2013 2nd International Conference on Advanced Computing, Networking and Security

(ADCONS 2013)

Mangalore, India
15-17 December 2013
# Message from the Chairs

- ix

# Committee Members

- x

# Technical Program Committee

- xii

# Reviewers

- xiv

## Advanced Computing

1. Projection and Interaction with Ad-hoc Interfaces on Non-planar Surfaces
   - S. Dere Kundan and G. Ram Mohana Reddy
   - 1

2. Performance Evaluation of Multi-core Processors with Varied Interconnect Networks
   - Ram Prasad Mohanty, Ashok Kumar Turuk, and Bibhudatta Sahoo
   - 7

   - Udaya M. Visweswara, Atul Gohad, Sachin Kumar Yadav, N.V.S. Karthiik, and S. Mahesh Babu
   - 12

4. A Modified Local Least Squares-Based Missing Value Estimation Method in Microarray
   - Shilpi Bose, Chandra Das, Tamaghna Gangopadhyay, and Samiran Chattopadhyay
   - 18

5. An Empirical Study of Two MIS Algorithms
   - Tushar Bisht and Kishore Kothapalli
   - 24

6. Anomaly Detection and Similarity Search in Neutron Monitor Data for Predictive Maintenance of Nuclear Power Plants
   - Kapil Agarwal, Durga Toshniwal, Pramod K. Gupta, Vikas Khurana, and Pushp Upadhyay
   - 29

7. A Broker Based E-learning Service Integration and Execution Architecture for the Complex Requirements on Learning Resources
   - Demian Antony D’Mello, Mevida S. Crasta, Roanne N. Gomes, V. Abhishiktha, and Shareeta J. D’Souza
   - 35
Image and Speech Processing

Rivers and Coastlines Detection in Multispectral Satellite Images Using Level Set Method and Modified Chan Vese Algorithm .......................................................... Y.H. Dandawate and Sneha Kinlekar

Multitaper Spectrum Sensing Using Sinusoidal Tapers .......................................................... P. Sudheer Reddy and P. Palanisamy

Detection and Removal of Cracks from Digitized Paintings and Images by User Intervention .......................................................... Shrinivas D. Desai, Kavita V. Horadi, P. Navaneet, B. Ninksha, and V. Siddeshvar

A Hybrid Model for Rician Noise Reduction in MRI ............................................................... P.V. Sudeep, P. Palanisamy, and Jeny Rajan

A Stroke Based Representation of Indian Sign Language Signs Incorporating Global and Local Motion Information ................................................................. M. Geetha, P.V. Aswathi, and M.R. Kaimal

Image Denoising Based on Undecimated Double Density Dual Tree Wavelet Transform and Modified Firm Shrinkage ................................................................. Varun P. Gopi, M. Pavithran, T. Nishanth, S. Balaji, V. Rajavelu, and P. Palanisamy

Age Approximation from Speech Using Gaussian Mixture Models ........................................ Tanushri Mittal, Anurag Barthwal, and Shashidhar G. Koolagudi

Wavelet Based Sharp Features (WASH): An Image Quality Assessment Metric Based on HVS ........................................................................................................... M. Reenu, Dayana David, S.S. Aneesh Raj, and Madhu S. Nair

Robust Face Recognition in the Presence of Noises and Blurring Effects by Fusing Appearance Based Techniques and Sparse Representation ......................................................... Steven L. Fernandes, G. Josemin Bala, P. Nagabhushan, and S.K. Mandal

Cloud Computing and Database Systems

Automatic Cloud Detection Using Spectral Rationing and Fuzzy Clustering ................................ S.R. Surya and Philomina Simon

A Review of Monitoring Techniques for Service Based Applications .................................................. Sridevi Saralaya and Rio D’Souza

Selection of Services for Data-Centric Cloud Applications: A QoS Based Approach .................... Amit Kr Mandal, Suvamoy Changudder, and Anirban Sarkar

Cloud Based Service Registry for Location Based Mobile Web Services System .......................... Melwyn D’Souza and V.S. Ananthanarayana

A Scalable Matching Approach Based Density Function for Heterogeneous Database Integration ................................................................................................. Dharavath Ramesh and Chiranjeev Kumar
Adaptive Self-Tuning Techniques for Performance Tuning of Database Systems: A Fuzzy-Based Approach .................................................................124
   S.F. Rodd and U.P. Kulkarni

**Computer Networking**

Empirical Power Control Schema Using Physical Layer Optimization in MANET ..........................................................130
   Ramanna Havinal, Girish V. Attimarad, and M.N. Giriprasad

Improvised k-hop Neighbourhood Knowledge Based Routing in Wireless Sensor Networks ..........................................................136
   Debasis Das and Rajiv Misra

Allowing Multiple Rounds in the Shared Whiteboard Model: Some More Impossibility Results ..............................................................142
   Dharmeet Singh Hora, Piyush Bansal, Kishore Kothapalli, and Kannan Srinathan

Peer-to-Peer and Cellular Connection Management ..........................................................148
   Dipin Kollencheri Puthenveettil and Ankur Chauhan

Ontology Based Resource Discovery Mechanism for Mobile Grid Environment ..........................................................154
   S. Stephen Vaithiya and S. Mary Saira Bhanu

Channel Coded STBC-OFDM Based Transmit Diversity Systems in Multipath Rayleigh-Fading Channels ..........................................................160
   M. Surendar and P. Muthuchidambaranathan

Browser with Clustering of Web Documents ..........................................................164
   Ravitheja Tetali, Joy Bose, and Tasleem Arif

Seamless Interoperation of LTE-UMTS-GSM requires Flawless UMTS and GSM ..........................................................169
   Kavitha Ammayappan

Network Coding-Aware Neighbor Based Topology Control in MANETs ..........................................................175
   K. Srinivas, A. Venugopal Reddy, and A. Nagaraju

CL-ILD: A Cross Layer Interference-Load and Delay Aware Routing Metric for Multi-radio Wireless Mesh Network ..........................................................181
   D.G. Narayan, M. Uma, G. Pavan, and S. Suraj

Security Analysis of Session Initiation Protocol in IPv4 and IPv6 Based VoIP Network ..........................................................187
   Ganesh Dadaji Sonwane and B.R. Chandavarkar

Performance Comparison of Executing Fast Transactions in Bitcoin Network Using Verifiable Code Execution ..........................................................193
   Prabhjot Singh, B.R. Chandavarkar, Srishti Arora, and Neha Agrawal

An Efficient Online Mileage Indicator by Using Sensors for New Generation Automobiles ..........................................................199
   B. Naresh Kumar Reddy, M. Naraimhulu, S.V. Sai Prasad, K. Khaja Babu, and S.V. Jagadeesh Chandra

Performance of Jumbo Sized Data on Jumbo Frame and Ethernet Frame Using UDP over IPv4/IPv6 ..........................................................204
   Abhijit Das and Shibendu Debbarma
Analysis of HWMP-ETX Routing in Wireless Mesh Networks ................................................................. 208
  Jayalakshmi G. Naragund and R.M. Banakar

Information Security

An Efficient Distributed Verification Protocol for Data Storage Security in Cloud Computing ................................................................................................................................................................... 214
  P. Syam Kumar, R. Subramanian, and D. Thamizh Selvam

Detection of User Cluster with Suspicious Activity in Online Social Networking Sites ........................................ 220
  A. Sharath Kumar and Sanjay Singh

An Access Control Model for Cloud Computing Environments ........................................................................ 226
  Manoj V. Thomas and K. Chandra Sekaran

Modified Vigenere Encryption Algorithm and Its Hybrid Implementation with Base64 and AES ...................................................................................................................................................................... 232
  Gurpreet Singh and Supriya

Digital Image Authentication Model Based on Edge Adaptive Steganography ...................................................... 238
  Nidhi Grover and A.K. Mohapatra

Trust Based Privacy Preserving Access Control in Web Services Paradigm ............................................................ 243
  Rekha Bhatia and Manpreet Singh

DroidOLytics: Robust Feature Signature for Repackaged Android Apps on Official and Third Party Android Markets ........................................................................................................................................................................ 247
  Parvez Faruki, Vijay Laxmi, Vijay Ganmoor, M.S. Gaur, and Ammar Bharmal

Key Update Mechanism in PKI: Study and a New Approach .................................................................................. 253
  V. Spoorthi, Balaji Rajendran, and K. Chandrasekaran

(2,3) RIVC Scheme in Visual Cryptography without Pixel Expansion ........................................................................ 259
  Anila Thankappan and M. Wilscy

Author Index .............................................................................................................................................................. 264
