Methods I

Fission Matrix Capability for MCNP

Forrest B. Brown (1), Sean E. Carney (2), Brian C. Kiedrowski (1), William R. Martin (2)

1) Monte Carlo Codes Group, Los Alamos National Laboratory, Los Alamos NM, 2) NERS Department, University of Michigan, Ann Arbor, MI

Verification of MCNP5-1.60 and MCNP6.1 for Criticality Safety Applications

Forrest B. Brown, Brian C. Kiedrowski, Jeffrey S. Bull

Monte Carlo Codes Group, Los Alamos National Laboratory, Los Alamos NM

Status of MCNP Sensitivity/Uncertainty Capabilities for Criticality

Brian C. Kiedrowski, Albert C. Kahler, III, and Michael E. Rising

Los Alamos National Laboratory, Los Alamos, NM

Determination of Correlations among Benchmark Experiments by Monte Carlo Sampling Techniques

Matthias Bock and Maik Stuke

Gesellschaft für Anlagen- und Reaktorsicherheit (GRS) mbH, München, Germany

Impact of Correlated Benchmark Experiments on the Computational Bias in Criticality Safety Assessment

Matthias Bock and Matthias Behler

Gesellschaft für Anlagen- und Reaktorsicherheit (GRS) mbH, München, Germany

Trends of the deterministic route APOLLO2.8/JEFF-3.1.1 of CRISTAL V2 Criticality Package in ICSBEP benchmarks

C. Riffard, C. Carmouze and A. Santamarina (1), G. Grassi (2)

1) Commissariat à l'Énergie Atomique et aux Énergies Alternatives, CEA, DEN, DER, SPRC, Saint-Paul-lez-Durance, France, 2) AREVA NC, Paris La Défense, France

Feedback on nuclear data for separated Burnup fission products oscillations in the MINERVE reactor with JEFF-3 library in PWR-MOX fuel criticality-safety studies

A. Chambon, A. Santamarina, G. Noguère and C. Riffard (1), F. Lavaud and D. Lecarpentier (2)

1) CEA, DEN, DER, SPRC, Cadarache Center, Saint Paul-lez-Durance, France, 2) EDF, Clamart, France

Innovative Method to Calculate the Atomic Densities of any Compound Mixed with a Moderator

D. Noyelles, F.X. Giffard and E. Gagnier

Commissariat à l'Énergie Atomique et aux Énergies Alternatives - Centre de Saclay, DEN/DANS/DM2S/SERMA, Gif sur Yvette Cedex, France

Hybrid Technique in SCALE for Fission Source Convergence Applied to Used Nuclear Fuel Analysis

A.M. Ibrahim, D.E. Peplow, K.B. Bekar, C. Celik, J.M. Scaglione, D. Ilas, J.C. Wagner

Oak Ridge National Laboratory, Oak Ridge, TN

Criticality Safety Demonstration Using Low Fissile Concentration in Waste

A. Coulaud, G. Néron de Surgy (1), E. Guillou (2), L. Cholvy (3)

1) AREVA E&P, Montigny-le-Bretonneux, France, 2) AREVA NC La Hague, Beaumont-Hague Cedex, France, 3) CEA Marcoule, Bagnols sur Cèze, France

Analysis & Experiments I

Exclusion of Criticality for a Final Repository in a Saline Host Rock based on the Neutron Absorbing Properties of Cl-35

Robert Kilger, Matthias Bock, and Bernhard Gmal

Gesellschaft fuer Anlagen- und Reaktorsicherheit (GRS) mbH, Munich, Germany

Criticality Safety Analyses for Solid Fuel Thorium Molten Salt Reactor (SF-TMSR) Core Replacement

Zhaozhong HE, and Kun CHEN (1), Guoshun YOU and Jianping JING (2)

1) Center for Thorium Molten Salt Reactor (TMSR) Research, Shanghai Institute of Applied, Physics (SINAP), Chinese Academy of Sciences (CAS), Shanghai, China, 2) Nuclear and Radiation Safety Centre, Ministry of Environmental Protection of the People's Republic of China, Beijing, China

Above 5% 235U enrichment – A new AREVA challenge for criticality safety assessments in an UO2 fuel fabrication plant

N. Comte And M. Doucet (1), M. Manhes (2), P. Bouvet (3)

1) AREVA - AREVA NP Fuel Business Unit, Lyon, France, 2) 2011 Internship in the frame of a Master Degree Graduation, 3) AREVA - FBFC, Romans sur Isère, France

Reevaluation of the Jezebel Benchmark: Assumptions About Masses and Dimensions%)

Jeffrey A. Favorite and Roger W. Brewer (1), Raymond L. Reed (2)

1) X-Computational Physics Division, Los Alamos National Laboratory, Los Alamos, NM, 2) URS Professional Solutions LLC, Aiken, SC

Low Enrichment Uranium Conservative Modeling: Homogeneous or Heterogeneous Fissile Medium?% ,

D. Noyelles And E. Gagnier

Commissariat à l'Énergie Atomique et aux Énergies Alternatives - Centre de Saclay, DEN/DANS/DM2S/SERMA, Gif sur Yvette Cedex, France

The ORSphere Benchmark Evaluation and Its Potential Impact on Nuclear Criticality Safety% (

John D. Bess, Margaret A. Marshall, and J. Blair Briggs

Idaho National Laboratory, Idaho Falls, ID

Additions to the ICSBEP and IRPhEP Handbooks Since NCS 2009% *

John D. Bess and J. Blair Briggs (1), Jim Gulliford and Ian Hill (2)

1) Idaho National Laboratory, Idaho Falls, ID, 2) Organization for Economic Co-operation and Development (OECD) Nuclear Energy Agency (NEA), Paris, France

Interspersed Moderation, What is Credible?% +

Lary L. Wetzel, P. E., Brandon M. O'Donnell, Daniel L. Ashworth

Babcock & Wilcox Nuclear Operations Group, Inc., Lynchburg, VA

Full Burnup Credit Conservatism in PWR-UO₂ Industrial Applications, due to the Correction and Penalty Factors Derived from the French Experiments using the JEFF3.1.1 Evaluation% -

C. Carmouze, C. Riffard, A. Santamarina (1), G. Grassi (2)

1) Commissariat à l'Énergie Atomique et aux Énergies alternatives, CEA, DEN, DER, SPRC, Saint-Paul-lez-Durance, France, 2) AREVA-NC, Paris La Défense, France

Validation of 108 MOX Powder Applications for ANS and ISO Standards&\$%

Dennis Mennerdahl

E Mennerdahl Systems, Täby, Sweden

Use of Gadolinium as a Criticality Safety Control in Fuel Fabrication Process&%

David Eghbali

GE Hitachi Nuclear Energy, Wilmington, NC

Sub-critical Mass Determination for Cylindrical Systems of U-235, U-233 and Pu-239&&

Nhu-Thuy Tran and Eugene Masala

Atomic Energy of Canada Limited (AECL) – Chalk River Laboratories, Ontario, Canada

Methods II

Use of Tsunami in validation of Scale 6.1 for the Swedish spent fuel repository – Selection of experiments&' -

Fredrik Johansson and Henrik Liljenfeldt

Swedish Nuclear Fuel and Waste Management Co (SKB), Stockholm, Sweden

The Development and V&V of the Transport Module Based on MOC Method in Lattice Code LATC&) \$

Li Shuo, Chen Yixue, Yu Hui, Liu Zhiyan, Yan Yuhang

State Nuclear Power Software Development Center, Xicheng District, Beijing, China

Calculating Alpha-eigenvalue Spectra with Monte Carlo&),

Benjamin R. Betzler (1), Brian C. Kiedrowski and Forrest B. Brown (2), William R. Martin (3)

1) University of Michigan, Ann Arbor, MI, 2) Los Alamos National Laboratory, Los Alamos, NM, 3) University of Michigan, Ann Arbor, MI

Importance of Scattering Distributions on Criticality&* -

Brian C. Kiedrowski

Los Alamos National Laboratory, Los Alamos, NM

Comparison of Validation Results for GEMER, MCNP, and SCALE/KENO-VI

David Eghbali, Qi Ao and John Hannah
GE Hitachi Nuclear Energy, Wilmington, NC

Use of SCALE Continuous-Energy Monte Carlo Tools for Eigenvalue Sensitivity Coefficient Calculations

Christopher M. Perfetti and Bradley T. Rearden
Oak Ridge National Laboratory, Oak Ridge, TN

Recycling Facility Periodic Safety Review: A Methodology Used for the Nuclear Criticality Safety Review Of Geometrically Safe or Favorable Equipment

M. Hampartzounian, Y. Blin, A. Coulaud, G. Néron de Surgy and A. Bardelay (1), E. Guillou (2), G. Grassi (3)
1) AREVA E&P, Montigny-le-Bretonneux, France, 2) AREVA NC, Beaumont-Hague Cedex, France, 3) AREVA NC, Paris La Défense Cedex, France

The SCALE Verified, Archived Library of Inputs and Data - VALID

W.J. Marshall and B.T. Rearden
Oak Ridge National Laboratory, Oak Ridge, TN

Benefits of Using EPRI Depletion Reactivity Benchmarks for Burnup Credit Validation

Dale B. Lancaster (1), K. S. Smith (2), A. J. Machiels (3)
1) NuclearConsultants.com, Boalsburg, PA, 2) Department of Nuclear Engineering, Cambridge, MA, 3) Electric Power Research Institute, Inc., Palo Alto, CA

Analysis & Experiments II

Evaluation of the Kyoto University Critical Assembly Erbium Oxide Experiments

Joseph A. Christensen
U.S. Department of Energy – Idaho Operations Office, Idaho Falls, ID

EPRI Depletion Benchmark Calculations Using PARAGON

Vefa N. Kucukboyaci
Westinghouse Electric Company, LLC, Cranberry Woods, PA

Validation of Critical Parameter Calculations for Sodium Diuranate using Sensitivity and Uncertainty Analysis

Philip Sewell and Peter Vescovi
DAHER-TLI, Columbia, SC

Measurement and Modeling of Void Effects on Multiplication in a Homogeneous Thermal Reactor

Robert D. Busch
University of New Mexico, Chemical and Nuclear Engineering Department, Albuquerque, NM

Credible Moderation Content of Uranium Oxide Powder and Pellet Systems

Elisabeth Dunn, Steven Brown, Mark Dodds, Alison Thomas
Global Nuclear Fuels – America (GNF-A), Wilmington, NC

Effects of Particle Size and Density on UO₂ Systems

Elisabeth Dunn and David Eghbali
Global Nuclear Fuels – America (GNF-A), Wilmington, NC

Production of a Criticality Safety Case for Reprocessing Enriched Material Through the MAGNOX Reprocessing Plant at Sellafield

D Ellis, S Hollman, D McCrindle and G Palmer
Sellafield Ltd, Seascale, CA20 1PG, United Kingdom

Results of Critical Experiments on Water-Moderated Fully-Reflected 6.90% Enriched UO₂ Fuel Pin Arrays with a Fuel-to-Water Volume Ratio of 0.52

Gary A. Harms, Allison D. Miller, and John T. Ford
Sandia National Laboratories, Albuquerque, NM

Justification to Disregard U-234 Mass in Certain Uranium Systems

Andrew R. Wysong
Lawrence Livermore National Laboratory, Livermore, CA

Programs/Training/Risk Assessment/Post-Fukushima

Generic Criticality Considerations for Spent Fuel Pool Storage Racks under Beyond Design Basis Accident Conditions(' (

Robert Kilger, Matthias Bock, and Bernhard Gmal

Gesellschaft fuer Anlagen- und Reaktorsicherheit (GRS) mbH, Munich

The Official Website of the U.S. Department of Energy's Nuclear Criticality Safety Program 444

Brian L. Koponen, David P. Heinrichs, Chuck K. Lee (1), Lori Scott (2)
