Symposium on Biomathematics (Symomath 2013)

West Java, Indonesia
27–29 October 2013

Editors
Hidetaka Arimura
Kyushu University, Fukuoka, Japan
Nuning Nuraini
Institut Teknologi Bandung, Bandung, Indonesia

All papers have been peer reviewed.

Sponsoring Organizations
Center of Mathematical Modelling and Simulation (PPMS)
Institute for Research and Community Services (LPPM)
Institut Teknologi Bandung

Committees

INVITED PAPER

Application of computational physics: Blood vessel constrictions and medical infuses
Suprijadi, M. R. A. Sentosa, P. Subekti, and S. Viridi

CONTRIBUTED PAPERS

Analysis of the dengue disease model with two virus strains
F. Adi-Kusumo, A. N. Aini, and M. Ridwan

Optimal control problem in correlation between smoking and epidemic of respiratory diseases
D. Aldila and M. Apri

Model for social interaction, competition and dominance in ant colonies
N. Anggriani, I. Aryani, Darmawati, and A. K. Supriatna

Coexistence analysis of diploid and triploid hybrid water frogs
M. Apri, D. Suandi, and E. Soewono

On the robust optimization to the uncertain vaccination strategy problem
D. Chaerani, N. Anggriani, and Firdaniza

Optimal intravenous infusion to decrease the haematocrit level in patient of DHF infection
D. Handayani, N. Nuraini, R. Saragih, K. P. Wijaya, and J. Naiborhu

Molecular dynamics simulation of soft grains: Malaria-infected red blood cells motion within obstructed 2-D capillary vessel
L. Haris, S. N. Khotimah, F. Haryanto, and S. Viridi

Modelling on corrosion inhibitor kinetics in carbon steel pipe used in oil industry
A. N. Hasmi, N. Nuraini, D. Wahyuningrum, N. Sumarti, and B. Bunjali

Marine biological metapopulation with coupled logistic growth functions: The MSY and quasi MSY
H. Husniah and A. K. Supriatna
Estimating dynamic transmission parameters of the SIR model based on a kernel-based Gaussian process
S. W. Indratno and A. Shabrina 57

A model dynamic for effect latent population to co-epidemic of HIV-TB
Jafaruddin, Sutimin, and Ariyanto 61

Local stability of a five dimensional food chain model in the ocean
W. M. Kusumawinahyu and M. R. Hidayatulloh 66

Mathematical model of tuberculosis transmission in a two-strain with vaccination
J. Nainggolan, S. Supian, A. K. Supriatna, and N. Anggriani 70

Estimating parameter of influenza transmission using regularized least square
N. Nuraini, Y. Syukriah, and S. W. Indratno 74

Probabilistic classification method on multi wavelength chromatographic data for photosynthetic pigments identification

A simulation model on the optimization time for the sudden weaning of angelfish (Pterophyllum scalare)
D. N. Putri and N. Sumarti 84

Mathematical modeling of nasopharynx carcinoma on cell level
Sugiyanto, F. Adi-Kusumo, L. Aryati, and M. S. Hardianti 88

A dynamical system of deposit and loan volumes based on the Lotka-Volterra model
N. Sumarti, R. Nurfitriyana, and W. Nurwenda 92

Age structured dynamical model for an endangered lizard Eulamprus leuraensis
A. K. Supriatna, Q. Rachmadani, F. Ilahi, N. Anggriani, and N. Nuraini 95

Volume estimation of brain abnormalities in MRI data
Suprijadi, S. H. Pratama, and F. Haryanto 101

Numerical simulation of a two-sex human papillomavirus (HPV) vaccination model
I. Suryani and F. Adi-Kusumo 105

Stability analysis of a discrete Hutchinson equation with discrete and distributed delay
A. Suryanto, I. Yanti, and W. M. Kusumawinahyu 115

A nonlinear SIR with stability
Trisilowati, I. Darti, and S. Fitri 119
Self-motion mechanism of chained spherical grains cells  
S. Viridi and N. Nuraini  
123

Optimization model of vaccination strategy for dengue transmission  
H. Widayani, M. Kallista, N. Nuraini, and M. Y. Sari  
127

Simulation of mosquitoes population dynamic based on rainfall and average daily temperature  
H. Widayani, Seprianus, N. Nuraini, and J. Arum  
132

A comparison of binary and continuous genetic algorithm in parameter estimation of a logistic growth model  
Windarto, S. W. Indratno, N. Nuraini, and E. Soewono  
139
