2nd International Symposium on Project Management (ISPMREC 2011)

Regulatory Regional Economic Challenge and Project Management in Sustain

Shuyang, China
11-13 December 2011

Editors:

Henry Zhang            Wei Xie

Content

Chapter One

Mineral Reserve and Exploration

Moral Dimensions of the Establishment of Mining Occupational Health and Safety Management Mechanism
SUN Wanguo, LIU Pingping .................................................................3

Brief Study on Walking Space Design of City By-pass
LI Qian, LI Hongwei .................................................................8

Analysis on the Influence and Countermeasures of Mineral Resources Exploitation on Ecological Environment in China
LI Lianying .................................................................12

The Analysis of Credibility of Listed Companies in China
ZHANG Yan, ZHANG Kun .................................................................16

Strategies of Sustainable Development and Utilization of Mineral Resources
PENG Zhihong .................................................................21

Research on Problems and Countermeasures of Diversified Financing of Mining Industry in China
WANG Lingling, MA Jie .................................................................25

Small Focus of Rutile Ore Beneficiation Process
QIAN Yao, WANG Xiao-dong, XIE Wei .................................................................30

Chapter Two

Uranium Project Management

The Research of Evaluation Index System of the Level of Sustainable Development of Uranium Mining Industry Based on Circular Economy
HOU Junhua, TANG Zuohua .................................................................41

Analysis of Risk Management of Real Estate Development
SU Yali, LE Ye .................................................................46

The Research and Countermeasure About Ecological Logistics Service of Uranium Mine Products
CHEN Dayong .................................................................50
Characteristics of Atmospheric Dust Particles in Nanchang and Their Environmental Significance
LIU Cheng-dong, CHEN Yan-ping
55

Research on Nuclear Power Enterprises Financing
ZHANG Wei, ZHANG Fan
59

Study on Overseas Investment of Uranium Resources in China
MA Jie, WANG Lingling
63

Chapter Three

Engineering Management

Research on Corporate Social Responsibility Evaluation
WANG Fang, HE Songbiao
71

Principle and Application of BOT and BT Analysis
XIE Wei
77

Hefei Investment Environment Evaluation
FANG Gang, CHU Zhiquan
80

About Employee Relations and Reward
LIU Jie
85

The Study of Geological Engineering and Enterprise Management Regularity
LI Yufei, ZHENG Lei
90

The Optimal Ordering Model with a Stock-dependent Demand Rate and Delayed Payment
LIANG Peipei, GU Yanyan, ZHOU Yongwu
95

A Probe into the Application of Software Engineering Thinking in the Development of the Management Information System
TU Haili, HUANG Guohua
99

Content Analysis of Chinese Listed Companies’ Social Responsibility Report
LOU Zhi Hong, XIA Hong, JIN Yimin
103

Research on Countermeasures to Strengthen the Construction of Civil Administration Organizations in the New Situation
TU Xiaoling
108
The Research on Paradigm of Financial Integrated Risk Management Based on CSM Integration Theory
ZHAO Wei, XU Xusong .................................................................114

An Linkage Analysis between China and the US Stock Market
LI Ping, ZHANG Yanhua ...............................................................119

The Relationship between People Resourcing Policy and External Environment
LIU Jie ....................................................................................126

Chapter Four

Urbanisation and Land Supply

Analysis of Parking Problems in Shijiazhuang City
LI Yan, LI Hongwei .................................................................133

A Study on Countermeasures of Regenerating Traditional Commercial Precincts in Historic Cities
ZHENG Xuehai, LI Hongwei ........................................................137

Complex Urban Transport Links at the Bottom Point of the Design of Public Space
ZHU Yi Qian, LI Wei .................................................................141

From Traditional Houses to the New---The Research of Hebei New Residential Architecture
JIA Anqiang, FENG Lina ............................................................147

On the Perfection of China’s Legal System of Eco-compensation for Land Resources Utilization
CUI Guang-ming, DING Jian-hai ..................................................152

Analysis on Forecasting Models for Post Construction Settlement of High Liquid Limit Soil Embankment
CHEN Zhimin ........................................................................157

Sustainable Land Use Based on the “National Hectares” Ecological Footprint Model—A Case Study of Fuzhou City
LI Zhiqiang, WU Shiman, CHEN Yong ........................................163
Chapter Five
Environment and Tourism Development

Noise Influence and Prevention Treatment of Residential Buildings near Highway
ZHOU Tong, DIAO Jianxin ................................................................. 175

Evaluation of Builder’s Risk in International Carbon Credit Trade
HE Songbiao, WANG Fang ................................................................. 179

Pond Sediment Pb Content Distribution and Pollution Assessment
XU Dongshen, LI Qi ........................................................................... 186

Ideas on Constructing New Rural Social Endowment Insurance System in Jiangxi Province
XU Zhenghua, XU Jun, ZHAO Yuanru ................................................. 190

The Research about the Internal Cause and Countermeasures of Small and Medium-sized Enterprise in Finance Difficulties in Our Country
ZHENG Xiao Ping ............................................................................. 195

Research on the Impacts of Environmental Regulation on Enterprises’ Environmental Technique Innovation
ZHANG Fan, ZHANG Wei ................................................................. 200

Study on Tourist Market Segmentation and Market Positioning of Poyang Lake Eco-economic Region
HU Tingting, LUO Jie ..................................................................... 204

The Study of Tourism Human Resources Development in Jiangxi Province
LUO Jie, HU Tingting ..................................................................... 208

Researches on Legal System Perfection of Environmental Protection in Mining Area - from the Perspective of Humanity
YU Zhen, XU Xiaojuan ................................................................. 212

The Security Management Mechanisms and Strategies of Chinese Outbound Tourism
HOU Guolin, TAI Yunhong, YU Tonglin, WANG Yan .......................... 217
