Fatigue Design 2013

Procedia Engineering Volume 66

Senlis, France
27-28 November 2013

Editors:

F. Lefebvre

ISBN: 978-1-63266-332-0
# TABLE OF CONTENTS

## Preface
Mansour Afzali, Fabien Lefebvre

### PLENARY SESSION

**Assessment Of Existing Steel Structures – Recommendations For Estimation Of The Remaining Fatigue Life**
Bertram Kühn

**Reliable Fatigue Design, By Rigid Rules, By Magic Or By Enlightened Engineering**
Thomas Svensson, Pär Johannesson

### SESSION 1: WELDED COMPONENTS AND STRUCTURES

**Comparison Between The Eurocode For Fatigue Of Steel Structures, En 1993-1-9, And The Eurocode For Fatigue Of Aluminium Structures, En 1999-1-3**
Johan Maljaars, Mladen Lukić, Frans Soetens

**S-N Curves For Welded, Non-Welded Or Improved Welded Details Of Marine Structures**
Guy Parmentier, Michel Huther

**Influence Of Weld Defects On The Fatigue Resistance Of Thick Steel Plates**
P. Schaumann, M. Collmann

**Geometrical Influence Of A Butt Weld In The Low Cycle Fatigue Regime**
E. Lang, J. Rudolph, H. Th. Beier, M. Vormwald

**FEA Structural Stress Of Modalohr System For Semi-Trailer Rail Transportation: Weld Root Fatigue Focus**
Patrice Klein, Didier Turlier, Jacques Ober

**Fatigue Tests Of Axially Loaded Butt Welds Up To Very High Cycles**
P. Schaumann, S. Steppeler

**A Guideline For Fatigue Strength Improvement Of High Strength Steel Welded Structures Using High Frequency Mechanical Impact Treatment**
Gary B. Marquis, Zuheir Barsoum

**Use Of Martensitic Stainless Steel Welding Consumable To Substantially Improve The Fatigue Strength Of Low Alloy Steel Welded Structures**
Fabrice Scandella, Nicolas Cavallin, Philippe Gressel, Jessy Haouas, Laurent Jubin, Fabien Lefebvre, Isabel Huther

**TIG-Dressing Of High Strength Butt Welded Connections – Part 2: Physical Testing And Modelling**
S.H.J. van Es, M.H. Kolstein, R.J.M. Pippers, F.S.K. Bijlaard

**Fatigue Designed CL-Cutting Shape: A New Economic Steel-Concrete Connection System And Some Applications For Bridges**
Jacques Bertheloty

**Assessment Of The Surface Hardening Effects From Hammer Peening On High Strength Steel**
C. Revilla-Gomez, J-Y. Buffiere, C. Verdu, C. Peyrac, L. Daflon, F. Lefebvre

**Fatigue Strength Of HFMI Treated Structures Under High R-Ratio And Variable Amplitude Loading**
Eeva Mikkola, Matthew Doré, Mansoor Khurshid

**Diode Laser Weld Toe Re-Melting As A Means Of Fatigue Strength Improvement In High Strength Steels**
Christoph Gerritsen, Sofie Vanrostenbergh, Matthew Doré

**Residual Stresses In Welded Components Following Post-Weld Treatment Methods**
Lasse Suominen, Mansoor Khurshid, Jari Parantainen

**Fatigue Strength Improvement Of Welded Structures Using New Low Transformation Temperature Filler Materials**
A.A. Bhatti, Z. Barsoum, V. van der. Mee, A. Kromm, T. Kannengiesser
## Implementing High Frequency Mechanical Impact In Industrial Components: A Case Study
Bertil Jonsson, Yang Shin, Thomas Däuwel, Christoph Gorges

## TIG-Dressing Of High Strength Steel Butt Welded Connections – Part 1: Weld Toe Geometry And Local Hardness
S.H.J. van Es, M.H. Kolstein, R.J.M. Pijpers, F.S.K. Bijlaard

### SESSION 2: ENVIRONMENTAL EFFECT AND FATIGUE DESIGN

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Influence Of Temperature And Long Term Ageing On The Fatigue Crack Growth In A Precipitation Hardened Martensitic Stainless Steel</td>
<td>226</td>
</tr>
<tr>
<td>Influence Of Surface Finish In Fatigue Design Of Nuclear Power Plant Components</td>
<td>233</td>
</tr>
<tr>
<td>High Cycle Thermal Fatigue Damage Prediction In Mixing Zones Of Nuclear Power Plants: Engineering Issues Illustrated On The Father Case</td>
<td>240</td>
</tr>
<tr>
<td>Thermocracks®, A Specific Testing Machine For Evaluation Of The Thermal Fatigue Resistance Of Materials</td>
<td>250</td>
</tr>
</tbody>
</table>

### SESSION 3: MANUFACTURING PROCESS AND FATIGUE DESIGN

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effect Of Microstructure On The Fatigue Behavior Of A Friction Stirred Channel Aluminium Alloy</td>
<td>264</td>
</tr>
<tr>
<td>Influence Of Surface Integrity Of 15-5PH On The Fatigue Life</td>
<td>274</td>
</tr>
<tr>
<td>Influence Of The Base Material Strength And Edge Preparation On The Fatigue Strength Of The Structures Made By High And Ultra-high Strength Steels</td>
<td>282</td>
</tr>
<tr>
<td>A New Methodology For Designing Heat Treated Components In Fatigue</td>
<td>292</td>
</tr>
<tr>
<td>Fatigue Life Model For 7050 Chromic Anodized Aluminium Alloy</td>
<td>300</td>
</tr>
</tbody>
</table>

### SESSION 4: FATIGUE CRACK PROPAGATION ASSESSMENT

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accelerated Fatigue Crack Growth In 6082 T651 Aluminium Alloy Subjected To Periodic Underloads</td>
<td>313</td>
</tr>
<tr>
<td>Estimation Of Notch Sensitivity And Size Effect On Fatigue Resistance</td>
<td>323</td>
</tr>
<tr>
<td>Numerical Simulation Of The Total Service Life Time Of Steel Constructions Including Fracture Mechanic Concepts</td>
<td>334</td>
</tr>
<tr>
<td>Probabilistic Prediction Of Fatigue Life Of Cracked Parts: Linear Elastic Fracture Mechanics Based Approach</td>
<td>343</td>
</tr>
<tr>
<td>Experimental And Numerical Study For Fatigue Life Prediction Of Bolted Connection</td>
<td>354</td>
</tr>
<tr>
<td>Design Of Experiment Based On VMEA (Variation Mode And Effect Analysis)</td>
<td>369</td>
</tr>
</tbody>
</table>

### SESSION 5: COMPLEX LOADING AND FATIGUE BEHAVIOUR

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breathing-Induced Fatigue In Thin-Walled Construction</td>
<td>383</td>
</tr>
<tr>
<td>Multi-Parameter Fatigue Equivalence Loadings For Specification Applications</td>
<td>393</td>
</tr>
<tr>
<td>Use Of Multi-Scale Approach For Vehicle Weight Reduction Study</td>
<td>403</td>
</tr>
</tbody>
</table>
Modeling Of Hydrogen Transport In Rolling Contact Fatigue Conditions ........................................ 415
Yuri Kadin

Detection Of The Curves Based On Lateral Acceleration Using Hidden Markov Models ........................ 425
Roza Maghsood, Pär Johannesson

Operation Of The Bois Plant Hydraulic Turbine In Bypass Operating Mode: Analysis Of Fatigue Behaviour ................................................................. 435
Philippe Bryla, Marc Pillou, Mohamed Bennabch

Pile Fatigue Assessment During Driving ............................................................................................... 451
Jean Chung, Régis Wallerand, Morgne Hilis-Brault

Laplace Processes For Describing Road Profiles ................................................................................ 464
Pär Johannesson, Igor Rychlik

The Mobility Of Principal Stress Directions In Crossland Criterion .................................................. 474
Bertin Soh Fotsing, Bienvenu Kemeunege, Médard Fogue, Kevin M. Tsapi Tchoupou

SESSION 6: RELIABILITY APPROACHES IN FATIGUE DESIGN

Risk Based Fatigue Inspection Planning – State Of The Art .................................................................. 489
Tom Lassen

Stress-Strength Interference Method Applied For The Fatigue Design Of Tower Cranes ......................... 500
Simon Bucas, Pierre Rumelhart, Nicolas Gayton, Alaa Chateauanuef

SESSION 7: VIBRATION FATIGUE BEHAVIOUR

Fatigue Of Structures In Mechanical Vibratory Environment. From Mission Profiling To Fatigue Life Prediction .................................................................................. 508
M. Bennabch, H. Rognon, O. Bardou

Probabilistic Random Vibration Fatigue .............................................................................................. 522
Bauissaron Julien, Fouchez Bertrud, Yulama Thierry

Multiaxial Load Situations In Random Vibration Fatigue – Phasing And Cross Correlation .................. 530
Michel Hack, Frank Zingsheim

Time Domain Analysis Method Of The Impulse Vibro-Acoustic Signal For Fatigue Strength Characterisation Of Metallic Material .................................................. 539

Vibration Fatigue And Simulation Of Damage On Shaker Table Tests: The Influence Of Clipping The Random Drive Signal ......................................................... 549
Frédéric Kihm, David Delaux

SESSION 8: FATIGUE DAMAGE MECHANISMS

On The Fatigue Reliability Of Hydroelectric Francis Runners ................................................................. 565
Martin Gagnon, Antoine Tahan, Philippe Bocher, Denis Thibault

A New Model For Fatigue Damage Accumulation Of Austenitic Stainless Steel Under Variable Amplitude Loading ....................................................................................... 575
S. Taher, L. Vincent, J.-C. Le-roux

Quest For Fatigue Limit Prediction Under Multiaxial Loading ............................................................. 587
Jan Papuga

Two-Scale Time Homogenization For Isotropoc Viscoelastic- Viscoplastic Homogeneous Solids Under Large Numbers Of Cycles .............................................................................. 598
Sarra Haouala, Issam Doghri

Fatigue Damage Assessment Of Alternator Fans By EBSD ................................................................. 608
J.-B. Vogt, J. Bouquerel, F. Léux, F. Pallucho

Very High Cycle Fatigue For Single Phase Ductile Materials: Slip Band Appearance Criterion ............... 615
Ngoc Lam Phung, Nicolas Marti, Antoine Blanche, Nicolas Ranc, Véronique Favier, André Chrysochoos, N. Saintier, Fabienne Grégoire, Brigitte Bacroix, Guillaume Thoquenne

Fatigue Damage Analysis On Aluminium Alloy Specimens Under Strain Loading Sequences Associating With The Kurtosis-Based Coefficient ......................................................... 626
M.M. Padzi, S. Abdalallah, M.Z. Nuawi, Z.M. Nopiah

Microplastic Limit Of Steels As A Means Of Fatigue Limit Determination ............................................. 635
Ing. Šubomír Gajdoš, Ing. Martin Šperl, Jaroslav Kaiser, Václav Mendl
Occurrence Of Single And Double Slip Crossover Bands In Fatigued Alloys C460 And C22 .................................................. 643

Aezed Mohamed

SESSION 9: FATIGUE TESTING

Characterization Of Fatigue Damage In 304L Steel By An Acoustic Emission Method .............................................................. 651
A. Ould Amer, A.-L. Gloazec, S. Courin, C. Toaze

Thermal Measurements On Elastomeric Materials: From The Characterization Of The Dissipation Gradients To The Prediction Of The Fatigue Properties ......................................................................................... 661
I. Masquelier, Y. Marco, V. Le Saux, S. Calloch, P. Charrier

Experimental Facility For High Cycle Thermal Fatigue Tests Using Laser Shocks ................................................................. 669
L. Vincent, M. Poncelet, S. Roux, F. Hild, D. Farage

Fast Fatigue Properties Identification By “Self-Heating” Method: Application To Automotive Welded Joints .................. 676
Pierrick Florin, Matteo Facchinetti, Cédric Doudard, Sylvain Calloch

DAMAGE: Experimental Validation And Prospects .................................................................................................................. 684
Pierre Gaborit, Nicolas Gilblas, Alain Pyre, Rodrigue Desmorat

Fast Characterization Of Fatigue Properties Of An Anisotropic Metallic Material: Application To A Puddled Iron From A Nineteenth Century French Railway Bridge ......................................................... 689
L. Gallegos Mayorga, S. Sire, S. Calloch, S. Yang, L. Dieleman, J.-L. Martin

SESSION 10: COMPOSITES AND ELASTOMERS FATIGUE BEHAVIOUR

Rapid Determination Of The High Cycle Fatigue Limit Curve Of Carbon Fiber Epoxy Matrix Composite Laminates By Thermography Methodology: Tests And Finite Element Simulations ................................................................................................................................. 697
Laurent Gornet, Ophélie Wesphal, Christian Burtin, Jean-Luc Bailleul, Patrick Rozyczy, Laurent Stainier

Influence Of Elastomers Formulation On Fatigue Crack Growth Properties .............................................................. 705
Nicolas Roche, Laurent Perier

Low-Cycle Fatigue Of The Light Advanced Materials ................................................................................................................................. 713
Yakov B. Unigovski, Ariel Grinberg, Emmanuel M. Gutman

Fatigue Damage Modelling Of Continuous E-Glass Fibre/Epoxy Composite .......................................................... 723
Rim Ben Toumi, Jacques Renard, Martine Monin, Pongsak Nindum

Fast Prediction Of The Fatigue Behavior Of Short Fiber Reinforced Thermoplastics From Heat Build-Up Measurements ............................................................................................................................. 737
L. Serrano Abello, Y. Marco, V. Le Saux, G. Robert, P. Charrier

Damage Of Composite Materials ............................................................................................................................................................... 746
Thomas Jollivet, Catherine Peyrac, Fabien Lefebvre

Multi-Scale Damage Model For Mechanical High Cycle Fatigue (HCFt) Of Short Glass Fibre Reinforced Thermoplastics (SGFRTP) ........................................................................................................... 759
Anouar Krairi, Issam Doghri

SESSION 11: MECHANICAL BEHAVIOUR IN CONTACT FATIGUE

Modelling Of Surface Initiated Rolling Contact Fatigue Damage ...................................................................................................................... 766
Dave Hannes, Bo Alfredsson

XFEM Crack Propagation Under Rolling Contact Fatigue .......................................................................................................................... 775
B. Trollè, M.-C. Baietto, A. Gravouil, S.H. Mai, T.M.L. Nguyen-Tajan

Experimental Analysis And Modeling Of The Crack Arrest Condition Under Severe Plastic Fretting Fatigue Conditions ........................................................................................................................................ 783
Camille Gandiolle, Siegfried Fouvry

Characterization Of Surfaces Obtained By Precision Hard Turning Of AISI 52100 In Relation To RCF Life ........................................................................................................................................................................ 793
Nabil Jouini, Philippe Revel, Guillaume Thoquenne, Fabien Lefebvre

Prediction Of The Fretting Fatigue Crack Nucleation Endurance Of A Ti-6V-4Al/Ti- 6V-4Al Interface: Influence Of Plasticity And Tensile/Shear Fatigue Properties .................................................................................. 803
R. Ferre, S. Fouvry, B. Berthel, R. Amargier, J.A. Ruiz-Sabariego
