# Table of Contents

## Main Conference Keynote Speeches

1. Words and Rules Revisited: Reassessing the Role of Construction and Memory in Language ........................................................................................................ 1  
   *Alex Marantz*

2. A Principle-Based Approach for Natural Language Processing: Eliminating the Shortcomings of Rule-Based Systems with Statistics  ..................................... 2  
   *Wen-Lian Hsu*

3. Extracting “Criterial Features” for the CEFR Levels Using Corpora of EFL Learners’ Written Essays .................................................................................... 4  
   *Yukio Tono*

   *Stefan Th. Gries*

5. Linking Text with Data and Knowledge Bases .................................................. 9  
   *Junichi Tsujii*

## Workshop Keynote Speeches

1. Mining Language Learners’ Production Data for Understanding of L2 Learning Systems ........................................................................................................ 11  
   *Yukio Tono*

2. Introducing Linggle: From Concordance to Linguistic Search Engine .......... 12  
   *Jason S. Chang*

## Main Conference Invited Talks

1. Statistical Machine Translation Based on Predicate-Argument Structure ...... 15  
   *Chengqing Zong*

2. Using Hierarchically Structured Lexicon as Key Clues Solving Data Sparseness Problems in Word Sense Disambiguation: A Case for Korean and Its Applications to English and Chinese ......................................................... 17  
   *Aesun Yoon, Minho Kim, and Hyuk-Chul Kwon*

3. Effects of Constituent Orders on Grammaticalization Patterns of the Serial Verbs for ‘Give’ in Thai and Mandarin Chinese ......................................................... 18  
   *Kingkarn Thepkanjana and Satoshi Uehara*
PACLIC 27 Papers

Oral Presentation Session 1A: Grammar and Syntax

1. Global Approach to Scalar Implicatures in Dynamic Semantics ..................... 27
   *Jae-il Yeom*

2. Unification of Numeral Classifiers and Plural Markers: Empirical Facts and Implications .......................................................... 37
   *One-Soon Her and Yun-Ru Chen*

3. Head-Internal Relatives in Japanese as Rich Context-Setters ...................... 47
   *Tohru Seraku*

Oral Presentation Session 1B: Language Generation

1. An Abstract Generation System for Social Scientific Papers ....................... 57
   *Michio Kaneko and Dongli Han*

2. Automatic Utterance Generation in Consideration of Nominatives and Emoticon Annotation ........................................................... 66
   *Yusuke Nishio, Mirai Miura, and Dongli Han*

3. Ensemble Approach for Fine-Grained Question Classification in Bengali ..... N/A

Oral Presentation Session 2A: Discourse and Pragmatics

1. Prosodic Convergence, Divergence, and Feedback: Coherence and Meaning in Conversation ...................................................................... 85
   *Li-chiung Yang*

2. A Quantitative Comparative Study of Prosodic and Discourse Units, the Case of French and Taiwan Mandarin .............................................................. 92
   *Laurent Prevot, Shu-Chuan Tseng, Alvin Cheng-Hsien Chen, and Klim Peshkov*

3. Corpus-Based Research on Tense Analysis and Rhetorical Structure in Journal Article Abstracts ................................................................. 102
   *Pin-ning Tu and Shih-Ping Wang*
Oral Presentation Session 2B: Lexical Knowledge Learning

1. A Novel Schema-Oriented Approach for Chinese New Word Identification 108
   Zhao Lu, Zhixian Yan, and Junzhong Gu
2. A Study of the Effectiveness of Suffixes for Chinese Word Segmentation ...118
   Xiaoping Li, Chengqing Zong, and Keh-Yih Su
3. Learning Fine-Grained Selectional Restrictions ........................................N/A

Oral Presentation Session 3A: Speech Perception

1. Towards a Revised Motor Theory of L2 Speech Perception .........................136
   Yizhou Lan
2. Difficulties in Perception and Pronunciation of Mandarin Chinese Disyllabic
   Word Tone Acquisition: A Study of Some Japanese University Students ....143
   Yuting Dong, Yasushi Tsubota, and Masatake Dantsuji

Oral Presentation Session 3B: Language Learning

1. Exploring the Chinese Mental Lexicon with Word Association Norms ........ 153
   Oi Yee Kwon
2. Towards Automatic Error Type Classification of Japanese Language Learners’
   Writings..........................................................................................................163
   Hiromi Oyama, Mamoru Komachi, and Yuji Matsumoto

Oral Presentation Session 4A: Language Acquisition

1. The Development of Coherence in Narratives: Causal Relations ..............173
   Wen-hui Sah
2. Clausal-Packing of Path of Motion in Second Language Acquisition of
   Russian and Spanish ......................................................................................181
   Kawai Chui, Hsiang-lin Yeh, Wen-Chun Lan, and Yu-Han Cheng
3. Age Related Differences in Language Usage and Reading between English
   Monolinguals and Bilinguals ........................................................................190
   Dylan Marshall and Hamid Gomari
Oral Presentation Session 4B: Corpus Compilation and Analysis

1. Compiling a Corpus of Taiwanese Students’ Spoken English .......................... 199  
   Lan-fen Huang
2. BCCWJ-TimeBank: Temporal and Event Information Annotation on Japanese Text ................................................................................................................ 206  
   Masayuki Asahara, Sachi Yasuda, Hikari Konishi, Mizuho Imada, and Kikuo Maekawa
3. A Corpus-Based Approach to Linguistic Function........................................... 215  
   Hengbin Yan and Jonathan Webster

Oral Presentation Session 5A: Grammar and Syntax

1. A Case Study of a Free Word Order ............................................................... 222  
   Vladislav Kubon, Marketa Lopatková, and Jiri Mirovsky
2. Some Formal Properties of Higher Order Anaphors ...................................... 232  
   R. Zuber
3. ChinGram: A TRALE Implementation of an HPSG Fragment of Mandarin Chinese ........................................................................................................... 240  
   Stefan Muller and Janna Lipenková

Oral Presentation Session 5B: Machine Translation

1. Vietnamese to Chinese Machine Translation via Chinese Character as Pivot ........................................................ 250  
   Hai Zhao, Tianjiao Yin, and Jingyi Zhang
2. Transliteration Extraction from Classical Chinese Buddhist Literature Using Conditional Random Fields ............................................................... 260  
   Yu-Chun Wang and Richard Tzong-Han Tsai
3. Effects of Parsing Errors on Pre-Reordering Performance for Chinese-to-Japanese SMT .................................................................................. 267  
   Dan Han, Pascual Martinez-Gomez, Yusuke Miyao, Katsuhiro Sudo, and Masaaki Nagata
Oral Presentation Session 6A: Morphology and Syntax

1. Reduplication across Categories in Cantonese .......................................................... 277
   Charles Lam

2. Yet Another Piece of Evidence for the Common Base Approach to Japanese Causative/Inchoative Alternations ................................................................. 287
   Tomokazu Takehisa

Oral Presentation Session 6B: Phonetics

1. Are Mandarin Sandhi Tone 3 and Tone 2 the Same or Different? The Results of Functional Data Analysis .................................................................................. 296
   Chierh Cheng, Jenn-Yeu Chen, and Michele Gubian

2. An Application of Comparative Corpora of Interactional Data—Toward the Sound Profiles of Sites of Initiation in French and Mandarin Recycling Repair .......................................................................................................................... 302
   Helen Kai-yun Chen

Oral Presentation Session 7A: Semantics

1. Of-Constructions in the Predicate of Demonstrate and Show in Academic Discourse............................................................................................................. 312
   Liyin Chen and Siaw-Fong Chung

2. Spatial Particles in English: A Quantitative Corpus-Based Approach to the Conceptualization of Symmetry in Bodily Orientation ......................................................... 322
   Alvin Cheng-Hsien Chen

3. Typological Stage of Counterfactuals in Mandarin .................................................... 329
   Qian Yong

Oral Presentation Session 7B: Sentiment Analysis

1. Event Sequence Model for Semantic Analysis of Time and Location in Dialogue System ................................................................................................................. 339
   Yasuhiro Noguchi, Satoru Kogure, Makoto Kondo, Hideki Asoh, Ichiro Kobayashi, Akira Takagi, Tatsuhiro Konishi, and Yukihiro Itoh

2. #Irony or #Sarcasm—A Quantitative and Qualitative Study Based on Twitter ................................................................................................................................. 349
   Po-Ya Angela Wang
3. Collective Sentiment Classification Based on User Leniency and Product Popularity

Wenliang Gao, Naoki Yoshinaga, Nobuhiro Kaji, and Masaru Kitsuregawa

4. KOSAC: A Full-Fledged Korean Sentiment Analysis Corpus

Hayeon Jang, Munhyong Kim, and Hyopil Shin

Poster Session 1

1. Cross-Lingual Link Discovery between Chinese and English Wiki Knowledge Bases

Qingliang Miao, Huayu Lu, Shu Zhang, and Yao Meng

2. Locative Postpositions and Conceptual Structure in Japanese

Akira Ohtani

3. Transliteration Systems across Indian Languages Using Parallel Corpora

Rishabh Srivastava and Riyaz Ahmad Bhat

4. Exploiting Parallel Corpus for Handling Out-of-Vocabulary Words

Juan Luo, John Tinsley, and Yves Lepage

5. Classifying Questions in Question Answering System Using Finite State Machines with a Simple Learning Approach

Mohammad Moinul Hoque, Teresa Goncalves, and Paulo Quaresma

6. Use of Combined Topic Models in Unsupervised Domain Adaptation for Word Sense Disambiguation

Shinya Kunii and Hiroyuki Shinnou

7. Vietnamese Text Accent Restoration with Statistical Machine Translation

Luan-Nghia Pham, Viet-Hong Tran, and Vinh-Van Nguyen

8. A Compact FP-Tree for Fast Frequent Pattern Retrieval

Tri Thanh Nguyen

9. ML-Tuned Constraint Grammars

Eckhard Bick

Poster Session 2

1. Comparative Analyses of Textual Contents and Styles of Five Major Japanese Newspapers

Takafumi Suzuki, Erina Kanou, and Yui Arakawa

2. The Island Effect in Postverbal Constructions in Japanese

Kohji Kamada

3. Evaluation of Corpus Assisted Spanish Learning

Eckhard Bick
4. Augmented Parsing of Unknown Word by Graph-Based Semi-Supervised Learning .................................................................474
   Qiuping Huang, Derek F. Wong, Lidia S. Chao, Xiaodong Zeng, and Liangye He
5. Tonal Patterns in the 15th Century: A Corpus-Based Approach ....................483
   Chihkai Lin
6. Basic Principles for Segmenting Thai EDUs ..................................................491
   Nalinee Intasaw and Wirote Aroonmanakun
7. Automatic Clause Boundary Annotation in the Hindi Treebank ...................499
   Rahul Sharma, Soma Paul, Riyaz Ahmad Bhat, and Sambhav Jain
8. Myths in Korean Morphology and Their Computational Implications ........505
   Hee-Rahk Chae

Workshop Session 1

1. Creative Language Learning Projects with Digital Media ............................512
   Chin-chi Chao
2. iPad Reading: An Innovative Approach to New Literacies ...........................520
   Hsin-Chou Huang
3. A Generic Cognitively Motivated Web-Environment to Help People to
   Become Quickly Fluent in a New Language ..................................................526
   Michael Zock, Guy Lapalme, and Lih-Juang Fang

Workshop Session 2

1. Evaluation on Second Language Collocational Congruency with
   Computational Semantic Similarity .............................................................534
   Ching-Ying Lee and Chih-cheng Lin
2. A Corpus-Based Tool for Exploring Domain-Specific Collocations in English
   ......................................................................................................................542
   Ping-Yu Huang, Chien-Ming Chen, Nai-Lung Tsao, and David Wible
3. Automatic Identification of English Collocation Errors Based on Dependency
   Relations ........................................................................................................550
   Zhao-Ming Gao
Workshop Session 3

   Takahiro Ohno, Zyunitiro Edani, Ayato Inoue, and Dongli Han
2. PADS Restoration and Its Importance in Reading Comprehension and
   Meaning Representation ...................................................................................... 563
   Shian-jung Chen
