International Conference on Integrated Modeling and Analysis in Applied Control and Automation

(IMAACA 2005)

Held at the International Mediterranean Modeling Multiconference

Marseille, France
20 – 22 October 2005

Editors:

Agostino Bruzzone       Claudia Frydman
Genevieve Dauphin-Tanguy       Sergio Junco

# Table of Contents

## Regular sessions

Modelling and Identification of unsteady aerodynamics at low angle of attack around a flapping-wing  
*Antonin PERAY, Laurent PLANCKAERT, Geneviève DAUPHIN-TANGUY, Philippe VANHEEGHE*  
1

A review of graph algorithms applied to linear system control  
*Malika YAICI, Ali BELMEHDI*  
9

Algorithm of distance protection based on negative sequence component  
*Dris OUAHDI, Rafik LADJEROUD*  
15

Nonlinear dynamic data reconciliation using general optimization solvers within matlab  
*Ricardo PEREZ-CORREA, Lorenz T. BIEGLER*  
21

Multi-agent Architecture with Continuous Reinforcement Learning in Fuzzy State-Space for Robot Manipulation Control  
*John N. KARIGIANNIS, Costas S. TZAFESTAS*  
31

Simultaneous Robot-World and Hand-Eye Calibration Using a Stereo Head of Cameras  
*Aristos DIMITRIS and Tzafestas SPYROS*  
41

Stable load balancing algorithm in MPLS network  
*Kyeongja LEE, Ahmed RAHMANI, Armand TOGUYENI*  
47

Monitoring leaks in primary piping of nuclear power plants  
*Mario Francisco Guerra BOARATTI, Daniel Kao Sun TING*  
53

## Bond Graph methods for dynamical systems

Systematic reduction of dynamic equations to a minimal set in systems modelled with bond graphs  
*G. ROMERO, J. FELEZ, C. VERA*  
59

Model inversion of electrical engineering systems from bicausal bond graphs  
*G. GANDANEGARA, X. ROBOAM, B. SARENI*  
67

A Linearization Procedure for a Class of Nonlinear Systems Based on Bond Graph  
*Gonzalez-A. GILBERTO, R. GALINDO*  
77

LFT forms for the $\mu$-analysis in case of dependent uncertain parameters in bond graph models  
*C. NIESNER, G. DAUPHIN-TANGUY, F. GUILLEMARD, M. PENGOV*  
83

Prediction method of temperature distribution in an oil-hydraulic system  
*Koki TOMIOKA, Kazuhiro TANAKA, Katsuuya NAGAYAMA, Kimishiro TOKUDA*  
89

Modelling All Electric Ship using Bond Graphs and Switched Systems  
*Tom Arne PEDERSEN, Eilif PEDERSEN*  
95
Diagnosability analysis based on transcendence degrees and BG models
W. El OSTA, A. ACHIR, C. SUEUR, B. OULD-BOUAMAMA

Fundamental concordances between balanced truncation and activity-based model reduction
H. K. FATHY, J.L. STEIN

Deriving Port-Controlled Hamiltonian Models with Dissipation From Bond Graphs
Alejandro DONAIRE, Sergio J. JUNCO

Advanced Control for Continuous Systems
Air-stream and temperature plant remote control
Aziz NAKRACHI, Catalin CHERA

Control and optimisation for the cowpers of a steelmaking plant
C. PETRESCU, D. POPESCU, C. LUPU, T. BAYARJARGAL

Internet based remote process control
Sabin STAMATESCU, Ion MATEI, Dumitru POPESCU

Fault diagnosis for alarm management in industrial processes
Bogdan CIUBOTARU, Alexandru FANEA

Fault Detection in Vehicles
Yaw moment robust fuzzy control with observer for vehicle lateral dynamics
Ahmed EL HAJJAJI, Mohammed CHADLI

Robsust estimation of tire-road frictions and contact forces
A. RABHI, N.K. M’SIRDI, M. OULADSINE, FRIDMAN

Multiple temporal horizon automotive tracking
Hugues MOUNIER, Roger REYNAUD

Vehicle dynamics and road geometry interactions "Road/Vehicle Interaction Modelling"
Mounia NADJI, Yves DELANNE, Claude LAMARQUE, Michel GOTHIÉ

Modeling and validation of ground contact forces and their influence on the movement of center of gravity
Hassan SHRAIM, Mustapha OULADSINE, Hassan NOURA, Bochra ANANOU
