37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 1 of 9

Editors:

Dimitar Kazakov George Tsoulas
Contents

Symposium Preface
Simon O’Keefe

Invited presentations:
Functional brain architecture underlying eye movements
Melanie Burke, Claudia Gonzalez and Graham Barnes

Vision in natural behavior
Benjamin W. Tatler

Refereed papers:
A biologically based model of active vision
Alex Cope and Kevin Gurney

Multi-modal visual attention for robotics active vision systems - A reference architecture
Martin Hulse, Sebastian McBride and Mark Lee

A visual novelty detection filter based on bag-of-words and biologically-inspired networks
Y. Gatsoulis, E. Kerr, J.V. Condell, N.H. Siddique and T.M. McGinnity

A modular reinforcement learning model for human visuomotor behavior in a driving task
Brian Sullivan, Leif Johnson, Dana Ballard and Mary Hayhoe

Research student papers:
A Dynamical Model of Feature-Based Attention with Strong Lateral Inhibition to Resolve Competition Among Candidate Feature Locations
David G. Harrison and Marc De Kamps

Coordination of multi-layered neural computation - a Neural Pipeline approach
Rebecca Naylor, Simon O’Keefe, Jim Austin and Netta Cohen

Visual search performance can be enhanced by instructions that alter eye movements
David J. Yates and Tom Stafford
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 2 of 9

Editors:

Dimitar Kazakov  George Tsoulas

Contents

Session 1 –(9:00, Wednesday 6 April)–

Keynote:  
An Introduction to CoJACK.................................................................1
Paolo Busetta

Procedural Quests: A Focus for Agent Interaction in Role-Playing-Games........................................3
John Grey and Joanna Bryson

–(10:30 coffee)–

Session 2 –(11:00)– AI algorithms

Playing Tetris Using Bandit-Based Monte-Carlo Planning..................................................11
Zhongjie Cai, Dapeng Zhang and Bernhard Nebel

Determinization in Monte-Carlo Tree Search for the card game Dou Di Zhu..............................17
Edward Powley, Daniel Whitehouse and Peter Cowling

From game tutorials to game partners using natural language generation techniques..................25
Luciana Benotti and Nicolás Bertoa

–(12:30 lunch)–

Session 3 –(14:00)– Intelligent environments and characters

Representing Personality Traits as Conditionals......................................................................35
Richard Evans

Social Objects – A framework for social interactions between videogame characters.....................43
Phil Carlisle, Steve Manning and Mark Grimshaw

Influence Landscapes – From Spatial to Conceptual Representations........................................49
Luke Dicken and John Levine

SPREE : The Strathclyde Poker Research Environment..........................................................55
Luke Dicken, Nicky Johnstone, John Levine and Phil Rodgers

–(15:30 coffee)–

Session 4 –(16:00)– Position papers

Games based learning for Exploring Cultural Conflict..........................................................61
Lynne Hall, Syaheerah Lutfi, Asad Nazir, John Hodgson, Marc Hall, Christopher Ritter,
Susan Jones, Samuel Mascarenhas, Bridget Cooper, Ana Paiva and Ruth Aylett

Recognition of Emotional Brain Activities in Virtual Reality Environment: A Position Paper........71
Fabio Abbattista, Giovanni Attolico, Valeria Carofiglio, Fabio De Felice and Giovanni Dimauro

–(17:00 plenary session)–
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 3 of 9

Editors:

Dimitar Kazakov George Tsoulas

# Contents

Symposium Preface  
*Y. J. Erden & M. Bishop*

Creativity and art: three roads to surprise..................................................................................1  
*Margaret Boden*

Anonymity and Evolutionary Art......................................................................................................11  
*Margaret Boden*

On Impact and Evaluation in Computational Creativity: A discussion of the Turing Test and an alternative proposal..................................................................................................................15  
*Simon Colton & Alison Pease*

Creative or Not? Birds and Ants Draw with Muscles..................................................................23  
*Mohammad Majid al-Rifaie & Mark Bishop*

Object-oriented philosophy – the nature of the relations between humans and computational object...................................................................................................................................................31  
*Leighton Evans*

Multiple Realization and the Computational Mind..........................................................................37  
*Paul Schweizer*

From Artificial Life to Artificial Embodiment: Using human-computer interfaces to investigate the embodied mind 'as-it-could-be' from the first-person perspective....................................................43  
*Tom Froese, Keisuke Suzuki, Sohei Wakisaka, Yuta Ogai & Takashi Ikegami*

Contextual Affect Modeling and Detection from Open-ended Text-based Dramatic Interaction........51  
*Li Zhang*

The Information Processing Account of Computation......................................................................58  
*Nir Fresco*

Autonomy and desire in machines and cognitive agent systems....................................................65  
*Kevin Magill & Yasemin J. Erden*

The Singularity Might Indeed Be Near, But the Next Interesting Level of Intelligence Is Too Far........73  
*Jiri Wiedermann*

On the State of Superposition and the Parallel or not Parallel Nature of Quantum Computing: a controversy raising point of view..................................................................................................80  
*Michael Nicolaidis*

Using Ontological Dependence to Distinguish Between Hardware and Software........................89  
*William Duncan*

Why is it necessary to build a physical model of hypercomputation? ..........................................98  
*Florent Franchette*
Symposium on:
Computational Models of Cognitive Development

5th April, 2011

Organisers
Frank Guerin, Aberdeen
John Alexander, Aberdeen
Philip Quinlan, York

Programme Committee
(AI/Robotics) (Psychology)
John Alexander Andrew Bremner
Luc Berthouze Philip Quinlan
Frank Guerin Matthew Schlesinger
Sinan Kalkan Sylvain Stois
Norbert Krüger
Mark Lee
Honghai Liu
Jonathan Mugan
Paulo Santos
Georgi Stojanov
Nicholas K Taylor
Emre Ugur

Contents
Katherine E. Twomey and Jessica S. Horst ................................................................. 3
All Things Considered: Dynamic Field Theory Captures
Effect of Categories on Children’s Word Learning

Anne S. Warlaumont, Gert Westermann, and D. Kimbrough Oller .................. 8
Adult Input Causes Less Precise Imitation in a Neural
Network Model of Infant Vowel Perception And
Production

Alexandra Varga and Michiel van Lambalgen .......................................................... 13
Infants’ Flexible Closed World Reasoning and
Imitation-for-Learning

Norbert Krüger, Mila Popovic, Leon Bodenhagen, Dirk Kraft and Frank Guerin ........ 23
Grasp Learning by Means of Developing Sensorimotor
Schemas and Generic World Knowledge

Michael Miller ............................................................................................................. 32
Piagetian Autonomous Modeller

Timothy A. Furze and Brandon Bennett ................................................................. 40
Using the Principals of Classical Conditioning to Learn
Event Sequences
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 5 of 9

Editors:

Dimitar Kazakov George Tsoulas

Table of Contents

Introduction ........................................................................................................................................1

A Memory Structure that Gives Meaning to the Notions of Knowledge and Belief .................2

I think I know you: a sharable memory model between agent and human .........................10

Between Downward Spirals and Habituation: Emotion Intensity in Virtual Agents’ Memory Retrieval.........................................................................................................................................15

Towards modeling false memory using virtual characters: a position paper .......................20

A Preliminary Functional Analysis of Memory in the Word Sense Disambiguation Task ...25

On Memory Systems for Companion Robots: Implementation Methodologies and Legal Implications........................................................................................................................................30

Memory Systems for Cognitive Agents .....................................................................................35

Implementing a data mining approach to episodic memory modelling for artificial companions........................................................................................................................................41
# Table of Contents

Constructing a Reusable Linguistic Resource for a Polyglot Speech Synthesis ................................. 1
(Nur-Hana Samsudin and Mark Lee)

Multi-word Level Context Features: Towards Context Feature Improvement ................................. 6
(Azniah Ismail and Suresh Manandhar)

Using Multilingual Corpora to Extract Semantic Information ..................................................... 11
(Ahmad R. Shahid and Dimitar Kazakov)
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 7 of 9

Editors:

Dimitar Kazakov George Tsoulas

Introduction ...................................................................................................................................................... 2
Rob Clowes, Steve Torrance and Ron Chrisley

World-Related Integrated Information: Enactivist and Phenomenal Perspectives ............7
Igor Aleksander and Mike Beaton

A Role for Consciousness in Action Selection ...................................................................................... 15
Joanna J. Bryson

High-Dimensional Perceptual Signals and Synthetic Phenomenology ........................................ 20
Antonio Chella and Salvatore Gaglio

Information Integration, Data Integration and Machine Consciousness ........................................ 24
David Gamez

A model of primitive consciousness in autonomously adaptive system under a framework of reinforcement learning ........................................................................................................................................ 31
Yasuo Kinouchi, Yoshihiro Kato, Hiroki Hayashi, Yusuke Katsumata, Kazuhisa Kitakaze, and Shoji Inabayashi

Development and situated cognition: Preconditions for machine consciousness .................. 36
Riccardo Manzotti

A Cognitive Neuroscience-inspired Codelet-based Cognitive Architecture for the Control of Artificial Creatures with Incremental Levels of Machine Consciousness ........................................ 4
Klaus Raizer, André L. O. Paraense and Ricardo R. Gudwin

Self System in a Model of Cognition .......................................................................................................... 51
Uma Ramamurthy and Stan Franklin

Consciousness, Meaning and the Future Phenomenology .............................................................. 55
Ricardo Sanz, Carlos Hernández and Guadalupe Sánchez

Can Functional and Phenomenal Consciousness Be Divided? .................................................. 61
John G Taylor

Would a super-intelligent AI necessarily be (super-)conscious? .................................................. 67
Steve Torrance
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 8 of 9

Editors:

Dimitar Kazakov        George Tsoulas

Social Networks And MultiAgent Systems
3rd Symposium

http://snamas2011.res-earch

Symposium Chairs
Matthias Mailliard CEMAGREF, France
Clara Smith UNLP and UCALP, Argentina
Frédéric Amblard IRIT, France
Samuel Thiriot INRIA, France

Programme Committee
Luis Antunes Univ. Lisbon, Portugal
Guido Boella University of Turin
Cristiano Castelfranchi ISTC-CNR Rome, Italy
Edmund Chattoe-Brown Univ. Leicester, UK
Rosaria Conte ISTC-CNR Rome, Italy
Terrill Frantz Carnegie Mellon University, USA
Jeremy Pitt Imperial College London, UK
Camille Roth CNRS-EHESS, Paris, France
Antonino Rotolo University of Bologna, Italy
Giovanni Sartor Univ. Bologna, Italy
Jaime Simão Sichman Universidade de São Paulo, Brazil
Serena Villata University of Turin

Contents
Analysis of the power network among the actors of a social organization p.2
Paul Chapron, Christophe Sibertin-Blanc, Françoise Adreit

The Logic of Power. How my Power Becomes his Power p.8
Cristiano Castelfranchi

How detailed should social networks be for labor market's models? p.14
Zach Lewkowicz, Samuel Thiriot and Philippe Caillou

Considering baseline homophily when generating spatial social networks p.20
Sascha Holzhauer, Friedrich Krebs and Andreas Ernst

Selected Models for Agent-based Simulation of Social Networks p.27
Enrico Franchi, Federico Bergenti and Agostino Poggi

Time-Varying Graphs and Social Network Analysis: Temporal Indicators and Metrics p.33
Nicola Santoro, Walter Quattrociocchi, Paola Flocchini,
Arnaud Casteigts and Frederic Amblard

Adaptive Security Scheme for Open Networks p.39
Julia Schaunemeier, Jeremy Pitt, Moez Draief and Pallapa Venkataram

Rooting opinions in the minds: a cognitive and computational model of opinions and their dynamics p.45
Francesca Giardini, Walter Quattrociocchi and Rosaria Conte

Multilevel and Agent-Based Modelling in the Analysis of Differential School Effectiveness p.50
Mauricio Salgado and Elio Marchionne
37th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2011)

York, United Kingdom
4-7 April 2011

Part 9 of 9
