Test Oracles Session 6

Using Machine Learning Techniques to Detect Metamorphic Relations for Programs without Test Oracles - 1
  Upulee Kanewala, James Bieman

An Empirical Comparison of the Fault-Detection Capabilities of Internal Oracles - 11
  Tingting Yu, Gregg Rothermel, Witawas Srisa-An

Distributed and Agent Based Modeling and Analysis Session 11

Model-driven Synthesis of Monitoring Infrastructure for Reliable Adaptive Multi-Agent Systems - N/A
  Benedikt Eberhardinger, Wolfgang Reif, Florian Nafz, Jan-Philipp Steghöfer

Analysis of Local Re-execution in Mobile Offloading System - 31
  Qiushi Wang, Katinka Wolter, Joan Ripoll, Mart Jorba

Design of Distribution Automation Networks Using Survivability Modeling and Power Flow Equations - 41
  Anne Koziolek, Lucia Happe, Alberto Avritzer, Kishor Trived, Daniel Sadoc Menasché, Sindhu Suresh

Availability Session 16

Composing Hierarchical Stochastic Model from SysML for System Availability Analysis - 51
  Fumio Machida, Yoshiharu Maeno, Kumiko Tadano, Jianwen Xiang

Towards fast OS rejuvenation: An experimental evaluation of fast OS reboot techniques - 61
  Antonio Bovenzi, Kishor Trivedi, Stefano Russo, Hiroshi Yamada, Javier Alonso

Request Success Rate of Multipathing I/O with a Paired Storage Controller - 71
  Gangadhar Enagandula, Bipul Raj, Varsha Apte

Software Reliability Modeling Session 21

Nonparametric Bootstrapping Interval Estimations for Software Release Planning with Reliability Objective - 81
Defect Prediction Session 36

Predicting Defects Using Change Genealogies - 118
Kim Herzig, Andreas Zeller, Andreas Rau, Sascha Just

Predicting Risk of Pre-Release Code Changes with CheckinMentor - 128
Alexander Tarvo, Jacek Czerwonka, Thirumalesh Bhat, Thomas Zimmermann, Nachiappan Nagappan

Filtering Noise in Mixed-Purpose Fixing Commits to Improve Defect Prediction and Localization - 138
Hoan Nguyen, Tien Nguyen, Anh Nguyen

Stress Testing and Fault Localization Session 41

Single-Trace Fault Localization in Embedded Software - 148
Azzeddine Amiar, Lydie du Bousquet, Yliès Falcone, Mickaël Delahaye

Stress Testing of Task Deadlines: A Constraint Programming Approach - 158
Stefano Di Alesio, Arnaud Gottlieb, Lionel Briand, Shiva Nejati

Fault Localization Based on Failure-Inducing Combinations - 168
Laleh Shikh Gholamhossein Ghandehari, Yu Lei, David Kung, Richard Kuhn

Defect Characterization and Bug Reports Session 46

Domenico Cotroneo, Kishor Trivedi, Roberto Pietrantuono, Roberto Natella, Michael Grottke

Got Issues? Who Cares About It? A Large Scale Investigation of Issue Trackers from GitHub - 188
Tegawendé F. Bissyandé, Yves Le Traon, Jacques Klein, Laurent Reveillere, Lingxiao Jiang, David Lo

Characterizing Configuration Problems in Java EE Application Servers: An Empirical Study with GlassFish and JBoss - 198
Safety Critical Systems Session 61

   Ji Wu, Jie Tian, Tao Yue, Shaukat Ali

Evaluating long-term Predictive Power of Standard Reliability Growth Models on Automotive Systems - 228
   Rakesh Rana, Fredrik Törner, Martin Nilsson, Jörgen Hansson, Christian Berger, Miroslaw Staron

A Structured and Model-Based Hazard Analysis and Risk Assessment Method for Automotive Systems - 238
   Kristian Beckers, Denis Hatebur, Maritta Heisel, Thomas Frese

Analysis Techniques Session 62

Combining Testing and Proof to Gain High Assurance in Software: a Case Study - 248
   Peter Bishop, Lukasz Cyra, Robin Bloomfield

SInfer: Inferring Information Flow Lattices for Checking Self-Stabilization - 258
   Yong hun Eom, Brian Demsky

Relevant Inputs Analysis and its Applications - 268
   Yan Wang, Rajiv Gupta, Iulian Neamtiu

Model Based Testing Session 66

Feedback-directed Exploration of Web Applications to Derive Test Models - N/A
   Amin Milani Fard, Ali Mesbah

A Pattern-Based Approach for GUI Modeling and Testing - 288
   Rodrigo Moreira, Ana Paiva, Atif Memon

Experience Report: Model-based Testing of NASA’s OSAL API - 300
   Christoph Schulze, Dharmalingam Ganesan, Mikael Lindvall, David McComas, Alan Cudmore

Development for Quality Session 67
An Experience Report for Software Quality Evaluation in Highly Iterative Development Methodology Using Traditional Metrics - 310
Kumi Jinzenji, Laurie Williams, Takashi Hoshino, Kenji Takahashi

Automatic Skeleton Generation for Data-Aware Service Choreographies - 320
Huu Nghia Nguyen, Pascal Poizat, Fatiha Zaidi

An Empirical Study of the Effect of Learning Styles on the Faults found during the Software Inspection - 330
Anurag Goswami, Gursimran Walia

Search Based Software Testing Session 71

Constructing Subtle Higher Order Mutants for Java and AspectJ Programs - 340
Elmahdi Omar, Sudipto Ghosh, Darrell Whitley

Finding Test Data with Specific Properties via Metaheuristic Search - 350
Robert Feldt, Simon Poulding

Improving Search-based Test Suite Generation with Dynamic Symbolic Execution - 360
Juan Pablo Galeotti, Gordon Fraser, Andrea Arcuri

Test Generation and Coverage Session 72

Search-based Data-flow Test Generation - 370
Mattia Vivanti, Andre Mis, Alessandra Gorla, Gordon Fraser

Nan Li, Xin Meng, Jeff Offutt, Lin Deng

Help, Help, I’m Being Suppressed! The Significance of Suppressors in Software Testing - 390
Alex Groce, Chaoqiang Zhang, Mohammad Amin Alipour, Eric Eide, Yang Chen, John Regehr

Mobile and Cloud Security Session 86

Permlyzer: Analyzing Permission Usage in Android Apps - 400
Wei Xu, Fangfang Zhang, Sencun Zhu

Systematic Testing for Resource Leaks in Android Applications - 411
Dacong Yan, Shengqian Yang, Atanas Rountev

Keep It Moving: Proactive Optimal Workload Management for Reducing SLA Violations in Large Scale SaaS Clouds - 421
Arpan Roy, Rajeshwari Ganesan, Santonu Sarkar
Security Session 91

A Host-based Anomaly Detection Approach by Representing System Calls as States of Kernel Modules - 431
Syed Shariyar Murtaza, Wael Khreich, Abdelwahab Hamou-Lhadj, Mario Couture

A Study of the Relationship Between Antivirus Regressions and Label Changes - 441
Ilir Gashi, Bertrand Sobesto, Stephen Mason, Michel Cukier, Vladimir Stankovic

Static Analysis Versus Penetration Testing: a Controlled Experiment - 451
Riccardo Scandariato, James Walden, Wouter Joosen
