
Manama, Bahrain
7-9 May 2013
2013 Fourth International Conference on e-Learning "Best Practices in Management, Design and Development of e-Courses: Standards of Excellence and Creativity"

ECONF 2013

Table of Contents

Message from General Chair .............................................................................................................. xiv
Message from Program Chair ............................................................................................................. xv
Organizing Committee .......................................................................................................................... xvi
Reviewers ............................................................................................................................................ xvii
Acknowledgement .................................................................................................................................. xx
Sponsors .................................................................................................................................................. xxii

Session 1: Amandeep Co-design Training Session for Teachers

Session 2: Technological Issues: Architecture of Educational Information Systems Infrastructure

Developing an M-Learning Pilot for Qur’an and Its Sciences ................................................................. 1
   Ahmed Sameh

Crawler Based Context Aware Model for Distributed e-Courses through Ubiquitous Computing at Higher Education Institutes ................................................................. 9
   Haytham W. Hijazi and Jamil A. Itmazi

Architecture of a Nation-Wide Educational Information System Infrastructure: A Systematic Review ................................................................. 15
   Farzana Shafique
An Extendable OpenSource Architecture of E-Learning System .........................................................22
Murtaza Ali Khan and Faizan Urrehman

**Session 3: Organization and Strategy and Management Issues: Workplace Learning**

Evidence-Based-Practice Radiologic Technology (EBPRT) Teaching Strategy
which Curriculum Is Based on Continuous Professional Development Gate .........................................27
*Rana Abd Almugeeth Eisa Abd Almugeeth*

The Future Teaching and Learning Methods in Higher Education .....................................................33
*Samia El-Azab and Mohamed Alazab*

Empirical Assessment of Ethical Responsibility for Programmatic Effectiveness .................................38
*Le Gene Quesenberry*

**Session 4: Instruction Design Issues: Designing e-Learning Tasks**

Mobile Learning Laboratory for Hardware Courses .............................................................................51
*Wael M El-Medany and Yasser Ismail*

Edutainment: A Pioneering Innovation at the College of Health Sciences ............................................55
*Manijeh Mistry and Safeya Al Baharna*

Utilizing Interactive Simulation-Based Modules for Enhancing Learning Outcomes in Basic Computing Skills Course .................................................................67
*Michelle Nobleza Jimenez*

Taxonomy of Image File Formats ........................................................................................................74
*Evon Abu-Taieh, Abdullah El-Haj, Alia Abu-Tayeh, Asim El-Sheikh, and Nazeeh Ghatasheh*

**Session 5: Technology Issues: Learning Management Systems (LMS)**

Effect of MasteringChemistry® on Students' Learning and Grades at the College of Health Sciences ..................................................................................82
*Rabab A.Wahab and Safiya Al-Baharna*

Students' Perspectives in Adopting Mobile Learning at University of Bahrain ....................................86
*Mayyadah F. Al-Ani, Sarab M. Hameed, and Leka’a Faisal*

eLearning 2.0: Learning Management Systems Readiness .................................................................90
*Mohamed E. Edrees*

Students' Perceptions of MOODLE at the CHS .....................................................................................97
*Rabab A.Wahab, Fatema Ali, Sheeba P. Thomas, and Hassan Al Basri*
The Difference in Learning Strategies in Virtual Learning Environment and Their Effect on Academic Achievement and Learning Satisfaction for Distance Teaching & Training Program Students ................................................................................................................................. 102  

Shaikha Mahdi Alyami and Alagab Mohammed Alagab

Session 6: e-Skills and Information Literacy for Learning: Electronic Library and Information Search Skills

Proposed Academic Cloud Computing for Saudi Universities and Higher Institutes ............................................................................................................................................... 113  

Abdelrahman Osman, Saad Mamoun Abdulrahman, and Abusfian Elgelany

The Effect of E-Learning Based on Meta-cognition Strategy on Students' Achievement and Awareness of Creative Problem Solving Processes in a C++ Course at Kuwait University ........................................................................................................................................... 120  

Heba W.M. Alayoub, Ahmed M. Nouby, and Ayman M. Amer

Development of Chemistry Teaching in Accordance for Ready and Developed Electronically Systems ............................................................................................................................................... 121  

Mahmood, Abdul Salam, Mohammed, and Alhafidh

The Effect of Using an Interactive Multimedia Electronic Book on Developing Achievement, Performance of Geometry Skills, and the Attitude towards Its Use at the Primary School ........................................................................................................................................... 122  

Zakaria Gaber Henawy and Marian Melad Mansor

Session 7: Organizational Strategy and Management Issues: Education and Management

Accessibility as an Indicator of Jordanian E-Government Website Quality ......................................................................................................................................................... 156  

AbuAli Amer Nizar, Abdelsalam Obedidat, and Haifa Yousef Abu-Addose

A Cloud Computing Technology for Knowledge Centers ......................................................................................................................................................... 161  

Samia El-Azab, Mohamed Al-Azab, and P.E. Takeshi Utsumi

The Effect of Using Brainstorming Strategy on Developing Creative Thinking Skills for Sixth Grade Students in Science Teaching ......................................................................................................................................................... 169  

Ahmed Taleb, Hassan Hamza, and Eman Wefky

The Effect of Using Integrative Approach in Science Teaching on the Students' Attitude toward Learning Science ......................................................................................................................................................... 174  

Latifa Ebrahim Yassin, Budoor Ahmed Najim, and Eman Wefky
Session 8: Technological Issues: Virtual Learning Environments (VLEs)
The Quality Standards in the Application of Virtual Learning Environments (VLEs) ......................................................................................................................178
  Mahmood Abdul Salam Al-Hafidh

Proposed Model for the Learning Resource Center Based on Cloud Computing .........................................................................................................................187
  Mohamed Shawky Abdel-Fatah Shaltout

The Role of Virtual Experiments in Applying the Principles of Good Practice in Teaching .................................................................................................................................188
  Mohamed A. Antar

Exploring Intentions to Use Second Life for Education at University of Bahrain ........................................................194
  Hayat Ali, Ahmed Ali Ahmed, Tayyeba Tariq, and Huma Safdar

Second Life (SL) in Education: The Intensions to Use at University of Bahrain ........................................................205

Session 9: e-Skill and Information Literacy for Learning: Electronic Library and Information Search Skills

Online Library Adoption in Bangladesh: An Empirical Study .........................................................................................216

Introducing e-Resource Portal and Information Search Skills to Masses: Series of Information Literacy Campaigns at UD .........................................................................................220
  Raed Al-Bukhari, Farzana Shafique, Nadeem Siddique, and Muhammad Asif Kamal

A Heuristic ISD Model for Designing Online Courses for Higher Education in Palestine .................................................................226
  Zuheir Khlaif

Session 10: Technology Issues: XML, Schemes and the Semantic Web

The Impact of Web 3.0 on E-Learning ......................................................................................................................227
  Mohamed Shawky Abdel-Fatah Shaltout and Aseel I. Bin Salamah

  George E. Violettas, Tryfon L. Theodorou, and George C. Stephanides

Implementing Blended Learning through Studio Courses .................................................................................................241
  Muhammad Ali Khan and Sajjad Mahmood
The Reality of the Use of Learning Resource Centers Specialist for Libraries and Digital Resources as a Tool for Continuing Professional Development: A Comparative Study between Egypt and Saudi Arabia .................................................................245
Mohamed Al Saadany

Session 11: e-Learning Curriculum Development Issues
Using Corpus Linguistics as a Tool for Reform in English Language Teaching and Learning: The Case of Public Schools in Arab Countries .................................................................246
Omar Mohamed Alqadoumi
Students with Disabilities’ Attitudes towards E-Learning Courses in Developing Countries ...............................................................................................................................253
Ahmed Farouk Mohamed Saleh and Al Farouk Ahmed Farouk
Introduction of e-Learning Parallel to Classic Teaching in Intermediate Schools in KSA ........................................................................................................................................258
Anwar Alkood and Hisham Gabbani
Design an Innovative Virtual Training Environment and Measure Their Effectiveness in the Development of e-Learning Skills Training and the Trend towards Default with Faculty Members ...................................................................................260
Sayed AbduMoula Abu Khatwah

Session 12: e-Learning Research Methods and Approaches: Effectiveness and Impact Studies
Determinants of e-Learning Acceptance in Higher Education Environment Based on Extended Technology Acceptance Model .................................................................261
Nabeel Farouq Arif Al-Mushasha
Risks and Remedies in ISRA University e-Learning System .................................................................................................................................267
Zahraa F. Muhsen, Khalil A.Barhoum, Adi Maaita, and Ayman Nsour
Creativity Culture and its Relationship with Electronic Education .................................................................................................................................271
Malawi Abdullah Al-Shahrani
The Role of e-Learning to Face the Challenges of the Century .................................................................................................................................275
Samani Ahmed
Session 13: Instructional Design Issues: Designing e-Learning Tasks -- e-Learning Activities

A Proposed Model for Designing Creative Interactive e-Learning Activities and its Impact on Developing Knowledge Generating, Depth of Learning, and Team Work Skills .................................................................276

Hamdy Ahmed Abdelaziz

The Effect of Designing e-Activities within the Multi-Intelligence Theory on Satisfaction and Achievement of Postgraduate Students at the Arabian Gulf University .................................................................280

Maryam S. Alhamad, Ahmed M. Nouby, and Gamaleldin M. Elshamy

Internet and Continuing Education in the Arab Countries New Trends for Building a Knowledge Society .............................................................................................................283

Mukhtar Abdul Khalik Abdellah Attia

A Model for Developing Arab Applications in Mobile Education by Providing New Arabic Mobile Learning Engine (AMLE) .................................................................296

Hana Mohammed Eltayeb Abdal, Mohamed Osman Ali Hegazi, and Iman Abualmali Abdelrhman

A Proposal for the Design of e-Bank Questions inside Learning Management Systems (LMS) for Students of Universities and Higher Institutes .................................................................302

Saad Mamoun Abdelrhman and Wajeb Gharibi

Session 14: e-Learning Research Methods and Approaches: Course and Program Evaluations

Data Mining Methods to Assess Student Behavior in Adaptive e-Learning Processes .................................................................303

Agostino Marengo, Alessandro Pagano, and Alessio Barbone

Design and Implementation of e-Laboratory for Information Security Training .................................................................310

Siddeeq Y. Ameen and Ibrahim M. Ahmed

Usability of Blackboard System Applied at Kuwait University .............................................................................................................318

Suad Alshebou and Suha Alawadhi

A Mobile-Quiz Application in Egypt .................................................................................................................................325

Hany F. Elyamany and Ahmed H. Yousef
Session 15: E-learning Delivery Issues: e-Delivery in Different Contexts – Distance Learning

Potential Hindrances to the Utilization of e-Learning System in Architectural Courses .......................................................................................................................... 330
  Bhzad Sidawi

Effectiveness of the Image/Video Compression and Its Role in Supporting e-Learning Systems .............................................................................................................. 336
  Walaa M. Abdel-Hafiez and Mohamed Heshmat

Effective Use of LMS (Learning Management System) in Teaching Graduate Geology Course at KFUPM, Saudi Arabia .................................................................................................................. 342
  Mustafa M. Hariri

E-Assessment as a Tool to Augment Face-to-Face Teaching and Learning Environment ......................................................................................................................... 348
  Bassam Al-Hamad and Taj Mohieldin

Session 16: e-Learning Research Methods and Approaches: Evaluation of e-Learning Technologies

The Reality of Educational Usage of Digital Technologies in the Arab Institutions: A Study for the Arab League Educational, Cultural and Scientific Organization .................................................................................................................. 360
  Jamil Itmazi

The Availability of Quality Standards of e-Learning at Mutah University from the Point of View of Faculties .......................................................................................................................... 369
  Nawaf Samara, Suleman Al-Sarayrih, and Asma Al-Sarayrih

The Effect of Distance Training on the Motivation towards Collaborative Training and Skills of the Educational Resource Specialists in the Intermediate Schools in the Kingdom of Bahrain .................................................................................................................. 370
  May A. Shamandy, Ahmed M. Nouby, and Elajab M. Ismail

Developing an Efficient Algorithm for Building an Integrated Technical Educational System .......................................................................................................................... 402
  Wajeb Gharibi and Omar Mushayt
Session 17: Instructional Design Issues: Creating e-Learning Courses -- Collaborative Learning

Experimental Investigation of Computer Supported Collaborative Learning (CSCL) Face-to-Face vs. Blackboard .................................................................403

Amal Alrayes

Standards and Process Applied in Development of Comprehensive Online Courses at KFUPM, Saudi Arabia .................................................................413

Mustafa M. Hariri and Saeed M. Al Amoudi

The Future Is Here: m-Learning in Higher Education ..................................................417

Charalampos Giousmpasoglou and Evangelia Marinakou

Security and Collaborative Groupware Tools in Education: A Case Study at the University of Bahrain .................................................................421

Resala Aladraj and Mike Joy

Session 18: Organizational Strategy and Management Issues: Blended Learning

The Effectiveness of a Strategy in Blended Learning in Enhancing Web Collaboration Motivation and Web Collaboration Attitude among the College of Education Students at Al-Aqsa University ..................................................427

Hasan R. Mahdi and Goltan Hijazi

E-Learning at Hebron University -- A Case Study ..................................................438

Nabil M. Hasasneh and Mohammad M. Moreb

Equipping Upper Elementary Students with Web Mobile Skills to Advocate Programming Literacy .................................................................442

Ahmad Hammoud, Nisrine Adada, and Haifa Abou Harash

Facilitating the Implementation of the Constructivist Approach through the Social Space of Facebook .................................................................449

Khitam Shraim

Session 19: e-Learning Research Methods and Approaches: Evaluation of Student and Tutor Satisfaction

Influence of Exercises on the Final Result in the Blended Learning Environment .................................................................456

Nevzudin Buzadjija and Dragi Tiro.

An Investigation of Factors that Contribute to Student Satisfaction from Online Courses: The Example of an Online Accounting Course .................................................................462

Evangelia Marinakou
Experiencing Blackboard as an Educational and Communication Tool
at University of Bahrain: A Student’s Perspectives ................................................................. 469
  Amira H. Abdulrazzak, Mayyadah F. Al-Ani, and Aws Y. Fidaeldin

E-Learning in Saudi Universities, Challenges and Issues .......................................................... 473
  Dimitrios Xanthidis, Syed Waqee Wali, and Paul Nikolaidis

Author Index ........................................................................................................................................... 479
