2013 IEEE/ACM 17th International Symposium on Distributed Simulation and Real Time Applications

(DS-RT 2013)

Delft, Netherlands
30 October - 1 November 2013
17th IEEE/ACM International Symposium on Distributed Simulation and Real Time Applications

DS-RT 2013

Table of Contents

Message from the DS-RT 2013 Chairs.....................................................................................................viii
Organizing Committee.................................................................................................................................x
Program Committee....................................................................................................................................xi
Steering Committee...................................................................................................................................xiii
Reviewers...................................................................................................................................................xiv

Keynote Addresses
Interoperability, Composability, and Their Implications for Distributed Simulation: Towards Mathematical Foundations of Simulation Interoperability .................................................3
Andreas Tolk
Agents in a Federated World ......................................................................................................................10
Niek Wijngaards

Session 1: Discrete Event Simulation I
Logisim to DEVS Translation ......................................................................................................................13
Yentl Van Tendeloo and Hans Vangheluwe
JavaScript Distributed Agent Based Discrete Event Simulation ...............................................................21
Daniel Zehe, Heiko Aydt, Michael Lees, and Alois Knoll

Session 2: Simulation Tools and Applications
HybridSim: A Modeling and Co-simulation Toolchain for Cyber-physical Systems ...........................................33
Baobing Wang and John S. Baras
simDSN: A Simulation Platform for the Sensing Coverage Problem in Directional Sensor Networks .................................................................41
Recep Ozturk, M. Amac Guvensan, and A. Gokhan Yavuz
Service Abstractions With Fault Virtualization for Distributed Network Infrastructures

Kaliappa Ravindran, Jun Wu, and Arun Adiththan

Distributed Simulation of Heterogeneous and Real-Time Systems

Gilles Lasnier, Janette Cardoso, Pierre Siron, Claire Pagetti, and Patricia Derler

Session 3: Distributed Simulation and Real-Time Systems

Online Client Assignment in Dynamic Real-Time Distributed Interactive Applications

Seyhan Ucar, Huseyin Guler, and Oznur Ozkasap

Dynamic Voltage Scaling Scheduling on Power-Aware Clusters under Power Constraints

George Terzopoulos and Helen D. Karatza

ROThAr: Real-Time On-Line Traffic Assignment with Load Estimation

Takfarinas Saber, Anthony Ventresque, and John Murphy

Self-Assessment and Reconfiguration Methods for Autonomous Cloud-based Network Systems

Kaliappa Ravindran

Session 4: Modeling and Simulation

Developing a Distributed Agent-Based and DES Simulation Using poRTIco and Repast

Athar Nouman, Anastasia Anagnostou, and Simon J.E. Taylor

DIVAs 4.0: A Multi-Agent Based Simulation Framework

M. Al-Zinati, F. Araujo, D. Kuiper, J. Valente, and R.Z. Wenkstern

Evidence Traces for Multi-agent Declarative Rule-Based Policy Simulation

Ulf Lotzmann and Maria A. Wimmer

Session 5: Modeling and Performance

A Data-Driven Crowd Simulation Model Based on Clustering and Classification

Mingbi Zhao, Stephen John Turner, and Wentong Cai

Performance Modeling of Data Dissemination in Vehicular Ad Hoc Networks

Moumena Chaqfeh, Abderrahmane Lakas, and Sanja Lazarova-Molnar

Session 6: HLA and Data Distribution Management

A Parallel Data Distribution Management Algorithm

Moreno Marzolla, Gabriele D’Angelo, and Marco Mandrioli

Building an HLA-Based Distributed Simulation: A Metadata Approach

Agustin Santos, Katia Leal, and Luis F. Chiroque
Load Prediction in HLA-Based Distributed Simulation Using Holt's Variants .................................................. 161
Raed Alkharboush, Robson Eduardo De Grande, and Azzedine Boukerche

Autonomous Configuration Scheme in a Distributed Load Balancing System
for HLA-Based Simulations ................................................................................................................................. 169
Robson Eduardo De Grande, Mohammed Almulla, and Azzedine Boukerche

Session 7: Simulation of Complex Systems

Simulation of Information Propagation over Complex Networks: Performance Studies on Multi-GPU ........................................................................................................ 179
Jiangming Jin, Stephen John Turner, Bu-Sung Lee, Jianlong Zhong, and Bingsheng He

Development and Evaluation of Distributed Simulation of Embedded Systems
Using Ptolemy and HLA ................................................................................................................................. 189
Alisson V. Brito, Angelo V. Negreiros, Christoph Roth, Oliver Sander, and Jürgen Becker

A Management and Control Infrastructure for Integrated Real-Time Simulation Environment ........................................................................................................ 197
Xiao Xu and Ge Li

Session 8: Modeling and Simulation of Complex Networks I

TERP: A Trusted and Energy Efficient Routing Protocol for Wireless Sensor Networks (WSNs) ........................................................................................................ 207
Marwah Almasri, Khaled Elleithy, Anas Bushang, and Remah Alshinina

Muneer Alshowkan, Khaled Elleithy, and Hussain Alhassan

Scalable Wireless Video Streaming over Real-Time Publish Subscribe Protocol (RTPS) ........................................................................................................ 221
Basem Al-Madani, Mohammed Al-Saeedi, and Anas A. Al-Roubaiy

Self-Stabilizing Algorithm for Low Weight Connected Dominating Set .................................................................. 231
Karim Bessaoud, Alain Bui, and Laurence Pilard

Author Index ...................................................................................................................................................... 239
