2013 1st International Conference of the Portuguese Society for Engineering Education

(CISPEE 2013)

Porto, Portugal
31 October – 1 November 2013
List of papers

Materials Scientists, Engineers and Product Designers: not so different after all
Arlindo Silva, Hannah Melia, Philippe Radirovic ................................................................. #1

Lean learning academy: an international project for the development of an innovative framework for Lean Manufacturing training
Carlos Carvalho, Manuel Lopes, Galrão Ramos, Paulo Avila, Luis Fonseca, João Bastos, Ignace Martens ................................................................. #4

Engineering the future: A global Endeavor - An online course for transnational learning experiences with German and US students
Dominik May, Stephanie L. Moore ......................................................................................... #9

An Innovative Degree in Mathematical Engineering in the Portuguese Education System - Submission Process and Evaluation
Jorge Santos, José Matos, Teresa Araújo, Manuel Cruz, Sandra Ramos, Ana Moura .................... #15

Creative Thinking in Chemical Product and Process Design Education
Isabel João, João Silva ........................................................................................................... #16

Challenges of Engineering Education in a Global World
Isabel C. Teixeira, João Paulo Teixeira ................................................................................... #17

Application of a Mobile Personal Learning Environment to a Computer Science subject
Miguel Conde, Francisco Peñalvo .......................................................................................... #18

WIDE an Interactive Web Integrated Development Environment to Practice C Programming in Distance Education
Mohammed Serrhini, Abdelazziz Ait Moussa .......................................................................... #23

Tool to Support Computer Architecture Teaching and Learning
Bruno Nova, António Araújo, João Ferreira ........................................................................... #24

A Simulation Platform for Automation Teaching
Nuno Canadas, Carlos Barros, Jose Machado, Filomena Soares ........................................... #25

Remote Experimentation Using Mobile Devices
André Fidalgo, Willian Rochadel, Juarez Silva ....................................................................... #29

Unblinding a Braille machine - a case study of reverse problem-based learning
Ricardo Silva, Ricardo Moreira, Luis Gouveia, Manuel Felgueiras .......................................... #33

More activity, less lectures: a technology stewardship approach applied to undergraduate engineering learning
Pedro Neto, Bill Williams .................................................................................................... #36

A Mobile Platform for Open Learning based on Serious Games and Remote Laboratories
Iñigo Iturrate, Gustavo Martí-n, Javier García-a-Zubia, Ignacio Angulo, Pablo Orduña, Olga Dziabenko, Gustavo Alves, André Fidalgo ................................................................. #37

Conceiving Modern Engineers within the Framework of the Sustainability Action Plan (PASUS) of ISEP: Sustainability Matters!
Nidia Caetano, Ana Meira, Luis Castanheira, Marilo Cardoso, António Silva, João Rocha ................................................................. #38

Peer Observation of Teaching at U.Porto: A multidisciplinary approach to peer observation of teaching
João Pêgo, José Ferreira, Ana Mouraz, Amália Lopes ............................................................. #39

Visualization of electric field lines in an engineering education context
Renato Sousa, Paulo Garcia, Vítor Marinho, Ana Mouraz ....................................................... #41
Shedding light on important mentorship relationships issues in advanced engineering education
Celina Leão, Ana Ferreira ................................................................. #42

Students' perspectives on Remote Physiological Signals Acquisition Experiments E-learning in Engineering Education
Carla Barros, Celina Leao, Filomena Soares, Graça Minas, José Machado ........................................ #43

Portuguese engineering practice: Two empirical studies and a 15th century perspective
Bill Williams, José Figueiredo ............................................................. #44

The European Project Semester at ISEP: Learning to Learn Engineering
Benedita Malheiro, Manuel Silva, Maria Ribeiro, Pedro Guedes, Paulo Ferreira .......................... #45

Learner Autonomy in Higher Education: towards a validation of the PRO-SDLS scale to Portuguese engineering students
Marina Duarte .................................................................................. #46

Math diagnostic test in engineering: Dublin Institute of Technology and Coimbra Institute of Engineering
Carla Fidalgo, Emília Bigotte, João Branco, Vanda Santos, Michael Carr ......................................... #47

Concept Maps and Learning Objects: Part 2
Ana Pavani .......................................................................................... #48

Teaching and learning mathematical modelling and problem solving: a case study
Dag Wedelin, Tabassum Jahan, Tom Adawi, Sven Andersson ................................................................. #55

Managing Informal Learning in Engineering Contexts
Clara Viegas, Maria Marques, Gustavo Alves, Nikolas Galanis, Francisco Peñalvo .............................. #56

Ethics and academic fraud among higher education engineering students in Portugal
Paulo Gama, Filipe Almeida, Ana Seixas, Paulo Peixoto, Denise Esteves ........................................ #59

Curricular Unit Specification for Programme Assessment – Fostering teacher reflection, while improving course catalogues
João Barros ......................................................................................... #60

Ethic in Massively Multiplayer Online Role-Playing Games
Veronika Abramova, Jorge Bernardino ................................................................................................. #63

A joint academy-industry initiative for the development of an engineering program
João Cunha, Pedro Amaro, Luis Marques ............................................................................................... #65

Promoting problem solving skills and high order thinking in Geotechnical courses
Margarida Pinho-Lopes, Joaquim Macedo ............................................................................................... #69

2,4,6 - trichloroanisole evolution during cork stabilization: The contribution of a Masters student internship to the resolution of an industrial problem
Diva Correia, Maria Pinto, Luis Castro, Maria Pinheiro ........................................................................ #70

Interactive simulators: a contribution to link theory and applications in the teaching of chemical processes
Maria Rasteiro .................................................................................... #71

Using games to teach programming
Karel P eru tka, Petr Hrubos, Tomas Sedlak ............................................................................................ #74

Insights on web-based peer review: a case study with energy engineering students
Caroline Dominguez, Ana Maia, Daniela Pedrosa, Maria Nascimento .................................................. #78

An Industrial Robotics Course Based on a Graphical Simulation Package
Manuel Silva ...................................................................................... #79
