL: Slip-Stream Evaluation and Technoeconomic Analysis

Santosh Gangwal, Tim Hansen

Coliquefaction of Lignite, Wheat Straw and Plastic Waste in Sub-Critical Water

Baofeng Wang, Yaru Huang, Shuguang Zhao, Lirong Li, Jingjun Zhang

Pressure Influence on the Analytical Pyrolysis of Coals

Christian Berndt, Steffen Krzack, Bernd Meyer

SESSION 5: SHALE AND COAL BED GAS: GENERAL - 1

A Next-Generation Simulator for Unconventional Oil/Gas Production

Dongxiao Zhang, Xiang Li

Production Characteristics and Stimulation of Low-To-Moderate CBM Producing Well: Taking Hancheng Pilot Area as an Example

Xianjie Shao, Ze Wu, Yingjie Liu

Exact Title of Paper: Production Performance Evaluation Index System Construction of Medium- High Rank CBM Wells

Xianjie Shao, Xinzhu Dong, Yubo Sun, Ze Wu, Yingjie Liu, Shicai Li, Hou Xu

SESSION 6: CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: GENERAL - 1

Application of Heat-carrier-free Regenerative Rotating Bed Technology on Low-rank Coal Pyrolysis

Daohong Wu, Pei Pei, Qiachen Wang

US-China Advanced Coal Technology Consortium, Us-china Clean Energy Research Center: Research Direction and Program Overview

Jerald J. Fletcher, Chiguang Zheng

U.S. Department of Energy’s CCS Demonstration Projects

Gary J. Stiegel, Thomas A. Sarkus

Summit Power Group

Cynthia Wang

SESSION 7: COAL SCIENCE: GENERAL - 1

Purification of Crude Coal Benzene by Ozonization in Presence of Oxide Catalysts

Zinfer Rishatovich Ismagilov

Effects of Heating Rate and AAEM on the Production of NH₃ and HCN during Pyrolysis of Shengli Brown Coal

Shu Zhang, Yan-Ping Bai, De-Ping Xu, Pan-Pan Zheng, Lei Bai, Yong-Gang Wang

Mechanism of Interaction between Surfactants and Surface Functional Groups of Jincheng Coal by XPS Analysis

Zhiyuan Yang, Xiaoyuan Ren, Baoshan Guan, Kun Zhang

Change of Hydrophilic Oxygen-Containing Functional Groups during Drying Process of Lignite

Xiaoxia Jing, Xiao Liu, Zhiqiang Li, Yunlong Yang, Kaige Jing, Wangchun Chen, Liping Chang

SESSION 8: COAL MINING: GROUND CONTROL IN MINING – SESSION 2

Coal Mining Development and Application of Resin Capsules in Chinese Coal Mines

Bin Hu

Research on the Waterproof Coal Pillar Design for Coal Seam Group Mining Goaf

Yu-Jun Zhang

Synthesis Grouting and Anchoring Reinforcement Application in Deep Roadway

Wenzhou Li

Mechanical Site-Monitoring to Shotcrete Layer of Soft Rock Main Roadway Supported by Bolt-Shotcrete

Shulin Fang, Jian Zhang

Present Application Status of Coal Backfill in China

Feng Cui, Pengliang Liu, Ruemin Feng, Huaxing Zhang

SESSION 9: GASIFICATION: GENERAL - 2

Exact Title of Paper: Experiments and Simulation of Pressurized Ash Agglomerating Fluidized Bed Gasifier

Zheyu Liu, Jiejie Huang, Yitian Fang, Yongqi Zhang, Jiantao Zhao, Yifeng Xu
Degradative Solvent Extraction

Biomass

Improving Tar Yield and Quality by Enhancing Heat Transfer and Regulating Gas Flow in Fixed Bed Coal Pyrolysis Behaviors and Its Semicoke Reactivity

Supercritical Fluid Extraction of Heavy Components of Low Temperature Coal Tar Using N-Pentane Solvent

Comparison of Coal Characterization Procedures Performed According to GB and ASTM/ISO Standards

SESSION 10: CLEAN COAL AND GAS TO FUELS: GENERAL - 2

Carbon Fibers Preparation by Low-Molecular-Weight Fraction Obtained from Low-Rank Coal or Biomass by Degradative Solvent Extraction

Extraction and Analysis of the Phenolic Compounds from Coal Tar Oils

Influence of Liquefaction Conditions on Molecular Composition of Coal-derived Liquids

SESSION 11: SHALE AND COAL BED GAS: GENERAL - 2

An Experimental and Numerical Study of Gas Transport and Inhibition Processes in Coal Matrix

Micro-characteristics of Coal Petrology of Medium-High Rank Coal and Its Influence on CBM Concentration: An Example from Qinshui Basin

Evaluation of the Coalbed Methane Potential of Coal Reservoirs in Weibei Coalbed Methane Field, Southeastern Ordos Basin, China

Coal Reservoir Fracturing Process and the Acoustic Emission Response Based on the Development of Coalbed Gas

SESSION 12: CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: GENERAL - 2

Successful Operation of 500MW Siemens Coal Gasification

Unlocking Potential Value from Low Rank Coal with Trig™ Gasification Technology

Recent Development and Deployment of SES Gasification Technology

Pre-Commercial Demonstration of High Efficiency, Low Cost Syngas Cleanup Technology for Chemical, Fuel, and Power Applications

Coal Data of Turkey

SESSION 13: COAL SCIENCE: GENERAL - 3

Comparison of Coal Characterization Procedures Performed According to GB and ASTM/ISO Standards

Supercritical Fluid Extraction of Heavy Components of Low Temperature Coal Tar Using N-Pentane Solvent

Low Rank Coal Pyrolysis Behaviors and Its Semicoke Reactivity

Improving Tar Yield and Quality by Enhancing Heat Transfer and Regulating Gas Flow in Fixed Bed Coal Pyrolysis

Kinetic Studies for CO2 Gasification of H0k Coke Using Thermogravimetric Analyzer

Alkalis K/Na Migration Rule during Coal and Biomass Co-Pyrolysis Process

Design, Modeling and Characterization of an Entrained Flow Reactor for Pyrolysis/gasification of Coal and Biomass

Influence of Devolatilisation Conditions on Char Chemical Structure and Intrinsic Reactivity

SESSION 15: MINING AND MINERAL PROCESSING: GENERAL - 3

SESSION 16: VIRTUAL CHALK BOARD: GENERAL - 3

SESSION 17: TECHNOLOGY ALLIANCE: GENERAL - 3

SESSION 18: TECHNOLOGY ALLIANCE FOR TELEMECHANICS: GENERAL - 3

SESSION 19: TECHNOLOGY ALLIANCE FOR REFINING: GENERAL - 3

SESSION 20: TECHNOLOGY ALLIANCE FOR POWER: GENERAL - 3

SESSION 21: TECHNOLOGY ALLIANCE FOR COMBUSTION: GENERAL - 3

SESSION 22: TECHNOLOGY ALLIANCE FOR GAS TO LIQUIDS: GENERAL - 3

SESSION 23: TECHNOLOGY ALLIANCE FOR LIQUIDS TO LIQUIDS: GENERAL - 3
## SESSION 14: COAL MINING: ENVIRONMENTAL HAZARDS, REMEDIATION AND CONTROL

<table>

**Locations:**

- China
- United States
- Pakistan
SESSION 19: COAL SCIENCE: GENERAL - 4

Effect of Sodium Carbonate Additive on the Activation of Coal Wastes for Alumina Extraction
Yanxia Guo, Kehou Tan, Yaoyun Li, Fangqin Cheng

Effect of Heating Temperature and Additives on the Transformation of Alkali Metals in Zhundong Coal with High Sodium Content
Shiyan Wang, Limeng Zhang, Tao Yang, Bo Wei, Zhongtao Bu, Hongsan Tan

Process Analysis on Co-Pyrolysis of Lignite and Residue from Shendong Coal Direct Liquefaction
Yanli Xue, Xiaohong Li, Xiaoyong Xue, Qun Yi, Jie Feng, Wenyong Li

SESSION 20: COAL MINING: MONITORING AND CONTROLLING GAS IN MINES

Mining Methane Drainage in Polish Coal Mines
Nikodem Slezak, Dariusz Obracaj

A Novel Technology to Control the Quality of Pre-Mining Methane Drainage
Fubao Zhou, Tongqiang Xue, Jishan Liu, Mingyao Wei, Haijian Li

The Global Methane Initiative and Its Role in Increasing Coal Mine Methane Recovery and Use
Felicia Ruiz, Clark Talkington

Field Performance of Alternate Mining Geometries for Set-up Rooms and Development Entries in Longwall Mining
Yoginder P. Chugh, Harrold Gurley, Behroz Abbasi

SESSION 21: GASIFICATION: GENERAL - 4

Research and Practice on Two Stage Pulverized Coal Gasifier
Guangyao Si

Study on Venturi Characteristics in the Dense Phase Pneumatic Conveying System
Kai Liu, Gong Xin

Modeling Based Development of Internally Circulating Gasifier for High Ash Coals
Alexander Lautwitz, Martin Grabner, Bernd Meyer

Computational Fluid Dynamics Modeling for Coal Size Effect on Coal Gasification in a Two-stage Commercial Entrained-Bed Gasifier
Hyo-Jae Jeong, Dong Kwon Seo, Jungho Hwang

A Dynamic Modeling and Simulation of An Entrained Flow Coal Gasifier
Zelin Wu, Ryang-Gyoon Kim, Chung-Hwan Jeon

SESSION 22: CLEAN COAL AND GAS TO FUELS: GENERAL - 4

High Purity Hydrogen from Coal in a Novel Reactant Looping Gasification
Tomasz Wiltowski, Kanchan Mondal

Hydrogenation of Coal Tar on Dinickel Phosphide Supported on Alumina Catalyst
Shibiao Ren, Xianzhong Cao, Zhiping Lei, Zhicai Wang, Shigang Kang, Chunxia Pan, Hengfu Shui

Fischer Tropsch Synthesis in Supercritical CO2 Atmosphere with Product Gas Recycle
Kanchan Mondal, Adam Sim, Madhav Soti, David Carron, Tomasz Wiltowski

SESSION 23: CARBON MANAGEMENT: GENERAL - 1

CO2 Capture RD&D Proceedings in China Huaneng Group
Shisen Xu

Dynamic Simulation of MEA-based Post-combustion Carbon Capture System
Yali Xue, Xin He, Zhaofeng Xu, Zheng Li

Dynamic Modeling and Control of Post-combustion CO2 Capture Process Integrated with Supercritical Pulverized Coal Plant
Qiang Zhang, Debangsu Bhattacharyya, Richard Turton
Aqueous Ammonia and Amino Acid Salts Blends for CO₂ Capture
Hai Yu, Nan Yang, Dongyu Xu, Qi Yang, Leigh Wardhaugh, Paul Feron, Kangkang Li, Moses Tade, Jingwen Yu, Shujuan Wang

Investigation of CO₂ Desorption in Membrane Vacuum Regeneration Process
Mengxiang Fang

SESSION 24: COMBUSTION: COMBUSTION STUDIES

Mild Combustion of a Lignite Coal in a Laboratory Scale Furnace
Pedro Alvarado, Manabendra Saha, Paul Medwell, Bassam Dally

Estimation of Combustion Reactivity of Different Coal Rank Chars by Physicochemical Properties
Xiaoliang Jia, Zhigang Wang, Yitian Fang

Providing Explosion Safety in Intermediate Dustbin Systems When Burning Coals with High Volatile Content
Krzyztof Jesionek, Ista Ibić

Assessment of the Spontaneous Combustion Potential of Coal Using the Pulse Flow Calorimetric Method: a 20-year Experience
Boleslaw Taraba

SESSION 25: COAL SCIENCE: GENERAL - 5

Behaviors of Radical Fragments in Tar Generated from Pyrolysis of Coal under Various Conditions
Wenjia He, Qingya Liu, Lei Shi, Muxin Liu, Zhenyu Liu, Donghui Ci, Caroline Lievens, Xiaoqian Guo

Preparation of Char-water Slurry Using Various Coal Chars Derived from Pyrolysis and Hydrothermal Treatment
Jianmin Fu, Yutao Shen, Jie Wang

Separation of Phenols from Oils with Quaternary Ammonium Salts Via Forming Eutectic Solvents
Weize Wu

SESSION 26: COAL MINING: SAFETY, ECONOMICS AND MINING TECHNOLOGY

Field Performance of an SIUC Innovative Spray System for Continuous Miners for Coal Mine Dust Control
Yoginder P. Chugh, Harrold Gurley, Vijaya K. Kollipara

Development of China’s Coal Mining Technology and Equipment
Guo-Fa Wang

Top Coal Caving Method for Middle Hard Thick Coal Seam in Shandong Coal Field
Haiyang Yu

Meso-Fracture Experimental Method of Coal Containing Gas Based on the Industrial Computerized Tomography
Baiheng Nie, Xiangchun Li, Juangeng Meng, Hui Zhang

SESSION 27: GASIFICATION: GENERAL - 5

Simulation of a Catalytic Coal Gasification in Elevated Jetting Fluidized Bed
Weiwei Li, Kezhong Li, Shouguo Kang, Jingru Zu, Rong Zhang, Jicheng Bi

Advanced High Pressure Multipiston Feeder for Coal and Coal-biomass Mixtures
Santisinh Gunjwal, Tim Hansen

Fixed Bed Biomass Gasification
Johan C. Van Dyk, Kamil Krzatowski

Experimental and Kinetics Studies on Co-gasification of German Brown Coal and Wheat Straw
Lingmei Zhou, Denise Reichel, Martin Schurz, Guanjun Zhang

SESSION 28: CLEAN COAL AND GAS TO FUELS: GENERAL - 5

Gasoline from Coal and Biomass with CCS: Performance and Cost Analysis
Guangjian Liu, Eric D. Larson, Robert H. Williams, Xiangbo Guo

STF Technology – Production of High Octane Gasoline from Synthesis Gas on a New Route
Mario Kauczel, Joachim Engelmann, Bernd Meyer

Study of Direct Conversion of Syngas to Light Olefins Over Fe Based Carbon Sphere Catalysts
Bai Wang, Xiaoqian Guo, Qi Sun

PDU Scale Demonstration of Substitute Natural Gas Production Using Steam Hydrogasification
Chan Seung Park

SESSION 29: CARBON MANAGEMENT: GENERAL - 2

Alternative to Sequestration – Converting CO₂ into Synthetic Gas
David Banitt, Julie Horn

Carbon Dioxide Utilization by Catalytic Reactions
Zinfer Rishatovitch, Isgmuglov, N. V. Shikina, S. V. Lazareva, V. V. Kuznetsov, M. A. Kerzhentsev, T. N. Teryaeva
Towards Industrializations of CO₂ Reforming CH₄ to Syngas Over the Carbonaceous Catalyst
Yongfa Zhang

Capturing of CO₂ with Tetraethylenepentamine-impregnated Industrial Grade Multi-walled Carbon Nanotubes
Qing Liu

SESSION 30: COMBUSTION: MODELLING STUDIES

Numerical Modeling and Simulation of Hydrogen Sulphide Behavior in Pulverized Coal Combustion
Kenji Tanno, H. Watanabe, H. Tsuji, S. Umemoto, H. Umetsu, H. Shirai

Numerical Investigation of Chemical Reactions Inside Char Particle Macropores
Andreas Richter

The Influence of Shape on The Carbon Consumption of Non-Spherical, Reacting Carbon Particles
Matthias Kestel, Andreas Richter, Petr A. Nikrityuk

3D Numerical Simulation of Gas-Solid Hydrodynamics and Coal Combustion in an Industrial Scale Circulating Fluidized Bed
Massoud Massoudi Farid, Hyo Jae Jeong, Jong-Min Lee, Dong-Won Kim, Jungho Hwang

SESSION 31: COAL SCIENCE: GENERAL - 6

Experimental Study on Emission of Arsenic during High Arsenic Coal Combustion Process
Bengen Gong, Junying Zhang, Yongchun Zhao, Chuguang Zheng

Performance and Flow Pattern of Cyclone in Parallel with Tangential-inlet
Feng Liu, Jianyi Chen

Study Coal Thermolysis Kinetics Using In-Situ Pyrolytic Time of Flight Mass Spectrometer
Lei Shi

SESSION 32: SUSTAINABILITY AND ENVIRONMENT: GENERAL - 1

The High Efficiency and Near Zero Emission Technologies Based on Coal Utilization
Minfang Han, Suping Peng

Solubilisation of Victorian Brown Coal in ‘Distillable’ DIMCARB
Ying Qi, Tarun Tikkoo, Vince Verheyen, Vijay Ranganathan, Douglas Macfarlane, Alan L. Chaffee

Influence of Thermal Pretreatment and Acid-washing on Lignite Pyrolysis at Low Temperature
Huiling Rong, Cuiping Ye, Jie Feng, Xiaohong Li, Wenying Li

SESSION 33: GASIFICATION: GENERAL - 6

Advanced Acid Gas Separation Technology for Gasification Markets
Jeffrey W. Kloosterman, Jeffrey Hufton, Robert Quinn, Fabrice Amy, Shubhra Bhadra, Ellen M. O'Connell, Grant Dunham, Michael Swanson

Performance of a Small-Scale Injector for Atomization of Coal-Water and Petcoke-Water Slurries
Travis Waind, Pat Toth, Kevin Whitty

SESSION 34: CLEAN COAL AND GAS TO FUELS: GENERAL - 6

Process Simulation of Synthesizing Tert-Amyl Methyl Ether with Methanol and C5 Alkenes from High-temperature Fisher-Tropsch Syn crude Oil
Wenyong Li, Qiang Li, Qun Yi, Wenying Li, Jie Feng

Kinetic Study of Gasoline Synthesis from Coal Based Syngas Via Methanol and Dimethyl Ether Using Dual Reactor System
Yizhuo Han, Tao Zhang, Yisheng Tan

Sour Methanation Catalysts and Process Development
Shaodong Qin, Qi Sun, Shouli Sun, Dayong Tian, Donghui Ci

SESSION 35: CARBON MANAGEMENT: GENERAL - 3

New Enterprise and New Vista –Geological Storage of CO₂ Emitted by Coal Chemical Plants in China
Rongshu Zeng, X. Y. Tian, S. Wang, W. D. Xu

TC-265: Development of the First Internationally Accepted Standard for Geologic Storage of Carbon Dioxide under Organization of International Standardization (ISO)
Steven M. Carpenter

MVA Techniques and Application at the Citronelle SECARB Phase III site, Alabama
Steven Carpenter
From Coal Flue Gas to Fungible Fuels: Demonstration of an Algae Based System for CO2 Mitigation From Coal Fired Power Plants ................................................................. 2365
Michael Wilson

SESSION 36: COMBUSTION: NOx STUDIES

Experimental Study on NO Emission during Coal Char Combustion .................................................. 2384
Jie Xu, Rui San, Lijin Ma, Hui Liu
Effects of the Alkali Metals on NO Reduction during Biomass Advanced Reburning ............................ 2419
Jiangtao Hao, Ping Lu, Wei Yu, Yufei Zhang, Xiuming Zhu
Influence of Fly Ash & K/Na Additives on the Thermal DeNOx Process .............................................. 2433
Wei Yu, Ping Lu, Jiangtao Hao, Yufei Zhang, Xiuming Zhu
A Study on Absorption of NO in an Aqueous Solution of Sodium Persulfate ........................................ 2448
Xuchun Gao, Xiaoxun Ma, Xue Kang, Ya Shi

SESSION 37: COAL SCIENCE: GENERAL - 7

Properties of Solidified Fly Ash Suspension Heated at High Temperature ............................................ 2449
Radoslaw Pomykala
Critical Evaluation of Mineral Contents in Coal Using Chemical Quantitative Phase Analysis Method ............................. 2465
Z. Klika, I. Kolomaznik
Experimental Investigation of Factors Governing the Fragmentation of Coal Particles at High-temperature Conditions .......................................................................................................................... 2489
Felix Bastiakov, Shan Zhong, Petr Nikritiyuk, Heiner Gutte, Bernd Meyer

SESSION 38: SUSTAINABILITY AND ENVIRONMENT: GENERAL - 2

Physical-Chemical Characteristics and Potential Utilization of Ferrosphere in Hg Capture/Oxidation 2497
Jianping Yang, Yongchun Zhao, Junying Zhang, Chuangang Zhang
Global GHG Emissions .......................................................................................................................... 2510
Zhuo Xiong

SESSION 39: GASIFICATION: GENERAL - 7

Synergies in Co-Pyrolysis of Lignite and Coal Liquefaction Residues .................................................. 2599
Bang Xu, Renhui Sun, Mo Chu, Wenhan Cao, Zhiming Chang
Molding a Three-Dimensional Hybrid Entrained-Flow and Fluidized-Bed Mild Coal Gasifier .................. 2617
Ting Wang, You Lu
Development of a Higher Concentration Slurry Process Using Low-rank Coals for the GE Entrained-flow Gasification System ..................................................................................................................... 2632
Raul Ayala, Judith Oppenheim, Larry Duke, Xijing Bi

SESSION 40: CLEAN COAL AND GAS TO FUELS: GENERAL - 7

Fast Co-pyrolysis of Coal and Biomass in a Fluidized-Bed Reactor ...................................................... 2642
Jianfei Wang, Jiantao Zhao, Jiejie Huang, Shuangshuang Song, Songqing Guo, Yitian Fang
Ni/Mg-Al Oxide Catalysts for Low-Temperature CO2 Reforming with CH4: Effect of Preparation Method on Catalytic Performances ................................................................................................. 2671
Jie Feng, Xiangdong Feng, Jieying Jing, Xiaohuang Li, Wenying Li
Structure and Hydrogen Storage Properties of the Mg-C Composites Prepared by Mechanical Milling and Heat Treatment ..................................................................................................................... 2680
Tongshun Zhang, Shizhe Zhou, Haipeng Chen, Naiwei Wang, Weixian Ran, Jianqian Zhang
Solid-State Synthesis of Calcium Carbide ............................................................................................... 2696
Patrick E. Iyere, Edward M. Sabolsky, Steven L. Rowan, Ismail B. Celik, Katarzyna Sabolsky, Matt Targett, Stan Morrow

VOLUME 4
SESSION 41: CARBON MANAGEMENT: GENERAL - 4

Synthesis of Solid Amine Sorbents from Fly Ash for CO2 Capture .......................................................... 2717
Zhonghua Zhang, Baodong Wang, Qi Sun
Effect of NaNO3 on the CO2 Capture Activity of MgO-CaCO3-NaNO3 Sorbent ........................................... 2735
Xinfang Yang, Lifeng Zhao, Yunhan Xiao
The Effect of Doping CeO2 for CO2 Capture of Calcium-Based Sorbent at High Temperature .................. 2748
Xiaotong Liu, Junfei Shi, Xiaoxun Ma, Shisen Xu, Chen Li
Theoretical Screening of Solid Sorbents for CO2 Capture Applications .................................................. 2756
Lifeng Zhao, T. Duan, K. Zhang, X. S. Li, D. King, Y. H. Xiao

SESSION 42: COMBUSTION: ASH AND MEMORY

A Study of Slagging and Fouling: Current Theory and Experimental Characterisation of Deposits .............. 2767
Anthony De Girolamo, Bai Qian Dai, Xiaojing Wu, Lian Zhang
Numerical Study on Ash Deposition of Blending Coal in a Drop Tube Furnace ........................................ 2774
Chung-Hwan Jeon, Keju An
Fine Particulate Matter Formation during Co-Firing Lignite with Semi-Char in 25KW Down Fired Furnace ... 2787
Gengda Li, Shuiqing Li, Qian Huang, Qiang Yao, Zhangfa Wu, Gilf Y. Guo

SESSION 43: COAL SCIENCE: GENERAL - 8

Analysis of Low Temperature Oxidation of Coal to Understand the Self-Ignition Mechanism of Coal ............ 2805
Kouichi Miura, Hiroyasu Fujitsuka, Ryuchi Ashida
Controlled Separation of = 300°C Fractions from Low Temperature Coal Tar Based On Selective Reactions ... 2833
Ming Sun
Investigation of Drying Kinetics of Lignites under Isothermal Condition ............................................... 2842
Xiaolin Sun, Xin Gong, Xiaolei Guo

SESSION 44: SUSTAINABILITY AND ENVIRONMENT: GENERAL - 3

Optimal CO2 Abatement Pathways with Induced Technology Progress for Chinese Coal-fired Power Industry ... 2863
Aijun Li, Zheng Li
Forecasting Future Coal Production from Surface Mining in Central Appalachia ........................................ 2874
Wesley Burnett, Mike Strager, Jackie Strager, Aaron Maxwell

SESSION 45: GASIFICATION: GENERAL - 8

Three Dimensional Computational Fluid Dynamics Simulation for Parametric Study on Gasification Performance in an One-stage Entrained Bed Gasifier ................................................................. 2934
Donghui Ci, Caroline Lievens, Xiaofen Guo
A TG-FTIR Study of Low Rank Coals ............................................................................................................ 2957
Affecting of Synergy During Fast Copyrolysis of Biomass/Lignite Blends on the Reactivity of Char ................. 2964
Meijun Wang, Chunhui Fu, Daniel Roberts, Liping Chang
Effects of Inherent Moisture Contents on Lignite Conversion in the Absence and Presence of Steam as Reaction Atmosphere ........................................................................................................... 2975
Lei Bai, Shu Zhang, Kun-Jun Zhang, Yong-Gong Wang, Kai Xu

SESSION 46: CLEAN COAL AND GAS TO FUELS: GENERAL - 8

Electrochemical Capture of CO2 and Instant Conversion into Syngas .......................................................... 2989
Kevin Huang, Lingling Zhang, Zhu-bin Yang, Ming-fang Han
Crack Formation Characteristic of “Ball Structure” Carbonized Briquette ................................................... 3013
Yuqiong Zhao, Yongfa Zhang, Yan Liang, Yuliang Shi, Weiqing Chen
Role of the Ti, Ma, and Cu Promoters on the Structure, Reduction, and Catalytic Behavior of Iron-Based Fischer–Tropsch Catalysts ........................................................................................................... 3026
Wang Peng
Study on Shrinkage Characteristic of Briquette during the Pyrolysis Process ............................................. 3041
Qi Wang, Yongfa Zhang, Yuqiong Zhao

SESSION 47: GASIFICATION: GENERAL - 10

Co-pyrolysis Behavior of Rice Straw and Shenfu Bituminous Coal in Fixed Bed Reactor .............................. 3046
Shuaidan Li, Xueli Chen, Li Wang, Aibin Liu, Guangxu Yu
Effect of Mineral Content and Composition on Catalytic Coal Gasification Characteristics .......................................................... 3055
Tao Lu, Kezhong Li, Rong Zhang, Jicheng Bi
Characteristics of Soot Formed by Rapid Pyrolysis of Solid Carbonaceous Materials .......................................................... 3066
Zhike Gai, Rong Zhang, Jicheng Bi
Effect of Temperature and Pressure on Brown Coal Pyrolysis in a Drop Tube Reactor ............................................................ 3085
Stephan Siegl, Denise Reichel, Steffen Krazack, Bernd Meyer
Influence of the Hydrothermal Dewatering on the Physicochemical Characteristics of Chinese Low-Rank Coals .................. 3092
Lichao Ge, Yanwei Zhang, Zhihua Wang, Jinhu Zhou, KeFa Cen

SESSION 48: COMBUSTION: OXY-COMBUSTION & CHEMICAL LOOPING - 1

Update of Alstom’s Oxy-Combustion Development for Steam Power Plants ......................................................................... 3122
James R. Kenney, Armand Levasserre, Carl Edberg, Benoît Prévot
Ignition and Combustion Characteristics of Wet Victorian Brown Coal in Oxy-Firing and Air-Firing Conditions .................. 3146
Wirhan Pratono, Lian Zhang, Jian Zhang
Chemical Looping Combustion of Methane over Bimetallic Fe2O3–CuO Oxides .......................................................... 3163
Ewelina Ksepko, Ranjani Siriwardane, Hanjing Tian, Thomas Simony, Marek Sciazko
Development, Scale-Up and Process Modeling of Copper-Based Chemical Looping with Oxygen Uncoupling (CLUO) .............. 3171
Kevin Whitby, Jo Ann S. Lighty
Pore Structures Change of Different Particle Size of Pulverized Coal Combustion in an O2/CO2 Atmosphere ......................... 3186
Baijun Yi, Liqi Zhang, Zhihua Mao, Fang Huang, Chuangang Zheng
Combustion of Carbonaceous Material in High Temperature of the Oxidizer with Low Oxygen Concentration .................. 3210
Pedro Nel Alvarado, Francisco Cadavid, Wilson Ruiz, Andres Anell

SESSION 49: COAL SCIENCE: GENERAL - 9

An Integrated Process of Coal Pyrolysis with Methane Steam Reforming for Improving Tar Yield ............................................. 3220
Haoquan Hu, Chan Dong, Lijun Jin, Peng Zheng, Yang Li
Catalytic Performance of Chars as Catalyst for Reforming Pyrolytic Tars from Shengli Lignite Pyrolysis ......................... 3230
Fang-Jie Wang, Zong-Ding Chen, Shou-Yi Li, Shu Zhang, Yong-Gang Wang
Studies on Physical and Chemical Properties of Liquid Products in the Extraction of Coals with Supercritical Carbon Dioxide/NMP Mixed Solvent .......................................................... 3248
Ye Sun, Xingjian Wang, Zhenghua Dai, Guangsuo Yu, Fuchen Wang
Effects of Pyrolysis Conditions on Swelling and Sphericity Properties of Chinese Coals ........................................ 3266
Yuxin Wen, Xiang Xu, Shaojun Yang, Yunhan Xiao
Catalyst Development for Rate Enhanced Acid Gas (CO2) Scrubbing .................................................................. 3275
Kunlei Liu, Cameron Lippert, Joe Remias

SESSION 50: SUSTAINABILITY AND ENVIRONMENT: GENERAL - 4

Effect of O2 Content during Calcination of V2O5-WO3/TiO2 Catalyst on Selective Catalytic Reduction Activity of NO by NH3 .................................................................................................................. 3279
Qingta Liu, Xiaomin Hou, Zhenyu Liu, Guojun Yin, Sifan Chen
Characterization of Sulfation Behavior of Indian Limestones for Sulfur Capture .......................................................... 3299
Sarma V. Pisupati, Hari S. Jammulamadaka

SESSION 51: GASIFICATION: GENERAL - 9

Downdraft Steam-Plasma Gasification of Coal: 1D Kinetic Model and Results .......................................................... 3317
Yadim A. Kuznetsov
Preliminary Characteristic of Coal Gasification by-product from Pilot Plants Based on Fluidized Bed Reactors .................. 3332
Badegele Pomiyaku
Common Active Sites Assumption of Coal Char Gasification in the Mixture of H2O and CO2 .................................................. 3351
Bai Zhang, Qinhui Wang, Zhongxing Luo, Mengxiang Fang
Study on the Sintering Property of Wangjiata Coal in Catalytic Coal Gasification (CCG) Process ........................................ 3369
Yandong Mao, Jicheng Bi, Yan Zheng, Huifang Wang, Yadon Jin Kezhong Li
Sulfide Capturing Techniques for Advanced Fuel Conversion Process by Silica-Supported Sorbents ........................................ 3378
Yau-Fin Chyou, Liang-Wei Huang

SESSION 52: CLEAN COAL AND GAS TO FUELS: GENERAL - 9

Experiments Study on Coal Tar Pyrolysis in Thermal Plasma ........................................................................ 3396
Xuan Li, Jianxiao Han, Cliff Yi Guo, Binbang Yan, Cheng Yan, Cheng Yi
The Effect of Coal Pyrolysis Temperature on the Gas Evolution ................................................................. 3416
The Catalytic Effect of CaO and Fe₂O₃ on Reducing PAHs Release During Coal Pyrolysis ..................... 3430
Chun Zhang, Guanglong Li, Jinying Yan, Zhanglong Liu, Jing Zhang, Fan Li

CO₂ Reforming of CH₄ Over Ni Catalyst Prepared From MgAl Layered Double Hydroxylate by Two-steps Method ........................................................................................................ 3431
Haoquan Hu, Mingguang Song, Lijun Jin, Chuan Dong

Sulfur Removal and Release Behaviors of Sulfur-Containing Model Compounds during Pyrolysis Under Inert Atmosphere ........................................................................................................ 3440
Fenrong Liu, Lili Xie, Huaping Guo, Mei Xue, Ruiting Hu, Haoquan Hu

SESSION 53: GASIFICATION: GENERAL - 11

Synergies in Co-Gasification with Mixtures of H₂O and CO₂ ................................................................. 3467
Yonghui Bai, Lunjing Yan, Zhanglong Liu, Yulong Wang, Fan Li

Computational Fluid Dynamics Simulation of Coal Gasification in a Circulating Fluidized Bed Gasifier ............................................................................................................................... 3468
Yirong Zhang, Fulin Lei, Yunhan Xiao

Mineral Matter Behavior During Co-gasification of Coal and Biomass .................................................. 3489
Guanjun Zhang, M. Klinger, M. Schreiner, L. Zhou

Syngas Combustion in Ash Layer Remained on Coal Surface during Gasification .......................... 3498
Xi Liu, Zhengyu Liu, Qingyu Liu

Sintering Characteristics of Fly Ash from Lignite Gasification in Fluidized Bed .................................. 3510
Xin Yang, Jiejie Huang, Huabin Fang, Jinguo Li, Yiyan Fang, Yang Wang

The Effect of Cooling Rates on Crystallization Characteristics of Coal Slag ........................................ 3529
Weiwu Xuan, Jiansheng Zhang

SESSION 54: COMBUSTION: OXY-COMBUSTION & CHEMICAL LOOPING - 2

Devolatilization of Pulverized Coal in Oxy-fuel and Air Combustion Conditions ............................... 3548
Xiaohong Huang, Zhihui Liu, Chuguang Chen

Char Burnout of U.S. and Chinese Coals Under Oxy-Combustion Conditions .................................. 3558
Shengtong Hu, Alan N. Sayre, Xiaohong Huang, Zhuhui Liu

Redox Kinetics of Oxygen Carriers for Chemical Looping ................................................................. 3588
Marek Sciazko, Ewelina Ksepko

 Effects of Steam on Coal Pyrolysis and Char Combustion in the Presence of CO₂ ............................ 3602
 Danxi Yu, Wenyu Sun, Danxi Yu, Mingzhou Xu

Experimental and Modelling Investigation of the Pilot-Scale Oxy-Fuel Combustion of Victorian Brown Coal .............................................................. 3620
Lian Zhang, Jun Zhang, Xinxiang Wu, Jianwen Zhang, Yoshihiko Ninomiya

Flameless Pressurized Oxy-Coal: The Top of Power Cost Competition for CCS, and the Best Cost Option Along the Transition to Near-Zero Emission ..................................................... 3642
Massimo P. Malavazi, Giancarlo Benelli, Nicola Rosselli, Daniele Cumbo, Alessio Bardì

POSTER SESSIONS

POSTER SESSION 1: GASIFICATION

Characteristics of Solid Materials Sampled at Several Points during Operation of the 3T/d Entrained Coal Gasifier .................................................................................................................. 3669
Bongjin Jung, Nayeon Lee, Wonjun Nam, Chan Lee, Yongseung Yoon, Daesung Kim

Comparison of Ash Fusibility Behavior in Thermal System using Coal and Solid Waste Fuels ........ 3670
Jie Xu, Xia Liu, Feng Zhao, Qinghua Guo, Guansuo Yu, Fuchen Wang

The Effect of Flux on Ash Fusibility of High-Calcium Shanxin Coal .................................................. 3671
Jie Xu, Xia Liu, Feng Zhao, Qinghua Guo, Guansuo Yu, Fuchen Wang

Comparison of Fouling and Sintering Characteristics of Coal Ash with Several Fouling Factors at Reduction Environment ................................................................. 3684
Huocon Namkung

Kinetic Model of Coal-Char Gasification with Steam at Elevated Pressure ....................................... 3685
Qiaoxuan Yan, Jiejie Huang, Jianzuo Zhao, Yiyan Fang

Mild Pyrolysis Behavior and Kinetics Study of Low Rank Coal .......................................................... 3720
Lijuan Gao, Xianglong Zhao, Zhouyu Men, Yi Guo, Ke Liu

Co-Gasification of Coal-Biomass Blended Char with CO₂ at Temperatures of 900-1100°C ............... 3722
Hyo Jae Jeong, Sang Shin Park, Jungho Hwang

A Numerical Study on Coal-Biomass Co-Gasification According to Steam/Fuel Ratio .................... 3723
Jung-Goon Lee, Hyo Jae Jeong, Sang Shin Park, Jungho Hwang

Co-Gasification of Petrocoke with Coal at High Temperatures .......................................................... 3731
Liwei Ren, Jianti Yang, Feng Gao

The Brin Process for Separation of Oxygen from Air ............................................................................. 3735
Evan Granite, Elliot Roth, Michael Hajduk, Karen Uffalussy
The Co-Pyrolysis of Sawdust and Bituminous Coal Using Thermogravimetric Analysis (TGA) and Concentration Measurements of the Evolved Species .......................................................... 3739

Overview of Oxygen Generator Materials .......................................................... 3752

Biomimetic Separation of Oxygen from Air .......................................................... 3760

Magnetic Separation of Oxygen from Air .......................................................... 3769

Simulation of High Ash Content Coal Gasification on Circulating Fluidized Bed to Produce Fuel Gas for Ceramic Kilns .......................................................... 3778

Reactivity of Brazilian Coals in CO₂ Atmosphere .............................................. 3779

Cold Flow Test of Coal Pyrolysis with a Solid Heat Carrier ............................... 3780

Gasification Reactivities ofChars Derived from Different Lignites ..................... 3788

POSTER SESSION 2: COMBUSTION

Status and Evaluation of the Various Methods of Renewable Fuel Co-Firing in Korean Pulverized Coal Power Plants ........................................................................... 3796

Numerical Approaches to Retrofit of a Conventional Pulverized Coal Burner to an Oxy-Firing Burner .......................................................... 3797

A Study on NO₃ Reduction Characteristics through Syngas Reburning in a Pilot Scale Pulverized Coal Combustion System .................................................. 3798

An Experimental Study on Slagging/Fouling Characteristics for Various Coals Using a 50kWth Pulverized Coal Combustion System ........................................... 3799

Development of a Low NOₓ Combustor .............................................................. 3800

New Method of Characterizing Intrinsic Coal Combustion Behavior with TG .......... 3802

Catalytic Hydroprocessing of Model Compounds Simulating Coal Tar ................ 3809

Cu/SO₂ Catalysts Prepared by Different Methods for Hydrogenation of Ethyl Acetate to Ethanol .......................................................... 3819

Development of Catalyst for Manufacturing High Calorie SNG ......................... 3820

Determination of Toluene-Insoluble Content in Coal Pyrolysis Tar and Pitch .......... 3821

Research Progress of Suspended Reactor Hydro-Cracking Technology ............... 3823

Separation of Toluene and Methylenecholoxane by Dimethyl Sulfoxide .............. 3829

Catalytic Effects of Iron-based Catalysts on Product Distribution of Long-Flame Coal Hydropyrolysis .......................................................... 3838

Recycling of Tail Gas in Fischer-Tropsch Bubble Column Slurry Reactors and its Impact on the Coal-to-Liquid Process .......................................................... 3851

POSTER SESSION 3: CLEAN COAL AND GAS TO FUELS

POSTER SESSION 4: SUSTAINABILITY AND ENVIRONMENT

Study on the Optimal Coupling Paths between Nuclear Energy and Coal-Based Synfuels Processes .......................................................... 3861

Approaches to Developing Methodology for Evaluation of Energy Efficiency of Coal Chemical Processes .......................................................... 3865
POSTER SESSION 6: COAL SCIENCE

Surface Characterization of Ultrafine Fly Ash Interaction with Mercury .................................................. 3930
Ji-Eun Jung, Jennifer Wilcox, Adam Jew, Erik C. Rupp

The Radiation Characteristics of Radicals in CH4 Co-Flowing Jet Diffusion Flame ........................................ 3931
Xudong Song, Ting Zhang, Qinghua Guo, Yan Gong, Guangxiao Yu

The Chemical Structural Characteristics of Coals Rich in Semi-Fusinite .................................................. 3950
Shaqing Wang, Yuegang Tang, Fan Huang, Di Jiang, Xiaoxuan Li, Xin He

“Vehicle” Role of Solvent in Direct Coal Liquefaction Process ................................................................. 3958
Muxin Liu, Jian Yang, Zhenyu Liu, Wenjing He, Yanmei Li, Yong Yang

Pyrolysis of Liulin Coal Simulated by GPU-Based ReaxFF MD with Cheminformatics Analysis .................. 3961
Xiaoxia Li, Mo Zheng, Jian Liu, Ze Wang, Li Guo, Wenli Song

Study of Helianthus Annuus Stem Fast Pyrolysis by Using Py/GC/MS ....................................................... 3963
Huaikuan Zhang, Anming Zhou, Fuxin Chen

The Performance Research of DCFC with Shenhua Semi-Coke as Fuel .................................................... 3967
Guo-Yang Zhang, An-Ning Zhou, Jie-Shan Qiu

A Preliminary Study on Coal Graphitization in High Temperature ............................................................... 3972
Zhuqing Zhang, Ya-Ting Zhang, Yun-Peng Si, Zhi-Yong Hou, An-Ning Zhou

Variations in Characteristics of Extract with Coal Rank of Four High-Organic-Sulfur Coals in China .......... 3976
Yuegang Tang, Weizhi Li, Liang Wang, Cong Wang

Coupling of Volatile Radical Fragments in TGA Crucible During Pyrolysis of Coal ................................. 3984
Lei Shi, Qinghua Guo, Xiangwei Guo, Wenjing He, Zhenyu Liu

Compare with CO Regeneration and Thermal Regeneration of V_2O_5/AC Catalyst-Sorbent for SO_2 Removal 3987
Yaqin Hou, Rui Zhang, Zhenyong Huang, Shijie Guo

Rapid Oxidation of Lignite to Produce Benzene Carboxylic Acids at High Temperatures ......................... 3989
Weizhe Wu, Wenhua Wang, Yucai Hou, Muge Niu, Tong Wu, Jian Li

Catalytic Oxidation of Lignite to Produce Chemicals in High-Temperature Water ....................................... 3990
Weizhe Wu, Wenhua Wang, Yucai Hou, Muge Niu, Jiahe Yan

Utilization of Photocatalytic Reactions to Conversion of Different Rank Coals and CO_2 into Methanol .... 3991
Yao-Ting Zhang, An-Ning Zhou, Guo-Qiang Liu, Jiang-Tao Cai, Yun-Peng Si

Mercury, Trace Elements Release Characteristics during Integrated Process of Coal Pyrolysis with Methane 3995
Haoquan Hu, Yang Li, Lijun Jin, Chao Dong, Yongchun Zhao

Steam Reforming of Low-Rank Coals ............................................................................................................. 3996
Zhiqiang Zhao, Juwei Zhang, Feixiang Zhao, Xi Xue, Guangwen Xu

Behavior of Mercury Oxide over Activated Carbon in Simulated Coal Combustion Flue Gas by Temperature 3998
Shengji Wu, Rita Katayama, Azhar Uddin, Eiji Sasaoka

Mechanical Activation Method for Preparation of Carbon Sorbents .......................................................... 3999
Tatyana Sergeeva Manina, Natalia Ivanovna Fedorova, Zinfer Rishatovitch Izmagilov
CoPore Structure..............................................................................................................................................................................4000
Zinber Rashidovich Imangilov, Nadezhda Vasil'Evna Shkina, Natalia Viktorovna Zhuravleva, Roza Ravilevna Potokina, Tatiana Nikolaevna Teryaeva

Modeling of Lignin Pyrolysis Based on Bond Dissociation and Fragments Coupling.........................................................................................................................................................................................................................4002
Xiaojin Guo, Zhenyu Liu, Qingyu Liu, Lei Shi

Research on Crushing Mechanism and Separation Characteristic of ZGM Coal Mill..........................................................................................................................................................................................................................................................4010
Hua Wei, Yaqun He, Fengnan Shi, Xianxing Zhou, Shuai Wang, Linhan Ge

ANFIS-Based Level Control System for Flotation Column..........................................................................................................................................................................................................................................................4017
Cheng Sheng, Jingya Wei

Arsenic Occurrence and Enrichment in Single Pyrite Segregated by Float-Sink in Coal Sample from Guizhou, China........................................................................................................................................................................................................................................................................................................................................4024
Chong Tian, Junying Zhang, Rajender Gupta, Yongchun Zhao

Reaction of Carbon Disulfide and Magnesium during Milling with Carbonized Anthracite as Milling Aid......................................................................................................................................................................................................................................................................................................................................................4026
Haipeng Chen, Dexi Wang, Min Tian, Huichao Chu, Bonghun He, Shixue Zhou

Development of Alumina & Silica-Based High Valuable Products from Fly Ash......................................................................................................................................................................................................................................................................................................................................................4031
Xiaohuan Wang, Ruihpeng Wang, Yongfeng Xiu, Xiaoting Liu, Lijian Zhao, Gengzhi Yu, Qi Sun

A Study on Sintering Process of Alumina Extraction from Fly Ash......................................................................................................................................................................................................................................................................................................................................................4039
Yongfeng Xiao, Ruihpeng Wang, Xiaoting Liu, Xiaohuan Wang, Lijian Zhao, Gengzhi Yu, Qi Sun

Inorganic Particle Formation in Blended Coal Combustion......................................................................................................................................................................................................................................................................................................................................................4045
Bin Fan, Xiaopeng Zheng, Dunxi Yu, Minghao Xu

The Mechanism of Gravity Shedding of Ash Deposits in Coal Fired Boiler......................................................................................................................................................................................................................................................................................................................................................4053
Naoki Sato, Shunchiro Usma, Hiroshi Aramaki, Toku Nanuma, Tatsuki Usuki, Ryos Ichihara, Ichiro Naruse

Investigation on the Correlation between Coal Property and Combustion Character of Low Rank Coal......................................................................................................................................................................................................................................................................................................................................................4061
Deting Kong, Ya'jun Tian, Xin Cui, Aigoz Liu, Haiyuan Lu, Aigoz Chen, Ke Liu

Arsenic Physical and/or Chemical Adsorption by CaO during Cooling Process of Simulated Air and Oxy-fuel Combustion Flue Gas......................................................................................................................................................................................................................................................................................................................................................4062
Hongyuan Hu, Dun-Kui Chen, Zhang Xu, Kai-Di Li, Huang Liu, Ai-Jun Li, Hong Yao

Petroleum and Mineralogy of the Super-High-Organic-Sulfur Coals of Late Permian from Chenxi Coalfield, Southern China......................................................................................................................................................................................................................................................................................................................................................4075
Xi Li, Yueqiang Tang

Roles of Anthracite Coal in Preparation of Magnesium-Based Hydrogen Storage Materials......................................................................................................................................................................................................................................................................................................................................................4081
Shixue Zhou, Weixian Ran, Qiangjian Zhang, Haipeng Chen, Naifei Wang, Tuo Li

Thermal Cracking of Representative Model Compounds of Low Temperature Coal Tar......................................................................................................................................................................................................................................................................................................................................................4087
Hongguan Li, Xiong-Chao Lin, Zhong-Qi Wang, Yong-Gang Wang, De-Ping Xu

Catalytic Upgrading of Coal Pyrolysis Tar over Char-Based Catalysts......................................................................................................................................................................................................................................................................................................................................................4093
Jianzhe Han, Xiangdong Wang, Junrong Yue, Shuju Guo, Guangwen Xu

Modeling and Simulation of Coal Devolatilization Behavior of Single Particles with Different Heating Rates......................................................................................................................................................................................................................................................................................................................................................4095
Haoyuan Hu, Liang Zou, Lijun Jin, Chuan Dong, Yang Li

A Study on Tar and its Hexane Soluble Fraction Produced in Pyrolysis of 23 Chinese Coals......................................................................................................................................................................................................................................................................................................................................................4096
Lei Shi, Qingya Liu, Zhenyu Liu

Separation and Identification of Low Temperature Coal Tar Compounds Using silica-Gel Column Chromatography......................................................................................................................................................................................................................................................................................................................................................4100
Xiongchao Lin, Ying Tang, Yi-Ming Hu, Hai-Yong Zhang, De-Ping Xu, Yong-Gang Wang

Effect of Tetrahydrofuran Extraction On XLGL Lignite Pyrolysis in N2 Atmosphere......................................................................................................................................................................................................................................................................................................................................................4106
Haoyuan Hu, Liang Zou, Lijun Jin, Chuan Dong, Yang Li

Composition and Utilization of the Co-Products from Lurgi Gasifier......................................................................................................................................................................................................................................................................................................................................................4107
Xiaoliang Tang, Daniel Reiser

Effect of the Group Composition of Low Rank Coal on Combustion Reactivity......................................................................................................................................................................................................................................................................................................................................................4113
Haiyuan Lu, Ya'jun Tian, Xin Cui, Deting Kong, Cliff Guo, Ke Liu

POSTER SESSION 7: COAL MINING

Strata Response Principle and Stress Distribution Characters of Pre-Driven Recovery Room......................................................................................................................................................................................................................................................................................................................................................4124
Zhi-Gang Wu, W. Z. Li

The Reasonable Analytical Value of Canopy Aspect Ratio of the Two-Leg Shield Powered Support......................................................................................................................................................................................................................................................................................................................................................4134
Yajun Xu, Guofa Wang

Study on Spreading Route of Micro-Seismic Initial Arrival Wave in Rock Strata......................................................................................................................................................................................................................................................................................................................................................4146
Chuan-Peng Wang, Yuan-Jie Wang, Fa-Bing Chen

Gas Monitoring as a Prevention System of Mine Workings in Polish Coal Mines......................................................................................................................................................................................................................................................................................................................................................4147
Nikodem Szelazek, Justyna Swolkin, Dariusz Obraca

POSTER SESSION 8: SHALE AND COAL BED GAS

Adsorption Isotherm Measurements of Gas Shales Using Rubotherm Microbalance for Subsurface Temperature and Pressure Conditions......................................................................................................................................................................................................................................................................................................................................................4155
Xiaoshi Li, Yiwen Ju, Quanlin Hou

Evolution Characteristics and Mechanism of Macromolecular-Nanopore Structure in Tectonically Deformed Coals......................................................................................................................................................................................................................................................................................................................................................4156

Guochang Wang, Yiwen Ju, Timothy R. Carr, Chaofeng Li

Characterization of Organic Species in Liushuhe Oil Shale using GC/MS and DART/MS

You-Quan Dou, You-Jia Tian, Yan-Peng Zhao, Chang-Juan Yang, Xian-Yong Wei

Numerical Simulation on Formation, Dissipation, and Retention of Coalbed Methane Containing Biogenic Gas in Luling Gas Field, China

Yuan Bao, Chongnao Wei, Yiwen Ju

Comparative Study of Enrichment Characteristics and Mining Technology of China’s Coalbed Methane and Shale Gas

Yiwen Ju, Zhifeng Yan, Guochang Wang

Optimization Method of Reasonable Formation Pressure Level in the Development Process of Coalbed Methane Wells

Xianjie Shao, Hao Xu, Yubo Sun, Yingjie Liu, Xinxiu Dong, Shicai Li, Ze Wu

Productivity Prediction Model Establishment and Numerical Simulation of Coalbed Methane Wells

Xianjie Shao, Shicai Li, Yubo Sun, Xinxiu, Hao Xu, Yingjie Liu

The Major Geological Characteristics of Organic-bearing Shales: In Coal-Bearing Rock Strata from Huainan Mine, China

Hongling Bu, Yiwen Ju, Lizhi Fang, Guochang Wang

Author Index
