# Table of Contents

## Keynote Address:

*Applying Systems Thinking to Aviation Psychology*  
Nancy Leveson

## NextGen Human Factors Research

*NASA NextGen Flightdeck Research: A Database of Research Areas and Results*  
Mosier, Munc, Reich, Fox, Swarts, Tomko, O'Neill, Cunningham

*Sequential Required Time of Arrival Intervals Utilizing Existing Technologies*  
Alexander & Teller

*Review of Pilot Performance and Pilot Automation Interaction Models in Support of NextGen*  
Sebok & Wickens

## Symposium: Sensor to Analyst: Improved Decision-Making in Aerial ISR Through Training and Decision Support Tools

*Optimizing Data Processing and Management Decisions During ISR Through Innovative Training Regimens*  
Tossell, Jackson, Tripp & Nelson

## Effectiveness of Simulation-Based Training

*The Effectiveness of Microsoft Flight Simulator as a Training Aid for Private Pilot Training and Proficiency*  
Beckman

*Preliminary Examination of Simulator-Based Training Effectiveness*  
Lubner, Dattel, Henneberry, DeVivo, & Allen

## NextGen Air Traffic Control

*The FAA's Human Factors Air Traffic Control / Technical Operations Strategic Research Plan*  
Austrian & Piccione

*Effects of NextGen Concepts for Separation Assurance and Interval Management on ATCo Situation Awareness*  
Strybel, Vu, Chiappe, Morgan, & Battise

*Perceived Usefulness of Planned NextGen Capabilities by Air Traffic Control Tower Controllers*  
Holbrook, Parke, Oyung, Collins, Gonter, & Beard
Display Overload: An Artifact-Based Work Analysis of Air Traffic Management ........................................... 68
Fernandes & Brinton

**Symposium: High Fidelity Simulation and Aviation Training to Improve Problem Solving Skills and Coordination**

High Fidelity Simulation and Aviation Training to Improve Problem Solving Skills and Coordination ... 74
Georgiou, Carlson, & Craig

Teamwork and Performance Outcomes of High-Fidelity Airline Operations Center Simulations .......... 80
Littlepage, Craig, Hein, Moffett, Sanders, Carlson, Ivakh, & Georgiou

Refinement of Mental Models of Interdependence and Communication .................................................... 86
Sanders, Littlepage, & Hein

A Situation Awareness Design Approach to the Position of Airline Maintenance Control in a Simulated Operations Control Center ........................................................................................................................ 92
Bridges

**Situation Awareness**

Exploring the Effects of Working Memory Capacity, Attention, and Expertise on Situation Awareness in a Flight Simulation Environment .................................................................................................................. 98
Ozcan, Cakir, & Say

Situation Awareness and Situation Assessment: How are they related? ....................................................... 104
Hertz & Hertz

Assessing the Efficacy of Situation Awareness Probe Questions for Predicting Air-Traffic-Management Performance .............................................................................................................................................. 110
Miles, Vu, Chiappe, Strybel, & Battise

**Cockpit Automation**

Petrenko

Adaptive Controller Adaptation Time and Available Control Authority Effects on Piloting ....................... 122
Trujillo & Gregory

South African Airline Pilots’ Perceptions of Advanced Flight Deck Automation ............................................. 128
Naidoo

**Symposium: NextGen 2018: What Is and Is Not Likely to Change for Controllers**

Identifying the Impact of NextGen on the Job of Air Traffic Control Specialists in the Mid-Term .............. 153
Baumann, Krokos & Hendrickson
NextGen Operational Improvements: Will They Improve Human Performance? ......................... 159
Beard, Johnston & Holbrook

Assessing the Changing Human Performance Risk Profile in the NextGen Mid-Term ..................... 165
Berry & Sawyer

Pilot/Crew Training

Fornette, Bardel, Lefrancois, Fradin, El Massioui, Darse, & Roumes

Assessment of Manual Flying Skills by Combining Aircraft Parameters with Pilot Control Inputs .... 177
Schubert, Appel & Huttig

Reducing Aggressive Responses to TCAS: Evaluation of a TCAS Training Program .................... 183
Fleming, Pritchett, Popescu & Cleveland

Workload Management

Flight Deck Models of Workload and Multi-Tasking: An Overview of Validation .......................... 189
Wickens & Sebok

Tracking and Visuospatial Working Memory .......................................................... 195
Langerak, Herdman & Howell

Enhancing Military Helicopter Pilot Assistant System Through Resource Adaptive Dialogue Management .................................................................................. 201
Maiwald & Schulte

Single-Pilot Workload Management During Cruise in Entry Level Jets .................................... 208
Burian, Pruchnicki, Christopher, Silverman, Hackworth, Rogers, Williams, Drechsler, Runnels, & Mead

Tuesday Posters

Exploring the Impact of ADS-B NextGen Technology Requirements for General Aviation .......... 214
Borsa, Dillman, & Ropp

Beyond Multitasking: Human Factors Implications for Single-Pilot Operations in the NextGen Environment .................................................................................. 220
Bermudez, Wilt & Deaton

Does Supplementary Computer Generated Cueing Enhance Controller Efficiency in a Congested Communication Environment? ..................................................... 226
Santana, Langhals, Miller & Finomore

Transferring Human Factors Knowledge from Aviation to Development of a Warning System for Landslide .................................................................................. 232
Koglbauer, Hohenberger & Steger
Applied Human Factors Research for the Technical Operations Organization of the Federal Aviation Administration
Austrian & Sierra

Giving a Face to Airline Customer Satisfaction: A Graphic Approach
Wildt, Bowen, & Bowen

The Impact of Cognitive Psychology in Minimizing Human Errors
Jonzon

Training for Situation Awareness
Hertz & Hertz

A Proposal to Reduce Unsafe Aviation Maintenance Task Handovers with a Virtual Training Solution
Gildea, Shebilske, Alakke & Narakesari

Effects of Motion Cueing on an Attitude Recovery Task
Nicholson, Townsend, Staples, Gamble & Herdman

Human-Automation Performance Under Time Pressure Has Limited Benefits
Tunstall & Rice

Applying the Compliance-Reliance Model to System-Wide Trust Theory in an Aviation Task
Tunstall, Geels-Blair & Rice

Air Traffic Control Challenges

Clarifying Cognitive Complexity and Controller Strategies in Disturbed Inbound Peak ATC Operations
Schuver-van Blanken & Roerdink

Effects of Airport Tower Controller Decision-Support Tool on Controllers’ Head-Up Time
Hayashi & Cruz Lopez

Structuring, Analyzing and Monitoring Problems and Decision Making Processes at Civil Air Navigation Sets of a Public Organization
Cabral & Estellita

Outcome-Based Risk Pathways: Utilizing Safety Reports to Understand Risks in Air Traffic Control
Berry, Sawyer & Austrian

Symposium: Measuring Human Factors Success in Acquisitions
Demagalski, Subotić, Crutchfield & Norris

Optimizing Display Designs

The Effects of Stereoscopic Radar Displays on Air Traffic Controller Performance
Russi, Langhals, Miller & Heft
Design and Evaluation of a Co-Planar Separation Display

Ellerbroek, Brantegem, van Paassen, & Mulder

Using Animated Graphics on Aircraft Navigation Displays; Pros and Cons

Oh

Unmanned Aircraft Systems: Model and Training

Stewart

Military Unmanned Aircraft System Operators: Training and Human Performance Issues

Cohn, Olde, Arnold, & O'Neill

Control of Multiple Unmanned Vehicles: A Capacity Model from a Meta-Analysis

Wickens, Gosakan, Gacy & Laux

Enabling Aerospace Team Performance

Development and Validation of Measures for Army Aviation Collective Training

Bink, Seibert, Dean, Stewart, & Zeidman

Exploring The Boundaries of Command and Control Models of Distributed Team Performance in Aviation and Aerospace Operations

Cuevas & Caldwell

Symposium: New Avionics Technologies Human Factors

Yeh, Chase, Goh, Rogers & Starter

Cognitive Engineering Solutions

Visualization of Pairwise Conflict Resolution for Air Traffic Control

van Paasen

Evaluating ASAP (Anticipation Support for Aeronautical Planning): A User-Centered Case Study

Lini, Bey, Hourlier, Vallespir, Johnston, & Favier

Uninhabited Aerial Vehicle Control

UAS in the NAS: Survey Responses by ATC, Manned Aircraft Pilots, and UAS Pilots

Comstock, McAdaragh, Ghatas, Burdette, & Trujillo

Issues Relevant for Synthetic Teammate – Human Teammate Interactions in Operations of a Synthetic Unmanned Aerial System

Cooke & Myers

The Integration of New Technology Into a Complex System

Neville, Blickensderfer, Kaste, Dorton, & Luxion
Wednesday Posters

Coordination in Distributed Unmanned Aircraft Systems ................................................................. 401
Reynolds, Burke, & Salas

North-Up, Track-Up, and Camera-Up Navigation of Unmanned Aircraft Systems ................................. 407
Chappell & Valimont

Examining Memory for Search Using a Simulated Aerial Search and Rescue Task ......................... 412
Perelman & Mueller

Supervisory Control State Diagrams to Depict Autonomous Activity .............................................. 418
Patzek, Rothwell, Bearden, Ausdenmoore, & Rowe

Adaptive Automation for Multiple Aerial Vehicle Supervisory Control: Impact of Changing Automation Levels ........................................................................................................................................................ 424
Ruff, Calhoun, Miller, & Breeden

A Cognitive Engineering Approach for Showing Feasibility Margins on an In-Flight Planning ............ 430
Lini, Vallespir, Hourlier, Labat & Favier

Risk Perception in Ecological Information Systems ................................................................................. 436
Comans, Borst, van Paassen, & Mulder

Spielman, Vargas, Hammack, Bulkley, Lew, & Dyre

Experimental Effective Intensity of Steady and Flashing Light Emitting Diodes for Aircraft Anti-Collision Lighting ..................................................................................................................................................... 448
Yakopcic, Puttman, Kunz, Ang, McPherson, Santez, Donovan, Skarzynski, Trick, Mead, Milburn & Khaouly

Air Transport Incident and Accidents Caused by Crew Situation Awareness Errors ......................... 454
Arnold

The Impact of Binaural Beat Technology on Vigilance Task Performance, Mental Workload, and Psychological Stress ........................................................................................................................................... 459
Shoda & Burns

Able Flight: Increasing Aviation Opportunities for People with Disabilities ........................................ 465
Kirschner, Avery, Majors, Bowen, & Wulle

Improving Student Retention with the Creation of a Student Chapter of a Professional Organization ... 471
Mott & Musselman

Bowen, Bowen, Carney, Kirschner, Lu, Meehan, Mott, & Wildt
### Plenary Researcher Panel

*Synthetic Task Environments and the Three Body Problem* ............................................................... 482  
John Flach

### Safety

*Extending Mission Operations Safety Audits (MOSA) Research to an Indian Sub Continent Island Airline* .......................................................................................................................... 488  
Burdekin

*The National Aviation Operational Monitoring Service: Development of a Survey Methodology* ........ 494  
Connors, Mauro, & Statler

### Visual/Ocular Indices in Flight

*Enhancing Helicopter-Pilot Obstacle Avoidance Using a Binocular Head-Mounted Display* ............... 500  
Beringer & Drechsler

*An Investigation and Analysis of the Vestibulo-Ocular Reflex in a Vibration Environment* .................. 506  
Uribe, Miller, & Smith

*Visual Perspective Illusions as Aviation Mishap Causal Factors* ....................................................... 512  
Patterson, Arnold, & Williams

### Symposium: Human-Centered Automation in Future Air Traffic Management Systems

*Designing for Joint Human-Automation Cognition through a Shared Representation of 4D Trajectory Management* ............................................................................................................. 518  
Klomp, Borst, van Paassen, Mulder, Nieuwenhuisen, Majj, Mooij & van Drunen

*Arrival Management Decisions by Visualizing Uncertainty* ............................................................... 524  
Tielrooij, Borst, van Paassen, & Mulder

*Mismatches between Automation and Human Strategies: An Investigation into Future Air Traffic Management Decision Aiding* .................................................................................................. 530  
Westin, Borst & Hilburn

*Human-Centered Automation as Effective Work Design* ..................................................................... 536  
Pritchett & Feigh

### Modeling for Aviation Safety

*Validating a Model of Automation Supporting the Robotic Arm Controller* ........................................... 542  
Wickens, Sebok, Gacy, Li & Sarter

*Pilot Decision Making: Modeling Choices in Go-Around Situations* ................................................... 548  
Haslbeck, Eichinger & Bengler
Modeling Human and Animal Collision Avoidance Strategies
Koglbauer, Braunstingl, & Haberkorn

Aviation Safety Evaluation by Wavelet Kernel-Based Support Vector Machine
Chang & You

Surface Operations & More

Collaboration, Coordination and Information Requirements for the Support of an Airport Departure Metering Program
Smith, Weaver, Fernandes, Spencer, Evans, & Durham

Flight Deck Technologies to Enable NextGen Low Visibility Surface Operations
Prinzel, Arthur, Kramer, Norman, Bailey, Jones, Karwac, Shelton, & Ellis

Individual Pilot Factors Predict Simulated Runway Incursion Outcomes
Van Benthem & Herdman

Assessing the Effects of Off-Nominal Conditions on NextGen Air Traffic Control Operations
Sawyer & Berry & Austrian

Military Selection

Pilot Cognitive Functioning and Training Outcomes
Carretta, King, Retzlaff, Barto, Ree, & Teachout

Measuring Distribution of Attention as a Part of Situational Awareness – A Different Approach
Meierfrankenfeld, Greb & Vorbach

Cognitive & Physiological Workload Indices

Detecting Fatigue in Commercial Flight Operations Using Physiological Measures
Thomas, Craig, Gast, Grube, Muhm & Romig

Effects of Event Rate on Cerebral Blood Flow Velocity During Vigilance Performance
Neubauer, Dillard, Warm, Funke, Funke, Matthews, Epling, & Dukes

The Use of Functional Near Infrared Spectroscopy (fNIRS) to Assess Cognitive Workload of Air Traffic Controllers
Woo, Willems, Harrison, Izzetoglu, Hah, & Ayaz

Symposium: Display Effectiveness & Neuroergonomics in Tactical Airlift

An Integrated Neuroergonomic Assessment of In-Flight Pilot Workload
Harbour, Christensen, Estepp, & Gray

Perceptual and Adaptation Implications with Display 3-D Spatial Location: Retrofit of HUD on a Tactical Airlift Platform
Harbour, Hudson & Zehner
Controller-Pilot Communication

Communication Sequences in Controller Pilot Communications ............................................................. 633
Histon, Rantanen, & Alm

Recommendations Supporting Development of Flight Deck DataComm Text and Graphic Display
Evaluation Guidance ........................................................................................................................................ 639
Gallimore, Munoz, Oh, Crory, Green, Shingledecker, & Tsang

Controller-Pilot Communications in the Presence of Asynchronous UAS Radar Surveillance Data ...... 645
Yuan, Histon, Burns, Waslander, & Dizaji

Pilot & ATC Selection

Looking for Chuck and PT: An Evidence-Based Approach to Assessing Helicopter Pilots...................... 651
Dickens

The Psychomotor Vigilance Test: Sources of State and Trait Variance ......................................................... 657
Hoermann

The Utility of AT-SAT in Hiring Graduates of an Air-Traffic Collegiate Training Initiative Program ... 663
Pierce & Bleckley

Auditory/Vibrotactile Displays

Comparing the Effects of Simulated, Intelligent Audible Checklists and Analog Checklists in Simulated
Flight ........................................................................................................................................................... 669
Hilton & Hard

Flight Deck Audio Displays: Striking the Right Tone in Future Designs ....................................................... 679
Serber

Individual Differences in Perception and Performance of Advanced Navigation Systems ..................... 685
Garcia, Eisert, Payne, Baldwin & Finomore
