A Broadband Signal Capture and Tracking Algorithm Based on FPGA ................................................................. 1
Shouxi Zhu, Jianzhong Qi, Qingping Song

A Hierarchical Security Architecture of VANET ................................................................................................. 6
Qingzi Liu, Qiwu Wu, Li Yong

A High Accuracy Positioning Technology of Wireless Research and Implementation ........................................... 11
Yuqiu Zhu, Peng Song, Jianzhong Qi

A Modified PTS Fusion Algorithm for PAPR Reduction of OFDM Systems in Cyberspace .................................. 16
Jing Yan, Jianping Wang, Zhen He

A New High-Power LED Drive Power Design Based on "PFC+LLC+VC, CC" Topology Structure ....................... 20
Wenfang Li, Haixia Li, Jiayi Chen

A Performance Testing and Optimization Tool for System Developed by Python Language .................................. 24
Haojie Fan, Yongmin Mu

A Quantization Feedback Algorithm Based on Error Comparison in Multi-Basestation Cooperation System .............. 28
Dongsheng Han, Wei Yang, Zhixiong Chen, Jingfang Sun

A Rapid Path Planning Adaptive Optimization Algorithm Based on Fuzzy Neural Network for Multi-Robot Systems ................................................................. 32
Huan Zhang, Zhiguo Shi, Xiancui Wei

A Secure Biometric-Based Authentication Scheme Using Smart Card ................................................................. 39
H. B. Tang, Z. J. Zhu, Z. W. Gao, Y. Li

A Secure Mechanism for Networked Control Systems Based on TrueTime ......................................................... 44
Liyong Zhang, Lun Xie, Weize Li, Zhiliang Wang

A Trust Evaluation Model with Elimination of Uncertain Recommendation .......................................................... 50
Guoqiang Zhou, Qingkai Zeng, Guofu Zhou

A Two-Stage Allocation Optimization in Static Load Balancing of HLA Distributed Simulation ......................... 56
Xiaojiao Fan, Bin Gan, Ping Wu

A User Clustering Algorithm Considering User's Interest-Offset ....................................................................... 62
Guoqiang Zhou, Hao Ding, Guofu Zhou, Weifeng Zhang

A Utility-Based OFDM Resource Allocation Scheme for LEO Small Satellite System ......................................... 68
Xiaofu Wu, Yueyuan Chen, Liqiang Gao, Chao Meng

A Weighted D-S Evidence Theory Based Cooperative Spectrum Sensing to Defend PUE Attack .......................... 74
Liping Du, Shaokun Jiang, Fei Li

A Weighted Event Decision Mechanism for Cyberspace ..................................................................................... 78
Xiaojia Ma, Qian Liu, Chao Guo, Xianwei Zhou, Du Liping

An Anonymous Signcryption Scheme Based on One-Off Public Key ................................................................. 81
Longjun Zhang, Cheng Guo, Zhonghua Xv, Lulin Zhang

An Energy-Saving QoS Routing Protocol in Green Internet .............................................................................. 88
Jinhong Zhang, Xingwei Wang, Min Huang

An Improved Jobs Algorithm for Queue Schedule of HF Gateway ..................................................................... 103
Chuan Jiang, Guoce Huang, Binghe Wang, Yu Chen

An Improved Sum Rule for Multi-Unit Biometric Fusion Based on MCYT Database ........................................... 109
Yong Li, Meimei Shi, Qiwei Wu

Analysis of Link Traffic Load-Based Channel Assignment for Multi-Radio Mesh Network ................................. 115
Yan Hua, Dongsheng Han, Xiaojie Guo, Tao Jing, Dezhenn Zhang

Application of Distinguishable Weight Based Uncertain Measure Model in Water Quality Assessment ................. 124
Yan Sun, Yu Zhang

Application of Fuzzy Comprehensive Evaluation in the Evaluation of Expressway Service Quality ...................... 131
Zhijia Yang, Yongmin Mu, Cuitiao Zhang

Application of Multi-level α-β-γ Filter in Velocity Measurement ........................................................................ 136
Beinian Zhang, Peng Song, Jianzhong Qi

Causes Analysis and Countermeasures of Large-Scale Wind Turbine Network Removal ....................................... 146
Jianwei Wang, Bo Liu

Chaos-based Secure Scheme Against DNS Hijacking in the IP Multimedia Subsystem ........................................ 150
Chengsu Lu, T. Robles Valladares, Gang Zhu

Comparison of MFCC and DWT Features for Automatic Speech Recognition of Urdu ........................................ 154
H. Ali, Xianwei Zhou, Sun Tie
Cyberspace Based Wisdom
Xianwei Zhou, Zhimi Cheng, Jiahua Liu, Fuhong Lin, Jianwei An .......................................................... 159

Design and Implementation of Public Logistics Information Platform .................................................. 162
Li Jie

Design and Implementation of Wireless Voice System Based on Central Station .................................. 167
Jie He, Wei Yang, Yadong Wan, Qin Wang

Design and Realization of the Novel Temperature Measuring and Display System .......................... 172
Yang Sen, Xue Qing

Design of Miniature Photovoltaic Power Generation System Based on ZigBee Network Technology ........ 175
Jin-Qiao Yi, Xiao-Yuan Tan, Jian-Jun Tan, Yong Huang, Xian-Bo Sun, Hong-Hua Liao

Detection of Software Vulnerabilities Based on Fuzzing ..................................................................... 192
Mingxiang Bi, Xuan Huang, Rui Huang

Distributed Storage Based on Cloud Computing ...................................................................................... 196
Shuang Li, Xuefeng Li

DLTDM: A Dynamic Layout Time Division Multiple Access Channel Allocation Protocol Based on Real-Time Geolocation System .................................................................................. 199
Jie He, Cheng Xu, Bingfeng Liu, Qin Wang

Downlink Coverage of TD-SCDMA Femtocell ......................................................................................... 206
Chao Wang

DTN Routing (CDPR) Algorithm Based on Contact and Deliver Probability .......................................... 210
Xinya Li

E-Commerce Law in Cyberspace: Issues, Challenges and Suggestion .................................................... 214
Xianwei Zhou, Zhimi Cheng, Fuhong Lin, Jianwei An

Effects of Superimposed Signal on Microwave Photonic Filter Performance ..................................... 217
Duan Gao, Jianping Wang

Established at the Beginning: VOD Users' Loyalty, Lifespan and Visiting Pattern ............................... 222
Huizhen Zou, Yuchun Guo, Yishuai Chen, Wei Zhu

Flatten Design of Open Document Query (ODQ) ................................................................................. 228
Feng Ling, Xuhong Liu, Yingai Tian, Ning Li

Gaussian Mixture Model for Background Based Automatic Fall Detection ....................................... 234
Huer Xiao, Xianwei Wang, Qiang Li, Zhiliang Wang

Image Denoising Based on Non-Subsampled Shearlet Transform ........................................................ 238
B. Qi

Inspirations for Office Document Formats from Web Office ................................................................ 242
Jiang Tang, Yun-Mei Shi, Ning Li

Zhiquiang Guo, Long Wu, Yadong Wan, Shihong Duan

IVIT: A Core Stateless IPv4/IPv6 Transition Mechanism Combining Translation and Tunnel Technologies .......................................................... 252
Jingtao Su, Xianwei Zhou

Limited Communication Information Fusion Algorithm Based on Complex Network for Multi-Robot System Companies ......................................................................................................................... 258
Zhiqiao Shi, Kaifang Hu, Jun Tu, Qiao Zhang

LiKademlia - Topology Matching and Load Balancing P2P Model ....................................................... 263
Yong Zhu, Yue Hu

Making HCloud Service Trustworthy with TPM-Based Extension ......................................................... 268
C. G. He, D. Xu, X. M. Fan, Y. Li

Management Information System for Gift Picking Card Authenticity and Exchange ...................... 274
Li Jing

Management Process Based Cloud Service Security Model ................................................................. 278
Zhiwei Gao, Yao Li, Hongbin Tang, Zhijun Zhu

Mathematical Model for Status Space Transfer in Dynamics System and Reciprocal Calculation Method for Status Transfer ...................................................................................................................... 282
Shaozhong Cao, Yang Li

Method for Determining Dynamic Characteristics Analysis and Parameters of Phase-Locked Frequency Circuit ............................................................................................................................... 287
Li Li, Bing Li

Microwave Photonic Filters Based on Phase Modulator and Fiber Bragg Gratings ................................ 290
Yongtao Li, Jianping Wang, Mingyue Sang

Modelling and Analysis of Phishing Attack Using Stochastic Game Nets ............................................. 300
Min Tu, Chao Liu, Xinxiang Qiu, Shuang Zhao
Moving Target Detection in the Binocular Vision System ................................................................. 306
   Wei Song, Ming Li
Multilayer Satellite Network Routing Based on Hypergraph Theory .............................................. 312
   Chao Guo, Yi Chen, Guo-Cai Jia, Xian-Wei Zhou
Comparisons of Image Matching Methods in Binocular Vision System ............................................. 316
   Wei Song, Hong-Huang Liu
On Data Transmission System Based on the CPCI Bus ................................................................. 321
   Jing Zha, Peng Song, Jian-Zhong Qi
Optimal Transmission Distance of Mean Progress and Mean Transport in Device-to-Device Networks ......................................................... 332
   Huanle Zhang, Yu Fu, Jian Liu
PCA Based Shadow Cutting Model of Multiband Remote Sensing Image ...................................... 338
   Xiao-Man Li, Gang Wang
Performance Analysis and Optimization of the Interference-limited Multi-hop Wireless Relaying System .......................................................................................... 342
   Weifeng Mou, Fang Fang, Xuaxuan Tang, Xiaoming Xu, Weiwei Yang, Yueming Cai
Power Allocation Based on Stackelberg Game in a Jammer-Assisted Secure Network ..................... 347
   Junyue Qu, Yueming Cai, Jianwen Lu, An Wang, Jianchao Zheng, WendiJiangg Yang, Nianfeng Weng
Propagation of Computer Viruses Via Pseudodigital Mobile Communications Networks .................. 353
   Yuan-Bo Chai, Chao Liu, Wan-Li Chen, Hua-Qin Jiang
Quality Evaluation of Facial Image Toward Age Estimation .............................................................. 358
   Xing Zhang, Xianwei Wang, Huer Xiao, Tao Liu, Zhihliang Wang
Research of Automatic Parking System Based on License Plate Recognition .................................... 363
   Qing Tian, Teng Guo, Long Zhang, Shuai Qiao
Research of Cyberspace Architecture ......................................................................................... 367
   Jinhua Liu, Haitao Xu, Xianwei Zhou, Fuhong Lin, Jianwei An
Research of GNSS Real-time Pseudorange Differential Positioning Technology ............................... 370
   Jianhui Nie, Jianzhong Qi, Peng Song
Research of Secure Ecosystem Based on Android Platform ............................................................... 375
   Jinhua Liu, Wenbo Pan, Jiahui Hu, Xianwei Zhou, Jianwei An
Research of Transmission Loss Analysis in Deep Space Communication ........................................... 380
   Xianbang Hu, Haitao Xu, Xianwei Zhou
Research of Wisdom Oriented Architecture Based on Next Generation Networks ............................ 384
   Jiahui Hu, Xianwei Zhou, Yi Xie, Fuhong Lin, Jianwei An
Research on Anti-interference Method of Underwater Acoustic Communication Based on OFDM ........ 387
   Qianqian Bai, Yongmin Ma
Research on Authentication Mechanism of Cyberspace Based on Signature of Knowledge ................. 392
   Ning-Ning Song, Xian-Wei Zhou, Fu-Hong Lin
Research on Interference Cancellation of Quasi-Synchronous Visible Light Communication Systems ........ 401
   L. F. Feng, J. P. Wang, L. P. Du
Research on Mobility Management of Heterogeneous Wireless Access Network ............................ 404
   Yuan-Bo Chai, Wan-Li Chen, Chao Liu, Hua-Qin Jiang
Research on Semiconductor Lighting Engineering Situation and Development Trend ....................... 408
   Wenfeng Li, Zijing Li, Jiayi Chen
Retrieval Model of Social Books Based on Multi-Feature Fusion ..................................................... 411
   Li Song, Bo-Wen Zhang, Xu-Cheng Yin, Hong-Wei Hao
Secrecy Performance of MRT/RAS System with Outdated CSI in MIMO Wiretap Channels ................. 422
   Jianwei Hu, Yueming Cai, Weiwei Yang, Shining Xu
Security in Cyberspace: Issues, Challenges and Suggestion ............................................................. 428
   Yan Ding, Xianwei Zhou, Jinhua Liu, Fuhong Lin, Jianwei An
Service Analysis and Optimization Program of LAN Based on OPNET ............................................ 431
   Lin Yao, Guocai Jia, Fuhong Lin, Chao Guo, Xiao Ma
SOMNN-SVM: A Reduction Strategy for Large Scale Training Sample Set .................................... 438
   Yong-Hong Xie, Aiziguli Wulamu, Zhi-Yu Wang, Xiao-Jing Hu
Structural Design of Distributed Software System Based on Component ......................................... 444
   Hongxia Wang, Xiaoqiang Tang, Tianru Hu
Text Classification Dimension Reduction Algorithm for Chinese Web Page Based on Deep Learning ........ 451
   Feng Shen, Xiong Luo, Yi Chen
The Application of Entropy Weight Unascertained Model in Mine Safety Evaluation ....................... 457
   Sun Yan, Zhang Yu, Jianwei An
The Architecture and Key Technologies of Internet of Things in Logistics ...................................... 464
   Zhongguo Ma, Xinsheung Shang, Xinxi Fu, Feng Luo
The Design of Multi-Zone Wireless Burglar Alarm System ................................................................. 469
Juqin Zhang, Liqin Yue
The Law of the Distribution in KAD’s Routing Table ............................................................................. 473
Yang Yu, Hui Liu, Tianzuo Wang, Huaping Hu
User Scheduling Algorithm Based on Beam Selection in the Multi-Basestation Cooperation System .......... 489
Dongsheng Han, Wei Yang, Zhixiong Chen
Wisdom Security Model Against Internal Attackers for Cyberspace ...................................................... 493
Yan Ding, Jinhua Liu, Xianwei Zhou, Fuhong Lin
An Optimization Model and Its Algorithm of Bulk Grain Transportation with Time Windows ................ 496
Kaili Shao, Fengting Li
A Click-Through Rate Prediction Model and Its Applications to Sponsored Search Advertising ............... 500
Jing Ma, Xian Chen, Yueming Lu, Kuo Zhang
A Modified PSO Algorithm for Optimal Protection Capacity in Optical Network ................................... 504
Xi Chen, Yueming Lu, Shuai Zhang, Kuo Zhang
A Multi Feature Fusion Clustering Algorithm Based on Q&A Community ............................................ 509
Diandian Qian, Yonghua Li, Yueming Lu
A Simplified Implementation of Barbell Lifting Wavelets for Scalable Video Coding ............................. 514
Zhuoliang Zhang, Xi Zhang, Songlin Sun, Xiaojun Jing, Hai Huang, Yueming Lu
Codebook-Based Hybrid Opportunistic Interference Alignment ............................................................... 520
Haijing Liu, Tiejun Lv, Yueming Lu
An Improved DFT-based Channel Estimation Method for OFDM System ............................................... 550
Xingxing Li, Xiaojun Jing, Songlin Sun, Hai Huang, Yueming Lu
Decision Feedback Threshold Selection for UWB TOA Estimation with Energy Detection Receiver ........... 555
Hong Cai, Tiejun Lv, Yueming Lu
A Small-File Writing Acceleration Mechanism for Distributed File System ........................................... 561
Yu Yang, Lei Qi, Yueming Lu, Kuo Zhang
Exact Analysis of Transmit/Receive Zeroforcing Based MIMO AF Two-Way Relaying When Relay Has Two Antennas ................................................................................................................................. 565
Rongsheng Li, Tiejun Lv, Yueming Lu
The Massive MU-MIMO System with Optimal Number of Users Through Linear Precoders ................... 571
Ou Bai, Tiejun Lv, Haijing Liu, Yueming Lu
A Blended Feature Selection Method in Text Classification ..................................................................... 577
Kewei Shen, Xian Chen, Jing Ma, Le Ke, Yueming Lu, Kuo Zhang
Research of Centralized Multicast Key Management for LEO Satellite Networks .................................... 581
Qian Liu, Ningning Song, Wenlu Zeng
