Institute of Navigation
International Technical Meeting
2014

(ITM 2014)

San Diego, California, USA
27-29 January 2014

ISBN: 978-1-63266-080-0
## PLENARY SESSION

**Ubiquitous Positioning: A Pipe Dream or Reality?**  
T. Moore, The University of Nottingham, UK  1 - 36

**Policy and Privacy Considerations in a GPS World**  
A. Eisenstadt, National Coordination Office United States of America  37 - 55

## Advanced RAIM and Autonomous Integrity 1 and 2

**The Effect of Nominal Signal Deformation Biases on ARAIM Users**  
R.E. Phelts, J. Blanch, T. Walter, P. Enge, Stanford University  56 - 67

**Impact of Nominal Bias Bounding Techniques on Final ARAIM User Performance**  
C. Macabiau, C. Milner, Q. Tessier, ENAC, France; M. Mabilleau, J. Vuillaume, EGIS-AVIA, France; N. Suard, C. Rodriguez, CNES, France  68 - 77

**Satellite Selection and RAIM for GNSS Reliability Enhancement in Multi-Constellation**  
F.C. Meng, S. Wang, B. C. Zhu, Peking University, China  78 - 88

**Reduced Subset Analysis for Multi-Constellation ARAIM**  
T. Walter, J. Blanch, P. Enge, Stanford University  89 - 98

**Exclusion for Advanced RAIM: Requirements and a Baseline Algorithm**  
J. Blanch, T. Walter, P. Enge, Stanford University  99 - 107

**GNSS Signal in Space Outliers Analysis Based on Historical Navigation Data**  
Y. Liu, Beihang University, China; Y. Zhu, Aviation Data Communication Corporation, China  108 - 114

**Integrity Monitoring and Error Identification of Ultra-tightly Integrated GNSS/INS Navigation System**  
F. Qin, X. Zhan, S. Jing, Shanghai Jiao Tong University, China  115 - 126

**Design and Performance Evaluation of Airspace-Ground Cooperative GPS/BeiDou Dual-constellation RAIM Algorithm**  
Y. Liu, Beihang University, China; Y. Zhu, Aviation Data Communication Corporation, China  127 - 136

**An Improved Fault Tolerance Method of GPS/INS Integrated Navigation System**  
L. Cong, X. Huang, D. Yang, Beihang University, China  137 - 144

## Urban, Indoor and Terrestrial Applications

**Foot- and Knee-mounted INS for Firefighter Localization**  

**Performance Analysis of UWB Technology for Indoor Positioning**  
Z. Koppanyi, C.K. Toth, D.A. Grejner-Brzezinska, G. Jozkow, The Ohio State University  154 - 165

**Altimeter Slant Range Analysis and Compensation**  
P. Spiegel, B. Braun, J. Dambeck, F. Holzapfel, Institute of Flight System Dynamics, TUM, Germany  166 - 174

**Improving Low-Cost INS/GPS Positioning Accuracy Using Quantile Regression Forests**  
S. Adusumilli, D. Bhatt, H. Wang, V. Devabhaktuni, University of Toledo  175 - 180

**Application of the Recursive Signal Processing of the Floating Solution in Multipath Environment**  
S-L. Cho, C. Park, S-J. Lee, Chungnam National University, South Korea  181 - 185

**Pedestrian Dead Reckoning Indoor Positioning with Step Detection Based on Foot-mounted IMU**  
H. Yin, H. Guo, X. Deng, Nanchang University, China; M. Yu, Jiangxi Normal University, China; J. Xiong, Nanchang University, China  186 - 192

**Research on the SOOP Relative Distribution Modeling Method**  
Z. Lei, Z. Jun, Z. Yanbo, X. Rui, Beihang University, China  193 - 200

## Augmentation Systems (SBAS, GBAS, etc.) 1 and 2
Assessment of Methods to Trigger Transition Between Multiple SBAS
J. Dennis, Innovative Solutions International, a Pragmatics company; M. Hemstad, TetraTech AMT Inc. 201 - 211

Research on the Ionospheric Delay Correction Methods in SBAS of Compass
S. Wang and B. Zhu, Peking University, China 212 - 218

Korean SBAS Development Progress and Test Results of Pseudolite-Based SBAS Demo System
D. Han, H. Yun, O. Kim, C. Kim, C. Kee, Seoul National University, South Korea 219 - 222

Algorithm and Configuration Availability Tool for Integrity Monitoring Test Bed
C-W. Lin, S-S. Jan, National Cheng Kung University, Taiwan 223 - 233

Business Aircraft Multipath Analysis for GBAS CAT II/III
J. Dvorska, M. Musil, M. Orejas, O. Kutik, Honeywell International 234 - 245

Tracking Error Modeling in Presence of Satellite Imperfections
M. Vergara, M. Sgammini, Y. Zhu, S. Thoelert, F. Antreich, Germany Aerospace Center (DLR), Germany 246 - 253

Multiple Satellite Navigation Systems for the Ground Based Augmentation System
M. Stanisak, M. Bitter, T. Feuerle, Technische Universität Braunschweig, Germany 254 - 264

Dual Frequency Ephemeris Ground Monitor for GBAS
J. Jing, S. Khanafseh, S. Langel, F-C. Chan, B. Pervan, Illinois Institute of Technology 265 - 271

Investigation and Modeling of Effects of Ionospheric Plasma Bubbles on GBAS Availability and Its Mitigation by GPS/INS Integration
T. Fujiwara, T. Tsujii, T. Kubota, Institute of Aeronautical Technology, Japan Aerospace Exploration Agency, Japan 272 - 279

Augmenting EGNOS with an E5b Channel
H. Al Bitar, M. Raimondi, D. Kubrak, Thales Alenia Space, France; L. Ries, CNES, France 280 - 291

Improvement of DGPS Positioning Accuracy for Low Cost Receiver Using FKP Correction Message
J. Kim, J. Song, H. No, C. Kee, Seoul National University, South Korea; M. Yang, M. Park, Mando Corporation, South Korea; S. Lee, National Geographic Information Institute, South Korea 292 - 296

Interference and Spectrum Management 1 and 2

Effects of Multipath and CW Interference on Code Tracking Loop with EML Discriminator
B. Qu, J. Wei, Huazhong University of Science and Technology, China; S. Zhang, L. Bi, Space Star Technology Co. Ltd, China 297 - 303

Detection, Location and Mitigation of GNSS Interference
N. Ward, G. Shaw, General Lighthouse Authorities of the UK and Ireland; C. Hill, University of Nottingham, UK 304 - 310

Jammer Detection and Localization Using Maximum Time Interval Error
H.H Choi, Y.S. Choi, J.H. Lee, S.J. Lee, Chungnam National University, South Korea; C. Park, Chungbuk National University, South Korea 311 - 315

A Multiple COTS Receiver GNSS Spoof Detector -- Extensions
P.F. Swaszek, University of Rhode Island; R.J. Hartnett, U.S. Coast Guard Academy 316 - 326

Design and Assessment of a Dual Frequency GPS Intelligent Signal Tracking Loop for Interference Mitigation
A.M. Kamel, Military Technical College, Egypt 327 - 339

Effects of Rotor Blade Modulation on GNSS Array Antenna Anti-jamming Algorithms
F. Barbiero, ONERA/ISAE/Thales Avionics, France; F. Vincent, ISAE, France; T. Deloues, ONERA, France; F. Letestu, Thales Avionics, France 340 - 348

Further Investigations into C/A-to-C/A Interference
A.P. Cerruti, J.W. Betz, J. Rushanan, The MITRE Corporation 349 - 361

Improved Array Interpolation for Reduced Bias in DOA Estimation for GNSS
M.A.M. Marinho, German Aerospace Center (DLR), Germany/ Universidade de Brasilia, Brazil; F. Antreich, German Aerospace Center (DLR), Germany; J.P. Carvalho Lustosa da Costa, Universidade de Brasilia, Brazil 362 - 370

Low-Cost, High-Fidelity Data Acquisition System for Precision GNSS Adaptive Antenna Arrays
A.J. O’Brien and I.J. Gupta, The Ohio State University 371 - 376

Alternatives Sensors and Emerging Navigation Technologies
Hardware-Independent Automatic Crowdsourcing-Based Hybrid WLAN-RFID Adaptive Indoor Tracking System Using Fast Orthogonal Search and Multiple Particle Filters
C. Donnelly, M.M. Aita, Royal Military College of Canada; M.J. Korenberg, Queen's University at Kingston, Canada; A. Noureldin, Royal Military College of Canada, Canada

Model-Aided Navigation for a Quadrotor Helicopter: A Novel Navigation System and First Experimental Results
P. Crocoll, J. Seibold, G. Scholz, G.F. Trommer, Karlsruhe Institute of Technology (KIT), Germany

Results of Model-Aided Navigation with Real Flight Data
L. Görcke, J. Dambeck, F. Holzapfel, Technische Universität München, Germany

Containing a Difficult Target: Techniques for Mitigating DME Multipath to Alternative Position Navigation and Timing (APNT)
S. Lo, Y.H. Chen, B. Segal, B. Peterson, P. Enge, Stanford University; R. Erikson, Federal Aviation Administration; R. Lilley, Aviation Management Associates

LiDAR-based Relative Positioning for Swarm Exploration on Mars
T. Krüger, S. Nowak, J. Matthaei, P. Hecker, Technische Universität Braunschweig, Germany

A Fairy Tale Approach to Cooperative Vehicle Positioning
S. Stephenson, X. Meng, T. Moore, University of Nottingham, UK; A. Baxendale, T. Edwards, MIRA Ltd, UK

Quasi-Zenith Satellite System

Positioning Technology with OZSS Signals
A. Veitsel, A. Lebedinsky, D. Nikitin, Topcon Positioning Systems, Russia

Decimeter Level Vehicle Navigation Combining Multi-GNSS with Existing Sensors in Dense Urban Areas
N. Kubo, R. Hou, T. Suzuki, Tokyo University of Marine Science and Technology, Japan

Evaluation of Precise Point Positioning Using MADOCA-LEX via Quasi-Zenith Satellite System
T. Suzuki, N. Kubo, T. Takasu, Tokyo University of Marine Science and Technology, Japan

Ionospheric Correction at the Southwestern Islands for the QZSS L1-SAIF
T. Sakai, K. Hoshinoo, K. Ito, Electronic Navigation Research Institute, Japan

Application of Ionosphere Correction for Enhanced Multi-GNSS Positioning
H. Yamada, T. Takasu, N. Kubo, Tokyo University of Marine Science and Technology, Japan

The Use of Multiple GNSS Constellations with Strict Quality Constraints for Achieving High Accuracy in Urban Environments
H. Tokura, H. Yamada, N. Kubo, Tokyo University of Marine Science and Technology, Japan; S. Pullen, Stanford University, USA

GNSS Processing and Integration 1 and 2

Characteristics and Tracking Methods of TD-AltBOC Signal
D. Yang, Y. Kou, J. Sui, Beihang University, China

Detailed Analysis of the Impact of the Code Doppler on the Acquisition Performance of New GNSS Signals
M. Foucras, ABBIA GNSS Technologies / ENAC, France; O. Julien, C. Macabiau, ENAC, France; B. Ekambi ABBIA GNSS Technologies, France

Development of a Real-time GNSS Software Receiver for Evaluating RAIM in Multi-constellation
Y-H. Chen, S. Lo, Stanford University; D.M. Akos, University of Colorado at Boulder; M. Choi, J. Blanch, T. Walter, P. Enge, Stanford University

A Modified Real-time Orbit Determination Algorithm for LEO Satellites
X. Lin and L. Li, Zhejiang University, China

Cost-effective Cooperative RTK Positioning of Rowing Boats

Robust Inertial Aided Beamforming for GNSS
A. Grosch, M. Sgambarini, A. Konovaltsev, F. Antreich, German Aerospace Center (DLR), Germany

A New Carrier Phase Multipath Mitigation Technique for Ionosphere-free Combination
R. Moradi, W. Schuster, S. Feng, W. Ochieng, Imperial College London, UK

Application of the Constraint Moving Horizon Estimation Method for GPS/SINS Integrated Navigation System
X. Zhao, H. Qin, L. Cong, D. Yang, Beijing University of Aeronautics and Astronautics, China
Marine Applications

**eLoran for e-Navigation – The Requisite Co-Primary Source for Position, Navigation, Time and Data**
G. Offermans, E. Johannessen, C. Schue, A. Grebnev, S. Bartlett, UrsaNav, Inc. 574 - 582

**Enhanced Radar Positioning**

**A Method of Providing Integrity for eLoran**
C. Hargreaves, P. Williams, General Lighthouse Authorities of the UK and Ireland 588 - 593

**Senior Project Design of a Two Meter Autonomous Sailboat**
B. Williamsz, J. Kane, R.J. Hartnett, United States Coast Guard Academy; P.F. Swaszek, University of Rhode Island 594 - 600

Aviation Applications

**ARAIM Operational Performance Tested in Flight**
M. Rippl, I. Martini, B. Belabbas, German Aerospace Center/DLR, Germany; M. Meurer, German Aerospace Center/DLR/ RWTH Aachen University, Germany 601 - 615

**Hybrid DFMC GNSS/INS to Support Approach Operations**
M. Orejas, J. Dunik, Honeywell International 616 - 628

**Availability Analysis of RTK for UAV Shipboard Landing**
C-J. Huang, S-S. Jan, National Cheng Kung University, Taiwan 629 - 637

**Improvement of INS-Aided GPS Tracking Performance under Strong Ionospheric Scintillation**
T. Tsuji, T. Fujivara, T. Kubota, Japan Aerospace Exploration Agency (JAXA), Japan 638 - 644

**Evaluation of Dual Frequency GBAS Performance Using Flight Data**
M-S. Circiu, M. Felux, P. Remi, L. Yi, B. Belabbas, German Aerospace Center (DLR), Germany; Sam Pullen, Stanford University 645 - 656

MEMS, Timing and Micro PNT

**A Study on Practical Use of CSAC (Chip Scale Atomic Clock) for GBAS Ground Subsystem**
T. Yoshihara, S. Saito, K. Hoshimoo, Electronic Navigation Research Institute (ENRI), Japan 657 - 661

**Evaluation of ASF Correction Age and Timing Variance in eLORAN Disciplined OCXO**
S-W. Hwang, Y.S. Choi, S-R. Yeo, S.J. Lee, Chungnam National University, South Korea; S-H. Yang, Korea Research Institute of Standards and Science, South Korea; C. Park, S.J. Lee, Chungbuk National University, South Korea 662 - 665

Space and Atmospheric Weather 1 and 2

**Conceptual Study of Real-time Ionospheric Threat Adaptation Using Space Weather Forecasting for GNSS Augmentation Systems**
J. Lee, Korea Advanced Institute of Science and Technology, KAIST, South Korea; J. Lee, Korea, Tetra Tech AMT and Advanced Institute of Science and Technology, KAIST, South Korea; S. Pullen, Stanford University; S. Datta-Barua, Illinois Institute of Technology 666 - 676

**Ionosphere Impact on GNSS Based Civil Aviation Applications During Maximum Solar Activity**
E. Robert, EUROCONTROL, Belgium; M. Mabileau, Egis Avia, France; P. Ladoux, DSNA/DTI, France; D. Duchet, EUROCONTROL, Belgium 677 - 689

**Ionospheric Reconstructions for Various Solar, Seasonal, and Geomagnetic Conditions Obtained from the Global Assimilation of Ionospheric Measurements – Gauss Markov (GAIM-GM) Model**

**An Analysis for Irregularity of Tropospheric Delay Error Between Network Stations During Local Atmospheric Change**
M.Y. Shin, Y. Han, D.J. Cho, Korea Research Institute of Ships and Ocean Engineering, Republic of Korea 695 - 699

**Investigation of the Impact of Solar Storms on the Global Positioning System Receivers at High Latitudes**
R.J. Morton, Talawanda High School (Ohio) 700 - 708

**An Inverse Diffraction Technique for Scaling Measurements of Ionospheric Scintillations on the GPS L1, L2, and L5 Carriers to Other Frequencies**
C.S. Carrano, K.M. Groves, S.H. Delay, P.H. Doherty, Institute for Scientific Research, Boston College 709 - 719
Real Time Ionospheric Disturbance Analysis and Monitoring with GEONET Real Time Data
S. Saito, T. Yoshihara, Electronic Navigation Research Institute, Japan; M. Yamamoto, Kyoto University, Japan 720 - 724

Multimodel Ensemble Prediction System for Space Weather Applications

Algorithms and Results of Tracking BeiDou Signals During Strong Ionospheric Scintillation Over Ascension Island
D. Xu, Y. Morton, S. Taylor, Miami University (Ohio) 730 - 735

Emerging GNSS and Modernization 1 and 2

Autonomous Time Synchronization Technique for GNSS Constellation with Ridge Regression Method
S. Jing, X. Zhan, F. Qin, Shanghai Jiao Tong University, China 736 - 742

Mitigating the Impact of Predicted-satellite-clock Errors on GNSS PPP Positioning
C. Hackman, United States Naval Observatory 743 - 750

Effect of GPS NAV and CNAV/CNAV-2 Message Truncation Error on SISRE
Y. Liu, Beijing Institute of Tracking and Telecommunication Technology, China; L. Wang, D. Yang, Beihang University, China 751 - 760

Performance Analysis of L2 and L5 CNAV Broadcast Ephemeris for Orbit Calculation
H. Yin, Y. Morton, M. Carroll, Miami University (Ohio); E. Vinande, Air Force Research Laboratory 761 - 768

New GNSS Signals Demodulation Performance in Urban Environments
M. Roudier, CNES, France; A. Garcia-Pena, O. Julien, ENAC, France; T. Grelier, L. Ries, CNES, France; C. Poulihat, M-L. Boucheret, ENSEEIHT, France; D. Kubrak, Thales Alenia Space, France 769 - 780

Applications and Low-complexity Implementation of ACE-BOC Multiplexing
J. Zhang, Z. Yao, M. Lu, Tsinghua University, China 781 - 791

Comparative Analysis of Dual-Frequency Constant Envelop Multiplexing Techniques for ARNS Band
Y. Zhu, Z. Yao, X. Cui, M. Lu, Tsinghua University, China 792 - 801

Differential Code Bias Estimation Using Multi-GNSS Observations and Global Ionosphere Maps
O. Montenbruck, A. Hauschild, DLR/GSOC, Germany; P. Steigenberger, TUM/IAPG, Germany 802 - 812

Modeling the Galileo Full Operational Capability (FOC) Transmit Antenna and its Impact on Future Space Missions
S. Ramakrishnan and P. Enge, Stanford University 813 - 824

Coefficients Optimization Based Quasi-constant Envelope Multiplexing Technique and Its Applications
T. Yan, J. Wei, Z. Tang, Y. Cao, Huazhong University of Science and Technology, China 825 - 834

CS-POCET: A Dual-frequency Constant Envelope Multiplex Method for GNSS Signals
Z. Zhou, J. Wei, Z. Tang, T. Yan, Huazhong University of Science and Technology, China 835 - 843

Receivers and Antenna Technology

Approaching Millimeter Accuracy of GNSS Positioning in Real Time with Large Impedance Ground Plane Antennas
D. Tatarnikov and A. Astakhov, Topcon Positioning Systems, Russia 844 - 848

De-spreading Delay-and-multiplication Method for GPS Signal Acquisition
J. Fan and G. Ma, National Astronomical Observatories, Chinese Academy of Sciences, China 849 - 852

Experimental BOC Tracking Hardware Platform
P. Neumaier, F. Garzia, P. Sommer, A. Rügamer, Fraunhofer Institute for Integrated Circuits IIS, Germany; J. Wendel, F.M. Schubert, Astrium GmbH, Germany 853 - 867

Ambiguity Peak Resolution for Navigation Receiver
J-J. Floch, F. Soualle, J. Wendel, Airbus Defence and Space, Germany 868 - 875

A Two-dimension Tracking Based Multipath Mitigation Method for BOC Signals
Y. Gao, Z. Yao, Y. Zhu, M. Lu, Tsinghua University, China 876 - 883

A Standalone Approach for Ultra-Tightly Coupled High Sensitivity GNSS Receiver
T. Ren, M. Petovello, University of Calgary, Canada; C. Basnayake, General Motors, USA 884 - 897

Prediction of Antenna Induced Biases for Precision GNSS Receivers
Y.C. Chuang, M. Buchanan, A. O’Brien, J.J. Gupta, The Ohio State University 898 - 903

A Centering Correction Method for GNSS Antenna Diversity: Theory and Implementation using a Software Receiver
P. Zhang, Wuhan University, China and University of Nottingham, UK; F. Sun, Y. Xu, J. Zou, Wuhan University, China; W. Dai, Central South University, China and University of Nottingham, UK; X. Meng, University of Nottingham, UK 904 - 908
