NONLINEAR ACOUSTICS
State-of-the-Art and Perspectives
ISNA19

19th International Symposium on Nonlinear Acoustics

Tokyo, Japan 21 - 24 May 2012

Hosted by
Nonlinear Acoustics Society of Japan

EDITORS
Tomoo Kamakura
The University of Electro-Communications,
Tokyo, Japan

Nobumasa Sugimoto
Osaka University, Osaka, Japan

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS
Acoustical Society of Japan (ASJ)
Acoustical Society of America (ASA)
International Union of Pure and Applied Physics (IUPAP)

DVD INCLUDED

Melville, New York, 2012
AIP | CONFERENCE PROCEEDINGS 1474
Table of Contents

Preface: NONLINEAR ACOUSTICS State-of-the-Art and Perspectives
Tomoo Kamakura and Nobumasa Sugimoto ........................................... 1

Scope of the Symposium ........................................................................ 3

Committees ............................................................................................. 4

List of Participants ................................................................................. 7

Early history of ISNA
Mark F. Hamilton, Thomas G. Muir, and David T. Blackstock ............. 11

INVITED LECTURES
Sources and propagation of atmospherical acoustic shock waves
François Coulouvrat ................................................................................. 19

Understanding of thermoacoustic phenomena and their applications
Tetsushi Biwa .......................................................................................... 29

Nonlinear acoustic/seismic waves in earthquake processes
Paul A. Johnson ....................................................................................... 39

GENERAL THEORY OF NONLINEAR ACOUSTICS
On the evolution of a spherical short pulse in nonlinear acoustics
Bengt O. Enflo and Claes M. Hedberg .................................................... 47
Low-frequency intrinsic localized modes in a spatially periodic and articulated structure of rigid members with elastic supports
Yosuke Watanabe, Sojiro Awata, and Nobumasa Sugimoto 51

A study on bifurcations and structure of phase space concerning intrinsic localized modes in a nonlinear magneto-mechanical lattice
Masayuki Kimura, Yasuo Matsushita, and Takashi Hikihara 55

Existence and stability of localized modes in one-dimensional nonlinear lattices
Kazuyuki Yoshimura 59

Modulational instability and chaotic breathers in two dimensional Fermi-Pasta-Ulam lattices
Yusuke Doi and Akihiro Nakatani 63

Controlled translation of an intrinsic localized mode
M. Sato, N. Fujita, S. Nishimura, Y. Takao, Y. Sada, W. Shi, S. Shige, and A. J. Sievers 67

NONLINEAR ACOUSTICS IN FLUIDS
Peculiarities of shocks forming in high intensity acoustic beams in the presence of soft boundary at interaction area
Mikhail Deriabin, Dmitry Kasyanov, and Vasily Kurin 71

Molecular dynamics study of sound propagation in a gas
Takeru Yano 75

Resonant gas oscillation with evaporation and condensation
Masashi Inaba, Takeru Yano, Masao Watanabe, Kazumichi Kobayashi, and Shigeo Fujikawa 79

Experimental study of acoustic streaming in a high level standing wave guide: Influence of mean temperature and higher harmonics distribution
I. Reyt, S. Moreau, H. Bailliet, and J-C. Valière 83

Numerical study of nonlinear streaming inside a standing wave resonator
V. Daru, D. Baltean Carlès, and C. Weisman 87
Finite difference calculation of acoustic streaming including the boundary layer phenomena in an ultrasonic air pump on graphics processing unit array
Yuji Wada, Daisuke Koyama, and Kentaro Nakamura

NONLINEAR ACOUSTICS IN MULTI-PHASE AND CAVITATION
[Invited Paper] News from bubble dynamics: High static pressures, shock waves and interior dynamics
W. Lauterborn, T. Kurz, P. Koch, M. Alizadeh, H. Söhnholz, and D. Schanz

[Invited Paper] Observing multi-bubble sonoluminescence in phosphoric acid
Yang Kai, Maimaititusong Maimaitiming, Zhang Cui Ying, Zhu Qi Rong, and An Yu

Kyuichi Yasui, Toru Tuziuti, and Kazumi Kato

Instability and breakup of a gas-core viscous annular jet
Takao Yoshinaga

Focused ultrasound induced free-surface breakup and damage in acrylic plates
Yukio Tomita and Shigenori Tanaka

Bubble dynamics and decompression wave structure in a magmatic melt: Diffusion effects
Valeriy K. Kedrinskiy

Theoretical study on the shape instability of an encapsulated bubble in an ultrasound field
Yunqiao Liu, Kazuyasu Sugiyama, Shu Takagi, and Yoichiro Matsumoto

Pattern formation on the wall of acoustically driven gas bubble
A. O. Maksimov and T. G. Leighton

</table>
Subharmonic wave analysis in crack using the developed FEM
Tsuyoshi Mihara, Koji Shimaya, Yasushi Ikegami,
Takashi Furukawa, and Ichiro Komura

Two dimensional model for subharmonic generation at closed
cracks with damped double nodes
Kazushi Yamanaka, Yohei Shintaku, and Yoshikazu Ohara

Formation and evaluation of closed stress corrosion cracks in
Ni-based alloy weld metal for nuclear power plants
Yoshikazu Ohara, Yohei Shintaku, Satoshi Horinouchi,
and Kazushi Yamanaka

Analysis of harmonic generation in Lamb waves by finite-
difference time-domain method
Naoki Matsuda and Shiro Biwa

[Invited Paper] Nonlinear spectroscopy of closed delaminations
and surface breaking cracks: Finite element simulations of
clapping and nonlinear air-coupled emission
Steven Delrue and Koen Van Den Abeele

media with relaxation
Lev Ostrovsky and Andrey Lebedev

Nonlinear Resonant Ultrasound Spectroscopy (NRUS) applied to
fatigue damage evaluation in a pure copper
Toshihiro Ohtani and Yutaka Ishii

Imaging of partial plastic deformation in thin metal plates by
immersion nonlinear ultrasonic local resonance
Koichiro Kawashima, Ryusuke Imanishi, Fumio Fujita,
and Takumi Aida

Shear waves in a cubic nonlinear inhomogeneous resonator
Timofey B. Krit, Valery G. Andreev, and Oleg A. Sapozhnikov

A novel method for detecting second harmonic ultrasonic
components generated from fastened bolts
Makoto Fukuda and Kazuhiko Imano
Consideration of nonlinear vibration characteristic of object for irradiating high-intensity ultrasonic waves by a point-convergence-type aerial ultrasonic source
Ayumu Osumi and Youichi Ito

Acoustic harmonic generation in a multilayered structure with nonlinear interfaces
Yosuke Ishii and Shiro Biwa

NONLINEAR ACOUSTICS IN MEDICINE AND BIOLOGY
Effects of the liposomal formulation on the behavior and physical characteristics of acoustic liposomes
Nicolas Sax, Sachiko Horie, Li Li, Maya Sakamoto, Shiro Mori, and Tetsuya Kodama

Analysis of a bubble deformation process in a microcapsule by shock waves for developing DDS
Masaaki Tamagawa and Kenshi Morimoto

Enhancement of cavitation inception by second-harmonic superimposition
Shin Yoshizawa, Ryo Takagi, Jun Yasuda, and Shin-ichiro Umemura

Effective bandwidth extension by combined harmonics
Gregory T. Clement, Hideyuki Nomura, Hideo Adachi, and Tomoo Kamakura

Linearization strategies for the Iterative Nonlinear Contrast Source method for full-wave simulation of nonlinear ultrasound fields
Martin D. Verweij, Libertario Demi, and Koen W. A. van Dongen

Endoscopic optical coherence elastography using acoustic radiation force and a vibrating fiber
Kentaro Nakamura, Ryoichi Isago, and Daisuke Koyama

Ultrasonic actuation of biological tissues using dual acoustic radiation force for assessment of elastic properties
Hideyuki Hasegawa, Jun Yamaguchi, and Hiroshi Kanai

</table>
Account of heat convection by Rayleigh streaming in the
description of wave amplitude growth and stabilization in a
standing wave thermoacoustic prime-mover.
Guillaume Penelet, Matthieu Guedra, and Vitalyi Gusev 291

Numerical analysis of thermoacoustic spontaneous oscillations in
a 2D rectangular and an axisymmetric closed tube
Masahiro Ishigaki, Koichiro Shirai, Shizuko Adachi,
and Katsuya Ishii 295

Numerical simulations of thermoacoustic oscillations in a looped
tube
D. Shimizu, K. Nishikawa, and N. Sugimoto 299

Measurement of temperature gradient in a stack of a prime
mover in a loop-tube-type thermoacoustic cooling system
Shin-ichi Sakamoto, Yoshitaka Inui, and Yoshiaki Watanabe 303

AEROACoustics AND NonLinear Acoustics IN ATMOSPHERE
Nonlinearity analysis of model-scale jet noise
Kent L. Gee, Anthony A. Atchley, Lauren E. Falco,
and Micah R. Shepherd 307

[Invited Paper] A sonic boom propagation model including mean
flow atmospheric effects
Joe Salamone and Victor W. Sparrow 311

Computational fluid dynamics simulations of infrasound
generation process by meteorites
Martin Henneton, Philippe Delorme, Olaf Gainville,
and François Coulouvrat 319

Interference patterns in non-homogeneous flow over the obstacles
N. I. Makarenko and J. L. Maltseva 323

Acoustic waves in the atmosphere and ground generated by
volcanic activity
Mie Ichihara, John Lyons, Jun Oikawa, and Minoru Takeo 327
Numerical simulation of shock wave propagation in flows
Mathieu Rénier, Régis Marchiano, Éric Gaudard, Louis-Jonardan Gallin, and François Coulouvrat

Global variation of sonic boom overpressure due to seasonal changes in atmosphere
Hiroshi Yamashita and Shigeru Obayashi

Numerical simulation for sonic boom propagation through an inhomogeneous atmosphere with winds
Masafumi Yamamoto, Atsushi Hashimoto, Takashi Takahashi, Tomoo Kamakura, and Takeharu Sakai

Infrasound propagation in realistic atmosphere using nonlinear ray theory
Olaf Gainville, Philippe Blanc-Benon, and Julian Scott

Numerical and asymptotic solutions of generalised Burgers’ equation
Paul Hammerton and John Schofield

NONLINEAR ACOUSTICS AND OPTICS/EXPERIMENTAL METHODS IN NONLINEAR ACOUSTICS

Acoustic effects at interaction of laser radiation with a liquid accompanied by optical breakdown
A. V. Bulanov and I. G. Nagorny

Three-dimensional focus scanning by an acoustic variable-focus optical liquid lens
Daisuke Koyama, Ryoichi Isago, and Kentaro Nakamura

Observation of acoustic streaming in water/sensor plate/thin water layer/128YX−LiNbO₃ for realizing disposable digital microfluidic system
Jun Kondoh and Hitoshi Toyoizumi

Acoustic micromanipulation in a microchannel
Teruyuki Kozuka, Kyuichi Yasui, and Shin-ichi Hatanaka
APPLICATION OF NONLINEAR ACOUSTICS TO DEVICES

[Invited Paper] Actively created quiet zones by parametric loudspeaker as control sources in the sound field
   Chao Ye, Ming Wu, and Jun Yang

Estimation of parametric sound field controlled by source amplitudes and phases using numerical simulation
   Hideyuki Nomura, Claes M. Hedberg, and Tomoo Kamakura

Modeling the directivity of parametric loudspeaker
   Chuang Shi and Woon-Seng Gan

Inverse system design based on the Volterra modeling of a parametric loudspeaker system
   Wei Ji and Woon-Seng Gan

3D simulation of parametric ultrasound fields
   Fabrice Prieur

Droplet propulsion on non-piezoelectric substrates induced by Lamb waves
   Wei Liang, Sabrina Tietze, Martin Schmitt, and Gerhard Lindner

On the two-dimensional patterning of inorganic particles in resin using ultrasound
   Toru Tuziuti

Dynamics of second harmonic in nonlinear surface acoustic waves and a proposal of its device application
   Koji Aizawa and Yoshiaki Tokunaga

Spectral hole burning in piezoelectric resonators
   Fujio Tsuruoka
