
(ICESC 2014)

Nagpur, Maharashtra
9 – 11 January 2014
# 2014 International Conference on Electronic Systems, Signal Processing and Computing Technologies

## ICESC 2014

### Table of Contents

| Messages from the RCOEM Chief Patrons | xi |
| Message from the RCOEM Patron | xii |
| Messages from the General Chairs | xiv |
| Message from the Conference Chair | xvi |
| Message from the Publication Chair | xvii |
| Message from the University of Massachusetts Lowell | xviii |
| Message from the University of the District of Columbia | xix |
| Message from the American Society for Engineering Education | xx |
| Message from IEEE Bombay Section | xxi |
| Committees | xxii |
| Reviewers | xxv |
| About the Shri Ramdeobaba College of Engineering and Management | xxvi |
| About ICESC 2014 | xxvii |

## Embedded System Design

### Novel Approach for Music Search Using Music Contents and Human Perception

*Velankar Makarand and H.V. Sahasrabuddhe*

Design and Implementation of Various Topologies for Networks on Chip and Its Performance Evolution

*Somulu Gugulothu and M.D. Chawhan*

Acoustic Noise Cancellation Using Adaptive Filters: A Survey

*Mugdha M. Dewasthale and R.D. Kharadkar*

Process Variation and Voltage Scaling Optimization Techniques for Processing Signals Using Multirate

*Rajendra M. Rewatkar and Sajay L. Badjate*

An FPGA-Based Novel Architecture for the Fixed-Point Binary Antilogarithmic Computation

*J.G. Pandey, A. Karmakar, C. Shekhar, and S. Gurunarayanan*

Energy Efficient Wireless Sensor Network

*Rakhi Khedikar, Avichal Kapur, and M.D. Chawhan*
The Survey of Real Time Operating System: RTOS .................................................................34
Prasanna Hambarde, Rachit Varma, and Shivani Jha

Biometric Access Control Implementation Using 32 bit Arm Cortex Processor ..................40
Akansha Bhargava and R.S. Ochawar

Analog/Mixed Circuits and Systems

ASIC Design of Reversible Multiplier Circuit ...................................................................47
A.P. Hatkar, A.A. Hatkar, and N.P. Narkhede

Low-Latency, Low-Area Overhead and High Throughput NoC Architecture for FPGA Based Computing System ..................................................53
Sudhir N. Shelke and Pramod B. Patil

N-Fractional PLL Analysis of 4-GHz Frequency for OFDM Technology .......................58
Ujjwal V. Ramekar and Ajay P. Thakare

Multi-standard Highly Linear CMOS LNA .......................................................................63
Mayank B. Thacker, Manoj Awakhare, Rajesh H. Khobragade, and Pravin A. Dwaramwar

Analysis of QR Decomposition for MIMO Systems .......................................................69
Abha Chauhan and Rajesh Mehra

Design of Phase Frequency Detector and Charge Pump for Low Voltage High Frequency PLL ........................................................................................................74
Aniruddha C. Kailuke, Pankaj Agrawal, and R.V. Kshirsagar

Evolution of Ultra Wide-Band Swastik Shaped Monopole Antenna for Cognitive Radio Applications ..................................................................................................................79
M.S. Narlawar and S.L. Badjate

Selection of Digital Controller for Power System and Power Electronics Applications ..........84
Uday B. Mujumdar and D.R. Tutkane

A Low Voltage Wideband CMOS Operational Transconductance Amplifier for VHF Applications .................................................................................................................................89
D.J. Dahigaonkar, D.G. Wakde, and Anjali Khare

A Novel Parallel Multiplier for 2’s Complement Numbers Using Booth’s Recoding Algorithm .................................................................................................................................93
Chandrashekhhar T. Kukade, Raghavendra B. Deshmukh, and R.M. Patrikar

Multimedia System and Signal Processing I

Biometric Authentication Using Kekre’s Wavelet Transform ............................................99
R.D. Raut, Sujata Kulkarni, and Neha N. Gharat

Reversible Color Image Watermarking Using Trigonometric Functions ..........................105
Sayan Chakraborty, Prasenjit Maji, Arijit Kumar Pal, Debalina Biswas, and Nilanjan Dey

Rainfall Estimation over Roof-Top Using Land-Cover Classification of Google Earth Images ..............................................................................................................................111
Medha Aher, Sadashiv Pradhan, and Yogesh Dandawate

Fabry Perot Etalon Based Wavelength Sensor ..................................................................117
Pramodini A. Kale, S.G. Hate, and Nitin Kawade

Pitch Contour Extraction of Singing Voice in Polyphonic Recordings of Indian Classical Music .................................................................................................................................123
Kalyani Akant and Shyamkant Limaye

Algorithms and Distributed Systems II

Power Optimization of Wireless Sensor Networks Using Encryption and Compression

Alka P. Sawlikar, Z.J. Khan, and S.G. Akojwar ........................................................................................................... 222

Different RNA Secondary Structure Prediction Methods

Pradnya S. Borkar and Anjali R. Mahajan ........................................................................................................... 228

Coordination Based Motion Control in Mobile Wireless Sensor Network

Tathagata Das and Sarbani Roy ........................................................................................................... 231

Augmented Execution in Mobile Cloud Computing: A Survey

V.S. Jagtap, Karishma Vikas Pawar, and Ajeet Ram Pathak ........................................................................................................... 237

Game Theory Inspired Mobile Object Trapping System in Mobile Wireless Sensor Network

Tathagata Das and Sarbani Roy ........................................................................................................... 245

Enhancement of Image Retrieval by Using Colour, Texture and Shape Features

Apurva N. Ganar, C.S. Gode, and Sachin M. Jambhulkar ........................................................................................................... 251

Visualization of Wireless Sensor Network by a Java Framework for Security in Defense

Surveillance

Arpit Kasture, Akshay Raut, and Swaroop Thool ........................................................................................................... 256

Detection of Malicious Transaction in Database Using Log Mining Approach

Apashabi Chandkhan Pathan and Madhuri A. Potey ........................................................................................................... 262

An Approach to Balance the Load with Security for Distributed File System in Cloud

Vidy N. Chiwande and Animesh R. Tayal ........................................................................................................... 266

Implementation of Real Time Control Algorithm for Gait Assistive Exoskeleton Devices

for Stroke Survivors ........................................................................................................................................................................... 271

Jhulan Kumar, Neellesh Kumar, Dinesh Pankaj, and Amod Kumar

Multimedia Systems and Signal Processing II

Classification of Indian Classical Instruments Using Spectral and Principal Component

Analysis Based Cepstrum Features

Sneha Gaikwad, Abhijit V. Chitre, and Yogesh H. Dandawate ........................................................................................................... 276

Multipath Reliable Range Node Selection Distance Vector Routing for VANET: Design

Approach

Harish Laxmichand Sharma, Pankaj Agrawal, and R.V. Kshirsagar ........................................................................................................... 280

Design Approach for Frequency Reconfigurable Vivaldi Antenna with Pentagon Slot

Resonator

Deepali K. Borakhade and S.B. Pokle ........................................................................................................... 284

Noise Robust Novel Approach to Speech Recognition

Swapnil D. Daphal and Sonal K. Jagtap ........................................................................................................... 289

Denoising of 3D Magnetic Resonance Images Using Image Fusion

V. Naga Prudhvi Raj and T. Venkateswarlu ........................................................................................................... 295

Electrocardiogram Feature Based Inter-human Biometric Authentication System

Monalisa Dey, Nilanjana Dey, Sainik Kumar Mahata, Sayan Chakraborty, Suvojit Acharjee, and Achintya Das ........................................................................................................................................................................... 300
Use of Statistical Methods for Dimensionality Reduction in Hand Shape Identification
Employing Radon Transform and Collaborative Representation Based Classification ..................................................305
Oindrila Chatterjee, Ahana Gangopadhyay, and Amitava Chatterjee

Symbol Recognition: Cognitive Approach ..................................................................................................................311
Rumaan Bashir and Kaiser J. Giri

Enhanced Flooding Scheme for AODV Routing Protocol in Mobile Ad Hoc Networks ........................................316
Sandeep Gupta and Abhishek Mathur

Image Resolution Enhancement Using Lifting Wavelet and Stationary Wavelet Transform .....................................322
Mayank Agrawal and Ratanakar Dash

**Micro/Nano Electronic Systems**

Simulation and Analysis of Hybrid Ultra Dense Memory Cell by Using Single Electron Transistor ..................................326
Jyoti R. Chaudhari and D.K. Gautam

Multi-device Optimization for Scalable DC HEMT Model with Self-Heating Effect .............................................331
Sagar Karalkar, Kanti Prasad, Yu Zhu, Jerod Mason, and Dylan Bartle

Design and Development of Microcantilever Based Detector ..................................................................................335
Jayu Kalambe and Rajendra Patrikar

Improved Microcantilever Geometry for Bio and Chemical Sensing .........................................................................341
B.G. Sheeparamatti, J.S. Kadadevarmath, and R.M. Bhashetti

**Intelligent and Knowledge-Based Systems I**

Izhikevich Model Based Pattern Classifier for Hand Written Character Recognition—A Review Analysis ..................346
Soni Chaturvedi, Neha R. Sondhiya, and Rutika N. Titre

Classification of Texture Using Gray Level Co-occurrence Matrix and Self-Organizing Map .................................350
Vishal S. Thakare and Nitin N. Patil

A Comparative Analysis of Various Cluster Detection Techniques for Data Mining ...............................................356
Prashant Vats, Manju Mandot, and Anjana Gosain

Segmentation of Microscopic Images: A Survey .........................................................................................................362
Bhupendra S. Deshmukh and Vijay H. Mankar

Performance Optimization of Focused Web Crawling Using Content Block Segmentation ....................................365
Bireshwar Ganguly and Devashri Raich

A Secure Approach for Web Based Internet Voting System Using Multiple Encryption ...........................................371
S.M. Jambhulkar, Jagdish B. Chakole, and Prashul R. Pardhi

Syntax Parsing: Implementation Using Grammar-Rules for English Language .........................................................376
Madhuri A. Taval, M.M. Raghwanshi, and Latesh Malik

Product Evaluation Using Mining and Rating Opinions of Product Features .................................................................382
Vrushali Yogesh Karkare and Sunil R. Gupta

**Intelligent and Knowledge-Based Systems II**

An Improved Approach of Dictionary Based Syntactic PR Using Trie .............................................................386
Samit Kumar Pradhan and Atul Negi
Analysis of Synchronizer, Data Loss and Occurrence of Metastability .................................................................392
   Ankush S. Patharkar, Vivek E. Khetade, S.S. Limaye, Ashish S. Bhopale, and Akshay S. Patharkar

A Novel MRI Brain Edge Detection Using PSOFCM Segmentation and Canny Algorithm ..................................398
   Romesh Laishram, Wahengbam Kanan Kumar, Anshuman Gupta, and Khairnar Vinayak Prakash

Gujrati Character Recognition Using Adaptive Neuro Fuzzy Classifier .................................................................402
   Jayeshree Rajesh Prasad and Uday V. Kulkarni

DE Based Q-Learning Algorithm to Improve Speed of Convergence in Large Search Space Applications ..........408
   Zenefa Rahaman and Jaya Sil

Design of Automatic Car Breaking System Using Fuzzy Logic and PID Controller ..............................................413
   Sachin Hirulkar, Manish Damle, Vishal Rathee, and Bhalchandra Hardas

Intelligent Perpetual Echo Attack Detection on User Datagram Protocol Port 7 Using Ant Colony Optimization ......419
   Abhishek Gupta, Om Jee Pandey, Mahendra Shukla, Anjali Dadhich, Anup Ingle, and Vishal Ambhore

Review of Handwritten Pattern Recognition of Digits and Special Characters Using Feed Forward Neural Network and Izhikevich Neural Model .................................................................425
   Soni Chaturvedi, Rutika N. Titre, and Neha Sondhiya

An Agent Based Intrusion Detection System for Wireless Network with Artificial Immune System (AIS) and Negative Clone Selection .................................................................429
   G.V. Pradeep Kumar and D. Krishna Reddy

Investigation of Binomial and Chebyshev Distribution on Dielectric Resonator Antenna Array .........................434
   Nipun K. Mishra and Soma Das

Dynamic and Competitive Skeletonization for Recognition of Decorative Characters ........................................438
   Pankaj M. Pandit, Sudhir G. Akojwar, and Salim A. Chavan

Multimedia Systems and Signal Processing III

A Quality of Service Based Resource Allocation in Wireless Communication Networks ........................................444
   Rajashekhar Yaramasu, Shirin Qureshi, and Sudhir B. Lande

Comparative Study of Block Matching Algorithm and Dual Tree Complex Wavelet Transform for Shot Detection in Videos .................................................................450
   Ravi Mishra, S.K. Singhai, and Monisha Sharma

Conversion of Region of Interest from One Block Size to Another in Compressed Domain ................................456
   Vaishali A. Choudhary, Preeti Voditel, and Pratik R. Hazare

Performance of Space-Time Block Coded MIMO Systems for Cell Edge Users in Rayleigh Fading Channel ........465
   Nirmal S. Kothari and Vijay S. Patil

A Novel Image Processing Filter Designed Using Discrete Fourier Invariant Signal ............................................468
   Roshni Ravi and M.J. Josemartin

Mammography Feature Analysis and Mass Detection in Breast Cancer Images .................................................474
   Bhagwati Charan Patel and G.R. Sinha

Graphical Password Authentication: Cloud Securing Scheme ..............................................................................479
   Shraddha M. Gurav, Leena S. Gawade, Prathamey K. Rane, and Nilesh R. Khochare
Design and Implementation of a Highly Efficient Gray Image Compression Codec Using
Fuzzy Based Soft Hybrid JPEG Standard ........................................................................484
Vikrant Singh Thakur and Kavita Thakur

Based Embedded Wireless Sensor Network Node ................................................................490
Hemant M. Baradkar and Sudhir G. Akojwar

Designing a Secure and Reliable Node Disjoint Multipath Routing Algorithm and a Survey
on Existing Techniques .......................................................................................................496
Simran R. Khiani, C.G. Dethe, and V.M. Thakare

Author Index ......................................................................................................................501
