Some format issues inherent in the e-media version may also appear in this print version.
TABLE OF CONTENTS

CIRCUITS AND SYSTEMS

Architectures of Delay Line ADC and Delay Cells for Digital DC-DC Converters ................................................................. 1
Chuang Wang, Zunchao Li, Yuanfa Wang, Zhicong Miao

Construction of a NI ELVIS II+ Based Comprehensive Communication Circuits Experiment Platform ........................................... 5
Jianfang Ye, Jianwei Ye, Jiale Tu

Design and Verification of AC/DC Comparator Based on A/D Sampling .......................................................................................... 9
Yuqiang Xiao, Min Cao, Bo Li, Dada Wang, Chuan Li, Zhizhou Bi

Eigenenergies of a Nanoscale Symmetric Double Triangular Quantum Well in Double Gate InAlAs/InGaAs HEMT ........................................................................ 14
Neha Verma, Jyotika Jogi, Enakshi Khular Sharma

Strategy and Implementation of Multi-mode Control in Switch-Mode Power Supply ................................................................. 17
Ye Zhao, Wei Jiang

A Security System Based on Remote Iris Recognition .................................................................................................................... 21
Sha Lu, Huaideng Wang, Jing He, Jie Yuan

Modernization of TRR Control Rod Mechanisms Driving System Based on FPGA ................................................................. 25
Mohammad Arkani, Hossein Khalafi, Ashkan Hosnirokh, Arsaln Ezati

Thermal Breakdown Modeling and Simulation of GGNMOS under ESD Stress ............................................................. 31
Yao Liu, Tingjun Gao

Nodes Selection for Analog Circuits Fault Diagnosis Based on Condition Number ................................................................. 36
Yanjun Li, Yibing Shi, Wei Zhang

Impact of Process Variations and Defects on RF Front-end in Nanoscale CMOS ................................................................. 41
Yantao Liu, Aoyang Zhang, Xiangchong Liu

A Prediction-Based Scalable Design for Montgomery Modular Multiplication ........................................................................... 46
Chengguo Liu, Shang-He Liu, Guowei Yang, Zhipeng Wu

A Fashion Intellingent Guiding Device Based on Multi-sensor ........................................................................................................ 55
Li-Xia Zhang, Jia-An Zhang, Xinyi Meng, Ning Liu, Haiyong Liu

Study on Positioning System Based on Wireless Sensor Network ................................................................................................. 59
Lijun Liu, Siwen Luo, Jun Gui

COMPUTERS AND INFORMATION TECHNOLOGY

Design and Implementation of the Scheduling Distribution Module of EDM System ................................................................. 63
Xiaoqun Liao, Yuanlong Zhang, Shancheng Tang, Anxin Zhao

A Research on the Heuristic Signature Virus Detection Based on the PE Structure ................................................................. 67
Di Gao, Guisheng Yin, Yuxin Dong, Liang Kou

A Light-weight Approach for Automatically Reconstructing Large-scale Trees ........................................................................... 73
Wenmeng Zhou, Yao Yu, Yu Zhou, Sidan Du

A Target-driven Framework for Distributed Software Test Automation ......................................................................................... 79
Jian-Hua Gu, Xing-She Zhou

A Data Scheduling Scheme Based on Double Queue and Send-window ......................................................................................... 83
Hongcheng Huang, Hongmei Zhang

Design and Implementation of Texture Mapping in Parallel ............................................................................................................. 86
Wen Xu, Jangang Han

Research on the Optimal Portfolio Based on Genetic Algorithms ................................................................................................... 90
Jun Han

An Adaptive Immune System Applied to Task Scheduling on NOC ................................................................................................. 95
Wei Gao, Yubai Li, Song Chai, Jian Wang

Application of PHM for Complex Electromechanical Equipments .......................................................................................... 100
Minghui Wu, Tianzhu Wen, Shang Meng, Huamin Dai

A Novel Method for Cell Phenotype Image Classification ........................................................................................................ 105
Chao Li, Ji-Feng Huang

</table>
Research for a New Type Plant-wide DCS Integrated Main and Auxiliary Control Network ................................................................. 224
Chen Chen, Junfang Fu

Development of New Unmanned Fixed-wings Aircraft Patrol to Power Transmission Line ................................................................. 228
Bingqin Wang, Shilong Huang, Zhiyuan Huang

CONTROL THEORY AND APPLICATIONS

Optimization and Implementation of Intelligent PID Controller Based on FPGA ......................................................................................... 232
Kaiyu Wang, Zhenan Tang, Yongrui Zhang, Zhiming Song, Zhiheng Li, Mengmeng Xi

Design of Robust PID Controller Based on Desired Loop Transfer Function ....................................................................................... 236
Yonghui Chen, Gongquan Tan

Rotating Consensus of LFMAS in an Elliptical Orbit with Switching Topology ....................................................................................... 240
Gun Li, Meng-Jie Niu

Energy Saving in Electro-Hydraulic System Using Impedance Sensing ................................................................................................. 245
Kittipong Poomphochana, Pornjit Pratumsuwan, Watcharin Po-Nguen

The Research and Design of Remote Control Airship for Substation Inspection .................................................................................... 249
Hongliang Wang, Min Cao, Dada Wang, Peng Li, Shaquan Zhang, Erlei Tang

Study of Skinner Automaton Implemented on a Two-Wheeled Robot ................................................................................................. 253
Xuan Wu, Xiaogang Ruan, Xiaoping Zhang, Ouattara Sie

Fractional Order Modeling of PEMFC Temperature ......................................................................................................................... 257
Zhidong Qi, Dong Chen, Liang Shan

Research of Transfer Alignment for Airborne Distributed Inertial Attitude Measurement System ................................................................. 261
Yukun Wang, Shuai Chen, Xian Li, Runwu Zhong

Research of Automatic Disturbance Rejection Controller for Fiber Optic Gyro Servo Stabilized System ................................................................. 265
Qing Zhang, Li-Dong Guo, Liang Huo

Modeling and Optimization of Coal Moisture Control System Based on BFO ......................................................................................... 269
Xiaobin Li, Ting Fu, Yang Yu, Haiyan Sun

Real-time Workshop Information Acquisition and Monitoring System Based on Three-Layer Network ......................................................................................... 275
Junhong Wang, Donghui Sun, Zongrui Li, Zhenzhong Xu

A Modified Control Method for Congested Traffic in Car-following Model ................................................................................................. 279
Yu Cui, Hong-Xia Ge

Research on a New Path Planning Method for Mobile Robot ......................................................................................................................... 283
Xiaoping Zhang, Xiaogang Ruan, Xiaoping Zhu, Jing Huang

PID Parameters Tuning Based on a Self-Adaptive Immunity Ant Colony Algorithm ......................................................................................... 289
Yuying Shao, Zhengquan Lv, Li Deng, Aiping Wang

Research on Fuzzy Adaptive PID Control Algorithm Based on Siemens PLC SIM ......................................................................................... 293
Cheng-Wu Lin, Miao Liu, Jian-Guang Zhu

ELECTRICAL POWER SYSTEMS

Design of Household Photovoltaic Grid-connected Inverter Based on STC ................................................................................................. 297
Zhong-Mei Xi, Yang Li

Operation Characteristics of the Bidirectional LCC Resonant DC-DC Converter ......................................................................................... 300
Yingying Cai, Cong Wang

Study on Voltage Quality of VSC-HVDC Supplying Passive Networks ................................................................................................. 304
Xin Tang, Zhiwu Yang

Study on 2000V SiC JBS Diodes ................................................................................................................................................................. 308
Gang Chen, Lin Wang, Runhua Huang, Song Bai, Yun Li

Ozone Generation Properties of Screw-type Electrode Ozonizer by Divided Outer Electrodes ......................................................................................... 311
Tomoyuki Fujishima, Toru Kawaguchi, Takanobu Amano, Takahiko Yamashita

X-ray Detection Research of Current Transformer ......................................................................................................................... 315
Kuo Gao, Hong Yu, Tieqiao Guo, Erjun Pang, Tao Dong, Zhiwang Cheng, Jianhui Zhang

Research on Hydropower Peak Regulation Market ................................................................................................................................. 319
Sai Dai, Xu Zhao, Cui-Hui Yan

Research on Real Time Power System Dynamic Monitoring Master Station System Test and Evaluation ......................................................................................... 323
Kun Zhao, Sheng Liu, Zhi Cai, Yang Bai, Yansheng Lang, Qiang Li
Surface Roughness Effect on the Hydrophobicity Characteristic of Operating Composite Insulators
Song Wang, Tian Yuan, Jun Zhou, Qian-Yu Wang ................................................................. 327

Simulation Study on Internal Transparent Collector IGBT Using Superjunction Drift
Dongming Hu, Peihao Lv, Yuqiong Jia .................................................................................. 333

Transient Stability Analysis of Power System Using Improved Least Square Method and Energy
Dongrong Jiang, Zhao L, Lian Zhang ................................................................................... 337

Research on Initial Lightning Attachment Zone for Aircraft
Xiaorong Du, Guang-Bin Liu, Zhi-Yong Yu, Xin-Wu Zhuang, Yu-Long Zhao......................... 341

The Impact of Substation Circuit Breaker Failure Operation on System Transient Stability and
Counter Measures
Hui Zeng, Yu Zhu, Jingsong Liu, Gang Wang, Qiang Zhang, Tao Zhang .............................. 345

Analysis of Ac Transmission from Desert-Area Large-Scale Photovoltaic Generation
Alsalem Mohammed Hassan, Junichi Arai ......................................................................... 349

Study of a New Approach about Locating Single-phase-to-ground Fault
Bing Jiang, Chuan Zang, Zhiguo Xiao, Jie Yin .................................................................... 355

Energy Efficiency Evaluation of EV Charging Network Based on Fuzzy Comprehensive Assessment
Yabo Fan, Chunlin Guo, Wen Chen, Zongfeng Li ................................................................. 360

A Coordinative Optimization Model for Hydro-Thermal-LNG Power System
Qiang Ding, Jing-Yang Zhou, Hui Cui, Dan Xu, Wei-Gang Li, Zhi Chen, Yong Deng, Yuzhen Yao, Xin Cheng ................................................................. 364

Optimized Design of Crimping Tubes Matching with 1000mm2 Conductor
Shenghui Liu, Zhen Liu, Li Su, Lixian Zhou, Jiancheng Wan ............................................. 368

Closed-loop Control System Based on the Trajectory Information
Huaiyuan Wang, Baohui Zhang, Songhao Yang, Hao Yang, Lihua Wu, Qing Wang, Xiaojun Li, Shiyong Ma ................................................................. 372

Stability Characteristics and De-icing Modes Analysis of JinSu UHVDC Transmission Line
Jianniang Wang, Yonghua Yin, Jun Zhang .......................................................................... 376

Transient Stability Detection Scheme Based on the Trajectory Convexity for Multi-Machine Power
System
Songhao Yang, Baohui Zhang, Huaiyuan Wang, Hao Yang, Lihua Wu, Qing Wang, Xiaojun Li, Shiyong Ma, Junjie Lin ................................................................. 380

Design and realization of Convergence Controller Based on IEC61850 Protocol
Fengchen Zhou, Yufeng Duan, Ningxi Song, Jingshao Zhang ........................................... 384

Condition Assessment of Passive MRTB Based on Fuzzy Theory
Jing Dai ................................................................................................................................... 388

The Research on Asynchronous Motor Electronic Load
Guixiu Jiang, Jie Shi ............................................................................................................. 391

A Research of Active Power Filter Based on Feed-Forward Control
Xin Tang, Qi Wang ................................................................................................................ 395

Research on Crucial Techniques of Smart Distribution Grid
Zhigang Wu, Wei Wang, Jianqiang Xu, Yuqiang Xu, Jidong Shi, Dongju Wang ................. 400

Research Situation and Development Trends of Distribution Automation Technology
Wei Wang, Weiyuan Hu, Guowei Zhao, Shengwei Shen, Jidong Shi, Dongju Wang .......... 404

Comparison and Analysis of Metropolitan Power Grid Partition in China and Abroad
Nan Yang, Qingfang Yuan, Jian Sun, Haiyun Wang, Liangyu Li, Hengrui Ma, Li Liu, Shaomin Zhu ................................................................. 408

SIGNAL PROCESSING

Some Properties of Regular Crypto H^{10}-abundant Semigroups
Lili Wang, Aifa Wang .......................................................................................................... 413

Classification of Composite Power Quality Disturbance Signals Based on HHT and S-Transform
Nanhua Yu, Chuanjian Li, Rui Li, Shaoguo Yin, Wei Liu, Weiqi Tao .................................... 416

The Multi-state Model Fusion Algorithm for GNSS Navigation
Dawen Zhang ....................................................................................................................... 422

Dimension-reduced Robust Beamforming Method for MIMO Radar
Jingjun Li, Yonghua Jiang, Bo Dan, Weiwei Gao ................................................................. 426

Road Vehicle Classification Based on Extreme Learning Machine
Yan-Dehong Hao, Yi-Xin Yin, Jin-Hui Lan .......................................................................... 430

Speaker Recognition and Speech Emotion Recognition Based on GMM
Shupeng Xu, Yan Liu, Xiping Liu ......................................................................................... 434

An Adaptive Window Stereo Matching Based on Gradient
Yan He, Pei Wang, Jie Fu ..................................................................................................... 437
An Anti-interfering Reconstruction Algorithm Based on Compressed Sensing ........................................................... 441
Mei Du, Huaici Zhao, Chunyang Zhao, Bo Li

Image Matching Algorithm Based on Contourlet Transform and VA Fast Search ..................................................... 446
Jie Fu, Pei Wang, Yan He, Xiao-Qing Xu

Early TU Split Termination in HEVC Based on Quasi-Zero-Block .............................................................................. 450
Yanwu Shi, Zhiyong Guo, Xiaoyun Zhang

A Digitized Recording Data Analysis Method for Airborne Radar .............................................................................. 455
Surong Jiang, Jiangqiao Lan, Yuhai Yang

Particle Filter for Positioning Accuracy Improvement in GNSS Receiver ...................................................................... 458
Xiaowen Sun, Shufang Zhang, Qing Hu

Research and Design on the Key Technology of DVB-T Baseband System .............................................................. 463
Guocheng Wu, Zhuxin Yang, Weizhang Xu

A Digital Method of Noise Measurement of Charge-sensitive Preamplifiers Used with Detectors of Ionizing Radiation ................................................................................................................... 468
Jin-Xian Peng, Yun Yang, Jin-Tao Zhu, Jun Yang, Xiao-Liang Luo, Guo-Fu Liu

Design of Remote Fault Monitoring System Based on WAMP Press ........................................................................... 473
Yuying Shao, Zhengquan Lv, Li Deng, Aiping Wang

Study on Laser Spot Affecting the Accuracy of Transient Angle Test System Based on PSD .................................. 477
Hua Li, Jian Zhang, Da Xu, Mengchun Zhong

An Accelerated Iterative Image Reconstruction Algorithm Based on Multiple Linear Regression for Direct 3D ECT ........................................................................................................................................... 480
Yifan Wang, Hua Yan, Lijun Liu, Yinggang Zhou

Design of Translator Glove for Deaf-Mute Alphabet ................................................................................................. 485
Carlos Pesqueira Fiel, Cesar Cota Castro, Victor Velarde Arvizu, Nun Pitalua-Diaz, Diego Seuret Jimenez, Ricardo Rodriguez Carvajal

Design of Moving Target Detection and Tracking System Based on the Improved Optical Flow Method .............................................................................................................................................. 489
Jun Gui, Tiansi Ma, Lijun Liu
