2013 IEEE Workshop on Wide Bandgap Power Devices and Applications

(WiPDA 2013)

Columbus, Ohio, USA
27 – 29 October 2013
Monday, October 28

Session 1: GaN Devices
Chair(s): Farid Medjdoub

Very High Performance GaN-on-GaN Diodes ....................................................... 1
Isik C. Kizilyalli, Andrew Edwards, David Bour, Hemal Shah, Don Disney, Hui Nie
Avogy, Inc. United States

Performance and Robustness of First Generation 600-V GaN-on-Si Power Transistors ............................................................................................................. 6
Y.-F. Wu, J. Gritters, L. Shen, R.P. Smith, J. McKay, R. Barr, R. Birkhahn
Transphorm Inc., United States

600 V GaN HEMT on 6-inch Si Substrate Using Au-Free Si-LSI Process for Power Applications ........................................................................................................ 11
Toshihide Kikkawa, Tsutomu Hosoda, Shinichi, Akiyama, Yoshiyuki Kotani, Toshihiro Wakabayashi, Tsutomu Ogino, Kenji Imanishi, Akitoshi Mochizuki, Kazuo Itabashi, Ken Shono, Yoshimori Asai, Kazukiyo Joshin, Toshihiro Ohki, Masahito Kanamura,
Masato Nishimori, Tadahiro Imada, Junji Kotani, Atsushi Yamada, Norikazu Nakamura,
Tatsuya Hirose, Keiji Watanabe
Fujitsu Semiconductor Ltd., Japan; Fujitsu Laboratories Ltd., Japan

Session 2: GaN Based Circuit Prototyping
Chair(s): Avinash Kashyap

A GaN Transistor based 90 W Isolated Quasi-Switched-Capacitor DC/DC Converter for AC/DC Adapters .......................................................... 15
Xuan Zhang, Chengcheng Yao, Mark J. Scott, Ernest Davidson, Jinzhu Li, Pu Xu, Jin Wang
The Ohio State University, United States

High Step Down Ratio (400 V to 1 V) Phase Shift Full Bridge DC/DC Converter for Data Center Power Supplies with GaN FETs ........................................... 23
Yutian Cui, Leon M. Tolbert
The University of Tennessee, United States

The Impact of Inductor Selection on a 12-1 V GaN POL Converter with Over 94% Peak Efficiency and Higher Load Optimization ........................................ 28
Benjamin K. Rhea, Christopher G. Wilson, Luke L. Jenkins, Robert N. Dean
Auburn University, United States
Session 3: SiC Devices
Chair(s): Robert Kaplar

Ultrahigh Voltage SiC Bipolar Devices ................................................................. 32
Kenji Fukuda, Dai Okamoto, Shinsuke Harada, Yasunori Tanaka, Yoshiyuki Yonezawa,
Tadayoshi Deguchi, Shuji Katakami, Hitoshi Ishimori, Shinji Takasu, Manabu Arai,
Kensuke Takenaka, Hiroyuki Fujisawa, Manabu Takei, Kazushi Matsumoto, Naoyuki Ohse,
Mina Ryo, Chiharu Ota, Kazuto Takao, Makoto Mizukami, Tomohisa Kato,
Toru Izumi, Toshihiko Hayashi, Koji Nakayama, Katsunori Asano, Hajime
Okumura, Tsunenobu Kimoto
National Institute of Advanced Industrial Science and Technology, Japan; New Japan Radio
Co. Ltd., Japan; Fuji Electric Co. Ltd., Japan; Toshiba Corporation Corporate Research &
Development Center, Japan; Kansai Electric Power Co., Inc., Japan Kyoto University,
Japan

Ultra High Voltage IGBTs in 4H-SiC ................................................................. 36
Richmond, A. Burk, D. Grider, S. Allen, J. Palmour, A. Agarwal, A. Kadavelugu, S.
Bhattacharya
Cree, Inc., United States; US Department of Energy, United States; North Carolina State
University, United States

The Outlook for SiC Vertical JFET Technology ................................................. 40
Anup Bhalla, Xueqing Li, Petre Alexandrov, J. Christopher Dries
United Silicon Carbide, Inc., United States

An Analytical Investigation of the Effect of Varied Buffer Layer Designs on the
Turn-Off Speed for 4H-SiC IGBTs ................................................................. 44
Meng-Chia Lee, Xing Huang, Alex Huang, Edward Van Brunt
North Carolina State University, United States; CREE Inc., United States

Session 4: SiC Based Power Module and Integrated Circuits
Chair(s): Shashank Krishanmurthy

Comparative Analysis of Static and Switching Performance of 1.2 kV Commercial
SiC Transistors for High Power Density Applications ..................................... 48
T. Daranagama, N. Udugampola, R. McMahon, F. Udrea
University of Cambridge, United Kingdom.

Development of a 1200 V, 120 A SiC MOSFET Module for High-Temperature and
High-Frequency Applications ....................................................................... 52
Zheng Chen, Yiying Yao, Wenli Zhang, Dushan Boroyevich, Khai Ngo, Paolo Mattavelli,
Rolando Burgos
Virginia Polytechnic Institute and State University, United States

Silicon Carbide Integrated Circuits for Extreme Environments ...................... 60
Avinash S. Kashyap, Cheng-Po Chen, Reza Ghandi, Amita Patil, Emad Andarawis, Liang
Yin, Dave Shaddock, Peter Sandvik, Kun Fang, Zhenzhen Shen, Wayne Johnson
General Electric Global Research Center, United States; Auburn University, United States;
Design and Testing of a 1 kW Silicon-Carbide (SiC) Power Module .......................... 64
Charles Neft, Emil Hanna, Vivek Mehrotra, Kyle Gould and Avijit Bhunia
Teledyne Scientific & Imaging, United States;

Session 5: High Performance Gate Drive
Chair(s): Ben Blalock

An Adaptive Output Impedance Gate Drive for Safer and More Efficient Control of
Wide Bandgap Devices ........................................................................................................ 68
Romain GREZAUD, François AYEL, Nicolas ROUGER, Jean-Christophe CREBIER
MINATEC – CEA/LETI, FRANCE; Univ Grenoble Alpes, FRANCE

High-Temperature Gate Drive Circuit for Silicon-Carbide JFETs ............................. 72
Matthew Jones, Brian Ratliff, Ya-Chi (Carol) Chen, Charles Neft, Avijit Bhunia
Peregrine Power, LLC United States; Currently with Garmin AT United States; Teledyne
Scientific & Imaging, LLC, United States

Normally-off GaN Switching 400V in 1.4ns Using an Ultra-low Resistance and
Inductance Gate Drive ......................................................................................................... 76
Brian Hughes, Rongming Chu, James Lazar, Stephen Hulsey, Austin Garrido, Daniel
Zehnder, Marcel Musni, Karim Boutros
HRL Laboratories LLC, United States

Session 6: Packaging
Chair(s): Kevin Chen

Characterization and Performance Comparison of Reverse Blocking SiC and Si
based switch ......................................................................................................................... 80
Ankan De, Sudhin Roy, Subhashish Bhattacharya, Deepak M. Divan
North Carolina State University, United States; Varentec, Inc., United States

A Reliable and Cost-Effective Assembly Process for Quick Prototyping with GaN
FETs and Other Flip-Chip Packages ................................................................................ 84
Luke L. Jenkins, Christopher G. Wilson, Justin D. Moses, Jeffrey M. Aggas, Robert N. Dean
Auburn University, United States

From TCAD Device Simulation to Scalable Compact Model Development for GaN
HEMT Powerbar designs ...................................................................................................... 88
S. Stoffels, N. Ronchi, B. De Jaeger, D. Marcon, S. Decoutere, Stephan Strauss, Axel
Erlebach, Tommaso Clineto
imec, PMST, Belgium; Synopsys Switzerland LLC, Switzerland

Tuesday, October 29

Session 7: New Devices
Chair(s): Steve Stoffels
Recent Development in Flourine-Ion-Implanted GaN-Based Heterojunction Power Devices

Kevin J. Chen, Alex Man Ho Kwan, Zhikai Tang
The Hong Kong University of Science and Technology, China

Bipolar III-N High-Power Electronic Devices

Russell D. Dupuis, Jeomoh Kim, Tsung-Ting Kao, Yi-Che Lee, Zachary Lochner, Mi-Hee Ji, Jae-Hyun Ryou, Theeradetch Detchphrom, Shyh-Chiang Shen
Georgia Institute of Technology, United States

Research and development on Ga2O3 transistors and diodes

Masataka Higashiwaki, Kohei Sasaki, Man Hoi Wong, Takafulmi Kamimura, Daivasigamani Krishnamurthy, Akito Kuramata, Takekazu Masui, Shigenobu Yamakoshi
National Institute of Information and Communications Technology, Japan; Tamura Corporation, Japan; Koha Co., Ltd., Nerima, Japan

Session 8: Device Testing
Chair(s): Charlie Liu

A Specific Switching Characterization Method for Evaluation of Operating Point and Temperature Impacts on Wide Bandgap Devices

Romain GREZAUD, François AYEL, Nicolas ROUGER, Jean-Christophe CREBIER
MINATEC – CEA/LETI, FRANCE, Univ Grenoble Alpes, FRANCE

Accurate switching energy estimation of parallel eGaN FETs for modern aircraft applications

Bernardo Cougo, Henri Schneider, Julio Brandelero, Thierry Meynard
LAAS-CNRS, France; CIRTEM, France; University of Toulouse, France

Degradation of Dynamic ON-Resistance of AlGaN/GaN HEMTs Under Proton Irradiation

Andrew D. Koehler, Travis J. Anderson, Bradley D. Weaver, Marko J. Tadjer, Karl D. Hobart, Francis J. Kub
U.S. Naval Research Laboratory, United States

Session 9: WBG Based High Power Circuits
Chair(s): Miaosen Shen

Performance Evaluation of Wide Bandgap Semiconductor Technologies in Automotive Applications

Pourya Shamsi, Matthew McDonough, and Babak Fahimi
Missouri University of Science and Technology, United States; University of Texas at Dallas, United States

A 2 kW Gallium Nitride Based Switched Capacitor Three-Port Inverter

Cong Li, Da Jiao, Mark J. Scott, Chengcheng Yao, Lixing Fu, Xintong Lu, Titus Chen, Jinzhu Li, Jin Wang
The Ohio State University, United States
Fabrication and Evaluation of a High Performance SiC Inverter for Wireless Power Transfer Applications .................................................................................................................. 125
Omer C. Onar, Steven Campbell, Puqi Ning, John M. Miller, Zhenxian Liang
Oak Ridge National Laboratory, United States

Analyzing Losses Using Junction Temperature of 300V 2.4kW 96% efficient, 1MHz GaN Synchronous Boost Converter .......................................................................................................................... 131
Brian Hughes, James Lazar, Stephen Hulsey, Austin Garrido, Daniel Zehnder, Marcel Musni, Rongming Chu, Karim Boutros
HRL Laboratories LLC, Malibu, United States

Session 10: Gate & Interface
Chair(s): Toshihide Kikkawa

Physics of SiC MOS Interface and Development of Trench MOSFETs .......... 135
Tsunenobu Kimoto, Hironori Yoshioka, Takashi Nakamura
Kyoto University, Japan; Rohm Co., Ltd., Japan

Modelling of Temperature Dependence on Current Collapse Phenomenon in AlGaN/GaN HEMT Devices ......................................................................................................................... 139
Ganesh S. Samudra, Yung C. Liang, Yuling Li, Yee-Chia Yeo
National University of Singapore, Singapore

Control of Insulated Gate Interfaces on AlGaN/GaN Heterostructures for Power Devices .......................................................................................................................... 143
Yujin Hori, Taketomo Sato, Tamotsu Hashizume
Hokkaido University, Japan; JST-CREST, Japan

Interface Charge Engineering in GaN-based MIS-HEMTs ................................ 147
Ting-Hsiang Hung, Sriram Krishnamoorthy, Digbijoy Neelim Nath, Pil Sung Park, Siddharth Rajan
The Ohio State University, United States

Monday, October 28

Poster Session:

Diamond bipolar device simulation ........................................................................ 151
A. Mar´echal, N. Rouger, J.-C. Cr´ebier, J. Pernot, S. Koizumi, T. Teraji, E. Gheeraert
Univ. Grenoble Alpes, France; National Institute for Materials Science, Japan

Characterization of Two-Dimensional Hole Gas at GaN/AlGaN Heterointerface .155
Pucheng Liu, Kuniyuki Kakushima, Hiroshi Iwai, Akira Nakajima, Toshiharu Makino,
Masahiro Ogura, Shinichi Nishizawa, Hiromichi Ohashi
Tokyo Institute of Technology, Japan; National Institute of Advanced Industrial Science and Technology, Japan

An Ohmic Contact Process for AlGaN/GaN Structures using TiSi2 Electrodes .159
Influence of properties of Si3N4 passivation layer on the electrical characteristics of Normally-off AlGaN/GaN HEMT

IMS R&D, STMicroelectronics, Italy; University of Padova, Italy; University of Modena and Reggio Emilia, Italy

The Change in On-Resistance in GaN HEMTs Operating in a Buck Configuration

Will Abell, Jeff Aggas, Luke L. Jenkins, Chris Wilson, Robert Dean
Auburn University, United States

A Cross Batch Characterization of GaN HEMT Devices for Power Electronics Applications

Jeffrey M. Aggas, Luke L. Jenkins, Christopher G. Wilson, Justin D. Moses, Will E. Abell, Benjamin K. Rhea, Robert N. Dean
Auburn University, United States

GaN HEMT Reliability at 125_C for 1000 Hours

Justin D. Moses, Luke L. Jenkins, Jeff Aggas, Will Abell, Stephan Henning, John Tennant, Christopher G. Wilson, Robert N. Dean
Auburn University, United States

Silicon Carbide High-Temperature Packaging Module Fabrication

Wendell Brokaw, John Elmesy, Brian Grummel, Z. John Shen, Thomas X. Wu
University of Central Florida, United States; Advanced Power Electronics Corporation (ApECOR), United States; Illinois Institute of Technology, United States

Evaluation and Application of SiC Diode Phase Inverters

Stephen Savulak, Miaosen Shen
United Technologies Research Center, United States

Understanding the Cascode Switching Process

P. J. Garsed, R. A. McMahon
University of Cambridge, United Kingdom.

5-Phase Interleaved Buck Converter with Gallium Nitride Transistors

N. Videau, T. Meynard, V. Bley, D. Flumian, E. Sarraute, G. Fontes, J. Brandelero
Université de Toulouse, France; CIRTEM, France

Hard Switching Speed Improvements in GaN-based Synchronous Buck Converters

Christopher G. Wilson, Luke L. Jenkins, Justin D. Moses, Jeffrey M. Aggas, Robert N. Dean
Auburn University, United States
The Impact of Parallel GaN HEMTs on Efficiency of a 12 to-1 V Buck Converter

Luke L. Jenkins, Christopher G. Wilson, Justin D. Moses, Jeffrey M. Aggas, Benjamin K. Rhea, Robert N. Dean
Auburn University, United States

Tutorial Workbook
