CONTENTS

Preface ............................................................................ ix
ICMC Awards ........................................................................ xi
In Memoriam: Masaki Suenaga ................................................... xiii
2009 ICMC Committee .............................................................. xv
Acknowledgments .................................................................. xvii

PHYSICAL AND MECHANICAL PROPERTIES AT CRYOGENIC TEMPERATURES

Tensile Test Results on Compacted and Annealed 316LN Material ........................................ 3
K.-P. Weiss, A. Ehrlich, A. della Corte, and A. Vostner

Fatigue Properties of Modified 316LN Stainless Steel at 4 K for High Field Cable-in-Conduit
Applications ........................................................................ 9
V. J. Toplosky, R. P. Walsh, and K. Han

Mechanical Properties of Modified JK2LB for Nb3Sn CICC Applications .............................. 17
R. P. Walsh, K. Han, V. J. Toplosky, N. N. Martovetsky, T. L. Mann Jr., and J. R. Miller

Hydrogen Environment Embrittlement Evaluation in Fatigue Properties of Stainless Steel
SUS304L at Cryogenic Temperatures ........................................ 25
T. Ogata

Fracture Mechanical Measurements with Commercial Stainless Steels at 4 K and with
CP-Titanium at 173 K ................................................................ 33
A. Nyilas and H. Mitterbacher

Electrical and Mechanical Properties of Titanium Dioxide Nanoparticle Filled Epoxy
Resin Composites .................................................................. 41
G. Polizos, E. Tuncer, I. Sauers, D. R. James, A. R. Ellis, and K. L. More

Bending Response of Carbon Nanotube-Based Polymer Composites at Cryogenic
Temperatures ........................................................................ 47
Y. Kuronuma, Y. Shindo, Y. Mito, T. Takeda, and F. Narita

Thermal and Electrical Conductivity Measurements of CDA 510 Phosphor Bronze ............... 55
J. G. Tuttle, E. R. Canavan, and M. DiPirro

Dielectric Properties of Various Nanocomposite Materials .................................................. 63
E. Tuncer, G. Polizos, D. R. James, I. Sauers, A. R. Ellis, and K. L. More

Very Low Frequency Breakdown Properties of Electrical Insulation Materials at Cryogenic
Temperatures ........................................................................ 68
I. Sauers, E. Tuncer, G. Polizos, D. R. James, A. R. Ellis, and M. O. Pace

Thermal Properties of Silicon Nitride Beams below 1 Kelvin ............................................... 75
G. Wang, V. Yefremenko, V. Novosad, A. Datesman, J. Pearson, G. Shustakova, R. Divan, C. Chang,

Negative Magnetoresistance Behaviours and Localized Magnetic Moments in Insulating
CdSe Semiconductors at Very Low Temperatures with Magnetic Field ................................... 83
A. El kaouachi, R. Abdia, A. Nafidi, A. Zatni, H. Sahsah, and G. Biskupski

Scale Theory and Metal-Insulator Transition in Metallic n-Type InP Semiconductor at
Very Low Temperatures with Magnetic Field ............................................... 92
A. El kaouachi, R. Abdia, A. Nafidi, A. Zatni, H. Sahsah, and G. Biskupski
NON-METALLIC MATERIALS—INSULATION

Swelling and Gas Evolution in Irradiated Organic Matrix Composites—A Review ........................................ 103
D. Evans

Resin Permeation through Compressed Glass Insulation for ITER Central Solenoid .................................. 111
R. Reed, F. Roundy, N. Martovetsky, J. Miller, and T. Mann

Property Changes of Cyanate Ester/Epoxy Insulation Systems Caused by an ITER-Like Double Impregnation and by Reactor Irradiation ................................................................. 119

Fission Neutron Irradiation Effect on Interlaminar Shear Strength of Cyanate Ester Resin GFRP at RT and 77 K .......................................................... 127
A. Nishimura, Y. Iizumi, S. Nishi, T. Hemmi, K. Koizumi, T. Takeuchi, and T. Shikama

ITER Central Solenoid Coil Insulation Qualification ............................................................................... 135
N. N. Martovetsky, T. L. Mann, J. R. Miller, K. D. Freundenberg, R. P. Reed, R. P. Walsh,
J. D. McCloskey, and D. Evans

Design Issues of the Pre-Compression Rings of ITER ........................................................................... 145
J. Knaster, W. Baker, L. Bettinelli, C. Jong, K. Mallick, C. Nardi, H. Rajainmaki, P. Rossi, and
L. Semeraro

Mechanical Characterization of the ITER Mock-Up Insulation after Reactor Irradiation .............. 155

LOW-TEMPERATURE SUPERCONDUCTORS

Processing of High-Performance Nb$_3$Sn Wires through a New Diffusion Reaction Using
Sn-Based Alloys ................................................................................................................................. 165
K. Tachikawa, H. Sasaki, M. Yamaguchi, Y. Hayashi, K. Nakata, and T. Takeuchi

Comparison of A15 Stoichiometry and Grain Morphology in Internal Sn and Tube Type
Strands; Influence of Strand Design, HTs and Alloying .................................................................. 175

Development and Study of Nb$_3$Sn Strands and Cables for High-Field Accelerator Magnets .... 183
E. Barzi, N. Andreev, M. Bossert, V. V. Kashikhin, D. Turrioni, R. Yamada, and A. V. Zlobin

Coupling-Current and Persistent-Current Magnetizations in Nb$_3$Sn Rutherford Cables and
Strands .............................................................................................................................................. 191
E. W. Collings, M. D. Sumption, M. A. Susner, D. R. Dietderich, E. Barzi, A. V. Zlobin, and A. Nijhuis

Stability in Nb$_3$Sn Conductors; Magnetic and Self-Field Instability Considerations at 4 K and
2 K .................................................................................................................................................... 199
M. D. Sumption

Contact Mechanics Model for Transverse Load Effects on Superconducting Strands in
Cable-in-Conduit Conductor .............................................................................................................. 208
L. Chiesa, M. Takayasu, and J. V. Minervini

Fine Grained Nb for Internal Tin Nb$_3$Sn Conductors .................................................................. 216
S. Balachandran, R. E. Barber, Y. Huang, H. Miao, J. A. Parrell, S. Hong, R. B. Griffin, and
K. T. Hartwig

Investigation of Methods to Control Niobium Wall Dissolution in Internal Tin Tube Nb$_3$Sn
Superconductors ............................................................................................................................... 224
C. V. Renaud, Jr., W. T. Nachtrab, and T. Wong
A Study on Correlation between Jc(4.2 K) and Current Sharing Temperature Tcs of Nb3Sn Strands and Short Sample of Conductor for Toroidal Field Coils of ITER Magnet System

Bending Effects on Critical Currents of Nb3Sn Superconducting Wires

M. Takayasu, L. Chiesa, J. H. Schultz, and J. V. Minervini

Experimental Studies of Transverse Stress Effects on the Critical Current of Sub-Sized Niobium-Tin Superconducting Cables

L. Chiesa, M. Takayasu, and J. V. Minervini

14 MeV Neutron Irradiation Effect on Critical Current and Critical Magnetic Field of Nb3Sn and Nb3Al Wires

A. Nishimura, T. Takeuchi, S. Nishijima, K. Ochiai, G. Nishijima, K. Watanabe, and T. Shikama

Superconductivity and Microstructure of V-Ti Alloy Multifilament Prepared by Diffusion Reaction between Constituent Pure-Metal Subelements

T. Takeuchi, H. Takigawa, N. Banno, M. Nakagawa, M. Iwatani, K. Inoue, Y. Hishinuma, and A. Nishimura

A Thermohydraulic-Quenching Code for Superconducting Magnets in Network Circuits

J. Feng, J. Schultz, and J. Minervini

MgB2 CONDUCTORS

Effects of Sintering Temperature on Superconductivity in Ti-Sheathed MgB2 Wires

G. Liang, H. Fang, S. Guchhait, C. Hoyt, and J. T. Markert

Effects of Dual Doping of C and TiC Nanoparticles on Superconducting Properties of Fe-Sheathed MgB2 Tapes

H. Fang and G. Liang

Plasma Synthesized Boron Nano-Sized Powder for MgB2 Wires

Cabling of Thin MgB2 Strands for High-Current Conductors with Reduced AC Losses

Mechanical Properties of MgB2 Hollow Wires

BSCCO CONDUCTORS

Magnetic Orientation of Bi-2212 Powder

K. Damborsky, P. McIntyre, and N. Pogue

The Thermal Conductivity of Ag-Sn, Ag-Cu-Zr and Ag-Cu-Ni Sheath Materials for BSCCO Tapes

U. Sachadel and M. Chorowski

Torsion Strain Effects on Critical Currents of HTS Superconducting Tapes

M. Takayasu, J. V. Minervini, and L. Bromberg
COATED CONDUCTORS

Identifying and Investigating $J_c$ Variations in Coated Conductors Fabricated by MOCVD/IBAD .................. 347
J. Y. Coulter, O. Ugurlu, J. O. Willis, T. G. Holesinger, and Y.-Y. Xie

Microstructure and Critical Current Density of $YBa_2Cu_3O_{7-x}$+$BaSnO_3$ Thick Films Grown with Pre-Mixed Pulsed Laser Ablation Target .................... 355
J. Burke, C. V. Varanasi, L. Brunke, H. Wang, J. H. Lee, and P. Barnes

Second Phase (BaGeO$_3$, BaSiO$_3$) Nanocolumns in $YBa_2Cu_3O_{7-x}$ Films .................... 362
C. V. Varanasi, J. Reichert, J. Burke, H. Wang, M. Susner, M. Sumption, and P. N. Barnes

Voltage Distribution and Mechanical Strength in Splice Joints Made from As-Manufactured YBCO Coated Conductors ....................... 370
R. C. Duckworth, Y. Zhang, M. J. Gouge, C. M. Rey, D. van der Laan, and C. Clickner

The Effect of a Filament Interruption on Current-Voltage Curves and Critical Currents of Filamentary YBCO Tapes with Superconducting Bridges ................... 380
M. Polak, P. Mozola, P. N. Barnes, and G. A. Levin

Thermal Conductivity of High Temperature Superconductor Coated Conductors ............. 388
M. Schwarz, C. Schacherer, A. Ehrlich, and K.-P. Weiss

HTS BULK CONDUCTORS

The Generation of High Trapped Fields in Bulk (RE)BCO High Temperature Superconductors .................. 397

The Puzzle of Two Different Sub-Micrometer Tungsten-Rich Deposits in Bulk YBCO: One Acts as Pinning Centers and the Other Does Not .................. 407
R.-P. Sawh, R. Weinstein, D. Parks, and A. Gandini

Author Index ......................................................... 415
Materials Index .................................................. 419
Subject Index ...................................................... 421
