TABLE OF CONTENTS
PRICM-8: 8th Pacific Rim International Congress on Advanced Materials and Processing

Preface .......................................................................................................................... liii
About the Editor/Congress Organizers ................................................................. lvii

Symposium A. Materials for Energy

Research and Production of Heavy Pipeline Plate for Submarine Gas Transmission Lines at Shougang Steel ................................................................. 3
   S. Li, C. Zha, J. Li, and W. Ding

Microstructure Characterization in Domestically-Made TP310HNbN Austenitic Stainless Steel After Creep Test ....................................................... 13
   S. Li, C. Zha, J. Li, and W. Ding

Recent Niobium Developments for High Strength Steel Energy Applications ................................................................................................. 19
   S. Jansto

Synthesis, Characterization and Pseudo-Capacitive Performance of MnOx/CNT Heteronanostructures ............................................................... 27
   K. Mondal and C. Tsai

Evaluation of the Electrical Resistance and Capacitance of a Di-Electric Electro-Active Polymer ................................................................. 35
   B. Ng, G. Lovhoiden, and J. Magbanua

Electrochemical Performance of LiMnxNi0.5-xAl2xO3 by Hydrothermal Method ................................................................. 45
   S. Woo, S. Lee, K. Lee, and Y. Yoon

Electrochemical Deposition of High Purity Silicon in Molten Salts ... 51
   G. Haarberg

Nano Scale Energetic Materials: Theoretical and Experimental Updates ............................................................................................... 57
   K. Martirosyan, Z. Ramazanova, and M. Zyskin
First Principles Studies of Mechanical Properties of Thoria ............... 65
   B. Szupunar and J. Szpunar

Characterization of the Crystallographic Textures and Mechanical
Anisotropy Factors in Two Modifications of Zr-2.5Nb Pressure
Tube Materials ..................................................................................... 71
   R. Fong, S. Vogel, R. Miller, and H. Saari

Dispersion Characteristics of PAA (Polyacrylic Acid) for Tube
Fouling Control in Nuclear Power Plant .............................................. 79
   Y. Maeng, K. Kim, H. Kwon, K. Seong, and H. Yang

Hydrogen Storage Performances of Mg_{20}Ni_{10-x}M_x (M=Cu, Co, Mn;
X=0-4) Alloys Prepared by Melt Spinning ........................................ 85
   D. Zhao, T. Zhai, T. Yang, Y. Lin, and Y. Zhang

Evidence for Existence and Generality of Competitive Reactions
during Hydrogenation of Mg/Cu Superlaminate Composites ............ 95
   K. Tanaka, H. Takeshita, K. Shibata, Y. Nishida,
   K. Kurumatani, H. Miyamura, and S. Kikuchi

Torrefaction of Yacon and Jerusalem Artichoke Stems as a
Contribution to the Alternative Production of Inulin ...................... 103
   V. Vesely, J. Sobek, J. Hanika, and M. Puncochar

Poster Session

Charpy Impacty Properties of ODS Ferritic Steels ......................... 111
   S. Ukai, W. Izawa, N. Oono, S. Hayashi, T. Sakamura,
   Y. Kohno, S. Ohtsuka, and T. Kaito

Corrosion Problems in Heat Recovery for Water Heating ............. 119
   E. Posada

Diffusion Bonding of W/ODS Steel Using Pure Iron Insert for
Fusion Reactor Applications .............................................................. 129
   H. Noto, S. Taniguchi, H. Kurishita, S. Matsuo,
   and A. Kimura

Durability and Cycling Stability of Copper Coated Titania
Nanotube as Anode Materials for Li-Ion Battery ............................... 137
   S. Kim, H. Eom, and S. Choi
Effect of Microstructure on Hydrogen Absorption Property in Hypereutectic Mg-31mass%Ni Hydrogen Absorption Alloy......... 143
H. Saitoh and M. Kondo

Hierarchical ZnO Nano-Tree Growth for High Efficiency Solar Cell .................................................................................................... 149
S. Ko and C. Grigoropoulos

Investigation on Co-Combustion Kinetics of Anthracite Coal and Biomass Char by Thermogravimetric Analysis......................... 155
G. Wang, J. Zhang, T. Xu, J. Shao, Z. Hu, and J. Qiu

Investigation on Corrosion Behavior of High-Level Waste Container Materials ................................................................. 167
Q. Xu, W. Wang, X. Pang, Q. Liu, and K. Gao

Microstructure and Properties of Nano-Structured 9CR Oxide Dispersion Strengthened Steels Produced by Atomization and Hot Isostatic Pressing ................................................................. 181
R. Xie, Z. Lu, and C. Liu

Renewable Thermoenergetic Resources in the Pyrometallurgical Copper Production Process...................................................... 189
M. Cirkovic, M. Mitovski, V. Trujic, A. Mitovski, and M. Bugarin

Study on Super Stable All-Solid-State Battery at High Temperature.......................................................................................... 197
S. Lee, S. Jee, and Y. Yoon

Study on the Combustion Characteristics and Kinetics of Pulverized Coal in High Oxygen-Enriched Condition .................... 203
J. Shao, J. Zhang, Q. Tang, G. Wang, R. Mao, and H. Sun

The Preparation and Electrochemical Performances of Al-Si/C Nanocomposite Anode for Lithium Ion Battery ......................... 213
H. Kim, K. Tulugan, F. Xue, C. Liu, X. Dong, and W. Park

Thermodynamic Evaluation for Formation of MgCu₂ from MgH₂ and Cu............................................................................... 221
K. Shibata, K. Tanaka, K. Kurumatani, Y. Nishida, and H. Takeshita
Symposium B. Materials for the Environment

Removing Pollutants from Water, Solar Energy

Synthesis and Antibacterial Properties of Silver and Copper Ions Against Escherichia Coli, Salmonella Typhimurium, Staphylococcus Aureus and Pseudomonas Aeruginosa

G. Shim, H. Eom, and S. Choi

Interaction of Tourmaline Mineral Powders with Sea Water and Its Anti-Microbial Properties

Y. Qi, Z. Zhang, and W. Li

Catalysis, CO₂, Structural Materials and Polymers

Aragonite Precipitated Calcium Carbonate: A New Versatile Functional Filler for Light Weight Plastic

T. Thriveni, U. Il, and J. Ahn

Formation, Degradation, Recycling and Recovery of Materials

Effect of PH on Susceptibility to Environment-Assisted Cracking of AZ31 Mg Alloy

T. Haruna and R. Kishimoto

Electrochemical Impedance Characteristics of Sintered 7075 Aluminum Alloy under SSRT Test

S. Sunada and N. Nunomura

Novel Self-Foaming Cellular Composites Produced from Recycled Water Potabilisation Sludge

F. Espejel-Ayala, R. Ramírez-Zamora, O. González- Barceló, and R. Schouwenaars

Electrochemical Formation of Tb Alloys in LiCl-KCl Eutectic Melts

H. Konishi, K. Mizuma, H. Ono, E. Takeuchi, T. Nohira, and T. Oishi
Poster Session

Adsorption Kinetics of CeO$_2$ Powders and Al Foam Loaded CeO$_2$. J. Chen, D. Yang, Y. Wei, J. Jiang, A. Ma, and D. Song

Studies on the Structures and Optical Properties of TiO$_2$ Doped with Transition Metals. X. Liu and Y. Fu

Symposium C. Advanced High-Temperature Structural Materials

Advanced High-Temperature Structural Materials

Coarsening Kinetics of Grain Boundary in a Cast Nickel Base Superalloy during Long Term Aging. Q. Zeng, M. Zhao, P. Yan, J. Li, J. Zhao, and L. Zhang

Dynamics of Recrystallization Behavior and Grain Growth Behavior of Nb-Ti-Al Superalloy. L. Xiao and C. Yu

Friction and Wear Properties of Sintered Sulfur-Containing High-Speed Steels at Elevated Temperature. R. Liu and X. Xiong
Fully Dense Fine Grained FeAl-Based Intermetallics Prepared by Spark Plasma Sintering Method ........................................................ 361
   V. Sima, M. Cieslar, I. Celikyurek, O. Torun, and T. Chraska

Grain Growth Behavior of a Ni-Cr Based Superalloy GH4033 in Reheating Process Prior to Hot Rolling ............................................. 369
   L. Chen, Q. Cheng, F. Zhu, and Y. Zhao

Heat Treatment Effects on the High Temperature Mechanical Behavior of Directionally Solidified MAR-M247 Superalloy ............ 379
   H. Bor, C. Wei, A. Yeh, W. He, H. Wang, and C. Kuo

Influence of Alloying Elements on Deformability of High NB Containing TiAl Alloys ................................................................. 387
   L. Zhang, J. Zheng, X. Wang, Y. Hou, X. Xu, and J. Lin

Methodologies for Long-Term Creep Life Extrapolation of Gr. 91 Steel ............................................................................................. 397
   W. Kim, J. Park, J. Jang, B. Choudhary, S. Kim, Y. Kim, and Y. Jeong

Microstructural Change of Monocrystalline Co-Al-W-Based γ'/γ Two Phase Alloys by High Temperature Creep ......................... 409
   K. Tanaka and H. Inui

   S. Tian, Z. Guo, H. Yu, Y. Su, Y. Zue, and S. Zhang

Oxidation Response of Pack Cementation Coated TZM (MO_{0.5}Ti_{0.1}Zr_{0.02}C) Alloys under Dynamic Environments .......... 425
   J. Park, J. Kim, S. Cho, and Y. Son

Planar Defects and Dislocations in Transition Metal Disilicides...... 431
   V. Paidar

Precipitation of the Gamma Prime Phase in a Ni-Co-Based Superalloy during Different Stages of Cooling ................................. 439
   C. Cui, L. Xu, X. Sun, and Y. Zhou

Preparation and Microstructure of Carbon/Carbon Composites Modified with Zr-Ti-C Fabricated by Reacted Melt Infiltration ...... 447
   Y. Zeng, X. Xiong, G. Li, Z. Chen, W. Sun, and D. Wang
Preparing SiC-TiB$_2$ Composite via Liquid Phase Sintering .......... 457
  Y. Chen, W. Sun, L. Wu, and L. Jiang

Reaction Synthesis Mechanism of TiAl Alloy Fabricated by Hot
Pressed Sintering with Mixed Powders of TiH$_2$ and Aluminum ...... 463
  D. Sun, W. Gu, Q. Wang, X. Han, G. Wu, and J. Wang

Study on the Strain Rate Sensitivity of a Ni-Based Superalloy........ 469
  L. Wang, Y. Liu, X. Song, J. Jin, J. Du, and B. Zhang

Tensile Anisotropy of a Single Crystal Superalloy.................... 475
  L. Zhang, P. Yan, M. Zhao, J. Li, J. Zhao, Q. Zeng,
  and F. Han

The Effect of Silicon Additions on the Thermal Stability and
Morphology of Carbides in a Ni-Mo-Cr Superalloy..................... 485
  L. Jiang, Z. Xu, Z. Li, Y. Lu, G. Wu, and Z. Zhou

Titanium Aluminum Alloy Fabricated by Pressure Infiltration and
Heat Treatment ........................................................................ 493
  A. Li, L. Geng, F. Li, and R. Chen

Poster Session

Correlation of Microstructures with Mechanical Properties in
Recrystallized 15Cr-ODS Steels.................................................. 501
  Y. Ha, C. Zhang, and A. Kimura

Determination of Fracture Toughness Values of Two Ni-Base Super
Alloys for High Temperature Applications ............................... 509
  M. Hasan and M. Al-Grafi

Effects of Al Addition on the High Temperature Oxidation Behavior
of CM-247 LC Ni-Based Superalloy........................................... 521
  M. Chiou, S. Jian, A. Yeh, and C. Kuo

Effects of Alloying Elements on Thermal Aging Embrittlement of
15Cr Ferritic Alloys .................................................................. 529
  D. Chen, A. Kimura, C. Zhang, and W. Han

Fracture Characteristics of a Single Crystal Nickel-Based
Superalloy .............................................................................. 537
  D. Wu, L. Tian, and C. Ma
Symposium D. Advanced Steels and Processing

Advanced Characterization of Steels

Characteristics of Deformation Induced Martensite in SUS304 Austenitic Stainless Steel Deformed at RT and -60° C ....................... 563
M. Chen, S. Gao, D. Terada, A. Shibata, and N. Tsuji

Aging Precipitation and Recrystallization Behavior After Cold Compression by 10% in High-Nitrogen Austenitic Stainless Steel... 571
S. Feng, X. Li, Q. Yang, and C. Liu

Determination of Alpha / Gamma Phase Boundaries in the Fe-Cr-Ni-Mn Quaternary System with a Diffusion-Multiple Method............. 577
I. Shuro, S. Kobayashi, T. Nakamura, and K. Tsuzaki

Performance of Steels in Experiments, Simulation, and Theory

Effect of Prior Austenite Grain Size on Hydrogen Embrittlement Behaviors in 8Ni-0.1C Steel......................................................... 583
A. Shibata, T. Matsuoka, and N. Tsuji

Effect of Al Content on Tensile Deformation and Fracture Behavior Transition Due to Strain-Rate Change in Fe-Si-Al Alloys.......... 591
T. Mizuguchi, R. Yamamoto, T. Higuchi, H. Kobayashi, H. Miyagawa, and Y. Tanaka

Influence of Silicon Addition on the Low Temperature Toughness of Pressure Vessel Steels ......................................................... 597
J. Qiu, K. Wu, J. Li, and P. Hodgson
Effect of Ferrite Grain Size on Local Elongation in a Low Carbon Steel ................................................................. 603
   N. Tsuchida, H. Nakano, and T. Inoue

Evolution of Microstructures and Texture of 1.3%Si Non-Oriented Electrical Steel in the Twin-Roll Strip Casting Process ............ 609
   Y. Zhang, Y. Xu, Y. Wang, and G. Wang

**Advanced Steels and Processing**

Influence of Pre-Oxidation on the Corrosion Behavior of Weathering Steel ........................................................................... 615
   J. Luo, S. Yang, Y. He, and X. He

Rusting Evolution and Anti-Corrosion Mechanism of MnCuP Weathering Steel in Simulated Atmospheres ............................... 623
   L. Hao, J. Dong, and W. Ke

Selective Corrosion of Stainless Steel at Low pH .............................. 631
   K. Eguchi, Y. Ishiguro, M. Kimura, and H. Kimura

Fitting and Evolution of Atmospheric Corrosion of Low Alloy Steels under Wet/Dry Cyclic Corrosion Test ................................. 639
   J. Dong and W. Ke

Study on the Corrosion Resistance of Hot Rolled Rebar Quenched with a New Chemical Reagent ........................................... 645
   J. Wei, J. Dong, and W. Ke

The Corrosion Resistance of Weathering Steels in Atmospheric Exposure and Laboratory-accelerated Corrosion Tests ............. 651
   Z. Wang, J. Liu, Y. Zhou, M. Liu, and J. Wang

Formation of Equiaxed Crystals by Complex Inclusions during Solidification of Advanced High Strength Steel ...................... 657
   J. Park, J. Park, and C. Lee

Low-Cycle Fatigue Properties of the Fe-30Mn-(6-x)Si-xAl TRIP/TWIP Alloys ............................................................................. 665
   I. Nikulin, T. Sawaguchi, and K. Tsuzaki

In Situ Observation of the Microstructure Evolution in HAZ and Analysis by EBSD ............................................................... 673
   Z. Xiong, X. Wang, X. He, C. Shang, S. Liu, and G. Yu
Low-Cost and Time-Saving Thermomechanical Treatment on 54SiCr Steel ........................................................................................................ 679
  B. Masek and V. Pilecek

Preferential Precipitation of Cementite in Ferrite under a High Magnetic Field ............................................................................................... 687
  H. Choe, I. Miyazaki, T. Terai, T. Kakeshit, S. Yamamoto, and M. Yonemura

Studying the Hot Working Characteristics and Dynamic Recrystallization Behavior of Conventional Low Carbon Steel during In-Line Strip Production Process ............................................... 695
  J. Lee and B. DeCooman

Influence of Different Parameters on Theoretical Flame Temperature Before Tuyere in Corex Melter Gasifier .................................................. 703
  Q. Liu, K. Wu, P. Fu, W. Zhan, E. Zhang, and J. Qu

Influence of the Pulverized Coal Ash on Theoretical Flame Temperature Before Tuyere in BF ............................................................. 713
  E. Zhang, K. Wu, W. Zhan, Q. Liu, X. Wu, and Y. Zhao

Removal of Phosphorus, Sulphur and Arsenic from Ferronickel and Nickel Alloys .................................................................................. 725
  H. Chehade, Y. Yang, M. Barati, and A. McLean

**Steel Processing and Production**

Molten Mold Flux Technology for Continuous Casting of the ULC and TWIP Steel .................................................................................. 735
  K. Moon, M. Park, S. Yoo, J. Park, J. Cho, and G. Shin

Effect of Steel Composition on the Scale Layer Composition in Continuous Casting ................................................................. 747
  N. Wang, H. Wen, W. Huang, N. Dou, and M. Chen

Formation and Evolution of Spinel Inclusions during Al-Killed Steel Refining .................................................................................. 753
  Z. Deng and M. Zhu

Development of a Heat Recovery System from Steelmaking Slag.... 761
  S. Ozawa, N. Sigaki, and H. Tobo
Heat Transfer Characteristic in a Slag Heat Recovery Chamber ....... 769
   N. Shigaki and S. Ozawa

Thermodynamic Analyses of Iron Oxides Redox Reactions ............ 777
   W. Zhang, J. Zhang, Q. Li, Y. He, B. Tang, M. Li,
   Z. Zhang, and Z. Zou

**Microstructural Evolution of Steels in Experiments, Simulation, and Theory**

Microstructure Evolution in the Heat-Affected Zone of Zr-Ti
Microalloyed High-Strength High-Toughness Offshore Structural
Steels ........................................................................................................... 791
   Y. Yin, N. Wu, L. Li, Y. Yao, D. Wang, H. Yan, H. Wang,
   and K. Wu

Evaluation of Kinetic Equation of Athermal Martensitic
Transformation in Low Carbon Steels.................................................. 797
   Y. Wen, F. Huang, Y. Rong, and Z. Guo

Effects of Isothermal Process on Content of Retained Austenite
in High Chromium Cast Steels ............................................................. 803
   K. Fujio, A. Yamamoto, and S. Nishikawa

**Advanced High Strength Steels**

Quenching and Partitioning (Q&P) Processing of AISI 420 Stainless
Steel ........................................................................................................ 809
   E. Seo and B. DeCooman

Q-P Process on Steels with Various Carbon and Chromium
Contents .................................................................................................... 819
   H. Jirkova and L. Kucerova

Newly Developed Advanced High Strength Steels for Automotive
Lightweight Applications ........................................................................ 825
   W. Sun
Poster Session

Effects of Heating Rate on the Phase Transformation Temperature of Austenite in M Steel Sheet ................................................................. 835
  Y. Liu and W. Sun

Effects of Negative Gradient Magnetic Field on the Carbon Diffusion Behavior in Pure Iron ................................................................. 839
  Y. Wu, G. Duan, X. Zhao, and L. Zuo

Equipment and Automation of Blast Furnace Ironmaking Process ... 847
  X. Zhang and M. Lu

Factors Affecting the Mixing Characteristics of Molten Steel in the RH Refining Process ................................................................. 863
  M. Xu, Q. Liu, G. Wu, J. Ding, J. Yang, D. Ma, L. Liu,
  B. Hu, and L. Ma

High Speed and Stable Continuous-Casting Technique on No.4CCM in JFE Steel Corporation Kurashiki Works ......................... 871
  K. Suziki, K. Okada, K. Kameda, T. Asahina, and K. Oshima

High-Temperature Deformation Behavior of Carbon Steel Containing Dispersed Fine Voids ................................................................. 879
  M. Okonogi, N. Yoshinaga, and H. Miura

Microstructural Evolution of a Medium Carbon Advanced High Strength Steel Heat-Treated by Quenching-Partitioning Process ...... 885
  N. Zhong, X. Wang, and N. Min

Self-Repairing of Damaged Rust Layers on Carbon Steel and Weathering Steel ................................................................. 891
  X. Zhang, S. Yang, J. Huang, Y. He, and X. He

Static Model for Converter Steelmaking by Using Limestone .......... 899
  B. Tang, W. Zhang, X. Wang, G. Sun, Y. He, Z. Zou,
  and A. Yu

Study for Influence of Prereduction Degree on the Softening and Melting Properties of Sinter ................................................................. 907
  R. Mao, J. Zhang, C. Chen, S. Deng, Y. Liu, J. Shao,
  and G. Wang
Study of Rack and Chord Assembly Formability for Jack-Up Platforms ................................................................. 919
K. Park, S. Kim, H. Kim, and D. Kim

The Effects of Shot-Peening on Surface Residual Stress of Advanced Ultrahigh-Strength Trip-Aided Steels .................. 927
M. Natori, S. Song, and K. Sugimoto

The Development of Microalloyed Hot-Rolled High-Strength Auto Structural Steel with High Ti Content ...................... 937
X. Ye, K. Zhang, G. Zhang, L. Lei, Z. Li, X. Luo, and X. Yang

The Production of Bio-Steel and Its Applied Research on Watches ................................................................. 943
B. Li, H. Dong, X. Bao, Y. Lang, J. Zhou, C. Xing, H. Tang, F. Rong, J. Weng, and S. Sun

Zinc Distribution in Blast Furnace and Its Damage Mechanism ....... 955
B. Dai, J. Zhang, Z. Jiang, and C. Wang

Symposium E. Light Metals and Alloys

Light Metals and Alloys

Control of Textures in Aluminum Solid Solution Alloys by High-Temperature Deformation ................................................ 965
H. Fukutomi and K. Okayasu

Deformation Behavior of LPSO Phase and Zn Accompanied by Kink Band Formation ................................................................. 973

Deformation Behavior of Mg-Y and Mg-Al-Zn Alloy Single Crystals in Compression ................................................................. 979
S. Ando, M. Tsushida, and H. Kitahara

Development of Advanced Aluminum Alloys with Nano-Hetero Structures and Their Mechanical Properties .................. 987
T. Sato
Development of Al-TiC Alloys Using Powder Metallurgy as Grain Refiners for Aluminium and Its Alloys .................................................. 997
   A. Omran

Effect of Combined Electromagnetic Fields on the As-Casting Structure and Mechanical Property of HDC Casting 7075 Al Alloy Ingot............................................................ 1009
   Q. Zhu, Z. Zhao, Y. Zuo, L. Li, X. Wang, and J. Cui

Effect of Heat Treatment on Fatigue Behavior and Mechanical Properties of Al 7021-T6................................................................. 1017
   Y. Fouad

Effect of Rotating Gas Bubble Stirring Treatment on the Microstructures of Semi-Solid AZ91-2Ca Alloy.......................... 1025
   J. Xu, G. Wu, W. Liu, Y. Zhang, and W. Ding

Effects of Electromagnetic Field on Horizontal Continuous Casting of 6061 Aluminium Alloy Bar Process................................. 1035
   X. Wang, Q. Ma, G. Sun, and J. Cui

Elimination of Iron in Molten Aluminum Scrap by Electromagnetic Stirring Technique .............................................................. 1041
   G. Lee, M. Kim, and J. Park

Formability of Mg-Li Alloy Sheet by Square Cup Deep Drawing.. 1049

Friction Stir Lap Welding of Al and Mg Alloys: Deformation and Joint Strength................................................................. 1057
   Z. Chen and S. Yasdanian

High Strain Rate Superplasticity of a Fine-Grained AZ91 Magnesium Alloy Prepared by Friction Stir Processing.................. 1065
   D. Zhang, F. Chai, and Y. Li

Improvement of Mechanical Properties and Microstructure of Twin-Roll-Cast AMX1001 Magnesium Alloy by Rolling Process........ 1073
   K. Funami, M. Noda, Y. Gonda, G. Gonda, and H. Mori

Influence of Extrusion Ratio on Microstructure and Mechanical Behavior of MG-9Li-3Al-2.5Sr Alloy................................. 1079
   Y. Yang, X. Peng, W. Xie, and G. Wei
Investigation of Abnormal Grain Growth in a Friction Stir Welded and Spin-Formed Al-Li Alloy 2195 Crew Module.......................... 1091
  W. Tayon, M. Domack, E. Hoffman, and S. Hales

Lattice Rotation Due to Cold-Rolling on 1050 Aluminum with Near Rotated Cube Orientations............................................................... 1101

Mechanical Properties and Formability of Titanium-Clad Magnesium Alloy Sheets................................................................. 1109
  H. Inoue

Mechanical Properties of Low-Cost β-Type Ti-Mn Alloys Fabricated by Metal Injection Molding ........................................... 1115
  K. Cho, M. Niinomi, M. Nakai, J. Hieda, P. Santos, Y. Itoh, and M. Ikeda

Microstructural Characterization of Metastable Phases in Homogenised and Aged Mg-Gd and Mg-Gd-Nd Alloys Containing Zn, Y and Zr.................................................................. 1123
  S. Khawaled, M. Bamberger, and A. Katsman

Microstructural Control and Mechanical Properties of Low-Cost Titanium Alloys for Next Generation Aircrafts............................... 1131

Preparation of Large Scale Magnesium Alloy Billets by LFEC Processing........................................................................................ 1139
  Q. Le, L. Bao, Z. Zhang, and J. Cui

Quantitative Analysis of Twinning-Induced Plasticity (TWIP) in β-Titanium Alloy ............................................................................. 1149
  X. Min, X. Chen, S. Emura, K. Tsuzaki, and K. Tsuchiya

Relationship Between Aluminum Oxide Inclusion and Porosity in Aluminum Melt ................................................................. 1157
  J. Zeng, D. Li, H. He, H. Zhiliu, H. Cuiyan, and Y. Jialin

Textural Stability during Annealing in Aluminum Subjected to Shear Deformation........................................... 1163
  Y. Takayama, Y. Hoshina, R. Hamano, and T. Yamamoto
The Effect of Ca Additions on the Mechanical Properties of Mg-Al-Sn Alloys ................................................................. 1169
  Y. Kim, Y. Park, and Y. Lee

The Precipitation Behavior of α Phase in a New Near β Titanium Alloy Ti-7333 during Aging Process ................................. 1175

Thermodynamic Analysis of the Mg{Y{Zn Ternary System Using the Cluster Variation Method ..................................................... 1183
  S. Iikubo, T. Umebayashi, and H. Ohtani

**Poster Session**

Age-Hardening Behavior of Deformed Excess Mg-Type Al-Mg-Si Alloys .................................................................................... 1191
  Y. Ogawa, S. Ikeno, Y. Yoshimura, K. Kita, and K. Matsuda

Aging Behavior and Microstructure Observation of MgB_{2}/Al-1mass%Mg_{2}Si Composite Materials ............................................. 1197
  C. Kawamoto, K. Matsuda, K. Nishimura, and S. Ikeno

Effect of Ca Addition on the High-Temperature Deformation Behavior of AZ31 Magnesium Alloy .............................................. 1203
  N. Sakai, K. Funami, M. Noda, and H. Mori

Effect of Crystal Grain Orientation on Grain Boundary Fracture in Polycrystalline Al-Zn-Mg-Cu Alloy ........................................... 1211

Effect of Cu/Ag Addition on the Age-Hardening Behavior in Al-Mg-Ge Alloys ........................................................................ 1217

Effect of Rolling on the High Strength of 6N01 Aluminum Alloy .. 1223
  H. Kusuhara, M. Noda, H. Mori, and K. Funami

Effect of Shot Peening on Bending Strength of AZ31 Magnesium Alloy Pipe ........................................................................... 1229
  I. Fukuda and Y. Harada
Effect of Si and Ca Additions on Microstructure of As-Cast Mg-Sn-Sr Alloy ........................................................................................................... 1237
J. You, C. Yang, K. Qiu, and G. Yang

Effects of Annealing Temperature on the Recrystallization Behavior and Microstructure of Al-Mn Alloys with Different Second Phase Particles ........................................................................................................... 1241

Grain Refinement in Pure Mg and Mg-Zn Alloys during Hot Compression Test ........................................................................................................... 1249
Y. Fukuta, D. Terada, T. Sasaki, K. Hono, and N. Tsuji

Growth of the AlN and Fe-Al Intermetallic Compound Multilayer as Different Nickel Concentration ................................................................................................... 1257
J. Kong, M. Okumiya, Y. Tsunekawa, K. Yun, S. Kim, and M. Yoshida

Hot Deformation Behavior of an Al-7.6Zn-1.8Mg-1.4Cu-0.12Zr Alloy........................................................................................................................................................... 1265
X. Li, B. Xiong, Y. Zhang, Z. Li, F. Wang, H. Liu, and L. Yan

HRTEM Observation of Precipitation in Mg-Gd-Y Alloys during Aging at 473K ............................................................................................... 1271

Influence of High Magnetic Field on Intermediate Phase Growth in Mg-Al Diffusion Couple ........................................................................ 1277
C. Ban, C. Wang, Y. Hu, L. Liu, and J. Cui

Influence of Y on the Microstructure, Mechanical Properties and Fracture Mechanism of Mg-8Li-3Zn Alloy................................................. 1283
G. Wei, X. Peng, X. Zuo, W. Xie, and Y. Yang

Influence of Y/Zn Mole Ratio on the Phase Composition and Mechanical Properties of Mg-Y-Zn Alloys ..................................................... 1291
H. Liu, F. Xue, J. Bai, and J. Zhou

Investigation on Microstructure in As-Cast Aluminum Alloy 7136 and Its Evolution during Homogenization ........................................ 1299
Z. Li, Y. Zhang, B. Xiong, Y. Fan, X. Li, H. Liu, F. Wang, and R. Zhu
Microstructural Features and Age Hardening in an Al-Mg-Ga Sacrificial Anode Alloy ................................................................. 1307
  M. Park, D. Terada, M. Marya, and N. Tsuji

Microstructure and Mechanical Behavior of As-Cast, Extruded and Nanocrystalline Mg-9Li-3Al-2.5Sr Alloy .......................... 1313
  Y. Yang and X. Peng

Microstructure Evolution of AZ91D Magnesium Alloy during Extrusion-Torsion Simultaneous Processing .......................... 1323

Observation of Equilibrium Phase for Cu or Ag Addition Al-Mg-Si Alloys ................................................................. 1329
  S. Hida, M. Tokuda, K. Watanabe, K. Matsuda, and I. Susumu

Recovery and Recrystallization in 1050 Aluminum Alloy After Cold-Rolling at 50% ........................................................ 1335
  T. Kajiura, M. Tsukamoto, and A. Yamamoto

Study on the Hot Tearing Susceptibility of Mg-7Al-xCa-2Si-0.8Zn-0.5Sr-0.4Mn Heat-resistant Magnesium Alloys .................. 1341
  J. You, S. Tao, K. Qiu, Y. Ren, and G. Yang

Variation of Aging Behavior for Cu or Ag Addition Al-Zn-Mg Alloys ........................................................................... 1349

Warm Deformation Behavior of Ti-6Al-4V Alloy at Strain Rate of 100s-1 ................................................................. 1355
  W. Zheng, P. Liu, and S. Ai-Xue

Symposium F. Composites and Hybrid Materials

Composites and Hybrid Materials

A Novel Technique to Develop a Hybrid Al-Al₂O₃-Intermetallic Fibers in MMC or FGM Structure ................................................. 1365
  B. Rabeeh

Coupled Macro-Micro Modeling for Prediction of Grain Structure of Mg-Al Alloy ................................................................. 2723
H. Hao, X. Liu, Y. Song, and X. Zhang

N. Rimkus, T. Jankowski, J. Jurney, W. Peach, and S. Stout

Kinetics Modelling of Isothermal Bainite Transformation in Low Carbon Multi-Microalloyed Steel ............................................. 2739
L. Lan, C. Qiu, and D. Zhao

Simulation on Structure of Electroslag Remelting Ingot by Cellular Automata Method ............................................................ 2747
B. Li, Q. Wang, and T. Gao

Quantitative Phase Field Simulation of Athermal Omega Transition in Ti-Mo Alloys .............................................................. 2757
B. Tang, Y. Cui, H. Kou, M. Lai, and J. Li

Phase-Field Simulation of Solidification Microstructure Evolution in the Presence of Lateral Constraints ...................................... 2765
L. Du, R. Zhang, L. Zhang, and L. Liu

Refinement of Coarse-Grained Austenite in a Nb-V-Ti Microalloyed Steel Processed by Medium-Thin Slab Casting and Direct Rolling Route ................................................................. 2773
Q. Sha and D. Li
Strain-Induced Phase Transition in Martensitic Alloys: Phase-Field Simulation
Y. Cui, J. Wan, J. Zhang, and Y. Rong

The Statistical Analysis of Dislocation Percolation: A Mathematical Contribution to Strain Hardening Theory
R. Schouwenaars

Modeling and Simulation of Materials Behavior

Computer Simulation and Optimization of Chemical Compositions of Heat-Resistant Nickel Superalloys
Y. Shmotin, A. Logunov, I. Egorov, and I. Leshchenko

First-Principles Simulations of the Initial Corrosion-Process of Iron Surface
N. Nunomura, and S. Sunada

Modelling Heat Transfer in Nanofluids Based on Coupled Md-Stochastic Simulation
M. Ghosh and R. Rai

Full-Potential KKR Calculations for Lattice Distortion of Impurities in Fe-Based Dilute Alloys, Based on the Generalized-Gradient Approximation
C. Liu, M. Asato, N. Fujima, and T. Hoshino

Reactive Force Field for Molecular Dynamics Study of the ZnO Film Growth with Different Oxygen Environment
Y. Liu, B. Sun, and Y. Qi

Size Effect on Curie and Ordering Temperatures of Magnetic Nanoalloys
C. Yang and Y. Mai

Two-dimensional Numerical Study on the Growth of Sea Ice Crystals with Flotation of Crystal Nuclei and Its C-axes Distribution
Y. Kawano and T. Ohashi
Modeling and Simulations of Materials Processing

An Overall Simulation of Austenite Grain Evolution for Heavy Forgings during Heating and Hot Deformation............................... 2847
Z. Cui, F. Chen, C. Li, and D. Sui

Computational Fluid Dynamics and Experimental Results for the Horizontal Single Belt Casting (HSBC) of Aluminum Alloy Strips................................................................................................ 2859
R. Guthrie and M. Isac

Development of a Full PLIC-VOF Method for Mold Filling Simulation of High Pressure Die Casting Process......................... 2867
C. Bi and S. Xiong

Hot Extrusion Process Design for Spray-Formed FGH95 Superalloy Based on Numerical Simulation .................................................... 2875
C. Ge, B. Guo, S. Zhang, and J. Wang

Ideal Stopper Rod Lifts for Various Casting Conditions................... 2883
P. Shivaram

On the Constitutive Modeling of the Hot Deformation Behavior of a High-Mn Twinning-Induced Plasticity Steel........................................ 2893
H. Di, J. Zhang, and X. Wang

Prediction of Casting Defects and Optimization of Casting Process during Gravity Casting of Al Turbo Charger Valve Housing......... 2901
T. Park, Y. Lee, and S. Lee

Prediction of the Shape of Molten Flux Film in Continuous Casting Process....................................................................................... 2907
K. Yi, E. Ko, and Y. Kim

Study on Prevention of Wide-Thick Slab Transverse Cracks by Optimizing the Secondary Cooling Nozzles........................................ 2913
C. Ji, Z. Cai, M. Zhu, and Y. Sahai

Fluid Flow Transport Phenomena in Steel Continuous Casting FC-Mold Strands ........................................................................... 2921
Q. Wang, L. Zhang, C. Gao, and X. Zhang
Large-Scale Simulation of Dendritic Solidification .................. 2931
   S. Felicelli, M. Eshraghi, and B. Jelinek

Mathematical Modeling of Bottom Gas Injection in Industrial
Metallurgical Ladles in the Presence of a Top Layer of Slag ....... 2941
   B. Nunez, M. Ramirez-Argaez, and A. Conejo

Mathematical Modeling of Electromagnetic Stirring of Molten
Steel in DC Arc Furnaces ............................................................. 2949
   S. Smirnov and V. Kalaev

Modeling and Simulation of High Efficiency Welding Processes... 2957
   C. Wu, Z. Zhang, and T. Zhang

Modeling of the Argon Stirring Process during Desulfurization in a
Steel Ladle ...................................................................................... 2967
   P. Shivaram

Multiphase Modeling of Macrosegregation Formation in Steel
Ingot .......................................................................................... 2977
   W. Tu, B. Shen, H. Shen, and B. Liu

Numerical Analysis for Flexible Roll Forming ......................... 2987
   D. Kim, M. Cha, and J. Nam

Fuzzy Controlling Withdrawal Technology by Numerical
Simulation to Optimize Directional Solidification Process of
Superalloy Casting ........................................................................ 2993
   H. Zhang, Q. Xu, and B. Liu

Modeling of Thin Strip Profile during Cold Rolling on Roll Crossing
and Shifting Mill ........................................................................... 3001
   A. Aljabri, Z. Jiang, D. Wei, X. Wang, and H. Tibar

Formation of Free Surface Vortex in the Steelmaking Process (Dual
Tapping Hole System in a Converter) ............................................. 3009
   S. Lee, S. Kim, and H. Lee

Front Tracking Model of Simultaneous Melting and Solidification
during Multiple Layer Deposition in GMA Welding ................. 3017
   G. Duggan, M. Tong, and D. Browne

Numerical Simulation of Solidification and Macro Segregation in
Water Cooled Heavy Steel Ingot .................................................... 3025
   Z. Duan, H. Shen, and B. Liu
Numerical Study on Behavior of Top-Blown Supersonic Jets and Their Interaction with Bath in BOF Steelmaking Convertor ........... 3033
M. Li, Q. Li, L. Li, M. Feng, Z. Zhang, and Z. Zou

A Study on Heat Transfer at Metal/Die Interface during High Pressure Die Casting of AM60B Alloy ........................................... 3041
Y. Cao, Z. Guo, and S. Xiong

The Numerical Simulation of Flow-Field Inside the Raceway in Blast Furnace Based on CFD................................................................. 3051
H. Sun, J. Zhang, Z. Liu, J. Qiu, R. Mao, and G. Wang

Thermo-mechanical Behavior and Cracking Susceptibility of Solidifying Shell in Continuous Casting Mold......................... 3063
M. Zhu and Z. Cai

Poster Session

A Parametric Study of Resistance Spot Welding of a Dual-Phase Steel Using Finite Element Analysis ................................. 3073
M. Eshraghi, M. Tschopp, M. Zaeem, and S. Felicelli

An Approach for Modelling Carbon Homogenization Processes of Steel in Micro-Scale ................................................................. 3081
W. Wang, C. Ma, S. Wang, J. Cao, J. Cai, and J. Lin

Analysis of Electromagnetic Field and Temperature Field in ESR Process with Three Electrodes ...................................................... 3091
F. Wang, B. Li, and T. Gao

Fuzzy Control Expert System of Hot Blast Stove Based on Simulation and Thermal Balance ................................................. 3099
H. Guo, B. Yan, J. Zhang, and S. Chen

Influence of Different Blast Furnace Dead-Man State to Hot Metal Flow Field in Hearth and Bottom .................................................. 3109
H. Guo, B. Yan, M. Zhu, J. Zhang, and Y. Liu

Molecular Dynamics Study of Zirconium and Zirconium Hydride. 3119
R. Siripurapu, J. Szpunar, and B. Szpunar
Numerical Analysis of Electrorefiner for Spent Nuclear Fuel and Measuring the Composition of Molten Salt by Using the Libs ....... 3127
S. Kim, S. Park, S. Lee, J. Kim, H. Lee, and J. Lee

Numerical Analysis of Engineering Scale Cathode Process by Using Phase Change Model............................................................. 3135
B. Yoo, S. Kwon, J. Kim, and J. Lee

Numerical Simulation of the Erosion in the Hearth of COREX Melter Gasifier under the Condition of Different Drainage Type.............. 3141
K. Du, S. Wu, M. Kou, Z. Zhang, and W. Shen

Numerical Simulations of Non-Metallic Inclusions Behavior in Gas-Stirred Ladle ................................................................. 3149
W. Lou and M. Zhu

Optimization of Hot-Zone Design through CFD Analysis for Kyropoulos Sapphire Single Crystal Grower .................................. 3157
J. Kim, J. Ryu, Y. Park, and Y. Lee

Physical Modeling on the Mold Flow Field Influenced by Nozzle Clogging .................................................................................. 3163
L. Sun, J. Li, L. An, L. Wang, H. Tang, and Y. Gao

Simulation on the Melting Process of Iron Oxide Pellet in Slags.... 3171
Y. He, G. Wei, B. Tang, W. Zang, M. Li, and Z. Zou

The Bustling Nature of Vacancies in Al Alloys .............................. 3181
P. Lang, E. Povoden-Karadeniz, W. Mayer, A. Falahati, and E. Kozeschnik

Three-Dimensional Numerical Simulation of the Thermal Damaged Mechanism of Baosteel Blast-Furnace Tuyere .......................... 3189
Z. Zhang, S. Wu, and K. Du
Symposium M. Bulk Metallic Glasses, Nanocrystalline Materials, and Ultrafine-Grain Materials

**Metallic Glass**

Correlation between Internal States and Strength in Bulk Metallic Glass

*J. Tan, C. Li, Y. Jiang, R. Zhou, and J. Eckert*

Fabrication and Mechanical Properties of Cu-Based Bulk Metallic Glass and Composites

*J. Wu, Y. Pan, J. Pi, and L. Wang*

Castability of Bulk Metallic Glass Materials for Multi-Scale Tooling Applications

*P. Meagher and D. Browne*

Bulk Metallic Glass Composites Fabricated within the Supercooled Liquid Region

*K. Shamlaye, K. Laws, and M. Ferry*

Electrical Resistivities of La₅₅Al₂₅Ni₁₀Cu₁₀ Bulk Metallic Glasses in Isochronal and Isothermal Heating Processes

*B. Liu and F. Ye*

**Nanofunctional Materials**

Synthesis and Characterization of Bulk Nano Crystalline Pb Free Solders

*J. Rao, D. Kush, and I. Murthy*

Martensitic Transformation Behaviors of Fe-Ni Nanoparticles under External Field

*M. Jin, W. Zhou, and X. Jin*
Ultrafine Grained Materials

Microstructure and Mechanical Properties of Harmonic Structure Designed Pure Aluminum................................................................. 3253
   M. Ota, T. Seo, and K. Ameyama

Aging Behavior of Ultrafine Grained Commercial Al-Mg-Si Alloy Severely Deformed by ARB Process.............................................. 3259
   D. Terada, Y. Kaneda, Z. Horita, K. Matsuda, T. Hamaoka,
   S. Hirosawa, and N. Tsuji

Microstructure and Mechanical Properties of Coarse and Ultrafine Grain Titanium with Different Iron Contents......................... 3265
   V. Anumalasetty, G. Colombo, G. McIntosh,
   Y. Mardakhayeva, and D. Yu

Combination of ECAP Process and Heat Treatment to Achieve Refining Structure of Selected Magnesium Alloys ....................... 3275
   S. Rusz, L. Cizek, E. Hadasik, T. Donic, S. Tylsar,
   M. Salajka, J. Kedron, M. Klos, and P. Bobek

Influence of Low Temperature Annealing on Mechanical Behavior of Cu and Cu-Ge Alloy Processed by Cold Rolling....................... 3283
   Y. Gong, X. Wu, S. Ren, L. Cheng, Y. Long, and X. Zhu

Poster Session

Fabrication of Bulk Nanocrystalline Ni-W with Plastic Deformability Electrodeposited from a Sulfamate Bath .................................. 3291
   I. Matsui, Y. Takigawa, T. Uesugi, and K. Higashi

Formation and Mechanical Properties of Bimodal Microstructures in 0.2% Carbon Steel by Heavy-Reduction Hot Compression ........... 3297
   H. Park and J. Yanagimoto

Improved Mechanical Properties of V-Added Medium Mn Trip Steel .................................................................................................. 3303
   S. Lee and B. DeCooman

Influence of Cold Rolling Routes on Mechanical Properties of Copper Subjected to ECAP ............................................................. 3307
   Y. Jiang, J. Wang, M. Zening, and Z. Li
Martensitic Transformation from Nanocrystalline Austenite in Fe-Ni Alloys Fabricated by Electrodeposition

F. Ichikawa, A. Shibata, H. Adachi, T. Yamasaki, and N. Tsuji

Maximizing Performance of Al-Fe Alloys Processed by High-Pressure Torsion with Optimized Initial Microstructure and Processing Route

J. Cubero-Sesin, M. Watanabe, and Z. Horita

Microstructure Quantification and Mechanical Properties of Ultrafine Grained Fe-Cr Alloys and Pure Copper by Equal Channel Angular Pressing

M. Rifai, R. Haga, H. Miyamoto, and H. Fujiwara

Symposium N. Advanced Materials Characterization and Evaluation

Nanomaterials Characterization and Evaluation

Physical and Chemical Heterogeneity of Carbon Fibre

M. Huson, J. Church, A. Kafi, J. Khoo, K. Mangalampalli, J. Bradby, and B. Fox

Novel Scanning Electron and Scanning Probe Microscopy Techniques

TEM Studies on RMnO₃ Multiferroic Materials

A Novel Oxide Characterization Method of Nickel Base Alloy 600 Used in Nuclear Plant Reactors

E. Broitman, R. Becker, K. Dozaki, and L. Hultman

Conventional and Analytical Electron Microscopy Study of Phase Transformation in Implanted Diamond Layers

S. Rubanov, B. Fairchild, A. Suvorova, P. Olivero, and S. Prawer
Integrated Computational and Experimental Tools for Analysis of Microstructure-Property Relationships

Relationship Between Fracture Toughness and Microstructure of a New Near β Titanium Alloy ................................................................. 3371

Microstructure-Bendability Relationship in V-Bending of Cast Aluminum Alloy A356 ................................................................. 3379
   M. Jain, M. Marzouk, and S. Shankar

Multi-Functional Kic-Test Specimen for Assessment of Different Tool and High-Speed Steel Properties............................................. 3387
   V. Leskovsek and B. Podgornik

Interface Structure

Effect of High Angle Grain Boundary on Deformation of Aluminum Bicrystalline Nanopillars ................................................................. 3395
   Y. Kim and S. Han

Detection of Hydrogen Release from the Grain Boundary Fracture Zone in 7075 Aluminum Alloy.................................................... 3403
   K. Horikawa, S. Hokazono, K. Tanigaki, and H. Kobayashi

In-Situ Microscopy and Analysis

In-Situ X-Ray Radiographic Observations of Eutectic Transformations in Al-Cu Alloys ................................................................. 3409
   A. Murphy, W. Mirihanage, R. Mathiesen, and D. Browne

Poster Session

Fabrication of Uranium Dispersion Targets for Mo-99 Production. 3417
   M. Sim, H. Ryu, Y. Lee, J. Park, and J. Lee

High Cycle Fatigue Behavior of PH13-8Mo Straight Lugs.............. 3427
   S. Wen, C. Liu, and C. Ma
Influence of Trace Sb Addition in Ductile Cast Iron....................... 3435

H. Takamichi, K. Kenta, I. Susumu, S. Seiji, T. Kiyoshi,
and M. Kenji

Microbiologically Influenced Corrosion of Pipelines in the Oil & Gas
Industry............................................................................................ 3441

F. Alabbas and B. Mishra

Sensitivities of Depth Resolution to Sampling Depth and Sputter Ion
Energy in XPS Depth Profiling ....................................................... 3449

J. Ying, M. Zhang, R. Ji, H. Xie, and J. Tsai

TEM Observation of Spheroidal Graphite in Ductile Cast Iron ...... 3459

H. Takamichi, K. Takahiro, I. Susumu, S. Seiji, T. Kiyoshi,
and M. Kenji

Symposium O. Advanced Neutron and
Synchrotron Studies of Materials

Thin Films and Intergranular Phenomena

Measurement of Distributions of Local Internal Stress near Grain
Boundary in SUS316 by EXDM Using White X-Ray Micro
Beam................................................................................................ 3467

T. Miyazawa, K. Kajiwara, M. Sato, T. Hashimoto,
T. Yamada, T. Terachi, T. Fukumura, and K. Arioka

Plasticity and In Situ Studies

Neutron Diffraction Study and EPSC Modelling of Multi-Pass TIG
Weld ............................................................................................. 3475

Energy Dispersive Synchrotron Diffraction for In-Situ Analyses of
Hydrogen Behavior in Steels......................................................... 3481

T. Kannengiesser and E. Dabah
New Opportunities for Materials Science

Single-Shot Time-Resolved X-Ray Scattering Measurements of
Polycrystalline and Amorphous Materials under Shock Wave
Loading................................................................. 3489
  K. Ichiyanagi, K. Nobuaki, S. Nozawa, T. Sato, J. Hu,
  K. Nakamura, S. Adachi, and Y. Sasaki

The MAX IV: A Light Source for the Future ......................... 3497
  C. Quitmann, J. Andersen, Y. Cerenius, F. Hennies,
  and A. Steuwer

Poster Session

Real-Time Investigation of the Structural Evolution of Electrodes
in a Lithium-Ion Battery Containing V-added LiFePO4 Cathode Using
In-Situ Synchrotron X-Ray Powder Diffraction ......................... 3505
  C. Hu, K. Shih, C. Chiang, H. Su, B. Shew, and C. Lee
