</table>
ARRAY SIGNAL PROCESSING AND ARRAY DESIGN

An Ultrasonic Phased-Array Sensor to Measure the Velocity Profile of Open Channels .......................... 126
Manuel Haide, Wolfgang Schroer

The Subarray MVDR Beamformer for Active Littoral Sonar Systems ............................................. 130
Leverett Beazanson, Kevin Lepage, Robert Been

Distributed Network of Underwater Sensors Based on Local Time-Frequency Coherence Analysis .... 137
Florian Dadouchi, Cornel Ioana, Cedric Gervaise, Julien Mallet, Olivier Philippe, Didier Maauary, Stephane Jespers, Jerome Mars

Beamforming for Wireless Communications Between Buos .......................................................... 142
Fengzhong Qu, Bin Zhang, Ye Cheng, Fengzhong Qu, Zhujuan Zhang, Ying Ye, Ying Chen, Liuqing Yang

Design of Robust Superdirective Beamformer for Circular Sensor Arrays ....................................... 148
Yong Wang, Yixin Yang, Yuanliang Ma, Zhengyao He, Chao Sun

SOLAR IMAGING

Application of High Resolution Scanning Sonar with Multi Legged Underwater Robot ...................... 153
Hyuk Baek, Bong-Huan Jun, Jin-Yeong Park, Bo-Ram Kim, Pan-Mook Lee

Studying Seafloor Bedforms Using Autonomous Stationary Imaging and Profiling Sonars ............... 158
Ellyn Montgomery, Christopher Sherwood

Comparison of Feature Detection Techniques for AUV Navigation Along a Trained Route .............. 165
Peter King, Benjamin Anstey, Andrew Yardy

Underwater 2-D Sector-Scan Imaging Using MIMO Sonar with Narrowband LFM Pulses .......... 173
Chao Sun, Xiong-Hou Liu, Jie Zhuo, Zong-Wei Liu

Underwater Acoustic Imaging with Spatial Cross Correlation for Weak Noise Source Identification .... 178
Hu Yang, Hang Chen, Zhanlong Yang, Yanni Gou, Jinyan Du

RADARS

Interpretation of VHF Radar Echoes from a Complex Flow Field ................................................... 184
Malcolm Heron, Michael O'Shea, Jimmy Murphy, Leif Petersen, Daran Mollaghan, Arntson Prytz

Improvement of Surface Current Measurements with Spectra Reprocessing for 13 MHz SeaSonde Systems .................................................................................................................. 188
Colin Evans, Hugh Roarty, Michael Smith, John Kerfoot, Scott Glenn

Determination of Phase Difference of Backscatter Signals from Coherent-on-Receive Microwave Marine Radar for Wave Measurement ............................................................................. 193
Hwa Chien, Hao-Yuan Cheng, Dennis Trizna

Coincident, High Resolution Measurements of Ocean Surface Rain in Support of Improved Ascat-Retrieved Winds ............................................................................................................. 199
David Weissman, Marcos Portabella, Ad Stoffelen

Interpolated Swell Fields from SAR Measurements ........................................................................... 203
Pierre Tandeo, René Garello, Romain Husson, Bertrand Chapron, Fabrice Collard, Roman Fablet, Pierre Fabry

GEOACOUSTIC Inversion

Statistical Characterization of Weak Scattering Fields with Inverse Methods .................................. 207
Angeliki Xenaki, Peter Gerstoft, Olivier Carriere, Klaus Mosegaard

Passive Pachometry in Australian Water ......................................................................................... 214
Md Jahangir Alam, Eleanor Huntington, Michael Frater

Validation of an Inversion Scheme for Shear Wave Speed Using Scholte Wave Dispersion ............. 224
Jennifer Giard, Gopu Potty, James Miller, Christopher Baxter

Rapid Determination of Seafloor Acoustic Reflectivity by Exploiting Frequency Variability within Striations Data ..................................................................................................................... 233
Adrian Jones, Paul Clarke, David Bartel

Synthetic Aperture Geoaoustic Inversion in the Presence of Radial Velocity and Acceleration Dynamics ............................................................................................................................ 239
Bien Aik Tan, Peter Gerstoft, Caglar Yardim, William Hodgkiss
## AUV DESIGN

1. **Development of Hovering Type AUV 'Cyclops' for Precision Observation**
   - Son-Cheol Yu, Jubyun Pyo, Han-Gil Joe, Jin-Hwan Kim, Armagan Elibol
   - Page: 245

2. **An Extensible Networking Architecture for Autonomous Underwater Vehicles**
   - Ricardo Martins, João Sousa
   - Page: 250

3. **An Un-Tethered ROV for Routine Access and Intervention in the Deep Sea**
   - Andy Boven, Michael Jakuba, Norman Farq, Jonathan Ware, Christopher Taylor, Daniel Gomez-Ibanez, Casey Machado, Clifford Pontbriand
   - Page: 255

4. **Biological Inspired System for Localization and Mapping in Underwater Environments**
   - Luan Silveira, Silvia Botelho, Paulo Drews, Felipe Guth, Sr Diones Fischer, Felipe Moraes
   - Page: 261

5. **Design of an Autonomous Under-Ice Exploration System**
   - Marc Hildebrandt, Jan Albiez, Marius Wirtz, Philipp Kloss, Jens Hilljegerdes, Martin Fritsche
   - Page: 267

## AUV CONTROL AND SIMULATION 1

1. **Real-Time Dynamic Model Learning and Adaptation for Underwater Vehicles**
   - Lieutenant Joshua Weiss, Noel Du Toit
   - Page: 273

2. **Learned Anticipation Strategy for Speed Control in an AUV Fleet**
   - Juan Marulanda, Dean Edwards, Robert Heckendorn, Terence Soule
   - Page: 283

3. **A Simulator for Underwater Human-Robot Interaction Scenarios**
   - Kevin Demarco, Michael West, Ayanna Howard
   - Page: 292

4. **Multi-AUVs Formation Control with Acoustic Communication Constraints**
   - Hongli Xu, Guannan Li
   - Page: 302

## MARINE LIFE AND ECOSYSTEMS

1. **Ocean Sunfish in Canadian Pacific Waters: Summer Hotspot for a Jelly-Eating Giant?**
   - Tierney Thys, Rob Williams
   - Page: 308

2. **Development and Sea Trials of a New Camera-Based Assessment Survey System for Reef Fish Stocks**
   - Chad Lembke, Steve Murawski, Xianpeng Shi, Steve Butcher, Alex Silverman, Sarah Grasty
   - Page: 313

3. **xFOCE An Open Source Multi-Disciplinary Resource for In-Situ Ocean Acidification Research**
   - Farley Shane, Kent Headley, Peter Walz, James Scholfield, George Matsumoto, Karen Salamy, Bob Herlein, Edward Pelzer, Thom Maughan, Tom O'Reilly, Chris Lovera, William Kirkwood, James Barry, Peter Brewer
   - Page: 320

4. **Secure Seafloor Container CO2 Storage**
   - Mark Capron, Jim Stewart, Ronald Rowe
   - Page: 326

5. **Development of Air-Lifted Artificial Upwelling Powered by Wave**
   - Jiawang Chen, Ying Chen, Yang Jing, Naikuang Liang, Lin Shan, Fan Wei, Ge Han, Haocai Huang
   - Page: 334

## CURRENT MEASUREMENT TECHNOLOGY 1

1. **Adapting to Technology Advances and End of Life Announcements for Current Measurement Technologies**
   - Albert Williams, Archie Morrison
   - Page: 341

2. **A New Long Range Current Profiler**
   - Atle Lohrmann, Sven Nyland
   - Page: 347

3. **Airborne Optical Remote Sensing of Ocean Currents**
   - Steven Anderson, Seth Zuckerman, Shejun Fan, Jan Van Smirren
   - Page: 354

4. **Turbulence and Drag in a High Reynolds Number Tidal Passage Targeted for In-Stream Tidal Power Development**
   - Alex Hay, Justine McMillan, Richard Cheel, Douglas Schillinger
   - Page: 361

5. **An Investigation of the Accuracy of Current Profile Measurements from a Glider-Mounted ADCP Operating in Shallow Water**
   - Jerry Mullison, Chris Decollibus, Ben Altissup
   - Page: 371
OPTICAL SENSORS AND INSTRUMENTATION

Comparison of Measured and Theoretical Scattering and Polarization Properties of Narrow Size Range Irregular Sediment Particles .......................................................... 379
Wayne Slade, Yogesh Agrawal, Ole Mikkelsen

New Compact Wide-Area, High-Resolution, IR Sensor for UAV Platforms .................................................. 385
Clayton Chinn, Bill Morris, Thomas Reilly, Brett Hooper

The Driftcam: A Buoyancy Controlled Pelagic Camera Trap .......................................................... 391
Eric Berkenpas, Bradley Henning, Charles Shepard, Alan Turchik

Characterization of Wavefront Aberration in Laser Beam Propagating Over Saline Water and Sands ........... 397
Songsong Zhu, Hong Song, Ping Yang, Quanquan Mu, Fengzhong Qu, Haocai Huang, Han Ge, Jun Han, Jianxing Leng, Yong Cai, Ying Chen

Development of an In Situ Raman Spectrometer for Measurement of Sediment Pore Water Geochemistry in a High-Pressure Reaction Cell .................................................. 402
Xin Zhang, Zhendong Luan, Changan Chen, Jun Yan

DEEPWATER DEVELOPMENT TECHNOLOGY AND SEAFLOOR ENGINEERING

Technical Overview of a Safe, Configurable, Pressure Tolerant, Subsea LI-ION Battery System for Oil and Gas Deepwater Fields .......................................................... 407
David White, Leon Adams

Deepwater Technology for Oceanic Natural Gas Hydrate ................................................................................. 415
Arthur Johnson, Michael Max

Safety & Reliability Capabilities of Lithium-Ion Battery Systems for Subsea Applications That Use Autonomous Lithium-Ion Battery Modules .................................................. 420
Leon Adams, David White

Simulating the Environmental Impact of Tidal Turbines on the Seabed .......................................................... 429
Lada Vybulkova, Marco Vezza, Richard Brown

ARRAY SIGNAL PROCESSING AND ARRAY DESIGN 2

Robust Mode Space Supergain Beamforming for Circular Array Against Unknown Mismatch ........... 433
Yukang Liu, Yong Wang, Jiuyan Du, Yixin Yang, Zhengyao He

Experimental Study on Robust Supergain Beamforming for Conformal Vector Arrays .................................. 439
Yixin Yang, Yong Wang, Yuanliang Ma, Chao Sun

SONAR IMAGING 2

Guided Block Matching for Sonar Image Registration Using Unsupervised Kohonen Neural Networks ........ 444
Minh Tân Pham, Didier Guériot

Development of Image Sonar Simulator for Underwater Object Recognition .................................................. 449
Son-Cheol Yu, Jeong-Hwe Gu, Han-Gil Joe, Dong-Joong Kang

Real-Time Image Processing and Mapping Algorithm for Forward-Looking Obstacle Avoidance Sonar of AUV .......................................................... 455
Lei Gao, Hongli Xu

An Effective Presentation of Navigation Information for Prevention of Maritime Disaster Using AIS and 3D-GIS .................................................................................. 459
Xinjia Gao, Shigeaki Shiotani

REMOTE SENSING

Breaking Waves Effects on Scatterometer and Radiometer Signatures of the Ocean .................................... 465
William Plant, Vladimir Irisov

Enhanced Hybrid Lidar-Radar Ranging Technique .................................................................................. 469
Impacts of Rainfall on Aquarius Sea Surface Salinity Measurements
Hamideh Ebrahimi, Shadi Aslebagh, Andrea Santos-Garcia, Maria Jacob, Linwood Jones, William Asher

Monitoring Bio-Physical Coupling in the Open Gulf of Mexico Using an Integrated Satellite Sensor Approach
Katharine Woodard, Jerry Wiggert

MARINE ARCHAEOLOGY

Tools and Techniques for Underwater Archaeological Sites Documentation
David Scaradocci, Laura Sorbi, Francesco Zoppini, Pamela Gambogi

Hybrid Robot Crawler/Flyer for Use in Underwater Archaeology
Stephen Wood, Sean Vandesrirck, Brian Pugatch, William Harris, Jashelle Ojeda, John Malone, Mark Nanney, Tareq Ismail

A Convenient Testbed for Applying Marine Technology to Shipwreck Investigations and a Tool for Contagious STEM Focused Education in Marine Exploration and Research
Douglas Levin, John Seidel, Arthur Trembanis, Michael Gosman, Matthew Drutjons, Jacqueline Buskop, Jameson Culp

Investigation and Imaging of Archeological Sites by Manned Submersible
Erika Montague, Stockton Rush, Brad Wells

AUV PERFORMANCE

Maneuvering Performance of a Four-Fin Bio-Inspired UUV
Jason Geder, Ravi Ramamurti, John Palmisano, Marius Pruessner

Dives of Cruising-AUV “Jinbei” to Methane Hydrate Area in Joetsu Knoll
Takeshi Nakatani, Hiroshi Yoshida, Tadahiro Hyakudome, Shojiro Ishibashi, Makoto Sugasawa, Yutaka Ota, Hiroshi Ochi, Yoshiyuki Nakano, Hideaki Machiyama

A Tracking Control Method of ASV Following AUV
Daxiong Ji, Shenzhen Ren, Rong Zheng, Ruiwen Yi, Hongyu Zhao, Yang Lin

AUV CONTROL AND SIMULATION 2

Trajectory Planning and Following for Industrial Underwater Manipulators
Achint Aggarwal, Jan Albiez

Modeling and Simulation of an AUV-towfish System
Lea Miller, Karl Von Ellenrieder

BIOACOUSTICS

Spectral Changes in Snapping Shrimp Sounds Between Dusk and Dawn
Tyler Hee Wai, John Gebbie, Martin Siderius, John Allen

Characterization of Sperm Whale Vocalization Energy Based on Echolocation Signals
Hannan Lohrasbipeydeh, Tom Dakin, Aaron Gulliver, Adam Zielinski

Automatic Discrimination and Detection of Small Calf Ganges River Dolphin (Platanista Gangetica) from Other Age Groups Based on Bio-Sonar Inter-Click Interval Characteristics
Harumi Sugimatsu, Junichi Kojima, Tamaki Ura, Rajendra Bahl, Sandeep Behera, Vivek Sheel Sagar, Hari Singh

Signal Kurtosis As a Predictor of Biological Impacts from Noise Exposure
Michael Stocker

CURRENT MEASUREMENT TECHNOLOGY 2

Development of a Second-Generation Ice Tethered Profiler with Velocity Sensor
Fredrik Thwaites, Richard Krishfield

Influence of Turbulent Flow Field on Power Generation
Armin Humita, Amir Birjandi, Eric Bibeau
Determination of Stream Discharge, Hydrodynamics and Sediment Transport Variation at the Estuarine Section of the Hudson River and Estuary, NY

Mohammad Islam, James Bonner, Chris Fuller, William Kirkey

HOLOGRAPHY AND 3D IMAGING

Calibration of an Underwater Stereoscopic Vision System

Taufiqur Rahman

Back Projection Algorithm for Line Structured Light Extraction

Alexander Duda, Jan Albiez

Wide Area 3D Seafloor Reconstruction and its Application to Sea Fauna Density Mapping

Adrian Bodenmann, Thornton Blair, Ryota Nakajima, Hiroyuki Yamamoto, Tamaki Ura

Characteristics of 3D Structures of ADCP Echo Intensity Anomaly Observed Over Hydrothermal Vent Fields of the Snail, Archean and Pika in the South Mariana Trough

Kanae Komaki, Yasuo Furushima, Hiroyuki Yamamoto

BUOY TECHNOLOGY 1

A Study of DATA Logging System and the Southern Ocean Buoy's Motion

Junichiro Tahara, Shichiro Baba, Tatsuya Fukuda, Ota Yutaka, Yasuhiisa Ishihara

A System for Correcting ADCP Heading on Moorings at High Latitudes

Andreas Marouchos, Matthew Sherlock, Steve Rentoul, Lindsay Pender

Application of Subsea Wireless Technology to Environmental Monitoring

Amanda Collins

Hydrodynamic Response Behavior of Ribbon Fairing in Uniform Flows

John Niedzwecki, Sam Fang

SONAR SIGNAL PROCESSING 1

Homing an Unmanned Underwater Vehicle Equipped with a DUSBL to an Unmanned Surface Platform: A Feasibility Study

Mario Miranda, Pierre-Phillipe Beaujean, Edgar An, Manhar Dhanak

A Blind Denoising Process with Applications to Underwater Acoustic Signals

Philippe Courmontagne, Samir Ouelha, Ugo Moreaud, Fabien Chaillan

Improving Coherent Tonal Detection with Phase Interpolation and Compensation

Shaohua Chen

An Acoustic Simulation Approach for Testing ADCP

Ma Long, Zhang Xiangjun, Deng Kai, Wu Jianbo, Wang Changhong

ACOUSTIC IMAGING AND TARGET DETECTION

Multi-Detect Algorithm for Multibeam Sonar Data

Jesper Christoffersen

Generation of Anaglyph Using High Resolution Acoustic Images

Jin-Yeong Park, Hyuk Baek, Pan-Mook Lee, Bong-Huan Jun

OS-CFAR Detection of Targets in the Water Column and on the Seafloor with a Multibeam Echosounder

Christian De Moustier

Pipeline Detection System from Acoustic Images Utilizing CA-CFAR

Sebastian Villar, Gerardo Acosta, Andre Sena, Alejandro Rozenfeld

Object Detection with Sector Scanning Sonar

Jee Loong Chew, Mandar Chitre
SYSTEMS AND OBSERVATORIES

Tethys: A Workbench and Database for Passive Acoustic Metadata
Marie Roch, Simone Baumann-Pickering, Heidi Batchelor, Daniel Hwang, Ana Sirovi, Catherine Berchok, Danielle Cholewiak, Lisa Munger, Erin Oleson, Sofie Van Parijs, Denise Risch, Melissa Soldevilla, John Hildebrand

Measuring Underwater Noise with High Endurance Surface and Underwater Autonomous Vehicles
António Silva, Aníbal Matos, Cristiano Soares, José Alves, José Valente, Frederich Zabel, Henrique Cabral, Nuno Abreu, Nuno Cruz, Rui Almeida, Rui Ferreira, Salman Ijaz, Victor Lobo

The Pier Portal - A Web Controlled Underwater Profiling Camera
Aaron Jen, Misha Balingit, Cory Spieler, John Ridgely, Andy Lam, Brian Markwort, Bridget Benson

Deployment of an In-situ pH Calibrator on MARS Cabled Ocean Observatory
Chunyang Tan, Kang Ding, William Seyfried

A Test System for Cabled Ocean Observatories
Feng Zhang, Can-Jun Yang, Bo Jin, De-Jun Li, Yu Xie, Lu Zhang

AUTOMATIC CONTROL

Variable-Structure PID Controller with Anti-Windup for Autonomous Underwater Vehicle
Minsung Kim, Hangil Joe, Juhyun Pyo, Jongkyoo Kim, Hyosin Kim, Son-Cheol Yu

Adaptive Speed Control for Autonomous Surface Vessels
Sean Kragelund, Vladimir Dobrokhodov, Lieutenant Michael Hurban, Curtis Khol, Aurelio Monarrez

Forward Speed Control of a Pulsed-Jet Soft-Bodied Underwater Vehicle
Michele Giorelli, Francesco Giorgio-Serchi, Cecilia Laschi

Controller Design and Simulation of a Waterjet Propelled Unmanned Surface Vehicle with Uncertain Drag and Mass Properties
Wilhelm Klinger, Ivan Bertska, Jose Alvarez, Karl Von Ellenrieder

AUV AUTONOMY 1: PANDORA

Planning Inspection Tasks for AUVs
Daniele Magazzeni, Maria Fox, Derek Long, Michael Cashmore, Tom Larkworthy

Facilitating Cooperative AUV Missions: Experimental Results with an Acoustic Knowledge-Sharing Framework
Zeyn Saigol, Gordon Frost, Nikolaos Tsiogkas, Francesco Maurelli, David Lane, Alex Bourque, Bao Nguyen

Contact State Estimation Using Machine Learning
Nawid Jamali, Petar Kormushev, Darwin Caldwell

Pose-Based and Velocity-Based Approaches to Autonomous Inspection of Subsea Structures
Francesco Maurelli, Tom Larkworthy, David Lane, George Karras, Charalampos Bechioulis, Kostas Kyriakopoulos

TRIDENT: An European Project Targeted to Increase the Autonomy Levels for Underwater Intervention Missions
Pedro J Sanz, Pere Ridao, Gabriel Oliver, Giuseppe Casalino, Yvan Petillot, Carlos Silvestre, Claudio Melchiorri, Alessio Turetta

ULTRA-DEEP OCEAN SCIENCE AND ENABLING TECHNOLOGY: OVERVIEW

Underwater Simulator for Robotics Applications in High Depths
Felipe Guth, Silvia Botelho, Marcos Amaral, Felipe Moreira

Deep Water Instrument for Microbial Identification, Quantification, and Archiving
Douglas Pargett, Scott Jensen, Brent Roman, Christina Preston, William Ussler, Peter Girguis, James Birch, Christopher Scholin, Roman Marin

OCEAN ENERGY: WAVE POWER

Circular-Slide Wave Energy Converter in Random Waves
Hsiang Chen, Donald Delbalzo
Hybrid Resonant Wave Energy Harvesting Buoy for Sensor Applications.......................................................... 772
Douglas Gemme, H. Greene, Travis Tucker, Raymond Sepe, Steven Bastien

Highwave Off-Shore Energy: HOSE 2.............................................................................................................. 778
Gary Ross, Chris O'Connor, Michael Weaver

Up-Wave Surface Elevation for Smooth Hydrodynamic Control of Wave Energy Conversion in Irregular Waves........................................................................................................... 786
Umesh Korde

The Seaspoon: An Innovative Wave Energy Converter ................................................................................... 796
Lorenzo Di Fresco, Alberto Traverso

INFORMATION MANAGEMENT AND DATA ASSIMILATION

SeaScribe: An Annotation Software for ROV Dive Operations ........................................................................ 806
Reyna Jenkyns, Francoise Gervais, Benoit Pirenne

OGC Sensor Web Enablement Compliance for Ocean Networks Canada Scalar Data ....................................... 811
Benoit Pirenne, Eric Guillemot

A Metadata-Driven Management System for Numerical Modeling ................................................................. 814
Christoph Wosniok, Rainer Lehfeldt

SPLASHH (Student Programs Like Aquatic Science Sampling Headquarters) http://splashh.meteor.com) A Socially Driven Platform About Water ......................................................................................... 821
Lisa Adams, Robert Persaud, Danielle Adams, Saleh Hamadeh

Turbulence Modelling Using 3DVAR Data Assimilation in Laboratory Conditions .......................................... 830
Agnieszka Olbert, Stephen Nash, Emanuele Ragnoli, Michael Hartnett

OCEANOGRAPHIC INSTRUMENTATION AND SENSORS 1

Separating and Reattaching Microbial Fuel Cell on Sediment Bottom ............................................................ 839
Wayne Liu, Gerald Hong, Jeff Kagan, Lewis Hsu, Mignon Huang, Beatrice Dea

Undersea Electronics Powered by Large Surface Area Benthic Microbial Fuel Cells .................................... 843
Jeffrey Kagan, Andrew Higier, Lewis Hsu, Bart Chadwick

Sensors and Acoustic Modems Powered by Benthic Microbial Fuel Cells at the MARS Observatory ............... 850
Paul Schrader, Clare Reimers, Cody Doolan, Peter Gerguis, Michael Wolf, Dale Green

NOAA's Recent Field Testing of Coastal Water Quality Monitoring Systems--Quantifying Impacts of Biofouling and Investigating Chloride Measurement Techniques ...................................... 856
Grace Gray, Robert Heitsenrether

Design of Data Fusion Algorithm of 10-DOF MEMS-IMU for Underwater Sensors ........................................ 865
Yixuan Gao, Xueting Zhang, Qingpeng Kong, Yucheng Xu

IMAGING AND VISION 1

Groundtruth System for Underwater Benchmarking ......................................................................................... 870
Alfredo Martins, André Dias, Hugo Silva, José Almeida, Pedro Gonçalves, Flávio Lopes, André Faria, João Ribeiro, Eduardo Silva

Wide Field-of-View Daytime Fluorescence Imaging of Coral Reefs ................................................................. 875
Tali Treibitz, Ben Neal, David Kline, Oscar Beijbom, Paul Roberts, B. Greg Mitchell, David Kriegman

Underwater Augmented Reality: Navigation and Identification ....................................................................... 880
Hunter Brown, Haozhu Wang

Design of Stingray Video Monitoring System on Deepwater Pipe-Laying Ship .............................................. 885
Jie Zheng, Jing Liu, Qing Sheng

3D Reconstruction Model of Underwater Environment in Stereo Vision System ............................................. 891
Rui Nian, Yanli Wu, Bo He

POSTERS 1

Evaluating the Performance of MODIS FLH Ocean Color Algorithm in Detecting the Harmful Algae Blooms in the Arabian Gulf and the Gulf of Oman ......................................................................... 895
Maryam Al Shelhi, Imen Gherboudj, Jun Zhao, Nahla Mezhoud, Hossni Ghedira
Use of Reference Materials for Nutrients in Seawater and Comparability of Nutrients in the World's Oceans
Susan Becker, Dan Schuller, Melissa Miller, Michio Aoyama, Kenichiro Sato, James Swift
902

Structural Safety and Design Requirement of CFMP Based Offshore Wind Substructure System
Yoon-Ju Jeong, Young-Jun You, Min-Su Park, De-Ho Lee, Byeong-Cheol Kim
911

Simulation and Stability Analysis of the 200-ROV in the Absence of One Thruster
Junliang Cao, Chunhu Liu, Baosheng Yao, Lian Lian
916

Time Frequency Analysis of Underwater Ambient Noise in Tropical Littoral Waters
Rajveer Shastri, Yashwant Joshi, Arnab Das
922

Experimental Results of a Low Cost Weather Buoy
Marco Trapanese, Vincenzo Di Dio, Alessia Viola, Vincenzo Franzitta, Carlo Giacontia, Paolo Ferrara
926

Burst Mode Hybrid Spread Spectrum Technology for Covert Acoustic Communication
Feng Zhou, Yaoling Yin, Gang Qiao, Songzuo Liu, Yang Yu
931

Recovery of an Ice Buoy at 60°S in the Southern Ocean
Shoichiro Baba, Junichiro Tahara, Tatsuya Fukuda, Yasuhiro Ishihara
939

Development and Mooring of the Brazilian ATLAS-B Buoy Project
Edmo Campos, Carlos Franca, Leonardo Barreira, Luis Nonnato, Franciscos Neto, Rick Cole
946

Wave Buoy Data Analysis in the Delaware Bay
Hunter Brown, Robert Scarborough
950

Multi-Sonar Adaptive Target Detection Using the Sphericity Test
Nicholas Klausner, Mahmood Azimi-Sadjadi
955

Spectral Estimation of Cavitation Related Narrow-Band Ship Radiated Noise Based on Fractional Lower Order Statistics and Multiple Signal Classification
Umut Firat, Tayfun Akgul
960

Robust Source Localization Using Predictable Mode Subspace in Uncertain Shallow Ocean Environment
Zongwei Liu, Chao Sun, Jinyu Du, Yixin Yang
966

Adaptive Filter Design for Suppressing the Moving Surface Interferences in Optic-acoustic Remote Sensing
Xiaodong Peng, Wen Xu, Xiaofeng Jin, Jianhua Shang
971

Multi-Octave High-Frequency Hydro-Acoustic Communication
Craig Benson, James Hislop, Michael Ryan, Michael Frater
977

Coherent Reception of M-ary Orthogonal Spread Spectrum Acoustic Communications at Very Low SNR in Shallow Water Environments
Paul Gendron
982

TOPICS: A Modular Software Architecture for High-Latency Communication Channels
Chris Murphy
990

Dynamic Joint Network-Channel Coded Cooperation for Underwater Data Collection
Yongan Chen, Xiaomei Xu, Haixin Sun, Lan Zhang, Zhaotong Zhu
996

Instrument Task-Driven Workflow Software for Cruise and Maintenance Operations
Reyna Jenkyns, Meghan Tomlin, Benoit Pirene
1000

Hovering Type AUV "Tuna-Sand" and Its Surveys on Smith Caldera in Izu-Ogasawara Ocean Area
Yuya Nishida, Ura Tamaki, Takashi Sakamaki, Junichi Kojima, Yuzuru Ino, Kangsoo Kim
1004

Commissioning of a System that Terminates on the Seafloor
Peter Yinger, Philip Tennant, John Reardon, Gary Harkins, Charles McGuire, Michael Harrington, Michael Mulvihill
1009
The Design Prototype of Shore-Side Data Management and Service System of Ocean Observing System in South China Sea ................................................................. 1015
Xiu Li, Xiaogang Ouyang, Rongsheng Huang, Ming Jin

GLIDER TECHNOLOGIES

Long-Range Glider Localization Using Broadband Acoustic Signals and a Linearized Model of Glider Motion .................................................................................................................. 1021
Lora Van Uffelen, Bruce Howe, Eva-Marie Nosal, Glenn Carter, Peter Worcester, Matthew Dzieciuch

Multi-Channel Acoustic Data Acquisition and Telemetry on an Autonomous Vehicle for Marine Mammal Monitoring ............................................................................................ 1025
Harold Cheyne, Charles Key, Michael Satter, Michael Ornee, Christopher Clark

Ocean Gliders Payloads for Persistent Maritime Surveillance and Monitoring ................................................................. 1030
Alain Maguer, Rodney Dymond, Alberto Grati, Richard Stoner, Piero Guerrini, Alberto Alvarez

AUV AUTONOMY 2

GRASPER: HIL Simulation Towards Autonomous Manipulation of an Underwater Panel in a Permanent Observatory ................................................................. 1038
Pedro J Sanz, Javier Pérez, Antonio Peñalver, J. Javier Fernández, David Fornas, Jorge Sales, Raul Marin

On-Line Learning for Coping with Thruster Failures on Autonomous Underwater Vehicles ................................................. 1044
Matteo Leonetti, Seyed Ahmadzadeh, Petar Kormushev

Probabilistic Approaches in Ontologies: Joining Semantics and Uncertainty for AUV Persistent Autonomy ............................................................................................................................ 1050
Francesco Maurelli, Zeyn Saigol, Georgios Papadimitriou, Tom Larkworthy, Valerio De Carolis, David Lane

Towards Improved AUV Control Through Learning of Periodic Signals ................................................................................................................................. 1056
Petar Kormushev, Darwin Caldwell

ULTRA-DEEP OCEAN SCIENCE AND ENABLING TECHNOLOGY: SCIENCE OPPORTUNITIES

Hadal Landers: The DEEPSEA CHALLENGE Ocean Trench Free Vehicles ................................................................. 1060
Kevin Hardy, James Cameron, Larry Herbst, Tim Bulman, Steffen Pausch

Ocean Energy: Power Conversion

Design and Optimization of a 8kW Linear Generator for a Direct-Drive Point Absorber ................................................................. 1070
Jaeseung Kim, Jin Bae Park, Jung Yoon Kim

Electromechanical Emulation of Hydrokinetic Generators for Renewable Energy Research ................................................................. 1076
Jason Neely, Kelley Ruchel, Jesse Roberts, Steven Glover, Forest White, Michael Horry

NUMERICAL MODELING AND SIMULATION 1

Principal Component Analysis on Horizontal Acoustic Doppler Current Profilers Measurement ................................................................. 1084
Tuy Phan, John Wells, Yusuke Uchiyama, James Bonner, Shahidul Islam, William Kirkey

Spatial Evaluation of High-Resolution Modeled Offshore Winds Using Estimated Winds Derived from a Network of HF Radars ................................................................................................................................. 1089
Greg Seroka, Josh Kohut, Laura Palamara, Scott Glenn, Hugh Roarty, Lou Bowers, Rich Dunk

High Performance Regional Ocean Modeling with GPU Acceleration ................................................................................................................................. 1094
Ian Panzer, Spencer Lines, Paul Choboter, Jason Mak, Jason Mak

Numerical Simulations of Island Wakes Downstream Green Island, Taiwan Due to Passing of Kuroshio ................................................................. 1098
Shin-Jye Liang, Sheng-Lin Lin, Li-Te Chang
OCEANOGRAPHIC INSTRUMENTATION AND SENSORS 2

Design and Applications of a Vertical Beam in Acoustic Doppler Current Profilers ........................................... 1105
Paul Wanis

Profiling from 6000 Meter with the Deep Apex Float ................................................................................ 1110
Ernest Petzrick, James Truman, Hugh Fargher

A Multi-Channel Data Logger of In-situ Chemical Sensors for Cabled Seafloor Observatories ...................... 1113
Letian Xu, Xiaoping Hu, You Wang, Jiawang Chen, Ying Chen

IMAGING AND VISION 2

Field Experiments for Marine Casualty Detection with Autonomous Surface Vehicles ...................................... 1117
Alfredo Martins, André Dias, José Almeida, Hugo Ferreira, Carlos Almeida, Guilherme Amaral, Diogo Machado,
João Soasa, Pedro Pereira, Anibal Matos, Victor Lobo, Eduardo Silva

Geographical Mosaicking of Seafloor Images Acquired by an AUV ........................................................... 1122
Max Woolsey, Allison Woolsey

Detection of Objects and Their Shadows from Acoustic Images of the Sea Floor ........................................... 1127
Trevor Beugeling, Alexandra Branzan Albu

Underwater Image Color Correct in Extremely Poor Visibility ...................................................................... 1132
Beilei Hu, Bing Zheng, Yanan Wen, Yu Yang

POSTERS 2

Rheological Behavior of Flocculated Suspensions of Artificial Marine Cohesive Sediment ............................. 1136
Priyanthi Amarasinghe, Andrei Abelev

Robust Control of Oscillating Water Column (OWC) Devices: Power Generation Improvement ....................... 1142
Aitor Garrido, Izaskun Garrido, Mikel Arberdi, Modesto Amandarain, Oscar Barambones, Jesús Romero

Development a System for Counting Marine Species in Ballast Water ....................................................... 1146
Jung-Yeul Jung, Yong Seok Park, Dong Shon, Eun Chan Kim, Jeong-Hwan Oh

SCKF-MEFPDAF for Underwater Single Observer Bearings-Only Target Tracking in Clutter ....................... 1149
Dengfeng Mei, Kaizhou Liu, Yanyan Wang

Temporal Variations of Acoustic Propagation in the Strong Tidal Zone, Yellow Sea in the Northwest Pacific .................................................................................................................. 1155
Suntaek Oh, Seok Lee, Sangho Cho, Domyung Kang, Yongsoo Lee

Methods of Associating CODAR SeaSonde Vessel Detection Data into Unique Tracks .............................. 1159
Michael Smith, Hugh Rosary, Scott Glenn, Chad Whelan, Donald Barrick, James Isaacson

Geological Characterization of Co-Rich Ferromanganese Crusts over the Northwestern Pacific Seamounts ........................................................................................................ 1164
Akira Usui, Keisuke Nishi, Hisaaki Sato, Ian Graham, Tetsuro Urahe, Blair Thornton, Nobuyuki Okamoto

An Investigation Into ROV Based Tracking of a Shallow Water Nocturnal Squid ............................................ 1167
Samuel Yin, Christopher Clark, Timothy Peters, Vladimir Prodanov, Pat Fidopiastis

The Union of Time Reverse and Turbo Equalization On underwater Acoustic Communication ...................... 1175
Hao Xu, Min Zhu, Yanbo Wu

CABLES AND CONNECTORS

Essential Design and Risk Management for a Next Generation Ocean Dry Mate Connector .......................... 1180
David Jenkins, Matt Christiansen, Steve Thumbbeck

Non-Contact Wet Mateable Connectors for Power and Data Transmission ................................................... 1184
Rich Granger, Christopher Baer, Nathan Gabriel, John Labosky, Tom Galford

Cathodic Debonding of Undersea Electronic Cable Connectors: Delamination Kinetics When Primers and Encapsulants are Bonded Directly to Bare Metal Connector Backshells ................................. 1188
Thomas Ramotowski, Wayne Tucker, Matthew Rice

Extending Ethernet Reach for Instruments Used in Subsea Observatories .................................................... 1194
Richard Jones
SONAR SIGNAL PROCESSING

Sand Ripple Characterization Using an Extended Synthetic Aperture Sonar Model and MCMC Sampling Methods .......................................................... 1199
Alina Zare, J. Cobb

Velocity Measurement by Symbiotic Combination of Conventional and Coherent Doppler Sonars ................. 1206
Nobuyoshi Kouguchi, Peng Liu

Research of Interacting Multiple Model Particle Filter Based on Passive Multi-Sonar ......................................... 1212
Xueli Sheng, Chunyan Sun, Qing Ling, Jia Lu, Jingwei Yin, Longxiang Guo

Track Analysis and Design for Ultra Short Baseline Installation Error Calibration ........................................ 1218
Zhao Li, Cuic Zheng, Dajun Sun

ACOUSTIC TELEMETRY AND COMMUNICATION 2

A Study on Remote Data Retrieval Strategies in Underwater Acoustic Networks ........................................ 1223
Federico Favaro, Loris Brolo, Giovanni Tosso, Paolo Casari, Michele Zorzi

Modeling the Effect of Bubble Plumes on High Frequency Acoustic Propagation in Shallow Water ........... 1231
Allan Boyles, Allan Rosenberg, Qingqing Zhang

Application of Turbo Equalization in PPC Underwater Acoustic Communication ........................................ 1239
Bo Peng, Hefeng Dong

Synchronization and Doppler Scale Estimation with Dual PN Padding TDS-OFDM for Underwater Acoustic Communication .................................................. 1243
Zhenrui Chen, Yahong Zheng, Jintao Wang, Jian Song

SYSTEMS AND OBSERVATORIES 3

Assessing the Design of the NSW-IMOS Moored Observation Array from 2008-2013:
Recommendations for the Future ................................................................. 1247
Moninya Roughan, Amandine Schaeffer, Sotiris Kioroglou

Deep Profiler for the Ocean Observatories Initiative Regional Scale Nodes: Rechargeable, Adaptive, ROV Serviceable .......................................................... 1254
Tim McGinnis, Nick Michel-Hart, Michael Mathewson, Tim Shanahan

Long Island Sound Testbed and Experiments ............................................ 1258
Li Wei, Zheng Peng, Hao Zhou, Jun-Hong Cui, Shengli Zhou, Zhijie Shi, James O'Donnell

Design of an Undersea Power System for the East China Sea Experimental Cabled Seafloor Observatory ............................................................ 1264
Feng Lu, Huaiyang Zhou, Jiguang Yue, Xiaotong Peng, Bin He, Zhengwei Wu

GLIDER MISSIONS

Glider Operations in the Northwestern Gulf of Mexico: The Design and Implementation of a Glider Network at Texas A&M University ........................................ 1270
Ruth Mullins-Perry, Steven Dimarco, John Walpert, Norman Guinasso, Anthony Knap

Initial Investigation of the North East Pacific Salmon Feeding Waters with Slocum Gliders ....................... 1273
John Bird, Peter Gross, William McNea, Heather Judd

The Challenger Glider Mission: A Global Ocean Predictive Skill Assessment ............................................ 1283
Collin Dobson, Jeffrey Mart, Nilsen Strandskov, Josh Kohut, Oscar Schofield, Scott Glenn, Clayton Jones, Doug Webb, Carlos Herrera, Antonio Ramos

Observations of Hurricane Sandy from a Glider Mounted Aquadopp Current Profiler ........................................ 1291
Travis Miles, Scott Glenn, Josh Kohut, Oscar Schofield, Greg Seroka, Yi Xu

Giders in the Gulf of Mexico: Building Towards An Operational and Integrated Observing System in the Gulf of Mexico ........................................ 1299
Ruth Mullins-Perry, Ann Jochens, Matthew Howard
AUV AUTONOMY 3

Task Consensus Among a Team of Heterogeneous AUVs Under Intermittent Communication .......................................................... 1310
Ramprasad Balasubramanian, James Delande, Christiane Duarte
Intelligent Autonomy for Collaborative Intervention Missions of Unmanned Maritime Vehicles ......................................................... 1314
Carlos Insaurralde, Yvan Petillot
Simultaneous Operation of Heterogeneous AUVs .............................................. 1320
Max Woolsey, Arne Diercks, Roy Jarnagin, Vernon Asper
Online Path Planning of Unmanned Surface Vehicles Based on MILP .......................................................... 1325
Jing Leng, Jian Liu, Hongli Xu

ULTRA-DEEP OCEAN SCIENCE AND ENABLING TECHNOLOGY: VEHICLES AND PAYLOADS

Deep Water MiniROVs and Delivery Systems ................................................ 1332
Cyril Poissonnet
Operations to 11,000m: Nereus Ceramic Housings Design and Analysis .......................................................... 1339
Glenn McDonald

OCEAN ENERGY: TIDAL POWER

"Backflow Preventer;" Exploiting Patterns of Separated Flow to Increase Power in an Enclosed Hydopower Turbine .......................................................... 1344
George McBride
Life-Oriented Control of Tidal Power Generation ................................................ 1354
Zhiling Zhao, Peng Zhang, Jun-Hong Cui, Shengli Zhou
Motion of Twin Type Ocean Current Turbine at the Time of Startup and Accident .......................................................... 1359
Takaaki Gonoji, Katsutoshi Takeda, Ken Takagi
Near Wake Measurements of a Model Horizontal Axis Marine Current Turbine Under Steady and Unsteady Inflow Conditions .......................................................... 1365
Max Benthem, Max Benthem, Karen Flack, Ethan Lust
Performance Gain of a Horizontal Axis Hydrokinetic Turbine Using Shroud .......................................................... 1372
Mohammad Shahravarfard, Eric Bibeau, Amir Hossein Birjandi

NUMERICAL MODELING AND SIMULATION 2

ROPAX: Exploring the Use of Simulation as Decision Support System .......................................................... 1377
Mariusz Balaban, Thomas Mastaglio
Options for Real-Time Storm Tide Forecasting for Emergency Management in Queensland, Australia .......................................................... 1387
Joanna Burston, Takehiko Nose, Rodger Tomlinson
Application of Numerical Ship Navigation in Coastal Area .......................................................... 1395
Chen Chen, Shigeaki Shiotani, Kenji Sasa
An Advanced Channel Framework for Improved Underwater Acoustic Network Simulations .......................................................... 1404
Michael Zuba, Zaihan Jiang, T. C. Yang, Yishan Su, Jun-Hong Cui

OCEANOGRAPHIC INSTRUMENTATION AND SENSORS 3

Open Source Instrumentation Nodes for the Greater Oceanographic Community .......................................................... 1412
Chad Kecy, Ed Peltzer, Peter Walz, Kent Headley, Bob Hertien, Thom Maughan, George Matsumoto, Tom O'Reilly, Karen Salamy, Farley Shane, Chris Lovera, Jim Schofield, Bill Kirkwood, James Barry, Peter Brewer
Alessandra Tesi, Alberto Figoli, Piero Guerrini, Alain Maguer
CDIP, Quality Control Challenges ................................................................. 1424
Julianna Thomas, Corey Olfe
A System for Remote Access to Deployed Source and Receive Acoustic Arrays ................................................. 1430
Jeff Skinner, William Hodgkiss
An Aperture Online Measuring System of Ice Shelf Hot-Drilling Based on Magnetic Induction ......................... 1435
Liang Ma, Hai Yu, Jing Liu, Jie Zheng

IMAGING AND VISION 3

Thermographic and Visible Spectrum Camera Calibration for Marine Robotic Target Detection ......................... 1439
André Dias, Carlos Brás, Alfredo Martins, José Almeida, Eduardo Silva
Detection of Stationary Animals in Deep-Sea Video ................................................................. 1444
Marzieh Mehrnejad, Alexandra Branzan Albu, Maia Hoeberechts, David Capson
3-D Object Modeling from Occluding Contours in Opti-Acoustic Stereo Images ........................................... 1449
Shahriar Negahdaripour, Reza Babaei
A Link Budget Approach to Specifying Lights and Cameras for Underwater Applications ............................... 1457
James Broesch, Brad Lafferty
New Approach for Underwater Image Denoising Combining Inhomogeneous Illumination and Dark Channel Prior ......................................................................................................................... 1461
Zitao Wang, Bing Zheng, Weijian Tian, Beilei Hu, Yu Yang

POSTERS 3

Experimental Assessment of a Multiple Sequence Direct Sequence Spread Spectrum (MS-DSSS) Underwater Acoustic Communication Scheme ................................................................. 1465
Muhammad Asim, Qiao Gang, Feng Zhou, Liu Songzuo
Microradiometers: Hybrid Instrument Building Blocks for Next-Generation Ocean Color Instruments ................................................................. 1471
Stanford Hooker, John Morrow
A Numerical Study on the Wind Effect on the Oil Containment by Boom ................................................................. 1478
Kwangu Kang, Moonjin Lee, Jung-Yeul Jung
Obtaining Shape Information of Marine Microorganisms Using Polarized-Light Scattering ................................. 1482
Xiaorui Tian, Ran Liao, Yi Tao, Jianghu Wu, Jinlei Wang, Hui Ma
An Underwater Acoustic Communication Scheme with Inherent Scale Diversity for Multiple Users ............... 1487
Antonia Papandreou-Suppappola, Meng Zhou, Jason Zhang, Tolga Duman
Using a Transverse Marine Gradiometer (TVG) as Submarine Pipeline Location Tool ......................................... 1491
Mikhail Tchernychev, Ross Johnson, James Kulpa
Improved Performance of an Underwater Glider with Passively Rotatable Wings .............................................. 1497
Yu Xie, Canjun Yang, Pinfa Wang, Shilin Peng, Shuangshuang Fan, Shaoyong Zhang
Research on Sand Dumping Detection Based on Sound Absorption in Seawater ............................................... 1502
Zhe Cen, En Cheng, Hua-Bin Chen, Fei Yuan

ROPES AND TENSION MEMBERS

Evaluation of Wire-Lay Nylon Mooring Lines in a Wave Energy Device Field Trial ............................................... 1507
Andrew Varney, Robert Taylor, William Seelig
Mooring and Power Cable System for Current-Turbine ......................................................................................... 1512
Masao Shibata, Katsutoshi Takeda, Ken Takagi
On the Origin of Lifetime Extension for HMPE Ropes in Bending Operations ................................................. 1516
Marcel Meuwissen
Cordage Institute Guidelines for Marine Grade Nylon and Polyester Rope-Making Yarns ................................. 1526
John Flory

BIOLOGICALLY INSPIRED PROCESSING

Calibration Schema for a Long-Range, Fishery-Research Side Scan Sonar ................................................................. 1532
Lloyd Huff, Robert McConnaughney
A New Signaling Scheme for Underwater Acoustic Communications ................................................................. 1537
Ahmad El Moslimany, Meng Zhou, Tolga M. Duman, Antonia Papandreou-Suppappola

Biologically Inspired Covert Underwater Acoustic Communication Using High Frequency Dolphin Clicks ............................................................... 1542
Songzuo Liu, Gang Qiao, Yang Yu, Laiwei Zhang, Tingting Chen

A NEW SIGNALING SCHEME FOR UNDERWATER ACOUSTIC COMMUNICATIONS

ACOUSTIC TELEMETRY AND COMMUNICATION

Maritime Channel Modeling and Simulation for Efficient Wideband Communications Between Autonomous Unmanned Vehicles .................................................................................................................. 1547
Ayodeji Coker, Ted Rogers, Logan Straatemeier, Pierre Valder, Daniel Cooksey, Kelly Griendling

Study of Single-Carrier Coherent High-Speed Underwater Acoustic Communication ........................................ 1556
Xiaoyi Hu, Wei Su, Yurong Lin, Wenhui Liu, Xiaolin Jiang

Study of Class-D Power Amplifiers for Underwater Acoustic OFDM Transmissions ............................................. 1560
Xiaoaka Xu, Shengli Zhou, Kaleel Mahmood, Li Wei, Jun-Hong Cui

SYSTEMS AND OBSERVATORIES

Data Driven Modelling for Acoustic Undersea Collaborative Navigation ......................................................................... 1563
Douglas Horner, Geoffrey Xie

Data Transmission & Electrical Powering Flexibility for Cabled Ocean Observatories .................................................. 1573
Robert Thomas, Adnan Akhtar, Bandad Bakshi, George Harvey, Maurice Kordahl, Lee Richardson, Michael Sanders, Marshar Spalding

Development of an Adaptable Monitoring Package for Marine Renewable Energy ................................................... 1580
James Joslin, Ed Celkis, Chris Roper, Andrew Stewart, Brian Papage

Efforts on Developing the Technologies of Abyssal Cabled Observatory in China ..................................................... 1590
Yanhu Chen, Caijun Yang, Bo Jin, Dejun Li

GLIDER DATA

Sparse Glider Datasets: A Case Study for NoSQL Databases .................................................................................. 1595
Michael Lindemuth, Chad Lembke

Persistent Robot Tasking for Environmental Monitoring Through Crowd-Sourcing .................................................. 1601
Wesam Al-Sabban, Srinavran Das, Ryan Smith

Performance of Pumped and Un-Pumped CTDs in an Underwater Glider .......................................................... 1607
Alberto Alvarez, Richard Stoner, Alain Maugier

Motion Simulator for an Underwater Glider for Long-Term Virtual Mooring ......................................................... 1612
Kenichi Asakawa, Masahiko Nakamura, Junichi Kojima, Keisuke Watari, Tadahiro Hyakudome

AUV AUTONOMY

A Path Planning System for Autonomous Launch and Recovery System of Autonomous Underwater Vehicles .......................................................... 1616
Shailabh Suman, Sagar Pai, Yusong Wu, Bharath Kalyan, Mandar Chitre

A High-Precision Position and Attitude Measurement Sonar for Submarine Docking ............................................. 1623
Dajun Sun, Cuie Zheng, Dianlun Zhang, Juncheng Zhang

COASTAL ZONE MANAGEMENT AND POLICY

Evaluation of Coastal Vulnerability with Mobile Laser Scanning from a Vessel ......................................................... 1629
Todd Mitchell, Bertrand Chazaly, Gilbert Suarez

The Use of Geographic Information Systems to Assess the Compliance of Ballast Water Management for Commercial Ships Operating in California ......................................................... 1634
Christopher Brown, Chris Scianini, Raya Nedelcheva, Nicole Dobroski

Hull Husbandry Practices and Biofouling Management of Vessels Operating in California ..................................... 1639
Chris Scianini, Christopher Brown, Raya Nedelcheva, Nicole Dobroski
A Study on the Environmental Impact Assessment of the Garolim Tidal Power Project .................................................. 1643
Taeyun Kim, Kwangwoo Cho, Junho Maeng

OCEAN ENERGY: FUEL CELLS AND MORE
Chitin Enhances Power Production in Sediment Microbial Fuel Cells ................................................................. 1651
Meriah Arias-Thode, Lewis Hsu, Adrianne Wotawa-Bergen, Bart Chadwick
Apparatus and Theory of a Submerged Point Absorber Using Oscillating Water Column ........................................... 1655
Seung Kwan Song, Jin Bae Park
Marine Micropile Anchor Systems for Marine Renewable Energy Applications ......................................................... 1660
Dallas Meggitt, Robert Taylor, Jon Machin, Eric Jackson

NUMERICAL MODELING AND SIMULATION 3
Direct Simulations of Breaking Ocean Waves with Data Assimilation ..................................................................... 1667
Douglas Dommermuth, Lucas Rhymes, James Rottman
Application of the Method of Moment and Monte-Carlo Simulation to Extract Oil Spill Areas from Synthetic Aperture Radar Images ................................................................. 1677
Tae Ho Kim, Chan Su Yang, Kazuo Ouchi, Yisok Oh

OCEANOGRAPHIC INSTRUMENTATION AND SENSORS 4
Inexpensive Expendable Conductivity Temperature and Depth (CTD) Sensor ............................................................. 1681
Stephen Wood, Richard Paradis
Advances in Moored Upward Looking Sonar Systems for Long Term Measurement of Arctic Ice and Oceanography ..................................................................................................................... 1693
David Fissel, Rene Chave, Murray Clarke, Paul Johnston, Keith Borg, John Marko, Ed Ross, Jan Buermans, Matthew Stone
Magnetic Field Surveys of Coastal Waters Using an AUV-Towed Magnetometer ........................................................ 1700
Manhar Dhanak, Edgar An, Robert Coulson, John Frankenfield, William Venezia, Karl Von Ellenrieder
A Deep-Sea Drilling Rig MEMS Gyroscope Random Drift Error Correction Method ................................................... 1704
Hong Huo, Jing Liu, Wen Cai, Yi Guo

SOUND PROPAGATION AND SCATTERING
Bubble Number Densities in the Wake of a Propeller and a Pump Jet Ship ............................................................... 1709
Steve Stanic, Russell Dahlburg, Jerald Caruthers
Accurate FDTD Analysis of Underwater Acoustic Modal Equation Using Transparent Source ................................. 1721
Yongjune Kim, Il-Suek Koh, Yongshik Lee
Computationally Efficient Simulation of Underwater Acoustic Communication Systems ........................................... 1726
Parastoo Qarabaqi, Yashar Aval, Milica Stojanovic
Localization of Underwater Tone Noise Sources Using Instantaneous Frequency Rate Estimate ............................. 1732
Lingji Xu, Yixin Yang, Long Yang

POSTERS 4
Channel As Seen by an Argo Float: Study from Arabian Sea ......................................................................................... 1739
Muhammad Asim, Qiao Gang, Feng Zhou, Liu Songzuo
An Agile Single Board Quadrotor Providing "Eye in the Sky" Capabilities for Marine Environments ....................... 1746
Mohammed Raju Hossain, Taufiqur Rahman, Nicholas Krouglicof
Monitoring Dissolved Oxygen in New Jersey Coastal Waters Using Autonomous Gliders: Multi-year Trends and Event Response ............................................................................................................ 1751
Josh Kohut, Clinton Haldeman, John Kerfoot, Darvene Adams, Bruce Friedman, Robert Schuster, Michael Borst
GPU Accelerated Post-Processing for Multifrequency Biplanar Interferometric Imaging ............................................. 1760
Pingfan Meng, George Cutter, David Demer, Ryan Kastner
Unmanned Recovery of an AUV from a Surface Platform .......................................................................................... 1764
Edoardo Sarda, Manhar Dhanak
Design and Implementation of a New Low-Cost Subsurface Mooring System for Efficient Data Recovery
Chuan Tian, Daniel Deng, Jiwei Tian, Wei Zhao, Ming Xu, Xiaoyang Xu, Jun Lu

A Fast SAS Image Simulator Based on HPR Algorithm
Zhaozhong Zhu, Shibao Peng, Jia Xu, Xiaomei Xu

Feature Extraction Based on Vector Hydrophone in the Waveguide Environment
Lanyue Zhang, Xiaoying Yao

REMOTELY OPERATED VEHICLE DESIGN

A Soft Unmanned Underwater Vehicle with Augmented Thrust Capability
Francesco Giorgio Serchi, Andrea Arienti, Cecilia Laschi

Mini-ROVs, Going Where No ROV Has Gone Before
Sheldon Rubin

PoseiDRONE: Design of a Soft-Bodied ROV with Crawling, Swimming and Manipulation Ability
Andrea Arienti, Marcello Calisti, Francesco Giorgio Serchi, Cecilia Laschi

Design of Modular Camera Tool for Mini Underwater ROVs
Michael Poretti, Bridget Benson, Chris Ranch

Development of a Large Flow-Rate High Speed On/Off Valve for Underwater Hydraulic Ejection System
Linyi Gu, Xinran Wu, Lin Li, Jiawang Chen, Qingmiao Zhang, Junyi Yang, Minhui Zheng

CLASSIFICATION AND PATTERN RECOGNITION 1

Experimental Results on Target Characters of Divers
Zongxin Sun, Jiarong Zhang, Gang Qiao, Donghu Nie, Jialing Liao, Songzuo Liu

ACOUSTIC TELEMETRY AND COMMUNICATION 4

Non-Linear Doppler Scaling Correction in Underwater Acoustic Channels: Analysis and Simulation
Chung Him (George) Yuen, Behrouz Farhang-Boroujeny

Natural Language-Based Correction Method for Autonomous Underwater Vehicle Communications
Dean Edwards, Bryce Gill, Terry Soule, Juan Arais

A Mobile Communications Gateway for AUV Telemetry
Matthew Grund, Keenan Ball

Low-Frequency Source for Very Long-Range Underwater Communication
Frédéric Mosca, Guillaume Matte, Vincent Mignon, Vincent Mignon

Full-Duplex, Multi-User and Parameter Reconfigurable Underwater Acoustic Communication Modem
Gang Qiao, Songzuo Liu, Zongxin Sun, Feng Zhou

SYSTEMS AND OBSERVATORIES 5

Development of Specialized Tools for Biological Assessment Using Split Beam Hydroacoustics
Eric Munday

Cabled Observing Stations for Remote Locations
Martin Hofmann, Ryan Flagg, Ryan Key, Kate Moran, Scott McLean, Kim Juniper, Benoit Pirenne

Development of a Scientific Instrument Interface Module for Cabled Seafloor Observatories Based on Industrial Control Technology
Hong Song, Rui Lan, Qing Yue, Fengzhong Qu, Dan Song, Jun Xie, Ying Chen

Hardware-in-the-Loop Simulation with Acoustic Coupling for Underwater Acoustic Detection System
Zhanlong Yang, Hang Chen, Hu Yang, Lingji Xu

VEHICLE PERFORMANCE

Kinematic Walking and Posture Control of CR200 for Subsea Exploration in Tidal Current
Gyeong-Mok Lee, Seongyeol Yoo, Hyungwon Shim, Bong-Huan Jun, Hangoo Kang, Pan-Mook Lee

Jiarong Zhang, Xuefei Ma, Gang Qiao, Can Wang

MARINE EDUCATION AND OUTREACH 1

Robotic Competitions and Professional Societies: How Do We Improve the Workforce Readiness of Our Students? ............................................................................................................................... 2104
Deidre Sullivan, Jill Zande

D.E.E.P. Learning: Promoting Informal STEM Learning through Ocean Research Video Games .............................................................. 2106
Cheryl Peach, Daniel Rorhlick, Debi Kibb, John Orcutt, John Driscoll

SENSE IT - Student Created Water Quality Sensors ............................................................................................................................... ..................................... 2110
Liesl Hotaling, Rustam Stolkin, Sasen Lowes, Peiyi Lin, James Bonner, William Kirkey, Temitope Ojo

Using Real-World Data to Increase Students’ Scientific Literacy ............................................................................................................................... ........... 2114
James Brey, Ira Geer, Elizabeth Mills, Kira Nugnes

VEHICLE DESIGN 1

Design Challenges of a Next Generation Lightweight AUV ............................................................................................................................... 2120
Jon Crowell

The Development of a Robust Autonomous Surface Craft for Deployment in Harsh Ocean Environment ............................................................................................................................... 2125
Zhi Li, Ralf Bachmayer

Design and Fabrication of a 1m Titanium Sphere for 4000m Ocean Depth ............................................................................................................................... 2132
Douglas Pargett

Maneuverability Design and Analysis of an Autonomous Underwater Vehicle for Deep-Sea Hydrothermal Plume Survey ............................................................................................................................... 2139
Ruiwen Yi, Zhiquiang Hu, Yang Lin, Haitao Gu, Chao Wang, Daxiong Ji, Jian Liu

AUV OPERATIONS 2

MBARI Dorado AUV’s Scientific Results ................................................................................................................................................................. 2144
Duane Thompson, Hans Thomas, Yanwu Zhang, Julio Harvey, John Ryan, David Clague, David Caress, Charlie Paull, Jenny Padua, Doug Conlin, Eric Martin

Chasing Fish: Tracking and Control in a Autonomous Multi-Vehicle Real-World Experiment ............................................................................................................................... 2153
Jose Pinto, Margarida Faria, João Fortuna, Ricardo Martins, João Sousa, Nuno Queiroz, Frederic Py, Kanna Rajan

Recharging Autonomous Underwater Vehicles from Ambient Wave Induced Motions ............................................................................................................................... 2159
Nicholas Townsend, Ajit Shenoi

Passive AUV Tracking Using Sound Produced by Shrimps ................................................................................................................................................................. 2169
Md Jahangir Alam, Elanor Huntington, Michael Frater

VEHICLE NAVIGATION 2

Spline Navigation and Reactive Collision Avoidance with COLREGs for ASVs ................................................................................................................................................................. 2174
Miguel Pinto, Bruno Ferreira, Heber Sobreira, Anibal Matos, Nuno Cruz

Adaptive Cleaning of Oil Spills by Autonomous Vehicles Under Partial Information ............................................................................................................................... 2183
Jannan Song, Shalabh Gupta, James Hare, Shenli Zhou

Deliberative Optimization of Reactive Agents (DORA) for Autonomous Navigation ............................................................................................................................... 2188
Anthony Jones

SLAM and a Novel Loop Closure Detection for Autonomous Underwater Vehicles ............................................................................................................................... 2195
Shujing Zhang, Bo He, Rui Nian, Tianhong Yan, Yan Liang

DATA VISUALIZATION 2

Marine Observation Framework Using ICT for Mariculture in Indonesia ................................................................................................................................................................. 2199
Masaaki Wada, Katsumori Hatanaka, Ramadhona Saville, Nyoman Raudarta, Ketut Sugama
Using Tablets for Increasing Data Collection to Improve Dive Efficiency
Michael Max, Lavinio Gualdi

MARINE SECURITY AND DEFENSE 1

Mobile Adhoc Network of Waterborne Sensors for Enhanced Maritime Security
Nathan Whitten, Thomas Berger

Threat Modeling for Sensor Optimization
David Krou, Gregory Anderson, Evan Hanusa, Billy Jones

Monostatic Vessel Detection Statistics from the CODAR SeaSonde
Collin Dobson, Hugh Roarty, Kristen Holenstein, Michael Smith, Scott Glenn, Donald Barrick

OCEANOGRAPHY 1

A Modern Coastal Erosion Investigation: Kapa‘a Beach, Kaua‘i
Christopher Goody

Oceanography on Saturn's Moon, Titan
Ralph Lorenz

Nonlinear Spectra of Shallow Water Waves
Yury Stepanyants, Jean-Paul Giovanangeli, Christain Kharif, Nawin Raj

Weibull Statistics in Ocean Analysis and Prediction
Peter Chu

REMTELY OPERATED VEHICLE CONTROLS

Automated Visual Servoing for Close Inspection Using Low Cost, Man-Portable Vehicles
Scott Reed, Jonathan Evans, Benjamin Privat, Jon Wood

Control Architecture for Stable Gait of a Six-Legged Subsea Robot CR200
Banghyun Kim, Hyeonghwan Shim, Seong-Yeol Yoo, Gyeong-Mok Lee, Bong-Hwan Jun, Pan-Mook Lee

OROCOS Based Control Software of the New Developed MARUM HybridROV for Under Ice Applications
Gerrit Meinecke, Jan Albiz, Sylvain Joyeux, Volker Ratmeyer, Jens Renken

Development of a Hydraulic Propulsion System Controlled by Proportional Pressure Valves for the 4500m Work-Class ROV
Feng Zhou, Linyi Gu, Gaosheng Luo, Jiawang Chen, Mengjun Zheng, Zongze Shao, Chunming Dong

Depth Control of Remotely Operated Vehicles Using Nonsingular Fast Terminal Sliding Mode
Yangyao Wang, Linyi Gu, Ming Gao, Xianjun Jia, Jiyin Zhou, Donghui Zhou, Jun Liu

MODEL BASED SIGNAL PROCESSING

Parametrically Adaptive Wavenumber Processing for Mode Tracking in a Shallow Ocean Experiment
James Candy

Matched-Field Source Localization via Statistical Covariance Matching
Yue Zhou, Wen Xu

Tracking High-Speed Source Based on Moving Source Acoustic Field Model in Shallow Ocean Environment
Jinyan Du, Chao Sun, Zongwei Liu, Yi Zheng, Yixin Yang

ACOUSTIC TELEMETRY AND COMMUNICATION 6

Random Linear Packet Coding for Fading Channels
Rameez Ahmed, Milica Stojanovic

Nonbinary LDPC Code for Noncoherent Underwater Acoustic Communication and Its Experiment Results
Yanbo Wu, Min Zhu, Weiqing Zhu, Zeping Xing, Lijian Xu, Bo Yang
MARINE EDUCATION AND OUTREACH 2

Visualizing Oceans of Data: Educational Interface Design .......................................................... 2304
  Cheryl Peach, Ruth Krumhansl, Amy Busey, June Foster, Kira Krumhansl

COSEE Engagement of Ocean Research Community .............................................................. 2312
  Liesl Hostaling, Gail Scowcroft, Jan Hodder, Cheryl Peach

PSM-COAST: A Master’s Program for Professionals in Marine Science and Technology .................. 2316
  Steven Lohrenz, Louis Goodman, James Bisagni

VEHICLE DESIGN 2

Development of I-SPIDER: A Towed Platform for Video Survey and Instrument Placement ................. 2319
  Matt Lowe, Max Woolsey, Roy Jarnagin, Carol Latken, Brian Noakes, Larry Overstreet, Steven Tidwell

MARIUS Project: Design of a Sail Robot for Oceanographic Missions ........................................... 2324
  Maximilien Naveau, Cedric Anthierens, Elodie Pauly, Philippe Courmontagne

Folding Propeller Design and Analysis for A Hybrid Driven Underwater Glider ................................ 2330
  Zhier Chen, Jiancheng Yu, Aiqun Zhang, Ruiven Yi, Qifeng Zhang

A Hybrid Underwater Glider for Underwater Docking ..................................................................... 2339
  Shilin Peng, Canjun Yang, Shuanghuang Fan, Shaoyong Zhang, Pinfu Wang, Yu Xie, Ying Chen

First Field-Test of Seabed Walking Robot CR200 ........................................................................ 2346
  Bong Huan Jun, Hyungwon Shin, Banghyun Kim, Jin-Yeong Park, Hyuk Baek, Seongyeol Yoo, Hangoo Kang,
  Gyeong-Mok Lee, Pan-Mook Lee

AUV OPERATIONS 3

Autonomous Inspection Using an Underwater 3D Lidar ................................................................... 2352
  Dan McLeod, Mark Hardy, John Jacobson

Applications of Autonomous Underwater Vehicles (AUVs) to Ocean Mining Exploration .............. 2360
  William Senke

Demonstration of Wireless Data Harvesting from a Subsea Node Using a "Ship of Opportunity" .... 2363
  Norman Farr, Jonathan Ware, Clifford Pontbriand, Maurice Tivey

Positioning and Control of an AUV Inside a Water Pipeline for Non-Contact In-Service Inspection ... 2368
  Unnikrishnan Painumgal, Blair Thornton, Tamaki Ura, Yoshiaki Nose

The General Design and Field Trial of a Seafloor Surveying AUV System ...................................... 2378
  Hongwei Zhang, Liang Hao, Yanhui Wang, Yuhong Liu, Zhiliang Wu, Shuxin Wang, Shuai Shao, Dongjie Wei, Wei Hou

VEHICLE NAVIGATION 3

Autonomous Control and Simulation of the VideoRay Pro III Vehicle Using MOOS and IvP Helm ........ 2383
  Anthony Spears, Michael West, Thomas Collins

Hybrid Baseline Localization for Portable AUV Navigation ......................................................... 2393
  Bryce Gill, David Schipf, Ryan Borth, John Canning, Eric Wollbrecht, Michael Anderson, Dean Edwards

  Paulo Oliveira, Victor Lobo

Improving Terrain Navigation by Concurrent Tidal and Sound Speed Error Estimation ................. 2411
  Ove Hagen, Kjetil Anonsen

Some Algorithms of Cooperative AUV Navigation with Mobile Surface Beacon .......................... 2418
  Alexander Scherbatyuk, Fedor Dubrovin, Nikolay Sergeenko

MARINE GEOLOGY AND GEODESY

A Geometric Approach of Passive Shrimp Estimation .................................................................. 2424
  Md Jahangir Alam, Eleanor Huntington, Michael Frater

Investigations of Marine Geohazards in Coastal Zones ............................................................... 2434
  Todd Mitchell, Kevin Smith, Daniel Ebuna
Hydroacoustic Mapping System for Quantitative Identification of Aquatic Macrophytes, Substrate Composition, and Shallow Water Bathymetric Surveying ................................................................. 2441
   Eric Munday, Brian Moore, Janusz Burczynski
Dynamical Simulation and Analysis of the Tidal Current Field in Yellow Sea During Younger Dryas Period ................................................................. 2444
   Xibin Han, Jinghao Shi, Minhui Zheng, Fengyou Chu, Lijiao Li, Dong Xu, Yeping Bian

MARINE SECURITY AND DEFENSE 2

Safety and Security Applications for Micro-Unmanned Surface Vessels ............................................... 2454
   Chief Fernando Boiteux, Mark Patterson, Anthony Mulligan
Bistatic Vessel Detection with the CODAR SeaSonde ............................................... 2460
   Hugh Roarty, Kristen Holenstein, Collin Dobson, Michael Smith, Scott Glenn, Donald Barrick
A Multistage Tracker for Distributed Sensor Fields ............................................... 2465
   Evan Hanusa, David Krout
Development of an Unmanned Capsule for Large-Scale Maritime Search and Rescue ............................... 2470
   Miguel Pinto, Eduardo Silva, Anibal Matos, Nuno Cruz, Jose Alves, Duarte Almeida, Alfredo Martins, Jose Almeida, Diogo Machado

OCEANOGRAPHY 2

Hypoxic Intrusions to Puget Sound from the Ocean .................................................................................... 2478
   R. Deppe, Jim Thomson, Brian Polagye, Christopher Krembs
OES Standards Initiative ......................................................................................................................... 2478
   Kenneth Foote, Stephen Holt, Albert Williams
Multidisciplinary Approach to Assess Potential Risk of Mortality of Benthic Ecosystems Facing Climate Change in the NW Mediterranean Sea ........................................................................ 2493
   Nathaniel Bensoussan, Ivane Pairaud, Pierre Garreau, Samuel Somot, Joaquim Garrabou
Design of Eco Blocks for Protection of Submerged Pipeline ................................................................... 2500
   Joongwoo Lee, Jeong Seok Kim, Yonghoon Lee
Short Term Forecast of the Evaporation Duct for the West Pacific Ocean ................................................ 2506
   Yang Shi, Kunde Yang, Yuanliang Ma, Yang Yixin, Sun Chao
