SUPPLEMENTAL PROCEEDINGS

Fast Abstracts

Fast Abstracts A

Finding Related Events for Specification Mining - 1
Ziying Dai, Xiaoguang Mao, Liqian Chen, Yan Lei, Yi Zhang

Persistence of Relevance: A Missing Issue in Imperfect Coverage Models - 3
Jianwen Xiang, Fumio Machida, Kumiko Tadano, Yoshiharu Maeno

Automated Classification of NASA Anomalies Using Natural Language Processing Techniques - 5
Davide Falessi, Lucas Layman

A Study on the Effectiveness of Peer Review Meeting - 7
Noriyoshi Kuno, Tsuyoshi Nakajima, Makoto Matsushita, Katsuro Inoue

Comparative analysis of Bayesian and classical approaches for software reliability measurement - 9
Ketchiozo Wandji, Shahryar Sarkani, Timothy Eveleigh, Thomas Holzer, Peter Keiller

Characteristic Analysis of Quantitative Definition of - 11
Chao Luo, Hiroyuki Okamura, Tadashi Dohi

Fast Abstracts B

An Initial Evaluation of Model-Based Testing - 13
Vignir Gudmundsson, Christoph Schulze, Dharmalingam Ganesan, Mikael Lindvall, Robert Wiegand

Certification of Embedded Systems: Quantitative analysis and irrefutable evidences - 15
Nuno Silva, Marco Vieira

A new model to capture security threat patterns by complying with standards and lesson learned ~ Archiving Dependability for Security Assurance Cases - 17
Vaise Patu, Shuichiro Yamamoto

Monitoring System Calls for Anomaly Detection in Modern Operating Systems - 19
Shayan Eskandari, Wael Khreich, Abdelwahab Hamou-Lhadj, Syed Shariyar Murtaza, Mario Couture

Non-Operational Testing of Software for Security Issues - 21
Shweta Subramani, Mladen Vouk, Laurie WilliamsUsing

Software Reliability Models for Security Assessment – Verification of Assumptions - 23
Da Young Lee, Mladen Vouk, Laurie Williams

Industry
**Process A**

**Dependability of Open Systems - 25**  
Yasuhiko Yokote, Tatsumi Nagayama

**Conditional software specification & assurance - A practical assessment of contract-based approaches - 36**  
Marc Förster

**ARRL: A CRITERION FOR COMPOSITIONAL SAFETY AND SYSTEMS ENGINEERING - 37**  
Eric Verhulst, Bernhard Sputh

**Process B**

**Using ODC to diagnose an Agile Enterprise Application Development Project - 45**  
Ram Chillarege

**International standardization of Open Systems Dependability - 46**  
Hiroki Takamura

**Radio Diagnostic Tool: iDoctor - 47**  
Hoo Wei

**Testing A**

**Improving reliability of data protection software with integrated multilayered fault Injection testing - 49**  
Rk Gupta

**A novel mechanism to continuously scan field logs and gain real-time feedback - 50**  
Kishore Vinod, Manjunath Ramachandra, Santosh Yalawar, Prashanth Pai

**Improving Manual Analysis of Automated Code Inspection Results: Need and Effectiveness - 53**  
Tukaram Muske

**Best Industry Paper Session**

**Using Capture-Recapture Models for Make Objective Post-Inspection Decisions - 54**  
Gursimran Walia, Jeffrey Carver

**To Branch or not to Branch that is the question - 55**  
Brendan Murphy, Laurie Williams

**Design of a Dependable Peer-to-Peer System for Numerical Optimization - 56**  
Hrishikesh Dewan, Raksha Nayak

**Testing B**

**Smart Defect Classification for Better Analysis using Tagging Mechanisms - 57**  
Seema Meena, Uma Balasubramani

**Directed Graph as a Model for Unit Testing - 58**  
Lakshmankumar Mukkanvilli

**Automating Software Validation of a GPON Network - 59**  
Regina Moraes, Aline Fadel, Paulo Martins, Eliane Martins

**Modeling and Prediction A**
Predicting Multi-platform Release Quality - 60
Pete Rotella, Satyabrata Pradhan

Detection of Missing Software Requirements Using Base Requirement Pairs - 61
Arbi Ghazarian

Computational Modeling to Detect Software Sabotage - 81
Suresh Kothari

**Analysis A**

Reliability feedback through system log analysis - 82
Kishore Vinod, Pattabhirama Pandit, Manjunath Ramachandra

Fault-Class-Aware Fault Tree Generation and Analysis - 84
Ann Tai, Chris Walter, Lorraine Fesq, John Day

Modeling of Failure Detection and Recovery in SysML - 85
Myron Hecht

**Modeling and Prediction B**

A Statistical Approach for Software Resource Leak Detection and Prediction - 96
Jinghui Li, Xuewen Gong, Jianqing Yuan

Space systems modeling using the Architecture Analysis & Design Language (AADL) - 97
Michela Munoz

Diagnosing development software release to predict field failures - 99
Kishore Vinod, Manjunath Vinod, Santosh Yalawar, Pattabhirama Pandit

**Modeling and Prediction C**

Failure data analytics to build failure prediction mechanisms - 102
Sandipan Dey, Kandathil Jacob, Javier Alonso, Kishor Trivedi

Release Cadence: A Product Software Upgrade Study - 104
Samer Rashdan

Predicting Field Experience of Releases on Specific Platforms - 105
Pete Rotella, Devesh Goyal, Sunita Chulani

**Analysis B**

Forensic Study of the Curiosity Flight Software Anomalies - 106
Ron Morillo, John Lai, Leila Meshkat

Using Error Information to Improve Software Quality - 107
Gursimran Walia, Jeffrey Carver

**Student Papers**

Mining A Change History to Quickly Identify Bug Locations : A Case Study of the Eclipse Project - 108
Chakkrit Tantithamthavorn, Rattamont Teekavanich, Akinori Ihara, Ken-Ichi Matsumoto
Automatically Triaging for Fault Localization in Multithreaded Program
Bo Liu, Haibing Guan

IWPD

Fault Localization

Coincidental Correctness: an Interference or Interface to Successful Fault Localization? - 114
Zheng Zheng, Yichao Gao, Peng Hao, Zhenyu Zhang

Cues for Scent Intensification in Debugging - 120
Alexandre Perez, Rui Abreu

Bug localisation through diverse sources of information - 126
Steven Davies, Marc Roper

Clustering and Bug Fixing

Mutation-based spreadsheet debugging - 132
Birgit Hofer, Franz Wotawa

An Empirical Study on Clustering for Isolating Bugs in Fault Localization - 138
Yanqin Huang, Junhua Wu, Yang Feng, Zhenyu Chen, Zhihong Zhao

Program Behavior Characterization and Clustering : An Empirical Study for Failure Clustering - 144
Danzhang Zhang, Jianhui Jiang, Linbo Chen

Static Analysis

Scalable Isolation of Failure-Inducing Changes via Version Comparison - 150
Mohammadreza Ghanavati

Improving the Accuracy of Static Analysis Based on State Partition - 157
Dalin Zhang, Hailong Zhang, Dahai Jin, Yunzhan Gong

Automated Diagnosis of Software Misconfigurations Based on Static Analysis - 162
Zhen Dong

MedSRDR

MedSRDR A

Integration of Software Reliability Engineering, Risk Management and Safety Assurance Case - 169
Fubin Wu

Medical Device Software Risk Assessment Requires Cross Functional Personnel - 193
Alfred Granger, Paul Garrett, Gary Dalmadge

An extended notation of FTA for risk assessment of software-intensive medical devices. - 211
MedSRDR B

Safety assessment of software-intensive medical devices - 217
   Rasmus Adler, Sören Kemmann, José Augusto Oliveira Neto, Djalma De Melo Carvalho Filho

Testing Distortion Estimations in Retinal Prostheses - 223
   Mahadevan Subramania Parvathi Chund Eyal Margalit

Use Software Reliability Growth Models Wisely - 243
   Yuan Wei

WoSAR

Experimental Studies & Keynote

   Performance Degradation Analysis of a Supercomputer - 263
      Domenico Cotroneo, Flavio Frattini, Roberto Natella, Roberto Pietrantuono

   On the Effectiveness of Mann-Kendall Test for Detection of Software Aging - 269
      Fumio Machida, Artur Andrzejak, Rivalino Júnior, Elder Vicente De Paulo Sobrinho

Applications and Modeling of Rejuvenation

   Software Rejuvenation Impacts on a Phased-Mission System for Mars Exploration - 275
      Stefano Ballerini, Laura Carnevali, Marco Paolieri, Kumiko Tadano, Fumio Machida

   Estimating Response Time Distribution of Server Application in Software Aging Phenomenon - 281
      Hiroyuki Okamura, Chao Luo, Tadashi Dohi

   Comparing Four Case Studies on Bohr-Mandel Characteristics using ODC - 285
      Ram Chillarege

   Identifying Silent Failures of SaaS services using Finite State Machine based Invariant Analysis - 290
      Geetika Goel, Arpan Roy, Rajeshwari Ganesan

WoSD3

Dependability - Open Systems Dependability

   A New Method of Consensus Building for Open Systems Dependability - 296
      Yukiko Yanagisawa, Takashi Ito, Makoto Takeyama, Yasuhiko Yokote

   A Chain of Accountabilities in Open Systems based on Assured Entrustments - 303
      Makoto Hirai, Yoshifumi Yuasa, Yoshiki Kinoshita

   A Method for Assuring Service Grade with Assurance case - 311
      Shuichiro Yamamoto, Miki Masumoto, Tatsuya Tokuno
Comparative Study of d*framework and GSN: A Comparative Study of d*framework and GSN - 315
Takuya Saruwatari, Yutaka Matsuno, Shuichiro Yamamoto

Dependability - Tools and Application
Exploring Possibilities to Analyse Microblogs for Dependability Information in Variability-intensive Open Source Software Systems - 321
Matthias Galster, Dan Tofan

Dependability - Runtime Consideration
D-Script: Dependable Scripting with DEOS Process - 326
Kimio Kuramitsu

WoSoCer

Software Certification Practice
Qualitative comparison of aerospace standards: an objective approach - 331
Andrea Ceccarelli, Nuno Silva

Accelerated reliability testing approach for high-reliability software based on the reinforced operational profile - 337
Qiuying Li

An Improved SFMEA Method Integrated with Assistive techniques - 343
Xu Lili, Zhang Hong

Requirements Engineering in Rail Transit Production: an Experience Report - 349
Stefano Russo, Roberto Pietrantuono, Domenico Di Leo, Fernanda Buonanno, Paolo Di Paolo

Qualitative Analysis of State/Event Fault Trees for Supporting the Certification Process of Software-Intensive Systems - 353
Michael Roth, Peter Liggesmeyer

Third-party Software and Component Reuse
Strong and Weak Contract Formalism for Third-Party Component Reuse - 359
Irfan Sljivo, Barbara Gallina, Jan Carlson, Hans Hansson

Safety Contract Based Design of Software Components - 365
Andreas Söderberg

A Monitoring and Testing Framework for Critical Off-The-Shelf Applications and Services - 371
Nuno Antunes, Francesco Brancati, Andrea Ceccarelli, Andrea Bondavalli, Marco Vieira

Safety Evidences and Assurance Cases
Evidence Arguments for Using Formal Methods in Software Certification - 375
Ganesh Pai

Reference Architecture for High Dependability On-Board Computers - 381
Nuno Silva, Alexandre Esper, Ricardo Barbosa, Claudio Monteleone, Johan Zandin

Taking a Page from the Law Books: Considering Evidence Weight in Evaluating Assurance Case
