</table>
DCA: An Approach for Face Recognition through Component Analysis .................................................. 34
   P. Shamna, C. Tripti, and Paul Augustine

Prediction of Missing Items Using Naive Bayes Classifier and Graph Based Prediction .................................................. 39
   Sherica Lavinia Menezes and Geeta Varkey

Adaptive Neuro-fuzzy Classifier for Weapon Detection in X-Ray Images of Luggage Using Zernike Moments and Shape Context Descriptor .................................................. 46
   Annet Deenu Lopez, Eldho S. Kollialil, and K. Gopika Gopan

A Novel Technique for Efficient Text Document Summarization as a Service .................................................. 50
   Anusha Bagalkotkar, Ashesh Kandelwal, Shivam Pandey, and S. Sowmya Kamath

Stress Management Using Artificial Intelligence .......................................................................................... 54
   V.J. Madhuri, Madhumitha R. Mohan, and R. Kaavya

Anomaly Detection Using Motion Patterns Computed from Optical Flow .................................................. 58
   R. Parvathy, Soumya Thilakan, Meenu Joy, and K.M. Sameera

Reduction of MAI Using Optical Normaliser in an Optical CDMA System .................................................. 62
   Anila John and S. Sharath Raj

Prioritization of Messages on Community Based and Non Community Based Protocols in DTN .................................................. 66
   Anmol Aggarwal and Preeti Nagrath

Convergent Replicated Data Structures that Tolerate Eventual Consistency in NoSQL Databases .................................................. 70
   Clarence Tauro, Aby Easo, Samson Mathew, and Gnesan N

Modeling and Analysis of Communications Systems

Enhanced Design of UWB Antenna with Dual Tapered Conical Wave Launcher for Biomedical Application .................................................. 76
   M. Sasikala, A. Petrishia, and M. Durai Samy

Energy Efficient and Reputation Based CDS Model for Mobile Ad Hoc Networks .................................................. 80
   Sangheethaa Sukumaran, Surya Rani Sunny, and Lakshmi Ramachandran

Performance Analysis of Thresholded MRC Scheme for Cooperative Diversity under Rayleigh Fading Channel .................................................. 84
   B. Shamla and M.G. Jibukumar

An Alternative Selection Based Detection Method for Spectrum Sensing for Cognitive Radio .................................................. 90
   V.C. Abdul Rahim, H.S. Mruthyunjaya, and K. Vishnumurthy Kedalya

OFDM Channel Estimation Using Compressed Sensing L1-Regularized Least Square Problem Solver .................................................. 94
   Vijitha Rajan, Arun A. Balakrishnan, and K.E. Nissar

</table>
Iterative Region Merging and Object Retrieval Method Using Mean Shift Segmentation and Flood Fill Algorithm ................................................................. 157
   Neeraj Bhargava, Prakriti Trivedi, Akanksha Toshniwal, and Himanshu Swarnkar

Reconstruction of Beat Signal in Radar Altimeter Using Signal Processing ........................................ 161
   Geomol George, Arun A. Balakrishnan, and T.J. Apren

Application of Adaptive Filter Using Adaptive Line Enhancer Techniques ........................................ 165
   R.G. Soumya, N. Naveen, and M.J. Lal

Cumulative Acoustic Signal Based Traffic Density State Estimation .............................................. 169
   Prashant Borkar and L.G. Malik

Image Processing and Information Retrieval

Enhancement of Data Embedding Technique Using Adaptive Pixel Pair Matching for Security ................................................................. 173
   C.A. Nafsiya, Vidya Hari, and A. Neela Madheswari

Automatic Grading of Severity of Diabetic Macular Edema Using Color Fundus Images .................. 177
   K.S. Sreejini and V.K. Govindan

Exploitation of Regression Line Potentiality to Track the Object through Color Optical Flow ................................................................. 181
   M.H. Sidram and Nagappa U. Bhajantri

A Novel Method of Medical Image Denoising Using Bilateral and NLm Filtering ................................ 186
   M.R. Mahesh Mohan and V.S. Sheeba

Counting of Frozen Semen Straws Using Image Processing ................................................................. 192

Finger Vein Identification Based on Minutiae Feature Extraction with Spurious Minutia Removal .......... 196
   Preethy Prabhakar and Tony Thomas

Investigation on Multi Focus Images Using Block Based Feature Level Method .......................... 200
   S. Mary Praveena, Ila Vennila, and A.K. Kavitha

Cardiac Ischemia Diagnosis Using Stress ECG Analysis ................................................................. 204
   A. Amal and G. Reshmi

An SVM Based Skin Disease Identification Using Local Binary Patterns ........................................ 208
   Nibaran Das, Anabik Pal, Sanjoy Mazumder, Somenath Sarkar, Dwijendranath Gangopadhyay, and Mita Nasipuri

Content Based Video Retrieval Using SURF Descriptor ................................................................. 212
   S. Asha and M. Sreraj

Evaluation of Color Spaces for Feature Point Detection in Image Matching Application ............................ 216
   B. Sirisha and B. Sandhya
Feature Based Image Manipulation .................................................................220
S. Gopika and P. Mintu

A Novel Algorithm for Image Compression and Pattern Matching ..................224
Shamna P, Tripti C, and Paul Augustine

Collaborative Warning System for Dense Vehicular Networks Using MUSIC
Algorithm DoA ................................................................................................228
Chirag Warty, Richard Wai Yu, and Khaled ElMahgoub

VLSI Systems and Applications

High Speed VLSI Architecture for Squaring Algorithm Using Retiming
Approach ........................................................................................................233
S. Jalaja and A.M. Vijaya Prakash

Implementation of CMNN Based Industrial Controller Using VxWorks RTOS
Ported to MPC8260 ........................................................................................239

90nm CMOS Low Power Multimodulus 32/33/39/40/47/48 Prescaler
with METSPC Based Logic .............................................................................243
V. Mohammed Zackriya and Harish M. Kittur

Real-time Task Assignment in Heterogeneous Multiprocessor Using
Metaheuristic Algorithms ................................................................................248
K. Prescilla and A. Immanuel Selvakumar

Design and Implementation of Baseband Digital Modulator for CDMA
Communication System ..................................................................................253
P.N. Ravichandran, Satish Sharma, K.K. Raghunandana, Sunil,
H.S. Vasudevamurthy, and N. Valarmathi

Design of a Mesfet Based Low Noise Amplifier with Improved Noise Figure
for Low Power Wireless Applications in 2-3 GHz ..........................................257
Prameela B and Jagadeesh Kumar P.

Ubiquitous Intelligence and Cyber-physical Computing

Job Scheduling and VM Provisioning in Clouds ..............................................261
A. Chinnu Edwin and A. Neela Madheswari

Business Process Reengineering of the Workflows in Intensive Care Unit
Supported with a Tablet PC Based Automation System .................................265
K.S. Anju, Anumol Mathew, Joms Antony, Sudhin Joy, Bichu Vijayan,
and G.S. Santoshkumar

Improving the Accuracy of Ensemble Classifier Prediction Model Based
on FLAME Clustering with Random Forest Algorithm ...............................269
Seena Mary Augusty and Sminu Izudheen
Localization of a Mobile Autonomous Robot Using Extended Kalman Filter ........................................274
Vishwanath Sangale and Abhishek Shendre

TaskTracker Aware Scheduling for Hadoop MapReduce .................................................................278
Jisha S. Manjaly and Varghese S. Chooralil

Visualization of Information Theoretic Maximum Entropy Model in Real Time
Distributed System .........................................................................................................................282
Rashmi Sharma and Nitin

Controlling of Back to Back Converter for Load Sharing in Microgrid and Utility Grid .................................................................................................................................287
Nitin P. Choudhary and Xma R. Pote

Student's Desk: My Workplace on Android ..................................................................................292
Saurabh Agarwal, Tushark Bansal, Rajat Agarwal, and Mohammed Abdul Qadeer

Reliability and Information Security

Non Repudiation for Internet Access by Using Browser Based User Authentication Mechanism .................................................................................................................................296
Nithesh K. Nandhakumar, A. Binu, and Viji Paul

A Youthful Procedure for Spatial Domain Steganography ..........................................................300
S. Arya Raj and T. Soumya

Application: DDoS Attacks Resistance Scheme Using Polynomial Distribution Model .................................................................................................................................304
A. Vince Paual, K. Prasadh, and Sankaranarayanan

Safety and Security Framework for Exception Handling in Concurrent Programming ..................................................................................................................................................308
Faisal Anwer, Mohd. Nazir, and Khurram Mustafa

LEACRS: An Extendible Array Based Compression Scheme for High Dimensional Data Using Linearization ..................................................................................................................312
Md. Rakibul Islam, K.M. Azharul Hasan, and Tatsuo Tsuji

Scientific and Engineering Computing

A Cycle Based Reversible Logic Synthesis Approach ........................................................................316
Kamalika Datta, Bhadreswar Ghuku, Devi Sandeep, Indranil Sengupta, and Hafizur Rahaman

Industrial Power Wheeling and Optimum Power Interchange under Availability Based Tariff .................................................................................................................................320
Jani Das and S. Ashok

Near Duplicate Web Page Detection with Analytic Feature Weighting ...........................................324
Rasia Naseem, Sheena Anees, K. Muneer, and K. Syed Farook
Theoretical Computation of Boundary Layer Separation Point over an Impeller Vane Pressure Surface in Centrifugal Pump ................................................................. 328
     Swapnil Urankar, Sharad Raikar, N. Bharath, R. Naveen, and Sourabh Gupta

Pressure Detection at Molecular Level Using Pyroelectric Sensor .......................................................... 332
     Ashutosh Patri, Sritam Rout, and Shashiketan Samal

Design Aspects of Solar Thermal Power Generation in an Educational Institute ........................................... 336
     Prasad B. Joshi and Ravindra M. Moharil

UDDI Rated Web Services ......................................................................................................................... 340
     M. Sarith Divakar M and K.S. Mathew

A Novel Single-Phase Single-Stage Inverter for Solar Applications .......................................................... 343
     K. Muhammedali Shafaeque and P.R. Subadhra

Design of 3-D Phantoms for Human Carotid Vasculature ......................................................................... 347
     Ankita Banerjee, Sudipta Dey, Shubhankar Parui, Mita Nasipuri, and Subhadip Basu

MIMO System Using Transmit Diversity and Relay Selection Algorithm ................................................. 351
     Sanjeenani Jenekar and Manoj Demde

Placement of PMUs for Power System Observability Using Biogeography Based Optimization .................. 355
     K. Jamuna, Yugin L. Selva, and Gnanasekaran

Modeling and Design of a Novel Control Algorithm for Grid Connected Photovoltaic (PV) Inverter System ........................................................................................................ 359
     Ayaz Ahmad and L. Rajaji

Performance Evaluation and Measurement

Workflow Model for Distributed Access Control ....................................................................................... 363
     Manoj V. Thomas and K. Chandra Sekaran

Selection of Wind Generators for Optimal Utilization of Wind Energy Using Reliability Constraint ............ 367
     Ajinkya U. Mohiley and R.M. Moharil

Analysis of Conventional Inverter Topologies in Shunt Applications for Unbalanced and Non-linear Loads ........................................................................................................... 372

Peak to Average Power Ratio Reduction in Filter Bank Based Multicarrier System .................................. 377
     T.S. Mishmy and V.S. Sheeba

Leveraging Information Bus with In-Memory Caching for Service Oriented Architecture .......................... 382
     Anil Patil and Rajesh Ingle
Joint Adaptive Channel Estimation and Transceiver Design for Two-Way Relay Systems ...............................................................389
   Arun Joy and Vijay Kumar Chakka

   Shibendu Debbarma and Abhijit Das

Performance Analysis of Magnetic Resonance Image Denoising Using Contourlet Transform .............................................................396
   S.J. Padmagireeshan, Renoh C. Johnson, Arun A. Balakrishnan, Veena Paul,
   Ajith V. Pillai, and A. Abdul Raheem

Comparative Study of Multiclass Classifiers for Underwater Target Classification ...........................................................................400
   T.A. Ferose Babu and R. Pradeepa

Advances in Wireless and Microwave Technology

Broadband Proximity Fed Modified Circular Microstrip Antenna .................................................................404
   Amit A. Deshmukh, Ankita R. Jain, Apurva A. Joshi, Tejal A. Tirodkar, and K.P. Ray

Broadband Proximity Fed Half U-Slot Cut Rectangular Microstrip Antennas ........................................408
   Amit A. Deshmukh, Apurva A. Joshi, Ankita R. Jain, Tejal A. Tirodkar, and K.P. Ray

Sensor Localization and Obstacle Boundary Detection Algorithm in WSN .................................................................412
   Supantha Das, Indrajit Banerjee, and Tuhina Samanta

Memory Efficient, High Speed Implementation of MAX LOG MAP Decoder for CCSDS Turbo codes ........................................416
   Bibin Varghese, V.K. Ansha, S. Sreelal, and N. Shanu

Integrating Encryption Technique in Authentication of Multicast Protocol for Ad-Hoc Networks .................................................................423
   Tintu Devasia and R. Visakh

Design of 3-Bit Digital DMTL Phase Shifter for C- to Ku-Band Applications .................................................................427
   Jitendra Singh Sengar, Anamika Das, and Manish Puri

Quadrature Detection Methods for FM Demodulation .................................................................................................433
   Sona Sunny, Jaison Varghese John, and T.J. Apen

Design and FPGA Implementation of a Programmable Data Rate PSK Digital Demodulator for Onboard and Ground Applications .................................................................437
   Mahesh Kumar, V.K. Tank, and T.V.S. Ram

Demand Based Data Replication in MANETs .............................................................................................................441
   K.G. Priya, Mujeebudheen Khan, and K.G. Preetha

Efficient Optimal Route Stability Routing Protocol in MANET Using Gauss-Markov Mobility Model ..............................................................................445
   Bhabani Sankar Gouda, Pinaki Prasad Panigrahi, and Rabindra Kumar Shial
